RICE.—The market generally has had a dull tone latterly, and business is restricted to about 20,000 bags on the spot privately, white Bengal 10s. 6d. to 15s. 3d., low cargo 7s. 9d. to 8s., fair Ballam 8s. 9d., common Nakrenzie 8s. 10d½., good 10s., and Rangoon from 9s. 3d. to 10s. 6,478 bags Bengal (Ascooly), at auction, met scarcely any bids, and were withdrawn. The following are our quotations:—Bengal, white, 9s. to 15s. 6d.; cargo, 7s. 9d. to 9s. 3d.; Madras, 10s. to 12s.; Arracan, Rangoon, &c., 7s. 6d. to 11s.; Java, 10s. to 21s. Stock on hand on the 18th inst., 53,026 tons, against 29,667 at corresponding period of 1862.

SAGO.—Nothing of consequence doing. Pearl: 16s. to 21s. per cwt.; stock on the 18th inst. 1,448 tons. Sago Flour: Sells more freely; 1,500 bags middling to fair quality, in public sale, bringing 13s. 6d. to 13s. 9d. Our quotation is 13s. to 14s. per cwt.; stock on hand on 18th inst. 1,843 tons.

SPICES.—Pepper: black 3¼d. to 4d. per lb.; white 5d. to 6¼d. per lb. Pimento: By auction 420 bags common to good were chiefly disposed of at 2¾d. to 3d. Camphor: Nominal quotations are £8. 2s. 6d. per ton for Japan, and £7. 17s. 6d. to £8 China; but the drug has been completely neglected since our last, though the subject of constant inquiry. Cinnamon: We quote 1st sort 1s. 2d. to 2s. 1d. per lb.; 2nd 1s. to 1s. 9d.; 3rd 10d. to 1s. 4d.: 4th and Jnngle 8d. to 11d. The Quarterly Sales will take place on the 27th inst., when the quantity brought forward will be about 2,200 bales Ceylon. Cloves: Amboyna and Penang 3d. to 1s. 4d. per lb.; Zanzibar and Bourbon 3¾d. to 4d. Nothing doing in Penang; Zanzibar declined a further ¼d. per lb. subsequently to our last, but have since recovered the fall; and 2,290 bags at auction, nearly all sold at 3¾d. to 4d. per lb. for ordinary to very good; large sales also made privately; 19 bags Bencoolen sold at 4⅛d. Cubebs: £5. 5s. to £5. 15s. per cwt.; 60 bags at aucton sold at £5. 10s. per cwt. for fair. Cassia Lignea: 1, 2, and 3 qualities 82s. 90s.; Buds 260s. to 280s. Mace: 1st quality, bright, pale red, bold, even, not wormy, 1s. 8d. to 2s. 3d. per lb.; 2nd quality, 9d. to 1s. 2d. per lb; only 10 cases Penang and 1 case Singapore at auction, sold at 7d. to 11d. per lb. for low to middling red, being former terms. Musk: 1st quality, 23s. to 28s.; lower qualities, 12s. to 21s.; nothing doing. Aloes: £3 to £15 per cwt.; materially cheaper; supplies increasing; and 253 packages Soccotrine at auction mostly sold at £6. 5s. to £14. 10s. per cwt for middling soft to very good hard. 31 cases hepatic sold at £4. 15s. to £6. 17s. 6d. for fair soft to good hard; 91 cases Mocha retired. Colombo Root: 20s. to 60s. per cwt.; continues firm; and of 178 bags at auction, one-third sold at 59s. to 60s. for very good, and 10s. low. Star Anniseeds: 100s. to 105s. per cwt.; nothing doing. Nutmegs continue without change; and of 208 cases Penang, and 2 cases Singapore at auction, less than two-thirds sold at 2s. 7d. to 3s. 9d. per lb. for middling to fine bold; and 10d. to 1s. 5d. low to good medium. We quote, 1st quality, garbled, 2s. 6d. to 3s. 9d. per lb., 2nd and 3rd do., 11d. to 1s. 6d. per lb. Soy: 2s. 5d. to 2s. 7d. per gallon; flat. Oil of Anniseed: 5s. 6d. per lb.; flat. Cajaputa: 2½d. to 3d. per oz.; sold. Cassia: heavy, good flavour, 7s. 11d. to 8s. per lb. lower.

HEMP.—Jute: Our quotation is £19 to £28 per ton. Stock on hand on 1st inst., 6,074 tons. This market has continued animated, and prices of new Jute have further advanced 10s. to 20s. per ton; old comparatively neglected: large business done privately, on the spot, and for arrival; and of 16,785 bales at auction, three-fourths placed at £18. 15s. to £28. 10s. for very common to fine. Manila: £23 to £27 per ton; stock on 1st inst., 6,477 tons. This market has been generally inactive; and of 5,444 bales at auction, a small proportion only was quitted at £24. 2s. 6d. to £27 per ton common to good roping, with a few bales Lupez at £57 to £59. 2s. 6d. Sunn: £15 to £30 per ton; stock on 1st inst., 184 tons. Auctions have embraced 412 bales Bombay, half sold at £24. 10s. to £24. 15s. per ton for ordinary dark; 10 bales Sunn, and 280 bales Jubbulpore, all withdrawn.

SALTPETRE.—There has been a brisk demand, and a further advance has been paid, viz., for 7¼ to 3¼ per cent. on the spot 37s. 6d. to 38s. 9d., and for arrival 39s. to 39s. 3d. for five per cent. refraction. Holders mostly requiring advanced terms, the business on the spot is confined to about 2,000 bags Bengal, at an improvement of 6d. to 1s. per cwt. viz., chiefly 5½d. to 2¼d. per cent. refraction 37s. 6d. to 38s., and common quality at 36s. In auction, 693 bags Bengal, 14¾d. to 13 per cent. refraction, were held at 37s. and withdrawn. The following are our quotations: —Bengal, 36s. to 39s.; Bombay and Madras, 33s. to 36s. 6d.; English, refined, 40s. to 41s.; Nitrate of Soda, 13s. to 14s. The landings of Saltpetre from Dec. 27 to April 16, were 7,393 tons, against 6,136 tons in the same previous corresponding period; the stock on hand on the 18th inst. was 6,562 tons, against 3,367 at the same date in 1862.

COTTON.—The demand has been active, and extensive transactions have latterly taken place at an advance of ¼d. to ½d. per lb., viz.,—2,300 bales Surat—fair to good Kurrachee, 12⅜d. to 13½d.; fully middling Compta, 15d.; Middling Oomrawatty to fair Dhollera, 16.l. to 17¼d., 5,800 bales Tinnivelli Madras—fair to good fair, 16d. to 16¾d.; very middling, 15d. 1,000 bales Western—middling to good fair, 16½d. to 17½d.; Coconada, 15¾. 1,600 bales middling to fully fair Bengal, 12d. to 13½d.; and 1,100 bales China, at 15½d. to 15¾d. The business in parcels to arrive comprises 4,200 bales. The following are our quotations:—Madras, 1s. 2¼d. to 1s. 5½d. per lb.; Surat, 1s. 1d. to 1s. 7½d. per lb. The stock on hand, on the 18th inst., was 62,689 bales, against 51,501 bales in 1862. The total of deliveries for 1863 was 62 070 bales.

TIN.—Banca: Current quotation is £127 to £128 10s. per ton. Stock on hand on the 1st inst. was 2,505 tons. Straits, £122 to £124. This market has been very flat, with the most limited trade in each description within our quotations.

JAPAN WAX.—Quiet; and 392 hoxes, at auction, all retired; of very slow sale, at present, privately. We quote this article at 62s. to 80s. per cwt.

MISCELLANEOUS.—East India Rum, 1s. 4d. to 1s. 5d. per gallon; stock on hand, 2,881 hhds. Tapioca: 250 bags white good Penang were sold at auction at 2½d. per lb. Caster Oil, 4½d. to 4¾d. per lb.; sells readily at these quotations. Coculus Indicus: 9s. to 12s. per lb. Galls, blue, 100s. to 110s. per. cwt.; sorts, 70s. to 85s. per cwt., scarce. Gum Ammonicum, drop, 90s. to 130s. per cwt.; block, 30s. to 70s., scarce and in demand. Gum Animi, 1st size: £8 10s. to £11 per cwt.; 2nd and 3rd size: £6 to £8; partially scraped: £2 to £6. Gum Arabic; picked: 32s. to 57s. per cwt.; sorts: 25s. to 35s. Gum Assafœtida, drop: 100s. to 120s. per cwt.; block: 25s. to 90s.; Kino: £10 to £14. Gum Myrrh: 1st quality: £9 to £11. 10s.; 2nd quality: £4 to £8. Madder Roots: 23s. to 26s.; lower. Senna: 2½d. to 6d. per lb.; steady. Linseed: scarce; 66s. to 68s. per qr.; Rapeseed: 64s. to 72s. Guzerat: 73s. to 76s. Shells, Mother o'Pearl: 25s. to 64s. per cwt.; cheaper. Teeth, Elephants, 70lbs. and upwards, £30 to £35 per cwt. 40 to 60 lbs., £28 to £33; 20 to 40 lbs., £27 to £32; Scrivelloes, £12 to £32; Hollows, £13 to £29; Points and Tips, £14 to £34. Public sales fixed for 29th inst.; amount brought forward will be moderate, Sea Horse: 4 lbs. and upwards, 6s. to 14s. per lb.; 3 lbs., 4s. to 8s.; 1 to 2 lbs., 9d. to 2s. Tortoiseshell, Madras: 9s. to 20s. per lb. Beeswax, White, £10 to £11 per cwt.; Yellow, £7 to £8; Bleached, £9 to £8. 10s. per cwt.; unbleached, £7 to £7. 10s. per cwt., quiet. Cowries: fresh (with enamel), 30s. to 38s. per cwt.; dead (no enamel), 22s. to 32s. per cwt., flat and rather cheap. Nux Vomica: 9s. to 13s. 6d. per cwt., steady. Safflower: good to fine, £6. 10s. to £8 per cwt.; inferior to middling, £4 to £5. 10s. demand small. Shellac: Orange, 170s. to 190s. per cwt.; Garnet, 150s. to 160s.; Liver, 150s. to 170s.; Block, 100s. to 170s.; steady. Turmeric: 22s. to 26s. per cwt.; firm. Black Lead: 6s. to 20s. per cwt.; quiet. Cocoanut

Digitized by Google

Oil: Cochin, £49 to £51. 10s. per ton; Ceylon, £46 to £49; flat; rates lower, with limited demand. Dragons' Blood: In reeds, £11 to £15 per cwt.; in lumps, £4 to £11. Galangal Root: 24s. to 27s. per cwt.; quiet. Rattans: 3s. to 10s. per 100; firm. Rhubarb: Dutch, trimmed, 4s. to 6s. per lb.; common flat, 2s. to 4s. 9d.; round, 1s. 9d. to 4s. 6d.; steady.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 10s.; nail rods, £7 to £7. 5s.; hoops, £8. 10s. to £8 15s.; sheets, single, £9. 10s. to £9. 15s.; Staffordshire bars, £7. 10s. to £8; rails, £5. 12s. 6d. to £6.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and sheathing, £96 per ton; yellow metal, 8¼d. to 8½d. per lb.

TIN.—119s. for block; 120s. for bar. Tin plates, best charcoal, I. C. 28s. 6d. to 29s. 6d. per box.

LEAD, &c.—English pig, £20. 10s. to £21.; shot, patent, £23. 15s. to 24s.; sheet, £21. 10s.; spelter, £18; zinc, English sheet, £23. 10s.; quicksilver, £7 per bottle.

TIN.—Since the English smelters have decided not to advance their price, foreign has been easier, some few holders wishing to realise their profits. Tin plates are in fair demand. Lead is drooping, the prices now quoted being 10s. per ton lower than a fortnight since, very good brands can be bought at £20. 10s. Spelter is heavier at quotations.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton during the present year by the P. and O. Company's mail steamers.

MANCHESTER MARKETS.

Since Tuesday the yarn market has been extremely dull, but spinners have declined to take a fraction less in price that they would have done on that day. The feeling has been a more cheerful one, and some few orders have been given out at the extreme prices of Tuesday. The yarn-market closes quiet, but extremely firm. In cloth there is less firmness than in yarn, and this is partly attributed to a weakness in the Liverpool cotton market. The latest report from Liverpool says, "The market is dull and without change," but private telegrams say that prices have been practically easier for buyers, and this causes some hesitation here. The *Nova Scotian* is reported with further news of the siege of Charleston, and there is naturally a desire to wait till the tenour of her advices has been published. These causes, with the uneasiness arising out of the political situation with America, which is regarded by commercial men as assuming a very grave aspect, tend to hinder business, and have apparently a more serious effect upon the cloth than the yarn market. The cloth market has been getting quieter throughout the week, and though prices are nominally unchanged, or at least without quotable change, it is felt that buyers might get on at more favourable rates. Buyers, however, seem indisposed to operate, though they still keep up a rather active inquiry for India goods. For the home trade and other markets the demand is quite as flat as it has been at any time during the last fortnight.

FREIGHTS AND CHARTERS.

There are but few disengaged ships in port, and high classed vessels are in demand for China and the Indian ports. Tonnage is also wanted at the coal ports for Point de Galle. There is not much change to report either in berth freights outward or for coals. Homeward charters are obtainable at 70s. from Singapore, and 80s. from Manila and Ceylon, but there is now less disposition to charter from the latter island.

Current Rates of Freight for Vessels on the Berth :—To Kanagawa: 55s. weight, 42s. 6d. measurement. To Hankow: 65s. weight, 60s. measurement. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. measurement. To Shanghai: 50s. weight, 30s. measurement. To Hong Kong: 40s. weight, 35s. measurement. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. to 35s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £41 and £1. 10s. For Shanghai: £51. and £2. 10s. For Manila, £1. 10s. For the Philippine Islands, Penay, or Zebu, £2. For Singapore, £27 and £1. 7s. For Penang, £24. For Galle, £30 and £1. 7s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

A contract has been taken this week for 4,500 tons of coal for Singapore.

CASUALTIES.

The Star of the South, Renner, from Bombay, and Trincomalee, for Liverpool, which put into Barbadoes 6th Jan., leaky, was totally burnt March 24, after she had repaired, and taken in about 500 bales cotton and 100 tons linseed.

The Lucy Johnson, from New York for China, which drove ashore in Table Bay, 20th Sept., and was subsequently reported as having become a total wreck, was afterwards got afloat, taken on the slip and repaired, and was launched 22nd January, as the Saxon.

The Hellespont, from New York for Shanghai, has had to put back to the former port, leaky.

The Nipisiquit, Sterry, which sailed from Glasgow 13th April for Singapore and Penang, had to put back to Lamlash on the 20th inst.

At MADEIRA.—April 2, from the Clyde for China, Pekin (str.).

At ST. HELENA.—Eureka cutter, from Macao, and sailed March 2 for New York; March 3, Anglo-Saxon, Laird, from Shanghai, and sailed, 4, for London; Arnaud, Nadeau, from Ceylon; Harwood, Forsyth, from Shanghai, and sailed for London; 6, Skylark, Bursley, from Manila; 7, St. Paul, Burkett, from Amoy, and sailed for New York; Preston, Mefflitt, from Foo-chow-Foo, and sailed, 8, for London; Argo, Teuten, from Java, and sailed for Amsterdam; 8, Magdalena, Schmidt, from Singapore, and sailed, 9, for Falmouth; Queen's Own, Flannigan, from Shanghai, and sailed 9, for London; Helen's Lee, Brown, from Shanghai, Baron v. Hardenbrock, Henny, from Padang, and sailed, 9, for Amsterdam; 9, Tweeling Zusters, Jong, from Java, and sailed, 10, for Amsterdam; Nubia, Ray, from Canton, and sailed, 10, for New York; 10, Elshout, Akkermann, from Batavia, and sailed, 11, for Amsterdam; 11, Palmerston, Seagrove, from Shanghai, and sailed for Liverpool; 13, Waterlily, Towers, from Yokohama; Ann Adamson, Hutton, from Shanghai, and sailed for London; Solide, Fourneau, from Hong Kong, and sailed, 12, for Bordeaux; Caribon, Cameron, from Manila, and sailed, 13, for Queenstown; 11, Coleroon, Hall, from Penang, and sailed for London; 13, Bahia, Le Fanu, from Macao; 12, Millbrook, Baron, from Canton, and sailed, 13, for London; Simoom, Vennell, from Manila, and sailed, 13, for ——; 13, Telegraph, Rolufs, from Padang, off St. Helena; March 11, Indemnity, Jenkins, from Colombo for London; Jessie Beazley, Shanghai to Liverpool.

THE P. AND O. CO.'S FLEET.

The company's new screw steamer *Poonah* had her trial trip on the 11th inst. in the Southampton waters, and attained a mean speed in four runs of 13.394 knots. The builder's tonnage of the *Poonah* is 2,596 tons, and her engines, by Humphrys and Tennant, are 500-horse power. Of the very fine vessels of this fleet she certainly eclipses all. Captain Field has been appointed to the command, and she was despatched with the first mails and passengers from Southampton on the 20th inst.

THE "CARNATIC."

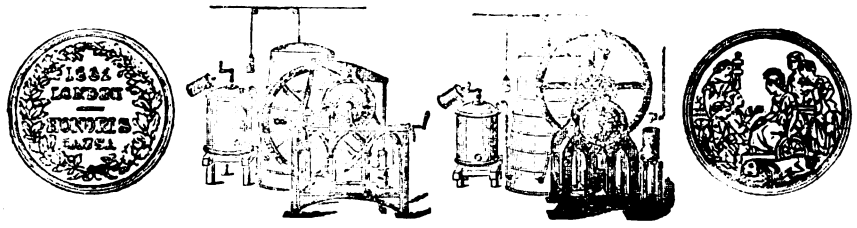
This vessel, likewise a screw, had her trial on the 18th inst., and attained a mean speed in four runs of 13.885 knots. Her builder's measurement is 2,014 tons, and her engines, 400-horse power, by Humphrys and Tennant.

In our last we noticed the launch of the *Rangoon*. The other vessels under construction are the *Syria*, paddle; *Golconda*, *Baroda*, and *Delhi*, screws. Another paddle has also just been ordered, making in all eight new additions to the fleet.

THE SCHOONER "KUNG-MOW."

A vessel under this name, lately launched, is now loading in London for Hankow direct. She is intended to trade on the Yang-tse and China waters, and is under the charter of Messrs. Elliot and Co., of this city. Her length is 108 feet, keel 12 feet hold, and 23 feet beam, and she is rigged with three masts. Her model and general appearance bid fair to prove good sailing qualities.

CAUTION.—At the International Exhibition of 1862, Prize Medals were awarded only to those who could show improvements over the other exhibitors at this and all the previous Exhibitions. Nearly all the makers of Soda-Water Machinery in the United Kingdom were exhibitors, but the ONLY PRIZE MEDAL awarded was to S. BARNETT; any assertion to the contrary being a fraud on the public. See the Official Jury Award Book, page 153.



BEAM ACTION MACHINE. DIRECT ACTION MACHINE.

SODA WATER MACHINES.

S. BARNETT,

(ABOVE TWENTY YEARS FOREMAN TO MESSRS. TYLER,)

23, *Forston-street, Hoxton, London,*

FROM 30 years' manual practice in the above branch, and having constructed most of the Machines now at work in various parts of the world, is enabled to offer the most complete and durable machinery; and by confining his manufactory to only two branches, namely, SODA WATER MACHINES and DIVING APPARATUS, and his whole attention being given to these branches, it must be obvious that every part is well studied, so that any derangement of parts can hardly occur. All the Machines made by S. BARNETT are constructed under his own superintendence, and proved to four times the pressure they are ever required to be worked at. S. B. being well aware of all the requirements of persons using Machinery where mechanical assistance cannot be obtained, has paid full attention to this point, as the great number of testimonials in his possession will prove. He has also lately introduced larger condensers, and more powerful frames than those previously in use, while his prices have not been increased.

The number here stated that each size Machine will make is for a first-rate article; a much greater quantity can be run through a Machine, but it will not be impregnated with the carbonic acid gas.

Recipes for making all the Mineral Waters and Aerated Drinks are sent with each Machine.

No. 1.	Patent Double Action, for making Soda Water and Lemonade at the same time, can be used for either separately—the invention of S. BARNETT, who obtained the Prize Medal of the Great Exhibition of 1851, makes 400 dozen bottles per day								£150	0	0
No. 1.	Single Action	"	200	"	"				75	0	0
No. 2.	" "	"	160	"	"				65	0	0
No. 3.	" "	"	120	"	"				57	10	0
No. 4.	" "	"	100	"	"				50	0	0
No. 5.	" "	"	50	"	"				40	0	0

S. BARNETT'S Improved Patent Safety Lever Bottling Machine will supply the place of a professional Bottler, and will affix to any Machine £12 0 0

Catalogue can be obtained of any of the Agents of this Paper, and through whom orders can be sent.

WENHAM LAKE ICE COMPANY, 140, STRAND, LONDON.

HOLLOWAY'S OINTMENT AND PILLS have over and over again proved the best friends to persons afflicted with ulcerations, bad legs, sores, abscesses, fistulas, and other painful and complicated complaints. Printed and very plain directions for the application of the Ointment are wrapped round each pot. Holloway's alterative pills should be taken throughout the progress of the cure, to maintain the blood in a state of perfect purity, and prevent the health of the whole body being jeopardized by the local ailment. Bad legs, old sores, great grievance, are readily cured, without confining the patient to bed, or withdrawing from him the nutritious diet and generous support so imperatively demanded when weakening diseases attack advanced years or constitutions evincing premature decrepitude.

LIFE DEPARTMENT.

(REDUCED RATES FOR THE EAST INDIES AND CHINA.)

The Directors of this Company beg to announce that they have adopted a new System of Rates for the East Indies and China, considerably lower than those now charged by this or—they believe—any other Company, but differing from the old system in respect that no reduction takes place on the insured returning to Europe or proceeding to any other part of the world for which no extra premium is charged.

According to this method, the insured, instead of being subjected to a heavy extra premium during the years of his residence in the Tropics, has the option of throwing the same over the whole currency of his insurance, by paying an unchanging rate which, it will be seen, is very little higher than the home one.

The following are Specimens of the New Rates:—

EAST INDIES AND CHINA.

ANNUAL PREMIUM FOR THE INSURANCE OF £100.

(Payable during the entire currency of the Policy.)

Age.	Without Profits.	With Profits.	Age	Without Profits.	With Profits
	£ s. d.	£ s. d.		£ s. d.	£ s. d.

At the TWENTY-NINTH ANNUAL GENERAL MEETING of the Shareholders, held on Saturday, the 11th April, 1863, at the Banking-house of the Company, 27, Cannon-street, E.C.,
GEORGE GORDON MACPHERSON, Esq., Chairman, in the chair,

The notice convening the Meeting and the following Report and Statement of Accounts were read:—

The Directors beg to submit to the shareholders the audited accounts for the year ended 31st December last, exhibiting a surplus of £173,815. 17s. 5d.

The Directors regret to say that a very serious loss has been sustained by the opium frauds at Hong Kong, the whole of which they have deemed it their duty to write off to debit of the Reserve Fund, according to the discretion vested in them under the Deed of Settlement.

Out of the above sum of £173,815. 17s. 5d., the Directors have paid the usual dividend and bonus, amounting to £120,000, and have transferred the balance, £53,815. 17s. 5d., to credit of the Reserve Fund, which now stands at £192,658. 17s. 8d.

Since the last Annual Meeting, the Directors have opened a Branch of the Bank at Sydney, under the management of Mr. Alexander Campbell, the progress of which has been satisfactory.

The house occupied by the Bank in Calcutta has long been found insufficient for the extended business at that Presidency; and the Directors are glad to report that a most eligible site has been secured, on which suitable premises will be immediately erected.

The Directors have purchased the freehold of the premises in Cannon-street on favourable terms.

The Proprietors will have to elect auditors for the ensuing year, and the present Auditors offer themselves for re-election.

By order of the Board,
MACKINTOSH BALFOUR, General Manager.

THE AGRA AND UNITED SERVICE BANK (Limited).

G. B. DALBY. Chief Accountant.

We have examined the preceding statements (Nos. 1, 2, and 3), with the books, vouchers, and securities, at the Head Office in London, and with the detailed returns and balance-sheets signed by the Auditors of the several Branches, and we hereby certify to the correctness and satisfactory character thereof.

WM. NEWMARCH, F.R.S.,
J. HILL WILLIAMS, } Auditors.

London, 31st March, 1863.

The following resolutions were duly moved, seconded, and carried unanimously:—

1. That the report and statements which have been read to the Meeting, and previously circulated to the shareholders in Europe, be adopted.

2. That Major Robert Guthrie MacGregor, Lieutenant-General Duncan Sim, John Carrington Palmer, Esq., and William Hardinge Tyler, Esq., be re-elected Directors.

3. That William Newmarch, Esq., F.R.S., and John Hill Williams, Esq., be Auditors for the present year.

4. That an annuity of Company's Rupees, four thousand per annum, be granted to Mr. John Parsick, Chief Accountant of the Calcutta Branch, on his retirement, caused by failing health and almost total blindness, after thirty years' service.

5. That the thanks of the shareholders be given to the Board of Directors for their careful control of the Bank's affairs; to the General Manager, Mr. Mackintosh Balfour; to the London Manager, Mr. William Shipman; and to the Local Committees and Managers of the Branches, for the satisfactory manner in which they have conducted the business of the Bank for the past year; and to the Auditors, for their efficient supervision of the accounts.

6. That the thanks of the Meeting be given to the Chairman, for his able conduct in the chair.

G. G. MACPHERSON, Chairman.

CEYLON GOVERNMENT LOAN.—

Ceylon Government 6 per cent. Debentures, issued under the authority of Ordinance No. 19 of 1862, entitled "An Ordinance for Raising £1,000,000 sterling on Debentures for the Construction of a Railway from Colombo to Kandy." Her Majesty's Principal Secretary of State for the Colonies having authorised the undersigned to DISPOSE OF DEBENTURES on behalf of the Government of Ceylon to the extent of £250,000, being the first instalment of the above-mentioned Loan, they hereby give notice, that they will be prepared to receive TENDERS for the whole or any portion of the said amount until 1 o'clock p.m. on Wednesday, 6th May proximo. The public revenue of Ceylon has for many years past exceeded the expenditure, and up to the present date the colony has contracted no public debt, with the exception of a small loan of £100,000, which was borrowed in 1861 to pay off the shareholders of the late Ceylon Railway Company.

The above loan, which is required exclusively for railway purposes, is secured on the general revenues of the colony, and both principal and interest are made payable at the offices of the Agents General for Crown Colonies in London.

The Bonds are for sums of £500, £300, £200, and £100, redeemable in 15 years, and bear interest at the rate of 6 per cent. per annum from the 15th May next, payable half-yearly on coupons.

Tenders must distinctly specify the total amount of debentures required, the premium per cent. which will be given for the same, and be addressed to the undersigned in a sealed envelope with the words "Tender for Ceylon Loan" written on the outside.

All the tenders will be opened in the presence of any of the persons interested who may attend for that purpose, at 1 o'clock on Wednesday, the 6th May, and the debentures will be allotted to the highest bidders, provided the prices offered are not lower than the minimum to be fixed before the opening and placed in a sealed paper on the table. In the event of an equality of tenders beyond the amount to be issued a pro rata distribution on such tenders will be made. Tenders at a price including a fraction of a shilling other than sixpence will not be accepted.

Five per cent. on the amount of the debentures allotted must be paid into the Bank of England on allotment, and the balance within 10 days thereof.

The debentures will be delivered at the office of the undersigned in exchange for the bank receipts.

A written communication will be sent to the successful tenderers as soon after the allotment as possible. Any further information required respecting the financial condition of the colony may be had on application to the undersigned agents for the Loan.

BEWARE of SPURIOUS and DANGEROUS COMPOUNDS, Sold in Imitation of

DR J. COLLIS BROWNE'S CHLORODYNE.

Certain dishonest and unprincipled Chemists piratically apply this name to worthless compounds—a name invented and applied by Dr. J. C. Browne, M.R.C.S. (on Army Medical Staff), to his great discovery, which is so extraordinarily curative in the above diseases.
As a proof of its efficacy, a few extracts from numerous testimonials by physicians and surgeons are given:—
From A. MONTGOMERY, Esq., late Inspector of Hospitals, Bombay.
Chlorodyne is a most valuable remedy in neuralgia, asthma, and dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other medicines had failed.
DR. JAS. CAMPBELL,
Surgeon, R.N., H.B.M. Consulate.
Bangkok, Siam.

"Make up for me 400 half-ounce bottles of Dr. J. Collis Browne's Chlorodyne. You will be surprised at such an extensive order from this part of the world, but much experience in its employment has led me to entertain a high opinion of its curative properties in various diseases."
Sold only in bottles, at 2s. 9d. and 4s. 6d., by the Sole Agent and Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury-square, London; and professional testimonials enclosed. None genuine without the words "Dr. J. Collis Browne's Chlorodyne" engraved on the Government stamp.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1865.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless natureo tthe remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Per P. and O. steamer, 4th June.—From Southampton.—To Shanghai: Mr. Arthur Barnard.—To Hong Kong: Mr. Budden.—From Marseilles, 12th June.—To Shanghai: Captain Sherard Osborn, R.N., Mr. H. S. Collins, R.N., Mr. Chapman, R.N.—From Suez.—To Hong Kong: Dr. Otto Martin.

Summary of News from the Far East.

JAPAN.

We have no news by this mail with regard to Admiral Kuper and the vessels under his command. It is said that he intends to make a demonstration at Osaka. At Yokuhama everything was quiet, no further signs of hostility having been made.

The *Japan Herald* publishes translations of two native documents, containing information which will be read with interest at the present time:—

"Copy of a document brought by two Tensos and one Giso, the 23rd day of the 2nd month, to Hotta Bitjou no Kami.

"The Mikado to the Tycoon.

"It is difficult for us to grant to you the approval you ask [to the treaties); for the honour of the name of the first Mikado it is impossible to agree. It is our duty to take care to tranquillise the minds of our people.

"The Tycoon should gather everyone's opinion, from the three great houses to the humblest subject; and give me the result of these in writing.

"If it is necessary to go into the negotiations and conclude these treaties, exceptions must be made of the country in the neighbourhood of my Imperial city, as we have already directed in our letter of the 24th of the 12th month. Hiogo in Sitzou must be excepted if possible. The Mikado often considers that he is not safe in his palace at Miako, and he desires the Tycoon to appoint some powerful Daimios to protect the Imperial palace.

"You have thought it well to open the port to foreigners, but you did not think that foreigners would entangle you with difficulties. We would know your opinion in this respect."

Circular from the Tycoon, dated the 6th month of the Year of Anchey [this corresponds with our August, 1858], sent by order of Yaomatono-Kami by the Ometski Kouro Kawa Sadjoa.

"The Mikado having been consulted by the Tycoon's Government about the making of treaties with foreigners, he answered that the conclusion of the matter [the making the treaties] would distress him very much. Thereupon the Tycoon requested all to send their written opinion upon the subject. Only a short time was required to gather together everyone's opinion, but in the meantime some Russian and American men-of-war came here, bringing the news that in a short time English and French men of-war would arrive here, that those two nations had fought and won many battles in China, that they would come here in the same warlike spirit, and it would be difficult for us to negotiate with them. The American Ambassador offered to us that if we would make a temporary treaty with him, as soon as we should have signed and given him the treaty, he could act as mediator between us and the French and English, and save us from all difficulties.

"It was impossible for us to comply with this without consultation with the Mikado; however, Inoe Sinano no-Kami, fearing the immediate assault [or breaking out of a war], the results of which might be same as in China, signed themselves, or were authorised to sign, the American Treaty at Kanagawa, which Treaty was given up to the American Ambassador.

"Necessity compelled the Japanese to this.

"The Mikado, on hearing of this, was much troubled, but to reassure him we told him we would fortify our shores.

"The Tycoon thought there was the necessity of concluding the Treaty, and he at once sent to the Mikado the messenger that every one should express fearlessly his opinion on the subject to the Government."

The *Japan Herald* writes:—"We have heard rumours of a projected change in the terms of the American treaty with this country. The matter has not, we believe, been made public officially, but we believe these changes refer principally to certain alterations or modifications in the tariff, but that at present it has got no further than a provisional agreement between the Japanese authorities and the American Minister.

"We have further heard it insinuated—if not broadly stated—that these commercial advantages have been accepted in ex-

Digitized by Google

change for some more or less important concessions to the Japanese on the part of America. We can scarcely credit this."

The same journal criticises more fully than it deserves, Mr. Fonblanque's "Niphon and Pecheli." The writer says :—"Of the many trashy books about Japan this is the most so."

CHINA.

PEKING.

There is no news of importance from the capital.

TIEN-TSIN.

The Nyen-fei Rebels have appeared in the neighbourhood, and an encounter with them has resulted in a serious accident to Acting-Consul Gibson. It appears that, on learning of the approach of these hordes of marauders, Mr. Gibson got the disciplined Chinese up from Taku, where there are about 2,000 under arms. With a detachment of 700 he proceeded against the Nyen-fei, and was met by a band of these people, whom he ordered his men to charge, he himself leading them on. Only about 70 obeyed, and it was not until he was close upon the foe that Mr. Gibson found out the fact; before he could extricate himself he had received one or two spear wounds about the head, and the latest news states that he lies dangerously ill at Tien-tsin. The English troops at Taku had been detained by order of Sir F. Bruce.

A Chinaman from Peking, who wishes to contract for the delivery of large quantities of coal at Tien-tsin, suitable for steamboat use, offers it at the rate of ten taels per English ton. Those who have seen specimens of his coal, and who profess themselves good judges, pronounce it excellent. He offers to contract for the delivery of four or five hundred tons per month. The coal is brought from the south-west corner of the province, and has to be carried for a considerable part of the distance on camels and mules, there being no available water conveyance.

SHANGHAI.

Renewed dissatisfaction is stated to be felt among the merchants, owing to the imposition of taxes on goods removed by native purchasers; tax-gatherers are posted at the doors of the different merchants' premises, and a duty is levied upon each bale of goods removed by Chinese dealers. Sir F. Bruce has ruled that the Chinese, even of the foreign settlements, in levying money amongt themselves, cannot be interfered with.

At a meeting of the Chamber of Commerce, held on the 16th March, the Chairman, Mr. E. Webb, informed the meeting that two resolutions would be laid on the table for consideration. The first proposed a remedy for the growing exactions of the Chinese Customs authorities, and in the second it was suggested that the Chamber should be thrown open to all merchants of the port, instead of being, as at present, exclusively a British Chamber. The chairman stated that, failing in application to the British Minister at Peking, he was informed on good legal authority that the only safe course of procedure in cases against the Chinese Government would be an appeal to the Privy Council at home, but at the same time, the expense of litigation being such as to deter merchants from referring complaints where the cost of redress would probably far exceed the amount to be recovered by the suit, and as all alike were interested in these questions, it had been suggested that a fund should be guaranteed, to be drawn upon when necessary, to meet the expenses of disputing such cases as the Chamber might deem of sufficient importance. Obscure points in the treaty would thus be decided; and a precedent so established would probably have the effect of lessening many grievances which had long pressed heavily upon trade. The second object of the meeting he would recommend to its consideration as tending to strengthen the influence of the Chamber, and constitute it more completely the representative of the trading interests of Shanghai. The first resolution to open a subscription list for the fund, was then proposed by Mr. Whittall and seconded by Mr. Michie. Mr. Vacher proposed as an amendment, which was seconded by Mr. Hanbury, "That in view of the expediency of the present British Chamber of Commerce being re-constituted as a general body representing all merchants (the subjects of Governments having treaties with China) at the port of Shanghai, it is advisable to postpone the discussion of the proposition just made until after such change shall have been made, so that the members of the new Chamber (if constituted) may have an equal interest in the question." Upon a show of hands, the amendment was lost, and the original resolution being put to the meeting, it was carried with one dissentient. Mr. W. Thornburn then proposed—"That in view of Shanghai being a foreign port, and not exclusively a British one, and of the large number of merchants of all nations resorting to it for purposes of trade, the Shanghai British Chamber of Commerce be henceforth constituted and called the Shanghai General Chamber of Commerce, and that foreign firms be invited to join and co-operate in all measures deemed necessary for the advancement of foreign interests at the port." The resolution was seconded by Mr. Kahn, and carried unanimously. A subscription list was then circulated for the object stated in the first resolution, and ordered to be kept at the secretary's office for signature by those not present at the meeting.

The *North China Herald* publishes a letter from H.M's Consul to the Committee of the Chamber of Commerce, "relating to the war taxes and extraordinary duties levied upon silk at Nanzing; and the prospects of recovery of the amounts illegally charged from the Chinese Government." Mr. Medhurst says :—"My representation of the case to H.M.'s Plenipotentiary, resulted in his declaring the exactions illegal, and authorising me to deduct the amounts from the first duties payable by the claimants, and I accordingly called upon the Superintendent of Customs to carry out the order, but he declared his inability to do so, not having received corresponding instructions from his superiors. Finding it impossible to secure his compliance by having recourse to the reasonable measures I am warranted to adopt in such cases, I reported his refusal to H.M.'s Legation, in August, since which date I have had no further advices." The chairman, in reply, begged that the subject might be again brought before the notice of Sir Frederick Bruce, and this was immediately done by Mr. Medhurst.

The *Friend of China* writes :—"We learn, with pleasure, that an Envoy Extraordinary and Plenipotentiary from Denmark has recently arrived here on his way to Peking, where he is to negotiate a treaty with the Chinese Government. The Danish flag is not only the fourth in Chinese waters—inferior in regard to the number of vessels which it covers only to that of Great Britain, the United States and Hamburg—but is also one of the oldest, best known, and deservedly most popular with the Chinese; and there appears therefore to be no reason to doubt that satisfactory treaty relations will speedily be established between the two countries; and that Denmark will thus shortly assume the place among the treaty Powers which legitimately belongs to her. Indeed the fact of an official declaration of the Chinese Government, issued so far back as 1845, granting her all the then existing and future privileges of the most favoured nations as regards trade, would seem even to give her a special claim. The Danish Government has, for this important mission, chosen an experienced diplomatist, Colonel de Raasloff, who, for a number of years, and until very recently, ably and successfully represented Denmark in the United States. This selection is indicative of the high value attached by the Danish Government to the satisfactory establishment of its future relations with the Chinese Empire, and augurs well for the attainment of that object."

The necessity of founding a sanatorium within a short distance of Shanghai has induced a number of gentlemen, including two doctors, to visit Pootoo, one of the Chusan group. Their report is highly favourable. It states that there is a snug anchorage at this island, which is within fifteen hours' journey by steamer from Shanghai; that it is a rocky, salubrious islet, with an excellent site for a sanatorium, and that there will be no difficulty in obtaining the permission of the landowners, who are Buddhist priests, to erect buildings upon it. It is stated that out of this preliminary survey and report, an association is likely to be formed, so as to carry out the objects in view. Apart from its advantages as a sanatorium for the sick, it would be resorted to by numbers during the humid heats of summer and autumn.

The amateur actors among the non-commissioned officers and privates of H.M.'s 31st Regiment, gave their first performance at the theatre, on the 13th March, with considerable success.

It is reported in Shanghai that three privates, belonging to H.M.'s 31st Regiment, have deserted with their arms and accoutrements, and that two more have escaped from prison; most probably these men hope to make their fortunes as Taiping officers.

NINGPO.

In our last number we gave an account of the repulse of the Franco-Chinese contingent at Shaou-hing, and of the deaths of

Digitized by Google

General Tardif and Lieutenant Tinling. We now learn that the siege has been renewed, as was anticipated, Tardif having been succeeded by General D'Argaibelle. After a month's resistance, the rebels evacuated the city. An advance was then made upon Seaou-san, which is also said to be evacuated, the rebels falling back upon Hangchow. It is affirmed that trade at Ningpo is reviving in consequence of this success. Captain Dew had previously left for Japan in H.M.S. *Encounter;* before embarking, he was presented with the following addresses by the foreign residents :—

"NINGPO, 19th March, 1863.

"To Captain Dew, C.B., R.N., H.M.S. *Encounter.*

"Dear Sir.—We cannot allow you to leave this port without thanking you personally for the energetic manner in which you have caused this neighbourhood to be cleared of rebels, pirates, and other worthless and dangerous characters. We also wish you to understand that the opinions on yourself lately expressed in public print, are not shared in by the larger portion of this community. We shall shortly forward you a piece of plate as a small token of our respect, and trust you will preserve it as a memorial of Ningpo.—We are, dear Sir, yours faithfully,

"A. N. Brown, agent to Messrs. Dent and Co.; Davidson and Co., F. S. Green, agent to Messrs. Jardine, Matheson and Co.; G. P. Jordan, J. Boshted and Co., G. E. Cerruti, M. S. Gubbay, R. S. Reuben, J. S. Hudson and Co."

A similar address was presented to Captain Dew in conjunction with the officers of the *Encounter.*

Captain Dew, in a letter to the editor of the *Shanghai Recorder*, after describing the defeat of the rebels, says :—"The opening up of this rich and fertile country is fast beginning to tell by the many boats of silk and cotton daily arriving at Ningpo, and there can now be no doubt but that the export of the former in the present year will be double that of Shanghai. The delight shown by the inhabitants of some thousand villages at their return to Imperial rule is unbounded."

NANKING.

Since the failure of the expedition to Nanking, no reliable intelligence has been received from the city or neighbourhood so that we are quite in the dark as to any movements between the belligerent forces.

HONG KONG.

On March 30, a deputation, consisting of the following gentlemen resident in the colony, waited upon the Chief Justice to present him with an address signed by nearly all the inhabitants of Hong Kong :—The Honourable Messrs. Perceval (Jardine, Matheson, and Co.), Chomley (Dent and Co.), Murray (Birley and Co.), and Forth (Colonial Treasurer); Messrs. Kingsmill, Pauncefoot, Block (John Burd and Co.), D. Lapraik, Rustomjee (P. F. Cama and Co.), and Palanjee (of P. and D. N. Camajee and Co.)

The Honourable Mr. Perceval, in the name of the deputation, said that, with his lordship's permission, he would read an address which had been drawn up for presentation to him on the occasion of his quitting the colony for England on leave of absence; it was as follows :—

"HONG KONG, March 21, 1863.

"Sir,—We, the undersigned, avail ourselves of the opportunity presented by your lordship's approaching departure for England, to express to you the sincere sentiments of respect and esteem which we entertain for your public character and conduct. We deeply regret that the occasion of your lordship's leaving us is prolonged ill health, which must often have rendered the discharge of the high duties of your station both onerous and painful. We trust that the return to your native land will restore and invigorate you, and that we may have the satisfaction of seeing you in due time resume your various duties in renewed health and strength. Throughout the period your lordship has sat upon the Bench of the Supreme Court, the grave duties of Chief Justice have been fulfilled with dignity and credit; and we have witnessed with approbation the anxious and laborious investigation devoted to the cases brought before you, the continual desire to administer the law in a spirit of justice and impartiality, and the resolve to maintain the independence and dignity of your Court. In the Legislative Council, your lordship's services to the public have been equally prominent and beneficial; and we have on many occasions heen indebted to your public spirit, straightforward action, and ability in influencing the deliberations of the Council. Our good wishes attend your lordship. We still look forward to your completing a long career of public usefulness; and meantime trusting you will be favoured with a pleasant voyage home, and attended henceforward with all happiness and prosperity.—We have the honour to remain, your lordship's most obedient servants,

On being handed the document, the Chief Justice seemed much affected. He said that, as this was a matter personal to himself, and as the address was signed with so many names, he had taken the liberty, to prevent any misapprehension on the part of those not present, of writing his reply to a document which he believed unexampled in the case of any public servant in the colony. His lordship then read the following reply :—

"HONG KONG, 30th March, 1863.

"Mr. Perceval and Gentlemen,—I thank you most heartily and gratefully for the approbation of my past conduct and the very kind expression of your good wishes for the future which I find embodied in the truly gratifying address with which you have been pleased to present me, and which it will be my pride and pleasure to exhibit to my friends in a far distant land, as an unquestionable proof that, in the discharge of my public duties, I have so conducted myself as to obtain the approval of the community in general resident in this colony, and the personal esteem of those with whom I have been brought into more intimate acquaintance. It is at all times most cheering to a public man filling the office of Judge to know that entire confidence is felt in his impartiality, and that he has been successful in his efforts to maintain the dignity and efficiency of the Court over which he presides. It has ever been my earnest desire to give my best services to the public, whether those services be rendered in the Supreme Court, the Legislative Council, or any other department of the Government; and this most pleasing address convinces me that I have not been altogether unsuccessful in my endeavours to do my duty. If it shall please an all-wise Providence to restore my impaired health, I shall hope to meet you all again in Hong Kong; and in the meantime I heartily reciprocate your many good wishes, and say good-bye to all; and may I find you all on my return in possession of health, wealth, and prosperity."

A deputation of the leading Chinamen in the colony also presented an address to his lordship, of which the following is a translation :—

"Hearing that the Chief Justice Adams is very shortly leaving this island and returning to his native land, we, the Chinese who live beneath the shadow of his protection, and are profoundly grateful for the way in which he has cherished us as his children, come unitedly and sincerely to his court and offer our respectful salutations—

May he find the waves quiet and tranquil!
May his ensigns wave in brightness.

We hope that when he has seen his Sovereign's countenance, he will come again to Hong Kong to satisfy our thirsty desires, and those of the men of other nations, who will unite in reverent admiration of him." To this address the Chief Justice replied in suitable terms.

The services of Chief Justice Adams have evidently been deeply appreciated in the colony. His patience, his impartiality, his sound good sense and discrimination, and his unfailing good temper, have won the regard of every Englishman on the island. On this topic the *China Mail* writes as follows :—

"To speak the truth, it is not an empty fame that will accompany his lordship to England. Impaired health tells its own story—and every man in this colony will corroborate it—of long, hard, unceasing toil on the part of the Judge. He has felt that he must answer to himself for the manner in which his duty was performed, and we feel certain that, on this score, his reflection cannot be otherwise than pleasing. Honour should await him in England, and we shall be glad to see his services to this colony meet with proper recognition at home. As regards his public usefulness, and the general respect paid to him, in Hong Kong, we shall not compare Chief Justice Adams with any other public officer; for no one of them would be able to stand the comparison either in his own eyes or in the general opinion; they all, very wisely, pay him the utmost deference. Nothing that could affect the well-being of the colony of Hong Kong has ever been beneath his lordship's consideration, and wherever his opinions have had influence—which is nearly everywhere—improvement has been the certain result. If the best wishes of a whole community can gratify or benefit a public servant, his lordship ought to be a gainer by the brief recess he goes home to enjoy."

The following remarks from the same journal will be read with interest by every one who has visited or resided at Hong Kong :—"It is well that the idea of having a permanent edifice in Hong Kong suitable for a theatre, City-hall, and assembly rooms, should not be lost sight of. At the same time we have a good deal on hand, before funds can be asked for this desirable purpose. The Sailors' Home must have a proper start, and the funds are still much below what is wanted to carry out either the original or the curtailed designs. The well-being and respectability of the port is very properly preferred to the amusement and convenience of the foreign residents, so that all we can do at present is to talk about our coming city hall, and keep in the straight path towards attaining so valuable an acquisition to the whole foreign community. The clock tower, moreover, which seems to increase in popularity as a public structure, was not paid for when we last heard the subject referred to, and it will not answer to have too many irons in the fire. If it could be shown, or even fairly presumed, that the City-hall, so to term it for brevity, would pay as a building speculation, much of the difficulty would disappear. The sum expended every year upon the temporary theatre could be taken to represent a capital of so much, while a charge for the hire of the theatre to all comers bearing decent credentials would represent so much more, in this case an unknown quantity, for we cannot tell how many talented caterers for the public would visit Hong Kong when it became known that a suitable building was always to be had. The assembly rooms would fetch a trifle in the way of revenue, for no persons wishing to use them would grudge a fee, there being no further expense in fitting them up, as at present, where the volunteers had large preliminary expenses in preparing a room in which to entertain their friends. As for the smaller ante-rooms, they would be in constant demand for meetings of different kinds, such as musical societies, chess

Digitized by Google

clubs, debating forums, &c., &c. We know of a chess club having been nipped in the bud from the sheer impossibility of a suitable room for its meetings. Probably enough, it would be difficult to build a hall and theatre for a sum equivalent to the capitalised revenue, but as, for all public purposes, the rooms would be given free of charge, contributions might be had up to a certain point, after which, applications for shares would readily come in. Not a year, or even a month, passes without the want of such a place being felt; and the ordinary enjoyments and courtesies of life are circumscribed in consequence. The Freemasons would no doubt give a ball every year if a room were to be had; and the guests of the Volunteers at a late festivity would return the compliment to the gallant corps. Many friendly transactions would be enacted on such neutral ground, which at present have only a germ in the good-will of respectable citizens."

The registrar-General, Mr. Turner, had left on a month's leave of absence.

The articles entitled "Progress in China," which appeared in the January and February numbers of *Blackwood's Magazine*, are vigorously attacked in the *China Mail*.

The Portuguese residents in Hong Kong were about to get up an amateur performance for the benefit of the distressed operatives in Lancashire.

On the 1st of April, a fire broke out in Spring Gardens, which resulted in the total destruction of two new buildings facing the Praya, immediately to the westward of Mr. Hall's ship-building yard. The fire is believed to have originated in some Chinese cooking-sheds adjacent to the houses destroyed, which latter was not quite out of the builders' hands. The houses are said to have been building for two residents in the colony. The loss is estimated at under $60,000.

CANTON.

The Canton races came off on the 31st March, the Hong Kong Confederates taking every race they entered for in the easiest manner. The course, according to the *China Mail*, is improved, several very objectionable turns being removed, and the course much lengthened. A most excellent tiffin was provided for all comers by the Cantonites, to which everybody seemed to do ample justice. The clerk of the course, Mr. J. P. M. Fraser, was gentlemanly and active in the discharge of his duties; the starter also did his work admirably, never making one mistake. Great surprise (to quote the same authority) was expressed at no cup being sent from Hong Kong, this being the first time it has been omitted. The following is a return of the races:—1. Brokers' Plate, won by Confederates' "Timor;" 2. Canton Cup, won by Confederates' "Spanish Student;" 3. Farewell Cup, won by "Steeple Jack;" 4. Honam Plate, won by Confederates' "Timor;" 5. Chaasze Cup, won by Confederates' "Skittles;" 6. Winners' Handicap, won by "Nil Desperandum."

The sum of 5,300 dols., recovered from the Chinese Government on account of the "Canton Fire Brigade," is awaiting disposal, and it has been suggested that it should be handed over to the Canton Church Society, so that the edifice on the Shameen may be completed.

COCHIN CHINA.

News has been received of the two missing boats of the American ship *Hotspur*, lately lost on the Paracels. The second mate's boat reached Saigon in safety, all hands well; and the captain's boat was picked up and brought into Bangkok, all on board alive, but very ill and weak from exhaustion. One lady was so ill as not to be expected to live.

JAVA.

Very heavy rains had fallen in different parts of Java, and caused extensive inundations. Several bridges had been carried away, and embankments burst, and the crops of rice, &c., seriously damaged or destroyed.

The Batavia Race Club, which has been in existence for forty years, has resolved not to hold any more races, but to confine its exertions to the giving of a yearly race ball. The reasons for this measure are not stated.

The prospects of the coffee crop for this year are said to be very favourable.

The *Java Bode*, in some recent articles, urges very strongly the necessity of the Netherlands Government taking instant and active measures for establishing its influence in that part of Sumatra bordering on the Straits of Malacca. The writer states that there are thousands of acres of ground admirably adapted for the cultivation of rice and sugar, and cotton, tobacco, and pepper, and that gambier might also be successfully grown on a large scale. The present comparatively uncultivated state of the coast is ascribed to the oppression of the native chiefs, and the constant recurrence of wars and disputes between neighbouring states which tend to depopulate the country. The writer asserts that until Dutch rule and European industry and capital are brought to bear upon the country it cannot be expected to prosper. He therefore presses this being done without delay. He then points out that this part of Sumatra is not only of importance to Holland in a commercial and industrial point of view, but it must be considered as of great value in a political and military aspect. He advocates establishments at two places on the Dutch side of the Straits of Malacca, one on the island of Bengkalis, and another on or near Dili—say at the island Kampei. Such places, he asserts, would afford new outlets for commerce, and they would prove better competitors to Singapore and Penang than have the miscarried free ports of Riow and Macassar.

MALACCA STRAITS.

SINGAPORE.

The principal event of any political significance, is the sale of the Government farms, which took place on the 31st March; they have fetched an advance of exactly $4,180 per month for Singapore alone, or about £12,000 a-year more than previously. The chief increase has been in the Spirit and Pawnbroking Farms; the Opium Farm not having been put up to auction this year, owing to an extention of time having been granted by the Government to the existing farmer. The impression seems to be that if this farm, which is by far the largest (being nearly two-thirds of the entire revenue), had been disposed of, it would have sold at an advance of about 25 per cent., or an increase of about £15,000 for the year.

The French steamer *Imperatrice*, Captain Massenet, belonging to the Messageries Imperiales line, from Suez the 27th Feb. last, arrived at Singapore on the morning of the 24th of March, and sailed for Hong Kong on the same day, in the evening.

Her Majesty's steamer *Perseus*, Captain Kingston, from the Cape of Good Hope the 29th January, arrived the following evening.

The *Straits' Times*, of April 8th, says:—"An expedition, composed of H.M.S. *Scout*, *Pluto*, and *Tonze*, started from this 10 days ago with sealed orders, it was said—at all events, with every indication of being bound on a secret and important mission. The general impression was that they had gone to see into the proceedings of the Dutch in Sumatra. But the *Scout* has turned up at Sarawak, where it appears she has gone to hunt out some pirates, in conjunction with one or two Dutch war steamers. It is to be hoped she will be more fortunate than on her last piratical cruize."

A very long letter from the Rev. Wm. Hackett, defending the conduct of the Bishop of Labuan from the severe attack of Mr. St. John, appears in the same journal.

CEYLON.

The general prosperity of the coffee interests in Ceylon has again attracted attention to all available forest land suitable for planting. Several large parcels of Crown forest have lately been sold at good prices, though not equal to those obtained for the Happotella lands. A good deal of new coffee will be planted during the coming season, chiefly in the Badulla and Happotella districts, which appear to be favorites at the present time, though estates in other directions are being gradually enlarged wherever there is spare forest available.

The Ceylon papers state, with strong expressions of indignation, that the 10th of March was allowed to pass by without any demonstrations of loyalty in the capital. His Excellency the Governor and the principal officials were still in Kandy. A journey which Sir Charles MacCarthy undertook to Badulla, *via* Nuwera Ellia, for the purpose of examining the communications, &c., had to be suddenly broken off at Pusilawa, on account of illness.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

DIXSON—On the 16th March, the wife of Andrew S. Dixson, of a son.

HELBLING—On the 8th inst., at Heathfield, King's-road, Clapham-park, the wife of Frederick Helbling, Esq., of a son.

LAWRENCE—On the 20th March, at Canton, the wife of F. W. Lawrence, of a daughter.

Digitized by Google

PRESTON—On the 25th March, at Canton, the wife of the Rev. C. F. Preston, of a daughter.
REISS—On the 3rd inst., at Oak-hill, near Manchester, the wife of James Reiss, Esq., of a daughter.
RUTTER—On the 24th ult., at Glebelands, Mitcham, the wife of J. C. Rutter, Esq., of a son.
SIEMSSEN—On the 15th ult., at Hamburg, the wife of George Theodor Siemssen, of a son.
SPAIN—On the 2nd inst., at her father's Charlton, Kent, the wife of Valentine Spain, Esq., R.N., Paymaster of Her Majesty's ship *Osprey*, of a son.
WINNINGTON-INGRAM—On the 4th inst., at Hallow, near Worcester, the wife of Commander H. Winnington-Ingram, R.N., H.M.S. *Buzzard*, of a daughter.

MARRIAGES.

ANNESLEY—KELLY.—On the 5th inst., by special license in St. Anne's Church, Dublin, by the Rev. H. Dickenson, William H. Annesley, Esq., Commander H.M.S. *Liverpool*, youngest son of the late Captain the Hon. Francis C. Annesley, R.N., and grandson of the late Earl Annesley, to Lucy Anne, youngest child of Denis Kelly, Esq., D.L., of Castle Kelly, county Galway. No cards sent.
BOWRING—TOULMIN—On the 28th ult., at Christ Church, Bayswater, by the Rev. Canon Boyd, M.A., rector of St. James's, Paddington, John C. Bowring, Esq., of Larkbeare, South Devon, eldest son of Sir John Bowring, to Isabella, younger daughter of Calvert Toulmin, Esq., of Inverness-terrace, Kensington-gardens. No cards.
COUPER—YOUNG.—On the 28th ult., at Darra-cottage, Turriff, Aberdeenshire, by the Rev. Robert O. Young, of Fort Rose, uncle to the bride, John Cardno Couper, Esq., of Whampoa, to Mary, daughter of Matthew Young, Esq., of Rose Bank, Sydney, New South Wales.
JARVIE—BANNATYNE.—On the 30th ult., at 4, Park-circus, Glasgow, by the Rev. James Craik, D.D., of St. George's, Robert Jarvie, Esq., of Shanghai, China, to Agnes D'Arcy, younger daughter of Andrew Bannatyne, Esq., of Milheugh, Lanarkshire.
KUSTERMANN—KOLE.—On the 14th February, at St. George's, Hamburg, by the Rev. Mr. Detmer, Franz Kustermann, Esq., of Penang, to Bertha, second daughter of the late Johann Kole, Esq., of Hamburg.

DEATHS.

BOULLE—On the 24th March, at Shanghai, N. Boulle, aged 54 years.
BRUCKNER—On the 8th March, at Shanghai, H. Bruckner, aged 24.
BEHRE—On the 13th March, at Saigon, Gustav Behre, Esq., of Altona, aged 32 years.
DARCEY—On the 3rd inst., at the house of his sister, Mrs. Plunkett, 3, Ormond-terrace, Rathmines, county Dublin, Charles Byrne Darcy, Esq., late of Singapore, third son of the late Anthony Byrne Darcey, of Drummartin, county Dublin, Esq. R.I.P.
DURANT—On the 25th ult., at High Canons, Herts, in the 35th year of her age, Charlotte Hill, the beloved wife of Richard Durant, jun., Esq., and eldest daughter of Colonel Alexander Wilton Dashwood, of Shenley Grange.
HOWES—On the 24th March, at the Government Civil Hospital, Hong Kong, James Spencer Howes, destitute seaman.
KNOOP—On the 16th March, at Shanghai, Franz Knoop, aged 38.
THOMSON—On the 18th February, at 6, Brighton-street, Edinburgh, Mrs. William Thomson, senior.
WYLIE—On the 17th March, at the General Hospital, Hong Kong, William Wylie, Private H.M.'s 99th Regt. aged 36 years.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—CANTON: A moderate amount of business has been done in most descriptions of Congous during the past fortnight, a rising exchange tending, however, to check the upward tendency which the continued favourable advices from England imparted to the market, which sustains previous quotations. In scented teas a fair extent of business has been done at prices lately quoted. Canton Greens have been taken to some extent. For Country Greens the demand has been limited to purchases for India, and the market has yielded a little. The total settlements of Congou for the season to date amount to 252 chops, besides six do. contract teas. The stock on the market is thus given: Congons, 28 chops, and 4,000 half-chests Canton packed; Country Greens, 15,155 half-chests, and 1,890 do. old; besides scented and Canton Greens in abundance, but unknown quantity.

SHANGHAI.—Black: The market for these kinds revived somewhat just previous to the departure of the last mail, and a better demand has existed since. Rates however have not been upheld, and a few chops have been settled at prices slightly below previous quotations. The stock has been increased by 4 chops from Hankow, mostly of inferior grades, and there are only 1,000 chests Congou and 1,200 chests flowery Pekoe on offer. Settlements and shipments for the fortnight amount to 4,331 chests, making in all since 1st June, 282,653 chests, against 200,225 chests, same time 1861-62.—Greens: There has been a more active enquiry and considerable settlements have been made, principally for the American market, at increased rates. Very little more tea is expected from Kiukiang, and purchasers are in consequence more eager, the demand being chiefly for fine Country Teas. Some few Pingsueys have been quitted at previous rates, but common Country and Japan Teas are still neglected. Settlements and shipments for the fortnight amount to 29,668 packages, making a total of 290,470 packages, against 265,015 packages same time last year. Stocks, in all, 18,200 packages.

FOO-CHOW.—The demand during the fortnight has been languid, and rates for Congous have receded about one tael. The settlements reported are as under:—Congou, 1,700 chests and 3,400 half-chests, at 5½ to 14 taels for low and dusty, and 13½ to 18 taels for good common to flowery; Flowery Pekoe, 100 chests, at 24 to 30 taels for good to fine; Oolong, 3,100 half-chests, at 12½ to 16 taels for common to fair cargo; Scented Teas, 2,800 boxes, at 18½ to 20 taels for fair to good. The total supply of Congous for this season amounts to 572,400 chests, the sales having been 567,000 chests. The supply of last season was 520,000 chests. Stocks are so much reduced that the season may be said to be over. They are thus reported:—Congou, 5,500 chests (4,500 ordinary and 1,000 good common to flavoury); 800 chests Flowery Pekoe; 1,500 half-chests Oolong; and 2,000 boxes Scented.

HANKOW.—Five chops of Hohows and Oonams have been settled during the fortnight at about one tael below the rate current prior to the new year. At present four chops of Hohows constitute the entire stock, and apparently form the balance of the season's supply.

KEWKIANG.—Since the 27th ult., a large business has been transacted in green teas, principally good Moyunes and Fychows, at rates fully equal to those current prior to the new year. The settlements since that date are reported as under: 3,000 half-chests, Taiping and mixed, at taels 21½ to 25½, 7,500 do. com., to fine Fychow, at 24 to 29½ taels, 5,403 do. com., to good Moyune and Twankay at 25 to 30 taels, and 5,500 do. fine Moyune at 31 to 34 taels, say in all, 21,500 half-chests. The stock on the market is reduced to 30,000 half-chests, mostly low and mixed. Of blacks there is neither stock nor sales.

NAGASAKI.—A few parcels of fine leaf have changed hands since last mail, principally for making up for home shipments. The stocks of the finer grades are now very small, but arrivals of fine tea are daily looked for. Exports for February 3,220 piculs.

YOKUHAMA.—For the past month there has been a very limited business. Settlements are only about 1,150 piculs, principally for the American market, at previous rates. Stocks:—Ordinary, 1,000 piculs, at $1 to 3; good, ditto, 1,000 piculs, $4 to 6; common, 1,500 piculs, $8 to 12; good, ditto, 1,000 piculs, $24 to 20; medium, 1,100, $21 to 28; fine, 1,000 piculs, $29 to 33.

RAW SILK.—SHANGHAI.—During the fortnight a moderate business has been transacted, the bulk of the purchasers being confined to Tsatlees. Prices are very firm, and the market is so bare of Taysaams that an advance of tls. 10 per picul has been paid. The receipts from the interior continue very light, and all reports agree that there is little more to be brought down for the remainder of the season. The arrivals from Japan have been 1,072 bales, and further large supplies are expected to come forward from that quarter. The transactions of the fortnight are reported at 2,400 bales, making the total settlements of the season to date 63,409 bales against 63,000 bales at corresponding period last season, and 71,800 bales the season before. The unsold stock is estimated at 2,000 bales now, against 4,500 bales same period last season, and 6,000 bales the season before. Quotations: Tsatlees, No. 1, tls. 480 to 490 per picul; 2, 460 to 470; 3, 440 to 450.

NAGASAKI.—Holders are keeping so firm for higher rates that there are no transactions to report:—The stocks consist of about 60 bales of medium to fine.

YOKUHAMA.—The business for the past month has been small. The rates still continue high, and the stock large, a state of things not likely to induce much anxiety on the part of dealers to become purchasers. Settlements for the month are estimated at 1,500 bales, making a total of 20,000 bales, against 8,000 bales the same time last year. No decline is anticipated notwithstanding the large yield this season, and the continuance of large arrivals, holders being firm, and gradually getting higher rates.

DRUGS, &c.—Cassia Lignea, no sales: quotation $16.50 to 17: stock 500 pls. Cassia Oil, no sale; no stock. Cassia Buds, sales 35 pls. at $50: stock 25 pls. Star Aniseed, no sales: quotation $23: stock 50 picu's. Aniseed Oil, no sales; quotation $215: no stock. Rhubarb and Gamboge, no sales; no stock. China Root, is quoted $4 to 4.50; no sales, and a small stock. Galangal, is quoted $3.75 to 4; no sales, and a small stock. Galls, are quoted $13.25; no sales, stock small. Vermilion, $40 per box, no sales. Camphor: The market is well supplied, and the demand being limited, the price tends down. The production in Japan and Formosa is known to be on the increase—stimulated by high rate ruling here. The quotation is nominal at $26. No sales reported.

COTTON.—Canton: With the exception of about 300 bales of Shanghai and Ningpo staples, no sales have been made during the fortnight. The quotations are nominally the same as before, say—Bombay 14*t* 5*m* to 16*t* 2*m*. Madras 14*t* 5*m* to 15*t* 5*m*. Bengal 13*t* 5*m* to 14*t* 7*m*. Shanghai and Ningpo 14*t* 3*m* to 15*t* 5*m*. The stock unsold in the pack houses consists of 400 bales Bombay, 140 bales Bengal and Madras, and 14,700 bales Shanghai and Ningpo. Hong Kong: The settlements of the fortnight are reported at about 2,500 bales Shanghai and Ningpo. The rates tend downwards and holders seem anxious to realise; the native demand is limited. The quotations are—Shanghai good clean $19.00 to 19.75, inferior $18.50 Japan $20.50 to 21. Shanghai: The settlements of the fortnight amount to 20,000 bales, for shipment to Hong Kong and Liverpool, principally to the former. The quotations are 13½ taels to 13½ taels, which show an advance. The supplies come forward slowly from the country, the capacity for production being still not ascertained.

CHINA IMPORTS.

HONG KONG.

COTTON YARN.—The sales reported in this market during the fortnight are limited to 18 bales, at the prices previously current. In Canton no sales have been made, and quotations remain as before.

GREY SHIRTINGS have found purchasers in this market to the extent of 9,000 pieces, at prices which, except for the heavier qualities, do not show any change; while in Canton 3,000 pieces have been settled at previous rates.

WHITE SHIRTINGS.—The settlements of these goods in this colony are put at 3,850 pieces, at slightly better rates. In Canton, although no transactions are mentioned, the nominal price has advanced materially.

T-CLOTHS have been placed in Hong Kong, at slightly higher rates, to the extent of 10,200 pieces; but although the Canton quotations show an advance of some 10 cents on the prices given in last circular, there have not been any sales effected.

AMERICAN DRILLS.—The quotations for these goods must to a great extent be considered nominal, as neither from this port nor from Canton are there any sales to be reported.

WHITE SPOTTED SHIRTINGS, DYED DO., BROCADES WHITE AND COLOURED.—The sales which are reported as having taken place in this colony amount to 750 pieces and 1,000 pieces of White and Dyed Figured Shirtings respectively, and the prices obtained show an advance of 20 to 25 cents per piece. There have not been any purchases of White Brocades, but some 500 pieces of Coloured have changed hands. In Canton all these descriptions of goods remain without inquiry, although a nominal quotation of 20 to 30 cents advance in their value is given.

CHINTZES AND HANDKERCHIEFS have met with fair inquiry in Hong Kong at firmer prices, and the sales of the fortnight are estimated at 1,120 pieces of the former, and 7,800 dozens of handkerchiefs. A small sale of 240 pieces of Damasks, at the annexed quotations, has also been effected.

RAW COTTON remains much as last quoted, and the settlements in Hong Kong of Shanghai and Ningpo staple aggregate only 1,860 bales. From Canton (where the value of Chinese Cotton has receded about 6 mace) no transactions are reported, and the settlements of the fortnight

Digitized by Google

appear to have been confined to some 200 bales of Indian growth, taken for shipment to this Colony, and thence to England.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths.—The business transacted in all the principal articles of woollen manufacture in this market during the fortnight has been on a larger scale than for some time past, and the sales of Spanish Stripes are put at 1,060 pieces Scarlet and Assorted Colours; 240 pieces of Scarlet have also been taken in Canton, quotations in both places remaining much as before.

LONG ELLS have also met with fair inquiry, and the sales of the fortnight are estimated at 3,080 pieces. These fabrics have not, however, maintained their value. In Canton nothing has been done.

CAMLETS show a slight decline in price, and the sales of the fortnight are put at 1,360 pieces.

LASTINGS have found buyers to the extent of 1,400 pieces, at about previous quotations; and 260 pairs of blankets have been sold.

METALS.—Iron, Flat, &c.—With the exception of Nail Rod, which has met with fair inquiry both here and in Canton, the market for all descriptions of iron has been dull; and the sales of the fortnight are estimated at 4,230 piculs of Nail Rod and 650 piculs of Round Bar, purchased in this colony, with 5,000 piculs of the former and 320 piculs of Hoop sold in Canton; prices for the most part remaining much as before quoted.

LEAD has not been quite so firm in price within the last few days either here or in Canton, but the transactions reported have been made upon a fair scale, and are estimated at 965 piculs and 2,200 piculs respectively.

TINS.—750 slabs have found purchasers in Hong Kong.

TIN PLATES have met with purchasers to the extent of 450 boxes in his colony, but the value of the article has not been maintained.

EXCHANGES ON LONDON.

[For dates see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	6 months sight.		6s. 3¾d. to 6s. 4¼d.	6s. 4d. to 6s. 5d.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

SAILED SINCE FEB. 28.

To GREAT BRITAIN, per Wynaud, 186,100 lbs. tea and 889 bales silk, from Kanagawa. Per Lord Raglan, 493,671 lbs. tea from Shanghai. Per Burman, 365,000 lbs. tea, from Fow-chow. Per Audelicia, 155,380 lbs. and 936 bales of silk, from Kanagawa. Per Neville, 836,169 lbs. and 40 bales silk, from Shanghai. Per Unrivalled, 928,706 lbs. do., from Canton. Per John Banfield, 661,992 lbs. do. from Canton. Per Vision, 502,682 lbs. do. from Shanghai. Per Patrician, 1,366,000 lbs. do. from Foo-chow. Per Red Riding Hood, 831,609 lbs. from Foo-chow. Per Egean, from Shanghai, 410,386 lbs. Per Albertine, from Foo-chow, 190,300 lbs. Per Rachel, from Canton, 706,378 lbs. Per Henrietta, from Canton, 297,223 lbs. Per Kosmos, from Canton, 402,177 lbs. Per Algernon, from Foo-chow, 479,600 lbs. Per Glendower, from Foo-chow, 416,900 lbs. Per Richard, from Foo-chow, 221,700 lbs. Per Geologist, from Foo-chow, 1,134,000 lbs. Per Merse, from Foo-chow, 850,200 lbs. Per Lauderdale, from Canton, 1,129,305 lbs. Per Psyche, from Canton, 274,200 lbs. Per Peterburgh, from Canton, 746,902 lbs. Per Ocean Gem, from Kanagawa, 293,637 lbs, and 399 bales silk. Per Ferozepore, from Shanghai, 602,196 lbs. Per Leichardt, from Shanghai, 575,033 lbs. Per Martaban, from Shanghai, 775,844 lbs.

To CONTINENT, per Albis, 121,400 lbs. do., from Foo-chow for Hamburgh. Per Kamschatka, from Foo-chow for Cronstadt, 375,000 lbs.

To NEW YORK, per Hotspur, 523,820 lbs. do., from Canton. Per Lillie, 300,373 lbs. do. Per Almena, 22,895 lbs. do. from Shanghai, and per Cossack, from Foo-chow, 463,700 lbs. Per Congo, from Foo-chow, 180,000 lbs.

SHIPPING INTELLIGENCE.

ARRIVALS.

At SHANGHAI.—March 11, Flying Spur, from London; 13, Min, from London; 13, Clara Babuyan, from Sunderland; 16, Albatross, from Newcastle

At HONG KONG.—March 17, Burnswork, from Liverpool; 19, Falcon, from London; 23, Defiance (str.), from Liverpool; 23, Clan Alpine (str.), from Glasgow; 26, Shanze (str.), from New York; 30, Chanticleer (str.), from Glasgow; 15, Unrivalled, Canton to London; 16, Vision, Shanghai to London; 16, Adelicia, Kanagawa to London; 17, Southern Cross, Shanghai to Liverpool; 17, Albis, Macao to Hamburg; 20, Ocean Gem, Kanagawa to London; 20, Egean, Shanghai to London; 20, Mary Fry, Manila to Cork; 21, Albertine, Foo-chow to Falmouth; 21, Minerva, Hong Kong to Europe; 23, Patriot King, Manila to Cork.

From CHINA, &c., to NEW YORK, &c.—March 15, Lily, from Shanghai to New York; 16, Cyclone, Manila to New York; 23, Mountain Wave, Manila to New York; 25, Cossack, Foo-chow to New York; 25, Galatea, Manila to New York; Great Britain, Shanghai to Montreal.

At SINGAPORE.—March 20, John Pattern, from Liverpool; 24, Henrietta, from Liverpool; 25, Hollandia from Shields; 31, Conquest, from Boston; April 6, Gan van Gale, from Rotterdam; Nancy Krysson, from Sunderland; Tirrell, from London; 7, George Andreas, from Hamburg; 8, Benvenue, from London.

At PENANG.—None.

At MANILA.—Feb. 24, Gov.-General, from Cardiff; March 10, Voladora, from Hamburg; 17, H. E. Lusanna, from Newcastle.

DEPARTURES.

From SHANGHAI.—March 7, Ferozapore, for London; 10, Leichardt, for London; 10, Carlotta, for Liverpool; 16, Caldera, for Liverpool; 18, Martaban, for London; 21, Acapulco, for Liverpool.

From FOO-CHOW.—March 12, Geologist, for London; 12, Merse, for London.

From AMOY.—March 17, Guinea, for New York.

From HONG KONG, CANTON, and MACOA.—March 15, Mercedes, for Havana; 17, Peterboro, for London; 28, Cumberland, for Liverpool.

From SINGAPORE.—March 22, Lorenzo, for Falmouth; 27, Revere, for New York; 31, Isabella, for London; Little Edith, for Falmouth; April 6, Bonita, for Falmouth; Freida, for Falmouth; West, for London: Wilhelm Sleurg, for London.

From MANILA.—Feb. 25, May Fry, for Cork; 26, Lady Head, for Liverpool; March 1, Cyclone, for Boston; Caprera, for Cork; 2, Danube, for New York.

LOADING.

At YOKUHAMA.—Copernicus, for London.

At SHANGHAI.—For London: Vanguard, M. of Londonderry, Thessalia. For Liverpool: Truro, Thames, Cyclone. For New York: Resolute, Castleton.

At FOO-CHOW.—For London: Albuera. For New York: Hound.

At CANTON.—For London: Margaret Mitchell.

At HONG KONG.—For Liverpool: Storm King, Rajah of Sarawak.

At SINGAPORE.—Wandrahm for New York; Cathay for Falmouth; Oscar for London; Olympia for the Channel; Jupiter for Falmouth; Anadue for Liverpool.

At MANILA.—For England: Cossipore, Valadora, John, Orient, Mayall. For Cadiz: Lucifer. For Nantes: Ade Bretagne.

PASSED STRAITS OF SUNDA.

From England and Continent to China, &c.: March 29, Voltigeur, Newcastle to Hong Kong; 15, Mountain Ash, Glasgow to Batavia; 29, Malvina, Vidal, Cardiff to Anjer. From New York to China: None. From China, &c., to England and Continent: March 14, Wynaud, Yokuhama to London.

FREIGHTS AND CHARTERS.

At SHANGHAI.—To London, £3. 15s. for tea, £4. 15s. for silk; Liverpool, £3. 15s. for cotton; New York $10 for tea; Tien-tsin 6 to 7 tls. per ton meast; Nagasaki $4 per ton, 25 cents per picul; Kanagawa $5 per ton, 25 cents per picul; Hankow 7 to 8 tls. per ton; Foo-chow $4 per ton; Amoy and Hong Kong, cotton 70 cents per bale.

At HONG KONG.—To London £4.

At SINGAPORE.—The Oscar (Swedish) has been laid on for London at £2. 15s. per ton for antimony ore, £3 tin and screwed gambier, and £4. 10s. light goods. Tin, £3 per 20 cwt.; sago in boxes, £4 do.; sago flour, £4 do.; gambier in bales, £3 do.; Sugar, £4 do.; black pepper, £4. 10s. per 16 cwt.; coffee, £4. 10s. per 18 cwt.; hides and horns, £4. 10s. per 16 cwt.; gutta percha, £4. 10s. per 20 cwt.; measurement goods, £4. 10s. per 50 cubic feet.

At MANILA.—For England: £4 to £4. 5s.

SALES IN CHINA.

Nanking, Am. brig, 258 tons, $20,250; Storm King, Am. ship, 1,500 tons, private terms; Prince Albert, Brit. steamer, 190 tons, $11,000; Sir Charles Forbes, Brit. steamer, 138 tons, $58,000 in barter; Victoria, Brit. steamer, 200 tons, $50,000 in barter; City of Hankow, Brit. steamer, 240 tons purchased by the Japanese Government for $100,000;

Digitized by Google

Nanking, Brit. steamer, 150 tons purchased by the Japanese Government for $45,000; Lanrick, Brit. brig, 264 tons for $20,000; Wanderer, Am. schooner, 175 tons $10,000.

CASUALTIES.

HONG KONG.

The British ship Falcon, Capt. Keay, arrived on the 19th March, after a very smart passage of ninety-six days from London. Through the kindness of the captain, we have been enabled to collect the following information from the ship's log-book:—On the 25th February, when in Gaspar Strait, the Beatrice, a British barque, bound from London to Hong Kong, was described, a boat from which vessel, with the second mate in it, informed those on board the Falcon of a mutiny which had taken place on board the Beatrice about a fortnight previously. It was ascertained that an attack had been made upon the captain and his officers at night. The chief officer in the *melee* (who was in charge of the deck) was brained and thrown overboard. The second officer, from the cabin, through the skylight, shot one of the mutineers through the head, killing him instantly. The rest of the men then went forward, and the disturbance for the time was quelled. The captain received some severe blows on the head from bludgeons when trying to come up the companion, and the second mate was injured with a harpoon. Capt. Keay sent his second officer and boat's crew on board, and assisted Capt. Taylor of the Beatrice in securing and placing in irons four of the mutineers. It was afterwards arranged that they should be transferred to the Falcon, as she would arrive sooner in Hong Kong, than the Beatrice. Captain Keay kindly lent Capt. Taylor two of his own men to help him in prosecuting the voyage to Hong Kong. We have yet to learn the cause of this serious crime committed upon the high seas. It has been suggested that the attack was made by the crew with the intention to possess themselves of the spirits stored in the cabin.

The steamer Carthage arrived on March 19 from the coast. She has brought to this port for trial the starboard watch of the British ship Aerolite, Captain Alleyne, accused indirectly of the murder of the second officer of that ship on the passage from London to Shanghai.

SWATOW.

The United States sloop Wyoming in coming into harbour struck on a sunken rock, starting her woodends forward and breaking in a number of her timbers for about thirty feet from the stem on the starboard side; she was immediately breached opposite Swatow, where she is being repaired sufficiently to be able to proceed to Amoy to dock. Her damages are estimated to be not less than twenty-five thousand dollars. The pilot on board at the time was a green hand and knew of no rock where she struck.

COMMERCIAL POSTSCRIPT.

CITY, SATURDAY AFTERNOON.

ARRIVALS NOT INCLUDED IN THE TABLES.

May 6, at Texel, from Shanghai, Bombay; 9, off Falmouth, from Manila, Paradise, Siam; Batavia, Elshout; April 25, at New York, from Hong Hong, Nuiab; May 9, at Deal, from China, Helenslee; at New York, from Manila, Simoom; May 11, at Liverpool, from Manila, Agamemnon; April 28, at New York, from Manila, Simoom; May 6, at Texel, from Batavia, Elshout; 9, at Deal, from Shanghai, Helenslee; 11, at Liverpool, from Manila, Agamemnon; from Shanghai, Bombay; 10, off Falmouth, from Manila, Paradies, Siam; 11, at Deal, from Penang, Coleroon; 12, from Yokuhama, Water Lily; from Colombo, Skimmer of the Waves, Sea Belle; from Shanghai, Queen's Own; from Sarawak, Thracian; 13, from Galle and Colombo, Amicus; from Manila, Gerardus Jacobus; from Penang, Ballarat; 9, at Texel, from Padang, Telegraph; 11, at Falmouth, from Foo-chow-Foo, Blohm; 13, at London, from Shanghai, Orissa; from Manila, Shand; 10, off the Start from Cochin and Colombo, Magna Bona; 13, at Deal, fom Galle and Colombo, Eliza Laing; from Cochin and Colombo, Elizabeth Ann, from Canton, Blenheim. At London, from Foo-chow-Foo, Lucy and Harriet; 12, at Liverpool, from Shanghai, Lebanon; 13, at Brouwershaven, from Batavia, Doelwyk; 15, at Deal, from Maulmain, Johanna; from Singapore, Eliza Thornton; 11, at Bordeaux, from Colombo, Arnaud; 13, at Texel, from Batavia, Jacoba and Christina. At Brouwershaven, from Samarang, Arracan; 15, at Falmouth, from Batavia, Eclipse; off Falmouth from Batavia, Johanna Lange; 16, at Deal, from Canton, Bahia; at London, from Canton, Milbrook; at Falmouth, from Maulmain, Eliza Sharp.

DEPARTURES.

April 22, from New York for Shanghai, Magenta, Alice, Painter; May 8, from Cardiff for Singapore, India; for Galle, Indus; from Dundee for Shanghai, Elizabeth; 9, from Glasgow for Batavia, Helen's Bank; for Shanghai, Sappho; from Liverpool for Basilau and Manila, *via* Cardiff, Azuline; 11, from London for Gibraltar and Ceylon, Adelaide; for Shanghai, Cymbeline; for Colombo, Avon; 9, from Cardiff for Shanghai, Eudora; for Singapore, Admiral de Winter; 10, from Sunderland for Shanghai, Glendover, Sir Harry Parkes, Cordelia; 11, from Newport for Colombo, Amathea; from Sunderland for Shanghai, Samuel; 13, from London for Sunderland and Hong Kong, J. L. Dimmock; 12, from Sunderland for Shanghai, Eastern Queen; 13, from Hartlepool for Shanghai, Blanche; 14, from London for Hong Kong and Canton, Laurel; for Amoy and Foo-chow-Foo, Vibilia; from Shields for Shanghai, Union; for Singapore, Benvirrent (?); 15, from London for Colombo, Zarah.

SPOKEN.

ETHOLE, Fr. barque, Bordeaux to Cochin China, 11 Mar., 14 S., 28 W.
CAMILLA, Liverpool to Shanghai, 23 Mar., 1 N., 21 W.

SPIRIT OF TRADE, for Shanghai, 5 May, 45 N., 13 W.

CASUALTIES.

The Paul Johann, Rooy, from Shields for Batavia, which put into Brouwershaven 6th May, was assisted in there, having lost topmast and foreyard.

The Arbutus (schr.), of Southampton, was abandoned May 4 in lat. 46 N., long. 10 W., and soon after sunk; crew saved by the Coleroon, Hall, from Penang; arrived in the Downs May 11.

The Queen's Own, Flanagan, which arrived at Deal May 12 from Shanghai, reports that she saw the wreck of a large vessel on Alceste Reef, Pulo Leat, China seas, and that on May 6, in lat. 47 N., long. 10 W., she picked up several pieces of wreck, apparently from a vessel of about 200 or 300 tons, and passed a large portion of a vessel's side and boat's chocks, seemingly the result of a collision.

LAID ON.—At London, for Shanghai, Cissy, Annie Archbell; for Hong Kong and Canton, Rifleman; for Manila, Asuncion; for Galle and Maulmain, Elize Rubcke; for Colombo, Skimmer of the Waves. At Liverpool, for Shanghai, Zingra; for Manila, Barinagœ; for Singapore, Highlander. At Glasgow, for Singapore and Penang, Edinburgh Castle. At Greenock, for Galle, Chedubu.

Outward freights remain unaltered. Ships for Hong Kong are in request. Homeward freight from Manila rules at 80s.

The P. and O. Company have contracted for the conveyance of 6,000 tons of coal from the North to Hong Kong.

Vessels cleared from New York for China: April 22, Magenta, for Shanghai; Alice Painter, for ditto. Arrived at New York: April 26, Nubia, from Canton.

The Admiralty have engaged freight for Government stores in the Troas from the River Thames to Hong Kong.

Messrs. Waithman's circular says:—"The silk market is without improvement, the demand for all descriptions being very limited. Prices during the past fortnight have shown a tendency to droop. Taysaams, owing to their scarcity, being more firmly held than Taatlees. In Japans there has been scarcely any business of importance. Deliveries, 1st to the 9th inclusive, China, 1,439 bales; Japan, 362 bales: total, 1,801 bales."

Sales of bar silver have been made at 61¾d. per ounce, being an advance of ¼d.

DANGERS AND DIFFICULTIES IN JAPAN.

In the first place, it is by no means certain that the authorities with whom we made the treaty, in virtue of which we establihsed ourselves in Japan, and which was the *fons et origo* of all the subsequent calamities and outrages, had any real right or power to make such a treaty, or were in fact the true and supreme Government of the land. It is certain that the Ruler with whom Lord Elgin fancied he was treating, and by whom the Japanese negotiators were assumed to be delegated, had been dead some days before the treaty was concluded. It seems certain also that this dead Tycoon—even if he had been alive—would have had no authority to abrogate or violate any of the fundamental laws of the empire; and it is quite certain that the exclusion of foreigners from Japan (as well as the right and duty of every native to slay and exterminate such foreigners) is a fundamental law of the empire, and one of its most sacred and positive laws. There seems little doubt, finally, that the Japanese polity is not only a monarchy and a double and a limited monarchy, but a feudal aristocracy; that the Damios, or great independent or semi independent princes, have as much right and power to say what shall and what shall not be done as the Tycoon or the Mikado; and that these Damios are rootedly and incurably averse to foreign residence and foreign commerce. It appears very probable, therefore, if not absolutely certain, that this treaty which Lord Elgin concluded with a dead man—and in defence of which we appear to be on the point of going to war—has no more real or legal validity in Japan than would belong to a treaty negotiated in England between the late Lord Mayor of London or the present Archbishop of Canterbury. It appears very doubtful, therefore—almost more than doubtful—whether we have any title to be in Japan at all—whether our establishment there is not as great a violation of the laws of the land as it is of the prejudices of the nation—and, in consequence, whether we are either legally or morally entitled to exact vengeance for outrages which have originated in a mistake of Lord Elgin's, and a cowardly deception or an unauthorised assumption of power on the part of the Japanese negotiators. It appears very doubtful, moreover, whether the Tycoon (to whom, as the nominal civil head of the Government, we must address our demands for atonement and protection) has any real power to reach the ruffians who have assailed and insulted us, or to punish the princes, nearly as high in station as himself, whose servants were probably the perpetrators, or to afford us, even if he so desired, ny efficient security for the future. It is all but certain that he cannot. These things being so, what ought to be our course as just men—what our decision and our line of proceeding as wise men? Are we to go to war with a semi-barbarous and remote Power in order to enforce a treaty of which the original validity is questionable in the extreme, and in order to maintain a position which is unprofitable, and will probably turn out to be untenable? Is there any object—can there be any hope—of maintaining friendly relations, or commercial transactions, or diplomatic intercourse, with a people who hold it to be meritorious, as well as lawful to slay all

Digitized by Google

foreigners, whose first principle of political economy is to eschew all external trade, who hate us as Christians in addition, and whose Government is so complicated that we do not to this day know where or in whom the actual sovereignty resides? Is there any object in attempting this? Have we any moral right to persist in it? Is there any prospect of succeeding in it? Ought not the British nation, at once and in time, to say to Lord Russell: "We will not drift or be dragged into so questionable, so costly, and so profitless a quarrel. Exact retribution, if you can discover the real criminals. Take due vengeance for lawless ruffianism, if you can take vengeance on the guilty. Leave your mark behind you, as you did in Cabul, if you think that English honour needs this, or will burn the brighter and look the purer for it. But do not let one false step entail a long series of false steps. Retreat while it is yet time from a position which you never ought to have occupied. And, above all, do not repeat our old blunder of allowing jealousy of future possible designs of Russia to drive us into transactions which are sure to involve us in incalculable cost, which is certain to be profitless, and in much wrong, which may ultimately lie heavy on the conscience of the nation.—*Economist.*

Parliamentary Intelligence.

HOUSE OF COMMONS.

MILITARY DEFENCE OF THE COLONIES.

(April 28th.) Mr. A. MILLS moved for copy of all communications since 1862 between the Secretary of State for the Colonies and the representatives of the Crown in the British dependencies respecting the mode and cost of their military defence. The discussion, was, however, confined to Canada and New Zealand, both of which colonies Mr. Mills considered ought to have a full share of the cost for military expenses.—Mr. C. FORTESCUE thought that the Canadian Government was alive to this obligation since they had raised a volunteer force; still it had at present done too little, and the Home Government had expressed this opinion very decidedly. There was no correspondence that could be at present laid on the table.—Mr. MILLS therefore withdrew his motion.

CLAIMS OF DISTINGUISHED SERVICE COLONELS.

(28th.) Gen. LINDSAY moved an address to Her Majesty "to appoint a Royal Commission to inquire into the claims of twenty-one officers of the army, who were promoted to the rank of colonel in 1855 and 1856 as aides-de-camp to the Queen, for distinguished service in the Crimean war, who, by a recommendation of the Royal Commission of 1858, had been deprived to an undue extent of the position they attained by the promotion conferred upon them, and to report whether they are entitled to any redress." This is not the first occasion on which this subject, one of great interest to military men, has been brought before the House. This time the debate terminated successfully, for Lord PALMERSTON engaged, if General Lindsay would withdraw his motion (which he did) that a commission should be issued to enquire into the matter.

IRON-CLAD SHIPS.

(28th.) Sir J. ELPHINSTONE, moved an address to Her Majesty 'to appoint a Royal Commission to consider the best mode of construction and form of the iron-clad ships which are to compose the future navy of England; to report upon the ships built and building, and the dock and basin accommodation required for their use at home and abroad." He observed that we were now entering upon the third re-construction of our navy within his recollection—a more costly one than the others, and the whole responsibility of this enormous charge was thrown upon an office too hard worked. The object of his motion was relieve the Admiralty of labour, and afford that Board the advice of a council of able, scientific men in the construction of our iron ships.—Lord R. MONTAGU thought a permanent council to advise the Admiralty would be greatly better than a commission, which generally buried all its labours in a Blue-book. How much better would it be to have, as in France, a self-supporting institution for the study of naval architecture. In bringing forward an amendment to this effect he quoted Mr. Scott Russell's statement, that the French ships are in every respect better than our own. But the most extraordinary result, he said, was that the French were gradually dispossessing us of the carrying monopoly which hitherto we had enjoyed. The Peninsular and Oriental Company had been deprived by them of the coasting trade in the Mediterranean, the West India Mail Company had to contend with vessels built by the officers he had described, and the direct transit of the Peninsular and Oriental Company was also subject to similar competition. He thought he had made out his case for the necessity of providing the service with a permanent staff of naval architects equal to the investigation of the scientific problems of the day, and to give advice and assistance to the Admiralty. The constructor of the navy would be supported by a body of scientific men, who could be stationed at Columbia, Australia, Hong Kong, the Cape, or at other points, and their existence would be attended with this further beneficial effect, that scientific inventions, like Captain Cowper Cole's cupola ships, would not be cast aside by the Government for nine years, but would undergo proper investigation at once.—Mr. LINDSAY did not consider that the French iron-cased vessels were at all equal to the English and said that the spread of ocean lines of steamers did not depend on the existence of a school of naval architects, but on the vast subsidies granted by the French Government.

"The Brazil line alone received four times as much as was given to our own West India Mail Company; and five times the amount paid to the Peninsular and Oriental Company was given to the Messageries Impériales. The greatest steam company in France—the Transatlantic Company—was now building eight ships of close upon 4,000 tons each, and all of these had been contracted for by the house of Scott and Sons, of Greenock. Three were building in Greenock, and the five others in yards in France, under the direction of Mr. Scott's foreman; and for these latter a higher price by 10 per cent. was to be paid than for those constructed in the United Kingdom. That fact afforded the best proof that we could compete successfully either with the iron or timber shipbuilders of France."

The debate terminated with the withdrawal both of the motion and the amendment.

THE ATTACK UPON SHAOU-HING.

(May 5th.) Col. SYKES asked the Secretary to the Admiralty if any and what measures were to be adopted consequent upon Captain R. Dew, of Her Majesty's ship *Encounter*, employing part of the naval force under his command in an unsuccessful attack upon the city of Shaou-hing, in which Lieutenant Tinling, of the *Encounter*, was killed, Shaou-hing being many miles beyond the thirty miles' radius from a treaty port.—Lord C. PAGET said that no official details of the unfortunate event referred to by the hon. and gallant gentleman had been received, but the Admiralty had given strict orders that none of Her Majesty's ships should be employed in operations beyond a radius of thirty miles from a treaty port.

CHINA.

(15th.) In a very thin House, Mr. LIDDELL called attention to events in China, with a view of obtaining an expression of opinion upon the course of policy pursued in that country. He contended that in China this country was pursuing a policy of active interference in the internal affairs of a foreign nation, in direct contravention of the principle of non-intervention which Her Majesty's Government professed. He argued that England, in fact, had established a military occupation of China, with the avowed object of facilitating trade and commerce; but, on the contrary, the mixing up of political questions—which were enforced by military demonstrations—with mercantile questions, and the regulations which had in consequence been adopted, had resulted in a considerable interruption of commercial affairs. He criticised with some severity the permission given to Captain Sherard Osborn and other officers, and 600 men of the navy, to enter the service of the Emperor of China, contending that it was an infringement of the Foreign Enlistment Act. He moved for a copy of all further correspondence relating to China other than that which had been produced.—Mr. J. H. BAILLIE stated that the expense of maintaining our forces in China amounted to a million per annum, and it was the duty of the House to inquire whether the sum was properly expended, and to ascertain what was the policy and the ultimate views of the Government. He denied that the desultory operations of our forces could have any real effect in the large province against which they were directed, while they certainly affected injuriously the trade of the foreign merchants.—The question for going into committee of supply was put and agreed to, but on the question that the Speaker do leave the chair, Mr. CORDEN expressed his suprise that no answer had been given by her Majesty's Government to the speeches which had been delivered on a question of such vital importance.—Mr. H. Seymour expressed a similar opinion. The House had been treated by the Government with the grossest disrespect. He believed the intention of the Government was the ultimate conquest of China.—Lord NAAS never recollected such an occurrence as this in the House, when a matter of the utmost importance was thus treated by the Government. He gave notice of his intention of bringing forward the subject at an early opportunity.—Mr. WHITE though the scanty attendance in the House was some justification of the collapse of the debate, although he was desirous that the discussion should be continued.—Mr. LAYARD said he was precluded from speaking more than once in the debate on going into committee of supply, because there were four subjects for discussion on foreign affairs to which he would have had to reply in only one speech. He was quite prepared to have discussed the Chinese question if the debate had been carried on, which it was in the power of the hon. members who complained to have done.—Mr. S. FITZGERALD denied that this was the form of the House. The hon. gentleman might have spoken separately on each subject, but he was glad that his silence was owing to a misconception.

Continental Intelligence.

FRANCE.

We have of late frequently referred to attempts which have been made to compensate for the losses incurred in France from the disease among the silkworms by importing seed from the Far East. According to information received by the Minister of Commerce from French agents in China, some districts in the province of Che-kiang produce seed giving 120 kilogrammes of cocoons per Chinese ounce, which is one-third more than the French ounce. The French Legation in China are of opinion that the transmission to France might be accomplished safely, and within a period of three months at most, through Siberia. By transmitting overland the heat of the tropics would be avoided. The province of Che-kiang, which is re-

Digitized by Google

markable for its fertility and its position, possesses forests of wild mulberry trees, which serve to produce healthy silkworms. The Minister of Commerce thinks that the introduction into France of this valuable breed of silkworms would be an immense service rendered to silk producers. The fraud which has been practised by vendors of foreign seed of unsound quality need no longer be apprehended. It is proposed, as the most certain mode of procuring the best seed from Che-kiang, to appoint nine delegates, of whom six should be chosen from among French silk growers, and three scientific men; the three latter to be named—one by the Minister of Foreign Affairs, the second by the Minister of Commerce, and the third by the French Consul in China. It is calculated that a great saving of expense would be accomplished by this plan, besides the advantage to the silk producers of being supplied with a sound material. The number of ounces annually used by the French silk growers is estimated at 1,200,000, and the cost price in China is 4f. 25c. the ounce. The various expenses being added, it is calculated that the seed might be delivered to the French silk growers at 7f. 57c. the ounce. Now, during the last five years the average price was 14f. the ounce; but, as the half of it was bad and unproductive, it costs the silk grower really 28f. the ounce. Previous to the appearance of the disease among silkworms, the best seed was sold at from 3f. to 5f. the ounce.

Despatches received in Paris from Cochin-China to the 31st of March state that public order was re-established in the colony. A great number of villages had given in their submission. Admiral Bonnard and a Spanish Plenipotentiary were to leave for Hué on the 3rd of April, to exchange the ratifications of the Treaty of Peace of 1862. All the Spanish troops were to re-embark upon the 2nd of April to return to Manila.

It is supposed that next year the army will be reduced to the normal state of 400,000 men, and 85,705 horses for France and Algeria; 188 ships afloat, with a crew of 30,254 men. It appears that there are at present 419,394 troops under arms, of whom 16,200 are in Rome, 1,960 in Cochin China, 34,800 in Mexico, not including 4,000 auxiliaries who require to be fully provided. It appears further that her distant expeditions compel France to maintain 300 ships afloat, with a crew of 47,577 men.

The chief subject of discussion in the French newspapers is the reply of Russia to the notes she has received from England, France, and Austria. The view taken of this reply is in general favourable to the Emperor Alexander.

In a discussion on the navy estimates, Count de la Tour complained of a remission of activity in France, whilst England was still making great exertions. In 1857 France had determined to employ 17,000,000f. annually in transforming the fleet, and he was sorry to see that it was now proposed to reduce that sum by 3,000,000f. Since 1857 England had expended vast sums in coast defences, and in increasing her navy, so that it had acquired a relative superiority over that of France. Then, again, England could command the services of 300,000 able-bodied sailors, whilst the French navy could not count on more than 80,000. There was as great a disparity also in the number of officers, for while England had 6,000 France had only 1,900, even after the recent addition of 210. He trusted that the Government would spare no efforts to keep up efficiency. He could not conclude without paying a tribute of gratitude to the army and navy, for having so expeditiously sent thirty thousand men across the Atlantic. He thought the House would admit that the army and navy had merited well of the country. General Allard, government commissioner, replied that the navy had not been neglected, that the transformation still continued, that a reduction of only 2,000,000f. had been made, which reduction had been made for financial reasons. With regard to the defence of the coasts, 13,000,000f. had been expended, and 295 batteries and 18 forts completely terminated. Others were more or less advanced, and would be finished in a few years. A reserve for the navy as well as the army was perfectly unnecessary. The house was evidently uneasy at the ministerial statement, especially when reminded that France in 1861 had 35 steam liners, 18 frigates, and 1 frigate *cuirassée*; that in 1863 progress had relaxed, and although she had now 112 steam-vessels, she had only 36 vessels, 24 frigates, and 4 frigates *cuirassées*—64 large fighting-ships in all, and only 11 more than in 1861. General Allard was reminded that two years ago he had said 6 frigates *cuirassées* were then finished, and that 10 more were rapidly advancing.

Cherbourg journals report that seven ships of war, fully armed, are now in the harbour, viz:—The *Napoleon*, the *Impetueuse*, the iron-clad frigates *Couronne*, *Normandie*, and *Solferino*, the corvette *Forfait*, and the guardship *Dauphin*. This assemblage of war vessels is connected by the partisans of war with a design to send a French fleet to the Swedish port of Carlskrona, which it is observed is only four days' sail from Cherbourg.

The *Annuaire Militaire* contains the following statistical details of the French army:—The present number of marshals is 10, Marshal Vaillant, nominated in 1851, being at the head of the list. Count D'Ornano, the youngest marshal, was appointed in 1861. The number of generals of division of the staff who have held chief commands is 10, General Schramm being the first on the list, and Count Palikao, better known as General Montauban, the last. The number of generals of division of staff, 1st section, is 82; that of generals of brigade, 158. The reserve list, 2nd section, includes 77 generals of division, and 171 generals of brigade. The staff, which by a decree of June, 1860, should consist of 580 officers, is composed of 55 colonels, 35 lieutenant-colonels, 110 majors, 290 captains, and 90 lieutenants. The army is divided into seven corps, six of which are in France, and the seventh in Algeria, an expeditionary corps in Mexico, and an active division in Rome.

M. Block, the able political economist, in a review of the official returns just published with respect to the trade of France during the first three months of the years 1861, 1862, and 1863, observes that they are worthy of serious attention. The first remark to be made is that French imports are gradually decreasing. They amounted to 561,000,000f. in 1861, they declined to 515,000,000f. in 1862, and to 498,000,000f. in 1863, while the exports as regularly increased. The exports amounted to 464,000,000f. in the year 1861, they increased to 490,000,000f. in 1862, and to 588,000,000f. in 1863. Another fact worthy of observation is that in 1861 the value of the imports exceeded that of the exports by 97,000,000f., in 1862 by 25,000,000f., but that in 1863 the value of the exports exceeded that of the imports by 90,000,000f. M. Block is not of opinion that economists should rejoice at this excess of the exports over the imports. They should first ascertain whether the amount of exports has not been influenced by the system of bounties, the low value of produce, or other circumstances.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, May 6.

Their Majesties the King and Queen, accompanied by the Prince of Orange, and attended by a numerous suite, arrived in this city from the Hague on the 30th ultimo, by a special train, on their usual annual visit.

In the First Chamber of the States-General the attention of the members was mainly directed towards the Bills sent up to them by the Lower Chamber for their approval and confirmation. The Bill for the Administration of the Crown Domain passed without a division, as did also, after a short discussion, the Extension of Art. 17 of the Law of the 19th of August, 1861, concerning the National Militia. The confirmation of the Decree of the Governor-General of Netherlands India, allowing the duty-free importation on paddy and rice in Java and Madura, as well as the abolition of all import duties on articles of food throughout Netherlands India, was passed without a division, after some explanations given by the Colonial Minister. The Bill for the alteration of the Excise duty on foreign distilled spirits was passed, after some explanations made by the Minister of Finance. The Bill for the release of the tithes by purchase then came on, and gave rise to a long and adjourned debate, and was eventually negatived by 23 to 13 votes. This is the third time they have thrown out this Bill in succeeding sessions, and thus the agricultural interest in this country has no chance of being relieved of this great impediment to its gradual development. It will be recollected that the Bill passed the Second Chamber by a large majority; but a great divergence of principle exists between the two Chambers on this important subject, with but very little chance of their coming to an agreement or even compromise, as the members of the first Chamber are elected by the Provincial States, which by the constitution in force cannot be dissolved. The last subject for discussion by the First Chamber was the new Education Bill, which, after some debate and explanations offered by the Prime Minister, Thorbecke, was passed by 26 to 7 votes, and then the Chamber adjourned for the present.

Digitized by Google

It is stated, that on the return of the Court to the Hague, the Prince of Orange will leave this country on a visit to several European capitals. Rumour supposes that his journey is not altogether unconnected with a matrimonial project. When the visit to this city is over, the Prince will in the first place proceed to England and witness the Epsom races.

During the month of April the number of vessels that arrived in this country from the East was only 13 (against 36 in March and 34 in February), bringing nine cargoes for the Company, and four for the private trade. Six discharged at Amsterdam, and seven at Rotterdam. Four of these vessels came from Batavia, five from Banjoewangie, one from Samarang, one from Sourabaya, one from Passaroeang, and one from Padang. Amongst other produce they brought 44,430 bags of coffee, and 22,348 kranjangs of sugar.

The Dutch ship *Johannes Hendrikus Ferdinand*, Capt. G. H. Lodewyks, from Shields to Sourabaya with coals (chartered by the company), has put into Nieuwe Deep in a leaky state, and is discharging her cargo previous to undergoing the needful repairs.

According to a report from Capt. Tode, arrived at Falmouth from Matanzas, he states having seen on the 10th of April, in 40 N. lat., and 40 W. long., a ship bearing the name of *J. A. Bang*, dismasted and in a sinking state. The Dutch ship *L. A. Bang*, Capt. C. M. Fallenius, sailed from Shields to Batavia on the 20th of March with coals, under charter for the Netherlands Trading Company.

By the last Cape mail intelligence has been received stating that the Dutch ship *Tryntje Fenna*, Capt. J. Abbink, from Batavia to this country, which had put into Simon's Bay under average, had repaired damages and reloaded her cargo on the 13th of March, and was about to proceed on her voyage. 285 kranjangs of sugar and 169 bags of cloves were sea damaged, and had been sold, in addition to which the captain had taken up £1,700 on a bottomry bond.

An interesting ceremony was performed last week at the Hague, in the saloon of the First Chamber of the States-General, where the medals were presented by the Prime Minister, Thorbecke, to the Dutch subjects who gained honours at the International Exhibition of 1862. All the Ministers were present, as well as the Royal Commissioner and the President of the Association for the development of Dutch national industry, whilst on the right of Mr. Thorbecke sat the British Ambassador. In the middle of the saloon were seated the sixty-seven gentlemen to whom medals were awarded, whilst the seventy-nine who received honourable mention were ranged along the side walls. The Premier made a suitable speech, in which, after referring to the cosmopolitan character of the Exhibition, and the international feature now assumed by modern industry, he showed how absurd it was at the present day for nations to shut themselves out from general competition with the whole world. Industry (he added) can only prosper by free trade, and no amount of favour or protection can produce a healthy and flourishing commerce, which proceeds solely from unshackled competition with other countries.

Mr. Pieter Jeckel, Knight of the Order of the Netherlands Lion, died at the Hague on the 29th ult., in the 65th year of his age. From 1817 to 1833 he was employed in the Colonial Office, and was then sent out to Java as Assistant-Secretary to the Indian Government by Mr. J. C. Baud, when that gentleman was Colonial Minister. In November, 1845, he was appointed Governor of the Molucca Islands, but was obliged, from ill-health, to return to Java in 1847, where he was employed in helping to draw up the Government regulations for the administration of the Dutch outside possessions in the Indian Archipelago. In 1849 he was named President of the General Court of Accounts in Java, in which capacity he remained till 1851, when he resigned his appointment and returned to Holland. He was greatly respected, and is very generally regretted by his numerous friends and acquaintances.

The *Dagblad* of the Hague contains the following paragraph: "Whilst the Japanese Ambassadors were residing among us, all sorts of dismal prophecies were made concerning their reception on their return home. These prophecies have been partly fulfilled. It is true we have not yet heard of their being compelled to undergo the operation of the 'happy dispatch,' but from official accounts received through the Swiss Embassy in Japan, we learn that they have been degraded from their rank and dismissed from office."

The private trade produce exported from Java to Holland during the month of February was as follows:—

Per *Willem Daniel*, 6,305 piculs coffee; 2,152 piculs sugar; 100 piculs rattans.

Per *Monitor*, 1,993 piculs coff ugar; 155 piculs rattans.

Per *Drie Gebroeders*, 7,764 piculs coffee; 67 piculs rattans; 787 piculs tobacco; 34 piculs sapanwood.

Per *Emma*, 5,392 piculs sugar; 50 piculs rattans, 16 piculs sapanwood.

Per *Betty*, 7,407 piculs sugar, 540 piculs rice; 112 leggers arrac; 500 piculs rattans.

Per *Carin*, 8,279 piculs sugar; 1,609 piculs tobacco.

Per *Estafette*, 1,475 piculs sugar; 1,696 piculs tobacco.

Per *J. M. Kemper*, 7,528 piculs sugar; 85 piculs rattans.

Per *S. van Heel*, 10,675 piculs sugar; 108 piculs rattans; 388 piculs pepper; 75 piculs indiarubber; 50 piculs sapanwood; 1,500 piculs tobacco.

Per *Travancore*, 7,003 piculs sugar; 38 leggers arrac; 130 piculs rattans; 6,400 hides; 50,074 kilogr. indigo.

Per *Willem de Zwyger*, 11,796 piculs sugar; 150 piculs rattans; 1,548 piculs tobacco.

Per *Jacob*, 7,287 piculs sugar; 98 leggers arrac; 150 piculs rattans; 31 piculs indiarubber; 681 hides; 6 piculs tobacco.

Per *D. F. Weber*, 4,880 piculs sugar; 3,050 piculs rice; 50 leggers arrac; 427 piculs rattans; 80 piculs sapanwood.

Per *Susanna Johanna*, 8,469 piculs sugar; 50 piculs rattans; 2,000 hides; 891 piculs tobacco.

Per *Catharina Maria*, 10,324 piculs sugar; 65 leggers arrac: 200 piculs rattans; 498 piculs tobacco.

The Indian Association held a general meeting last week for the purpose of petitioning the Government on the subject of the indigo cultivation in Java. The draft of the petition was read and unanimously confirmed. On the proposition of Mr. Schill, the meeting expressed its satisfaction on the subject of the railways in Java, accompanied by its wish to see the immediate execution of the line between Samarang and the Regencies. A resolution was then passed to send, on the part of the Association, an address of thanks to the King for confirming the concession; one to the Colonial Minister, thanking him for having so quickly paid attention to the subject; and one to each Chamber of the States-General in support of the Bill for confirming sundry articles of the above-named concession. The motion was passed unanimously.

Accounts have been received by the Naval Department announcing the safe arrival of H.N.M. screw-corvette *Apeldoorn*, 10 guns, Lieut. J. A. Hugenholtz, at Buenos Ayres on the 2nd of March. The *Apeldoorn* sailed from Nieuwe Deep on the 22nd of December last for Java.

On the 1st inst. the first Dutch iron-clad gunboat, lately launched at Rotterdam, and still lying there, was commissioned by Lieut. P. van Lelyveld. When fitted out she will be stationed for the present at Hellevoetsluys.

The *Staats-Courant* contains the following;—"According to a report dated the 14th of March, received by the Naval Department, H.M. screw-corvette *Reinier Claeszen*, of 10 guns, has gone from Sibogha to Nias, at the instance of the Governor of the West Coast of Sumatra, in quest of certain Malay slave traders, who had acted in a hostile manner towards the crew of a cruising boat, in order to drive them away and release the slaves they had taken. The result of the corvette's mission not being yet known, it is right to state that the allegations made by certain newspapers of the expedition having proved unsuccessful are at least premature."

In consequence of the emancipation of the slaves in the Dutch West Indies, several coffee, sugar, and cocoa plantations in Paramaribo, Dutch Guiana, and other possessions are advertised in the papers of this city for sale at moderate prices.

PASSENGERS OUTWARDS.

Per *Nederland and Orange*, Capt. J. Bouwmeester, from Rotterdam to Batavia: Mr. A. ten Bosch, Medical Officer of the East India Army, with three children and governess.

Per *Delft*, Capt. van Geelkerken, from Rotterdam to Batavia: Mr. J. van Geelkerkerken, Medical Officer, East India Army.

Per *Willem Kroonprins der Nederlanden*, Capt. Zetteler, from Brouwershaven to Batavia: Mr. C. Baesjou.

COMMERCIAL.

COFFEE.—The market for all descriptions has been quiet since last mail, and no alteration in values to report. No parcels offered for sale, and purchasers must make bids if they want to buy; but they cannot obtain any lots out of the company's last sale without paying a profit of 1 cent. There have been a few sales of private trade Java, among which were 1,000 bags ex *Cornelis Wernard Eduard* at 45½ to 51½ cents according to quality. The deliveries continue large, amounting to 373,101 bays during the first four months, against 320,917 bags last year, whilst the present stocks on warrant are only 161,055 bags against 170,183 in 1862. The quantity of unsold coffee in the company's warehouses is 282,895 bags against 304,700 last year.

SUGAR.—During the first half of the fortnight the raw article was in a very lively state, and upwards of 10,000 kranjangs were taken at rising prices. Since then, however, the market was not so active, though last week's currency was obtained. The only sale of any extent this week wa

Digitized by Google

1,763 kranjangs of Batavia, ex *Odin*, No. 13, at 33½ fl., to be received on board and landed at purchaser's expense. At Rotterdam higher prices are paid this week for Java, especially in the better qualities. Refined goods have also been in a very excited state, and prices considerably higher; but during the last few days a reaction has taken place, and some parcels of ready goods have been sold by the dealers a shade lower. Refiners, however, refuse to enter into contracts for forward delivery at anything less than last week's currency.

RICE.—There have been no dealings in paddy, and the rice mills are standing still for want of materials to work with. Cleaned descriptions go off in small parcels and realise full prices. Stocks are low, and the supplies expected very small.

SPICES are neglected, with the exception of Java cinnamon No 3, in which a few transactions were done at 80 cents. Soy is in active request.

TOBACCO.—The dealings have amounted to 2,000 bales of Java at fair prices. The stock is now reduced to 1,832 bales. The result of the late sales was as follows:—735 bales TR, from 17½ to 96 cents; 109 b. WGJ, 23½ to 37; 137 b. VA, 20 to 23½; 40 b. Goebok, 20 to 30; 523 b. BK, 18½ to 24½; and 720 b. KL, 17½ to 22 cents. All flowingly sold.

HIDES command more attention, and the market is firm. Among the sales since last mail are 553 ox and 269 buffalo, ex *Schelde*, from Padang, and 400 Java buffalo, ex *Gevalia*. Stock in importers' hands 9,510 Java buffalo and 13,658 do. ox.

TIN.—Banca dull of sale. Parcels have been offered at 76½ fl. without tempting purchasers. Present stock 39,452 blocks against 29.300 in 1862. The deliveries during the first four months of this year were 30,288 blocks against 24,671 in 1862.

RATTANS.—3,796 bundles, ex *Cornelis Gips*, were offered for sale, and found purchasers rapidly at full prices.

INDIGO.—At the company's sale of 1,723 packages of Java the whole quantity was sold, and there was great competition, especially for the soft and finer descriptions. As compared with the October sale, the prices obtained were as follows:—

Very ordinary at	500 cents, and under	30 to 50 cents lower
Ordinary	510 „ to 540 cents	30 to 40 „ „
Ord. middling	550 „ to 580 „	10 to 30 „ „
Middling and good middling	590 „ to 640 „	10 to 20 „ „
Fine middling	650 „ to 690 „	par
Fine and very fine ..	700 „ and above	par to 10 „ higher

COCHENILLE.—At the above sale 40 chests of Java cochenille were brought to the hammer and all knocked down with the following result:—

First quality	15 to 20 cents higher	than the
Second do.	10 to 20 „ do.	October
Zaccatille	25 to 35 „ lower	sale.

The Netherlands Trading Company calls on the holders of the warrants of the lot No. 118 nutmegs No. 4 in warehouse at Amsterdam, and lot No. 89, cloves No. 2 lying at Rotterdam, of the company's sale of the 26th May, 1836, to clear them within a certain specified time, or else they will be included in the next spice sale and resold for account of the company. As twenty-seven years have elapsed, it is to be presumed that the above warrants have long since been lost or destroyed, and there is but little chance that the goods will be claimed.

Naval and Military.

The Chinese gunboat Tien-tsin, Capt. Nicholas, sailed for China on the 6th inst. from Falmouth. Another of these gunboats was entered through the Custom-house by Messrs. Laird, Brothers, on the 4th inst., as the Kwang-tung, Captain A. Young, for Hong-Kong, *via* Falmouth.

The trial of the new paddle-wheel steamship Kian-Soo, built by Mr. John White, of West Cowes, for the Emperor of China, took place on the 6th inst. at the measured mile in Stokes Bay, near Portsmouth. This vessel is built on the diagonal principle, and is a beautiful model. Her length is 241 ft., breadth, 29 ft.; depth, 15 ft. 3 in.; and tonnage, builders' measurement, 1,000 tons. She is fitted with oscillating engines, constructed by Messrs. C. A. Day and Co., of the Northam Ironworks at Southampton, and has patent feathering paddlewheels. The diameter of the cylinders is 68in., with 5ft. stroke, and the velocity of the piston at full power 450ft. per minute. The Kiang-Soo attained as follows:—First run, 3 min. 59 sec., equal to 15·063 knots per hour; second run, 3 min. 8 sec., equal to 19·149 knots; third run, 4 min. 4 sec., equal to 14·754 knots; fourth run, 3 min. 15 sec., equal to 18·462 knots; the Admiralty mean of the whole being 16·903 knots, or 19¾ statute miles per hour. Revolutions of engines, 45; pressure of steam, 27lb.; vacuum, 26 in. The engines, which are of 300 nominal horse-power, worked up to 2,279, being over 7½ times their nominal power. The vessel's mean draught of water was 9ft. 3in. With such extraordinary results as these the Kiang-Soo was unanimously pronounced by all the naval and scientific authorities present to be one of the fastest vessels afloat. The Kiang-Soo is intended for the special use of Captain Sherard Osborn, the commander-in-chief of the Anglo-Chinese expedition, and will sail from London for her destination in about a fortnight.

The Armstrong and other guns required for the Cossack, 20, 250-horse power, fitting at the Nore for commission, have been despatched to that vessel from the Ordnance Stores, Chatham. This fine corvette is very rapidly approaching completion, and in the course of a few weeks will be ready to be despatched to any station where her services may be required. It is stated at Chatham that she will relieve the Pearl, 21, 400-horse power, Capt. J. Borlase, C.B., on the East India and China station.

In pursuance of Her Majesty's pleasure, Admirals of the Red, Sir F. W. Austen, G.C.B., and Sir W. Parker, Bart, G.C.B., have this day been promoted to be Admirals of the Fleet; and in consequence thereof the following promotions, also dated this day, have taken place:—

Admirals of the White Sir W. Bowles, K.C.B., and Sir H. Hope, K.C.B., to be Admirals of the Red.

Admirals of the Blue the Right Hon. M. F. Fitzhardinge, Lord Fitzhardinge, G.C.B., and Sir F. Moresby, K.C.B. to be Admirals of the White.

Vice-Admirals W. Walpole and B. M. Kelly, on the Reserved List, to be Admirals on the same list.

Vice-Admiral of the Red Sir W. H. Bruce, K.C.B., to be Admiral of the Blue.

Vice-Admirals W. J. Mingaye, Sir C. C. Parker, Bart., and J. E. Walcott, on the Reserved List, to be Admirals on the same list.

Vice-Admiral of the Red Sir J. H. Plumridge, K.C.B., to be Admiral of the Blue.

Vice-Admirals of the White Sir H. J. Leeke, K.C.B., K.H., and Sir C. H. Fremantle, to be Vice-Admirals of the Red.

Vice-Admirals of the Blue H. Smith, C.B., and J. A. Duntze, to be Vice-Admirals of the White.

Rear-Admirals of the Red the Right Hon. Lord E. Russell, C.B., and H. W. Bayfield, to be Vice-Admirals of the Blue.

Rear-Admirals of the White W. Ramsay, C.B., and Sir B. W. Walker, Bart., K.C.B., to be Rear-Admirals of the Red.

Rear-Admirals of the Blue C. Eden, C.B., and the Hon. C. G. J. B. Elliot, C.B., to be Rear-Admirals of the White.

Capt. the Hon. G. F. Hastings, C.B., to be Rear-Admiral of the Blue.

Capt. R. H. Stopford to be Rear-Admiral on the Reserved List.

Capt. the Hon. S. T. Carnegie, C.B., to be Rear-Admiral of the Blue.

Vice-Admirals H. Patton, A. Montgomerie, J. W. Montagu, G. C. Gambier, Sir C. Burrard, Bart., and T. L. Peake to have the rank and title of Retired Admiral; and

Rear-Admirals H. S. J. Marsham, C. Crowdy, and T. Mansel to have that of Retired Vice-Admiral, in pursuance of the Order in Council of May 7, 1858.

Capt. J. Pulling has also been promoted to be Retired Rear-Admiral on the terms proposed in the *London Gazette* of September 1, 1846, but without increase of pay.

It is rumoured that the distinguished posts of Vice-Admiral and Rear-Admiral of the United Kingdom will very likely be conferred upon Sir Thomas John Cochrane, G.C.B., and Sir George Francis Seymour, G.C.B.

Captain T. Fisher is to receive the captain's good-service pension, at the disposal of the First Lord of the Admiralty, by the promotion of Captain the Hon. G. F. Hastings, C.B., to flag rank.

Captain Alfred P. Ryder, private secretary to the Duke of Somerset, has been appointed to the office of Controller-General of the Coastguard, in the room of Captain the Hon. Swynfen T. Carnegie, C.B., promoted to flag rank. Captain R. Hall, late of Her Majesty's ship Termagant, succeeds Captain Ryder as private secretary to the First Lord.

The presentation of new colours to the 76th (Hindoostan) Regiment took place at Aldershott on Wednesday last, in the presence of a large number of spectators. After the Rev. N. Huleatt, principal chaplain of the camp, had read prayers, Lieutenant-General Pennefather presented the colours to the regiment. In doing so he reminded the troops of the reputation their predecessors had won for them, and congratulated Colonel Smyth on the present state of the regiment, the gentlemanlike tone of the officers, the active, anxious, intelligent conduct of the sergeants, the manly bearing and admirable *esprit de corps* of the soldiers. On the conclusion of the General's speech, Colonel Smyth briefly but earnestly thanked him for the honour conferred upon the regiment. After the ceremony, the various companies dined together, and in the evening the non-commissioned officers gave a ball, at which 150 were present, including Colonel Smyth, C.B., Colonel Brewster, C.B., and Major Cator.

Valorous, 16, paddle, Captain C. Forsyth, at Devonport, was swung for the adjustment of her compasses, on Tuesday, and embarked a draft of boys from the Implacable, training ship, for distribution among the squadron at the Cape of Good Hope, for which station the Valorous will shortly sail.

Leopard, 18, paddle-wheel steam sloop, Captain Charles T. Leckie, arrived at Simon's Bay 84 days from Plymouth, and sailed for the East India station on 22nd February last. We are glad to hear that this is one of the most comfortable ships in the service, the captain being very much liked by officers and crew.

The 96th Regiment, which left Portsmouth on February 15, on board the Himalaya, arrived at Simon's Bay, Cape of Good Hope, on March 12, after a splendid passage of 25 days. There were five births on board and one death.

Captain Harrington, of the Plymouth division, has been placed on the half pay list of his rank on his own application. The corporal and twelve gunners, Royal Marine Artillery, joined head-quarters, Plymouth division, on Tuesday, from Portsmouth, and ten privates, Royal Marine Light Infantry, embarked on board the Valorous, as supernumeraries, for the Cape of Good Hope station.

An Admiralty return of the cost of iron-plated ships fitted for sea gives the following figures:—The Warrior, £377,373; the Black Prince, built by Messrs. Napier, Glasgow, £373,899; the Resistance, built by Messrs. Westwood, Baillie, and Campbell, Poplar, £257,848; the Defence, built by Messrs. Palmer, Jarrow, £252,898.

Rear-Admiral of the Blue Charles Eden, C.B., one of the Lords of the Admiralty, arrived on Saturday, from Torquay, at Devonport, and inspected the training ship Impregnable, 78, Commander Francis S. Tremlett; the Canopus, 8, Commander Charles F. F. Boughey; the training ship Implacable, 24, Commander Samuel B. Dolling; and the guardship of the steam reserve the Indus, Captain Astley C. Key, C.B., in Hamoaze. His Lordship dined at Mount Wise with Port-Admiral Sir Houston Stewart, K.C.B., and left Plymouth by the morning express. The paddlewheel steam-sloop Argus, 6, Commander J. Lewis Moore, with his Lordship's secretary, which arrived at Devonport, was preparing to leave yesterday afternoon for Portsmouth.

The sailing transport Louisa, Captain Tillman, arrived at Spithead from Ceylon and the Cape of Good Hope with invalids. The Louisa left Columbo January 3rd, and arrived at the Cape of Good Hope on Feb. 25. She left on the 28th, bringing also as passengers Mrs. Colonel Hadden, and Mr. and Mrs. Mortimer. The ship experienced moderate weather. She left the Adamant with troops on board at the Cape of Good Hope, bound to Spithead. The invalids will be removed to the new hospital at Netley in the Pigmy.

LONDON, SATURDAY, MAY 16, 1863.

THE DEFEAT AT SHAOU-HING.

COLONEL SYKES, who is famed in the House of Commons for the number of useless questions which he asks, has certainly not done unwisely in referring to the recent defeat at Shaou-hing and to Captain DEW's conduct in employing part of the force under his command in an attack upon that town. As far as we are able to judge, Captain DEW's presence on that occasion was most unjustifiable. What business had that officer to be there at all? As a private spectator he was simply exposing himself to unnecessary risk, but as an officer of the British navy, it is absurd to suppose he was there as a spectator; and if he took upon himself to advise or command, he was compromising our authorities in China, and acting in bad faith towards the rebels. Shaou-hing, as Colonel SYKES truly observed, was a considerable distance beyond the thirty mile radius, and we are distinctly told that Captain DEW was actively engaged in the assault, that he took up a 68-pounder in his train, and that after the repulse, a sap was made and fortifications thrown up under his superintendence. This is not the first time that Captain DEW's conduct has called for severe comment, but in the present instance the sad loss of Lieut. TINLING seems to render it imperative that he should either—if that be possible—justify his conduct, or be publicly reprehended for it.

We can scarcely believe that Captain DEW's official statement when it arrives, will be such as to exonerate him from blame, yet it is but just that we should wait for that statement before passing a final judgment. This much, however, is clear, that the strict orders said to have been issued from the Admiralty must be rigidly enforced, unless we are prepared for interminable difficulties and broils while carrying on our commerce in China. The Celestial Empire is not a field in which British bravos or swashbucklers can display their pluck and daring and kill, or be killed, without injury to their country. If, as Mr. KINGLAKE affirms, "there lurks in the men of these isles a vestige of man the savage," China is not the place in which to display that spirit with impunity. Our aims in China are, or ought to be, peaceable. It is in the quiet pursuits of commerce that we have established a position in the empire. That position, indeed, has not been won without bloodshed, but in every instance war has been thrust upon us; our merchant princes in the Far East have neither desired it nor provoked it. Their interest is to be on friendly terms with the Government and the people, and to avoid everything which may affect the *entente cordiale* which is so essential to the furtherance of trade. If it be impossible to avoid taking a side, and acting with vigour against the rebels, at least let it not be said that we are behaving in bad faith towards them. The Taipings understand by this time that the thirty-mile radius is to be kept clear; they know that if they venture within that charmed circle they must come prepared to fight with English soldiers; but what will they think of our word, and of our alleged neutrality, if a British officer overstrides the limits marked out by his own Government and wantonly attacks them upon neutral territory? We say nothing of the company in which Captain DEW proceeded on this ill-judged errand, except that the wanton plunder of a town on the road by the French contingent might have sufficed to convince him that the enterprise was not one in which he could legitimately take part.

The death of Lieutenant TINLING, although only a melancholy incident of the adventure, renders it imperative, as we said before, that we should receive full particulars concerning it. That young and brave Christian officer who was beloved by all who knew him, and whose loss is said to be mourned "as that of a brother," has died in a wretched encounter at which he ought not to have been allowed to be present. No blame, however, attaches to him for following, with all the ardour of his nature, the footsteps of his superior officer, but we presume, with the *North China Herald*, "that Captain DEW will be held "responsible for this gallant young officer's loss to the "British navy."

OUR TRADE WITH THE PHILIPPINES.

Of the various foreign countries of the Far East, with which we carry on trade, there are none which we watch with greater interest than the Philippines, with which our direct trade is steadily increasing, although not at so rapid a rate as the numerous staples there to be obtained would lead us to anticipate. If we trace back the statistics of our commerce for the last five or six years the following are the results:—

	Value of Exports of British Produce.	Computed value of Imports.
1857 ..	£534,564	£881,648
1858 ..	541,475	745,178
1859 ..	685,490	756,576
1860 ..	674,235	606,798
1861 ..	784,564	846,369
1862 ..	448,574	—

We also ship foreign and colonial goods to the value of £6,000 or £7,000 a year.

In glancing at the direct imports we receive from the Philippines, we notice that there has been an increase in copal, which now reaches about 1,400 tons, but a total cessation of the supplies of mastic. This, we suspect, arises from a confusion of names for one and the same article. Manila hemp has greatly increased in supply, our imports which in 1860 fell to 77,538 cwt., rose in 1861 to 209,000 cwt., and were last year 173,478 cwt. Indigo has advanced to nearly 900 cwt.; the supplies of sapanwood have declined; hides have dropped to a mere nothing; mother-of-pearl shells keep steady at 2,000 to 2,500 cwt., and tortoise-shell comes forward in larger quantities, the exports reaching 4,000 to 5,000 lbs.; manufactured tobacco and cigars are declining, but sugar has largely increased, now averaging 400,000 to 500,000 cwt.

The chief exports from here to the Philippines are cottons, linens, and leather. Last year the cotton exports were but half the usual amount.

We possess more official information respecting the outports and stations of the Philippine group through our consuls than we do of Manila, the seat of Government and the principal port. We are therefore glad to be able to fall back on the latest report of Mr. LONEY, British Vice-Consul at Polillo, for some interesting official details as to the progress of trade in the Archipelago. The excellent harbour and advantageous position of Polillo as the central port of a group of fertile islands, numbering 2,000,000 of inhabitants, itself the chief tradal market of the most populous province of the Philippines, and of an island containing 800,000 souls, are of themselves sufficient to command public attention.

The principal articles of export of interest in connection with foreign markets are sugar, sapanwood, hides, hemp, and paddy; leaf tobacco is also exported to a considerable extent, but entirely on Government account. The export of sugar from Polillo last year was about 120,000 tons, an increase of 10,000 or 11,000 tons in seven years. Probably no sugar district with similar means can show the same rapid increase. There are other products which are capable of great development, such as coffee and cotton, and (if the present unfortunate monopoly were abandoned) tobacco. The Polillo crop of tobacco has in some years reached 30,000 cwt. There have been instances of quantities of the leaf being destroyed by natives dissatisfied with the classification. What is rejected by the Government classifiers is not allowed to be sold for export. The cotton plant grows vigorously in almost all the districts of Panay and Negros, and of various quality, some of remarkably good staple, but it is not yet produced in sufficient quantity for export. About 300 tons of cotton are annually brought from the province of Batangas, near Manila, and used in the native looms. It is likely that agriculturists will now give much more attention to this, one of the most promising products of the island, to the culture of which recent events in America have given an increased interest. Among the minor articles of shipment are buffalo horns, cowries, rattans, mat bags, beeswax, cocoa, arrowroot, wheat, vegetable pitch, beche de mer, dried vegetables,

Digitized by Google

beans, &c., cocoanuts, deer skins, timber (including ebony and fine woods of various kinds), and a large quantity of valuable goods of native manufacture made of the fibres of the pine-apple leaf, and of silk, cotton, and hemp. Of sapanwood the shipments are about 2,200 tons. Hemp, being mostly brought from the neighbouring islands as returns for paddy and native goods, is shipped to a small extent from Polillo, in irregular quantities of from 100 to 250 tons per annum ; but in case of a direct demand for a foreign market, large quantities could be obtained from Leyte and Samar at considerably cheaper rates than those current at Manila. Steam gun-boats are now replacing throughout the Archipelago the heavy sailing boats previously employed. These have in some measure promoted correspondence and communication with the neighbouring islands and provinces, and are likely to prove much more effectual in repressing piracy than the former gunboats. They have had several encounters with the pirates of the Sooloo seas, and have brought in many pirate "pancos" and other smaller boats. These pirates arrive annually in the Philippine group from the Sooloo Sea, particularly from the island of Tawi Tawi, reaching Panay and Negros about May, and continuing their depredations until the change of the monsoon enables them to return about October or November.

Though communication with the neighbouring islands has been facilitated by these steam gun-boats, a more rapid means of intercourse is still a great desideratum. At times, intervals of more than a month elapse without news from the capital, which is the centre of all advices bearing on trading interests, and gives the standard of value for all the products of the Archipelago. This slowness of intercourse acts most prejudicially in every way. A company at Manila is about to run a steamer between that port, Polillo and Zebu, and the establishment of a line of this nature will be very advantageous. It is also stated that the Government intend to carry on a monthly communication by steam with those more important provinces, an assertion to which the number of steamers arriving from Spain seems to give confirmation. The offers of subsidy made by the Government some time ago for the establishment of merchant steamers to take the mail to all the provinces were not accepted, owing to the number of conditions with which the contracts were hampered ; but they showed that the Government were alive to the rapidly-growing tradal importance of the provinces, and the consequent necessity of establishing prompt and regular communication.

The opening to foreign trade of the port of Zebu will, doubtless, prove as beneficial as has been the case at Polillo. Zebu affords great facilities for the supply of cargoes of sugar, hemp, and other valuable products, obtained, besides what the island itself furnishes, from the coast of Negros, from Leyte, from the populous island of Bohol and from that of Samar. It has also the great advantage of possessing the extensive and valuable coal mines, which are now at length being brought into use.

The formation of a new Government for the extensive island of Mindanao (the future importance of which it would be difficult to over-estimate), and the possessions contiguous thereto, is also an important step. The establishment of the seat of this Government at Cotabato in the great river of the Mindanao, which runs through a populous fertile and cultivated region, seems to be a judicious selection of locality, and calculated to develope the resources of an island of such great natural productive powers. The development of trade at Mindanao will materially react beneficially on that of Polillo and the surrounding islands, from which the Mindanao districts are separated by so unimportant a distance. The reduction of duties on foreign goods at Zamboang is another indication of a more liberal commercial policy.

The Government are very wisely abolishing most of the monopolies which have hitherto checked progress and fettered trade. Thus a royal order, has permitted the general manufacture, sale, and export of rum since 1st of January, 1862. Planters have in consequence been providing themselves with stills from Europe. It is understood to be also in contemplation to abolish the monopoly of the native wine obtained from the cocoa and nipa palms. The prices to be given by the Government to growers of tobacco, and the per centage granted to the functionaries employed in its collection and classification, have been increased. It would seem evident from many indications that the freedom of this very important article is now regarded as a question of more or less time only, the principle of the desirability of placing it in the same unrestricted position as in Cuba, being admitted both at Manila and Madrid.

It is in contemplation to place a lighthouse on the Seven Sins Rock, and one on Point Bondulan, on the island of Guimaras. Orders to this effect have been issued by the Government, and this measure and the projected laying down of buoys along the channel, near the Iguana Bank, and the Otong Shoal, will render the navigation still safer. Polillo, with these improvements, will be one of the most easily accessible, as it now is the securest port of the Philippine Archipelago.

Literature.

Mr. Kinglake's narrative of the "War in the Crimea" has already reached a third edition, yet it is curious that he does not alter in the text the obvious blunders which have been pointed out by his reviewers. In one case he describes Major Norcott as performing an action with which that gentleman has shown he had nothing to do, but instead of properly correcting the error in the text, Mr. Kinglake in a note asks his readers to substitute Lawrence for Norcott whenever the latter name appears. The great liberal, and conservative organs, the *Edinburgh Review* and the *Quarterly Review* have both published articles not at all complimentary to Kinglake's work. While allowing that the writer displays much ability, they aver that his book is full of prejudices, perversions of fact, careless misrepresentations, and statements as untrue as they are ungenerous with regard to our allies. Perhaps the essay in the *Quarterly* is the more able of the two, as it is evidently written by a man acquainted with all the military details of the war. The writer says :—"We are compelled to leave unexposed many of the inaccuracies of this most audacious history. A volume would be required to refute Mr. Kinglake's blunders, which, ludicrous when he is describing military operations on a great scale, become positively offensive when he condescends to speak of individuals. We have hitherto prided ourselves upon the impartiality of our historians, especially in a manly and generous treatment of other nations, even when our enemies ; Mr. Kinglake has deprived us of that privilege. We can no longer protest against the historic perversions of a Thiers, or the vain-glorious boastings of a Bazancourt. The answer will be, 'You English have your Kinglake.'"

Both the great reviews have articles on Colenso, the *Edinburgh* taking up generally the subject of Biblical inspiration, and the *Quarterly* discussing in an erudite manner the second part of the Bishop's work, and utterly destroying the foundation on which his arguments are based. Certainly these two earliest of the Quarterlies maintain their ascendancy in spite of younger rivals ; so also do some of the half-crown Monthlies, such as *Blackwood* and *Frazer*. In the long list of shilling periodicals, which, by the way, increase in number continually, the *Cornhill* and *Macmillan* take the highest rank. This month the *Cornhill* has an interesting article entitled "From Yedo to London with the Japanese Ambassadors," and a most able and cleverly exaggerated eulogium on "Chess," which is characterised as the best of all games for everybody. In reply to this *The Mirror* (a new and admirable weekly journal, conducted by Mr. Dallas, late principal reviewer of *The Times*) takes up the cudgels for Whist in a humorous article, which is in itself worth the price of the whole paper. In *Macmillan* for this month Ruffini continues his "Vincenzo, or Sunken Rocks ;" but another tale is sadly needed to keep up the life of the periodical, which, ably as it is conducted, but seldom affords *pabulum* which can be easily digested after dinner. While on the magazines we may mention that the *National* has an article on "British Policy in Japan," the writer of which holds that, for political rather than for commercial reasons, it is impossible, come what may, for us to withdraw from the country,—and that two new claimants for public favour have appeared this month. One of these is entitled *The Victoria Magazine*, and is chiefly remarkable as being set up by female compositors, and printed by Emily Faithfull, printer and publisher in ordinary to Her Majesty ; the other is of a more ambitious character, and has adopted the title of *The New Review*. It will be published monthly, at 2s. 6d., by Simpkin, Marshall and Co. The politics of the journal are Liberal-Conservative, and the first number issued this month contains an able diatribe against what the writer terms "Fossil Whiggism," a "Review of the Italian Question," "Sensation Pictures," and other vigorous articles. The journal will contain no tales or poetry, but will occupy the position of a regular review.

THE DEATH OF LIEUTEMANT TINLING.

The *Bath Chronicle* writes:—"More than a week has now elapsed since a telegraphic despatch from Suez announced, with cruel abruptness, that Lieutenant Tinling, son of the Rev. E. D. Tinling, one of Her Majesty's Inspectors of Schools, had been killed in an unsuccessful attack upon the Taiping fortifications at Shaou-hing, and very deep, general, and heartfelt has been the sympathy felt in this city with the afflicted family of this gallant young officer. Any faint hopes which may have been entertained that a mistake in the name might have been made, or that, though wounded, he might have been prematurely announced as dead, were yesterday dissipated by the arrival of letters from China. In a letter from Captain Dew, R.N., of the encounter, which we have been permitted to read, is the following account of the sad event:—'Your son, when wounded, was up the country with me, and present at an attack on a rebel city called Shaou-hing. I had repeatedly cautioned him against exposing himself to the enemy's fire, but he did not seem to know what fear was, and while watching with his opera glass the effect of our fire on the wall a small bullet struck him in the back of the head. I saw the bullet extracted, and sent him down to the ship at once. For quiet, his messmates removed him on shore to Mr. Hewlett's, a Consular officer and his great friend, and when the bad symptoms set in, his messmates never left him day or night. Mr. Moule, a most excellent missionary clergyman, was ever with him.' And he adds, 'the grief of his men and shipmates could hardly be less than your own. Both to myself and all the *Encounter's* men he had endeared himself by his many good qualities, and above all his chivalrous gallantry; and the gloom thrown over all by his death I have no words to express.' Dr. Irwin, who attended him during his last days, says,—"He had endeared himself to all of us. His gallantry on several occasions was the theme of universal admiration, and we mourn his loss as that of a brother. It is a great consolation to us that his faith was firm in Christ, and that he has but changed this world for a better." The following account of Lieutenant Tinling's career appears in the same journal:—"Lieutenant Tinling was born in May, 1842, and was appointed a naval cadet to Her Majesty's ship *Pearl* in 1856, in which ship he served on the Pacific and China stations till June, 1859. He returned to the China station in the autumn of that year, in the *Imperieuse*, Captain Maguire, R.N., passed for mate in February, 1862, and fifteen hours afterwards was made acting lieutenant, when he was transferred to the *Encounter*, Captain Dew, R.N., then lying at Hong Kong. At the capture of Ningpo, in May, Mr. Tinling, then acting-lieutenant, distinguished himself so much and was so favourably mentioned in his captain's despatches that the Admiralty, upon the receipt of them, promoted him at once to the rank of lieutenant. At the attack on Fungwha in last October, Lieutenant Tinling was hotly engaged, and was struck by a spent ball. When Ward's men refused to resume the attack he, with another officer, brought up a ladder, which he mounted, but he was overpowered and obliged to retire. Commander Bosanquet, of the *Flamer* gunboat, having been wounded on this occasion, Lieutenant Tinling was placed in command of the *Flamer*, and continued in her for nine weeks, after which he rejoined the *Encounter*, and on the 19th of February, 1863 (exactly one year from the day on which he had been made acting-lieutenant), he received his fatal wound."

THE FRENCH LINE TO CHINA.

The following description of these steamers has been published in the *Morning Herald*:—"A gentleman who cast his fortunes on board the *Labourdonnais*, which left Marseilles on the 19th of January, describes a series of discomforts and disasters such as we fancy have never been experienced during any one single trip in a "P. and O." ship. The first mishap was the fall of a spar, by which a lady passenger narrowly escaped being killed. Then it was found necessary to leave the anchor, the—appropriately named—donkey-engine refusing to work. After this the engine twice broke down, and owing, it would seem, to inefficient provision against bad weather, there was a great destruction of crockery and cabin furniture. The ship was a day late at Alexandria, and another day was then lost in Egypt through the mismanagement of some person or persons unknown. At Suez the *Alphée* awaited the passengers; and she proved, contrary to promise, to be a miserable *marcheur*. Her bottom was foul, and her engines in full working disorder, so that there was nothing but mishaps during her progress, which was so slow that she was passed in the Red Sea by the "P. and O." vessel, bearing the mails, which left Suez twelve hours after her, the mails themselves having been despatched from Marseilles fifty-four hours after the departure of the *Labourdonnais*. After leaving Aden the French pilot managed to run upon a sand bank; then the awning was set on fire, to the imminent danger of the ship. By this time the reckoning became uncertain by fifteen miles, so that she reached Galle by a fluke. In that port there was a detention of three days, owing to another ship belonging to the same company having broken down after leaving Calcutta. These and other mishaps occupied the luckless *Alphée* until her arrival in the Hooghly. But the list by no means includes all the inconveniences suffered by the passengers. Not for them was the miserable expedient of drowning their private wretchedness in the pleasures of the table. The table had no pleasures, it had only pains. All on board—French as well as English—joined in utter condemnation of the cookery, which, even if good, could not have disguised the bad materials employed. Moreover, the quantity supplied, as well as every accessory accommodation, was found lamentably insufficient. And if the food was bad, the drink was even worse. What would "P. and O." passengers say to vile Marsala, doled out as if it were Imperial Tokay, relieved only by the commonest *vin ordinaire*, and a coarse, fiery *eau de vie*, manufactured from whisky and barley! This was the entertainment provided for the first-class passengers. Into the agonies endured by the second we will not enter. This much is plain: that however the other discomforts of the journey may be ascribed to the youth and inexperience of the company, the table arrangements cannot be placed to that account. Indeed, the opinion generally entertained seems to be that things are likely to get worse instead of better, as the large subsidy received from the Government renders the company so independent of the public as to be quite indifferent to complaints. Instead of floating hotels, indeed, as the "P. and O." ships are called, those of the Messageries Imperiales are freely likened to floating *cabarets*, where smoking is tolerated everywhere, and cleanliness almost entirely disregarded. It has frequently been urged upon the "P. and O." Company that the board—and more especially the wines, &c.—should be made a distinct charge from the passage, but the plan is generally found unacceptable to Anglo-Indians, who dislike disbursements in detail, and especially to ladies, so many of whom travel alone, or with their families. The contract system has, therefore, been found preferable, even by the French company, so that the passengers have not the remedy against being poisoned, that taking their meals by the *carte* might possibly supply. Unless, therefore, the Messageries Imperiales make considerable alterations in their arrangements it appears that the British grumbler will be driven back perforce to the "P. and O.," and that the Gallic grumbler, however patriotic, will be induced to follow his example.

COURT OF QUEEN'S BENCH.

THE CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA V. RICH.

Mr. Bovill, Q.C., moved for a rule calling on the plaintiffs to show cause why the defendant's attorney should not be at liberty to inspect and make extracts from certain documents in an action by the plaintiffs against the defendant, who was one of their managers in India, charging him with having mismanaged the business of the bank in having improperly given credits, and other matters of that description. The documents consisted chiefly of correspondence between the head office in London and the representatives of the bank in Calcutta relative to the charges, and after the defendant had left the bank and the disputes had arisen. One portion had been furnished, but the part refused was kept back on the ground that it was a correspondence between the officials in England and India exclusively with reference to this suit. The Court granted the rule.

CHINA WESLEYAN MISSION BREAKFAST.—The annual public breakfast meeting on behalf of the Wesleyan Mission to China was held on the 2nd inst. at the London Tavern; the Hon. A. M'Arthur in the chair. The speeches after the breakfast were very interesting, but we can only find space for a few salient points. With reference to Chinamen in the colonies, the Chairman said: "The gold attractions have induced many of them to visit California and the Australian colonies. I regret to say that the treatment which they have sometimes received has been so injurious and un-Christian-like as, I fear, almost to countenance their idea that we are indeed barbarians. And yet we need scarcely wonder that Americans in California and our own countrymen in the colonies should dislike the Chinese, and manifest strong repugnance to seeing multitudes of them flocking to their shores. We have in the colonies, as you have, unhappily, in England also, a class of men who are destitute of religious principles, who are intensely selfish, and who suppose that every person and everything is likely to interfere with their own interest. Such men, of course, oppose the Chinese; it may be from the natural antipathy of race, or it may be from mistaken motives of worldly policy. We have, however, many thoughtful, wise, and good men, who entertain no unfriendly feeling towards the Chinese, but who, looking at the teeming millions of China, and looking at the sparseness of our European population in the country, dread the idea of being inundated by hordes of idolatrous people and of exposing our rising youth of both sexes to the contaminating influences by which they would, under such circumstances, be surrounded. But while the Chinese have been on some occasions cruelly treated, I am happy to say these immigrants have had the protection of the Government, and they have not been altogether neglected by the Christian churches of Australia. I am not in a position to say definitely what has been done, nor what agency has been employed by other Churches; but I can inform you that in connection with the Wesleyan Missionary Committee, an Australian Chinese Mission has been established, and a converted Chinaman is labouring with some effect among his countrymen in Victoria."—Mr. Dodds, of the Royal Navy, spoke as follows:—"I think I can best serve the interests of this association by stating the different incidents which have occurred during the course of my service in China. I left England in 1859, and arrived on the station in 1860. I was very shortly after stationed at Canton, and having been furnished with a letter of introduction to Mr. Cox, I took an early opportunity of endeavouring to find him out. After some difficulty, and after taking a lengthened cruise on the Canton river, I was safely landed at our Mission, which is by the river side; but not being able to speak in the language, for some time I was in a difficulty, surrounded by natives who looked upon me with wonder. But presently I heard a murmur of voices, and looking forward I saw a large room, where I found an English lady, surrounded by a number of Chinese girls of various ages, sizes, and conditions. This, I afterwards found out, was our girls' school, conducted by Mrs. Piercy, and the sight of an English lady, under such circumstances, conversing in what seemed such an unpronounceable language, formed a very interesting picture. This was my first insight into missionary life. I soon became acquainted with Mr. and Mrs. Piercy and the other members of the Mission and their friends. Mr. Cox, I learned, was absent in England. Our missionaries at Canton not only carry on the work of schools, and the labour of imparting instruction to the heathen, but they also perform another very important duty, and that is to exercise a good influence over foreign residents in Canton. This was especially the case during the occupation of Canton by our naval and military forces. I knew an officer of the garrison and several men who were converted during their stay in Canton through the instrumentality of our missionaries. The missionaries of Canton have weekly prayer-meetings held on Thursday evenings at the houses of the different missionaries in rotation, with the view of imploring the Divine blessing on their labours, that their own hearts may be preserved, and that they may be assisted in their work by having the Divine blessing upon them. These meetings are most punctually and energetically kept, and I found them very interesting indeed. In Mr. Piercy's house at Canton there is also Sunday evening service, conducted by the missionaries in rotation, and this is a great comfort to those foreign residents and naval and military people, whether officers or men, who have any taste for better things. So that it is our interest by a two-fold motive to support our missions, not only for the Chinese, though there certainly they were more especially required, but for other residents.

Digitized by Google

After leaving Canton, I went to Swatow, which is a very disagreeable, unhealthy kind of place, and the people there have a greater antipathy to strangers than any other part, and the only piece of information that I picked up was that Garibaldi had visited it in the character of a master of a vessel. We were not there very long, being soon ordered on to Amoy. There I found the missionary work in a very flourishing condition, and the London and Presbyterian Missionary Societies have some very interesting stations there. In company with the Rev. C. Douglas and W. Swanston, of the Presbyterian Mission, I went upon an excursion of about twenty miles up the river. The country was very pretty, and upon our arrival we were very warmly welcomed by the Chinese Christians who had been expecting us, and that, to my mind, was quite a new phase of the Chinese character. After leaving Amoy we went to Foo-chow, and there I found a very flourishing Methodist Mission, not an English Methodist Mission, but a Methodist Mission nevertheless, and here I had a greater insight into the manners and customs of the Chinese Christians as compared with the heathen Chinese than at any other place. Amongst other incidents I attended a Love Feast. It was an extraordinary Love Feast, for it was a gathering of all the members of the churches within a reasonable distance, and the Chinese were very liberal in accommodating those who came from distant parts. It was a most interesting meeting, and the Chinese spoke with much feeling. After a time, my friend Mr. Gibson, the missionary, introduced me as an English *Mimi*, which is the word there for Methodist; and I was requested to give my experience, and of course I had to do it through an interpreter, but I had the same story to tell. It was the love of our Saviour Jesus Christ. Afterwards, in the course of the day, I partook of the sacrament, and I really enjoyed the service exceedingly. While I was at Foochow, Mr. Gibson, the missionary, introduced me to a literary character, who had been for some time a hearer. I suppose he thought he would like to do a good stroke of business, and he volunteered his services to produce native converts at the reasonable rate of a dollar a head. He was evidently under the impression that we undertook nothing unless a profit was made, and I suppose he thought that the missionaries would have such a liberal per centage upon the converts Parkes, missionary in the West Indies, said:—"It is now just thirty-two years since I entered the Mission work, and twenty-five of those years have been spent in the Mission field. I esteem it to be the highest honour and the greatest happiness that I could have enjoyed, to be engaged in this work, and the longer I am connected with it, the more highly do I prize the honour and happiness which God has conferred upon me. I feel it to be an additional honour that God has called two of my sons to this work, and both to the China Mission. I would not wish anything more honourable for them than that which God has given them. Whilst I am labouring, thousands of miles away in the West, they will be labouring at a still greater distance in the East; and if, while I am endeavouring to win souls to Christ in the West, they are doing the same in the East, we are engaged in the same work, and looking for the same recompense and reward. I have no doubt about the success of the Mission to China. Our West India Mission is insignificant, compared with the great field to which my sons are appointed; but there we have set before us the example of success. For there, there was a beginning of the Mission. There was a first convert there; but now we count something like 50,000 members. And in China, though now it is 'the day of small things,' the little one shall become a thousand! I have no doubt of the adaptation of the Gospel to man universally, in all the varied circumstances of his existence; and only let the truths of Christianity in their simplicity and integrity be proclaimed by men full of the Holy Ghost and of faith, and much people shall be added to the Lord. I thank God that I am permitted to be present on this occasion, and I rejoice with you in the certain prospect of the subjugation of the world to Christ."

WESLEYAN MISSION IN CHINA.—The *Watchman*, the organ of the Wesleyan Methodists, writes as follows under the heading of "Twelve Years in China":—"Such might be the title, if anyone were now to write a narrative of the Wesleyan Methodist Mission to China, commenced by the Rev. George Piercy, whose name stands in the Minutes of Conference as appointed to Canton in 1851. In those of the year following, will be found the appointment of the Rev. Josiah Cox to the same place, which is still the head-quarters of the Methodist 'District of China,' comprising two or three 'Circuits' on the seaboard, and one in the centre of a nation which the last and most exact inquiries compel us to believe to be equal to a third of the living generation of mankind. Mr. Piercy still remains at Canton, with his accomplished wife, whom, thousands of miles as she is away, voyagers returned from China and impressed into the service of our Anniversary Meetings, cannot, it will be observed, help mentioning with grateful respect. But Mr. Cox, invited to Nanking by a once hopeful friend of his, of whom little good has been heard since he became one of the acknowledged Taiping Kings, has not been lured so far North without Providential guidance. He has, in truth, gone much further than he expected, and has fairly got into the rear of the rebellion, at one of the three vast commercial cities near the Tung-ting Lake, in the heart of the Empire, and more than a third of the distance, as a migratory bird would fly, from the junks in the harbours of Chusan to the sources of the two great Chinese rivers in the mountains of Thibet. At Hankow, in the commercial centre of the valley of the Yang-tse-kiang, Mr. Cox has secured Chinese soil for Methodist Mission-premises, and asks for six labourers among a population greater than that of 'All the Russias.' The whole heathen world, he says, cannot produce another field so great, so inviting, so accessible. For a beginning, in such a country as China, this is most encouraging. Considering the prejudices of the people, the difficulty of their language, their intestine commotions, and their quarrels with England and France, it is surprising and gratefully to be acknowledged."

CHURCH MISSIONARY SOCIETY.—The annual meeting of this society was held on the 5th inst., at Exeter hall; the Earl of Chichester in the chair. The Rev. John Venn read the report of the committee for the year, which was of great length, embracing the operations of the society throughout the world, which on the whole had been very successful. The details respecting the missions to Africa, especially to the territories of the King of Dahomey, were of a very interesting character. In India great progress was being made, the mission stations have increased considerably in number, and the converts to Christianity in proportion. Upwards of £50,000 per annum is now contributed to Christian missions in India by the resident European Christians in that country. In China the mission work has been much interrupted, owing to the war raging between the Taipingites and Imperialists. In New Zealand, North Western America, Ceylon, Mauritius, and Mediterranean, the mission work has been more or less successful, affording on the whole much encouragement. The financial statement showed that the total income for the year 1862 had been £131,217, being about £7,000 less than that received during the preceding year, which had arisen partly from a decrease in legacies, and partly from a falling off in the receipts from district associations, owing principally, it was believed, to the distressed state of the manufacturing districts. The expenditure had amounted to the sum of £136,400, which had not only absorbed the balance left on last year, but leaves a deficiency of £2,400.

SOCIETY FOR THE PROPAGATION OF THE GOSPEL.—The annual meeting of this society was held on the 30th ult., in St. James's Hall. The Archbishop of Canterbury presided. The secretary read the report of the society, which showed that the voluntary income for the year was £93,326. In the colonial division of the society's work, great liberality was shown. Thus, in the poor diocese of Nova Scotia, a sum of upwards of £2,000 had been raised towards the permanent endowment of the diocese, and the society had advanced to the colony £1,000 in aid of its efforts. In New Brunswick the same gratifying result had been witnessed, and the clergy of the district had subscribed from their small incomes the sum of £1,200. The same remarks were applied to Toronto and the western districts of Canada. In the West Indies, also, increased efforts had been made. The reports of the Bishops of Colombo, Borneo, and of the Australian colonies, were referred to as affording evidence of the progress of the society in all parts of the world to which its operations were directed. The total number of missionaries connected with the society was 488, being an increase of thirty-six during the last six months. The society has now been engaged for 162 years in endeavouring to plant the Church of Christ among our countrymen abroad and among the heathen. From North America (1701) its operations have gradually been extended to the West Indies (1701), Australia (1795), India (1818), South Africa (1820), New Zealand (1839), Ceylon (1840), Borneo (1849), British Columbia (1858), and Honolulu (1862). When the society was first founded there were probably not twenty clergymen of the Church of England in these lands. There are now congregations under the pastoral care of upwards of 3,000 clergymen.

BRITISH AND FOREIGN BIBLE SOCIETY.—The fifty-ninth anniversary meeting of this society was held at Exeter-hall on the 6th inst. The attendance was very large. The Earl of Shaftesbury presided. The report stated that the number of copies of the Scriptures issued during the past year was 2,133,860. The total issues of the society from its commencement to the present time amounted to 43,044,334 copies. The receipts for the year ending March 31st, 1863, from ordinary sources of income, was £157,990. The sum of £703 had been received for a New Testament fund for China, and £57 for the special fund for India. The total expenditure of the year amounted to £150,539. The meeting was addressed by the noble Chairman, the Archbishop of York, the Earl of Harrowby, the Rev. Dr. Tidman, the Bishop of Carlisle, the Bishops of Mauritius and Melbourne, and others.

CHINA WAR (VOTES OF CREDIT).—A Parliamentary return just issued shows that several votes of credit in the years 1859-60, 1860-61, and 1861-62, on account of the last China war, amounted to £4,680,000. The balance remaining in the Paymaster-General's hands is stated to be £28,097. The return includes a statement "of all claims made by the Indian Department for expenses on account of the last China war; the amount thereof repaid out of the vote of credit, and the balance remaining unsettled." The total amount of these claims is stated at £2,256,817, from which is deducted "amount of credits" allowed for stores returned and other receipts, exclusive of money advances out of the Treasury chest, £109,720; making the total amount of claims, £2,147,097. From this is also deducted £144,245 "amount included in claims (for wear and tear of ships, &c.) subsequently withdrawn from ditto," leaving the amount £1,962,852. The "amounts paid on account of the foregoing claims" are stated at £1,956,763, showing the amount still unsettled to be £6,089.

COMPETITION FOR THE INDIAN CIVIL SERVICE.—Of the 171 candidates who competed for 80 appointments in the civil service of India in 1862, 24 came from the University of Oxford, 20 from Cambridge, 16 from Scottish Universities, 25 from Trinity College, Dublin, and 8 from the Queen's University in Ireland. Thirty-seven were the sons of clergymen, 3 of Dissenting ministers, 3 of missionaries, 3 of physicians, 6 of surgeons, 3 of schoolmasters, 6 of officers in the Indian army, 3 of Indian army surgeons, 7 of gentlemen in the Indian civil service, 3 of magistrates, 1 of a baronet, 22 of gentlemen; and they rubbed shoulders with the sons of a baker, a shoemaker, a draper, a gamekeeper, an ironmonger, and a tobacconist, Four of these last six succeeded. Of the 44 Oxford and Cambridge men 25 succeeded; of the 16 from Scottish Universities 13; of the 25 from Dublin 12; of the 8 from the Queen's 6; of 53 who had been at the University 14. Of 96 Englishmen 42 succeeded; of 12 Scotchmen 6; of 36 Irishmen 21; of 20 from India 9; of 5 from the colonies 4. Two foreigners were unsuccessful.

ACCLIMATISATION SOCIETY OF GREAT BRITAIN.—The third annual meeting of this society was recently held at Willis's Rooms. From the annual report it appeared that the society has a balance at its banker's of £488. 18s. 6d., against one of £422. 14s. 4d. last year, besides a sum of £150, sent out to Australia for the purchase of birds and animals, and an unascertained balance in the hands of Messrs. Matheson and Co., for Chinese sheep. The working expenses of the society for the past year (exclusive of office rent, but including the salary of a clerk) had very little exceeded £100. The report then went on to allude to the various transactions during the year; to the success of the flock of Chinese sheep, and the award of medals for the exhibition of these sheep at the Battersea park show of the Royal Agricultural Society; also to the recognition of the labours of the society by the French Societe d'Acclimatation, whose committee have awarded silver and bronze medals to J. Bush, Esq., (treasurer of the British Society), and Viscount Powerscourt. A great variety of matters were then alluded to—such as the breeding of the Chinese sheep,

Digitized by Google

(both pure race and hybrids), experiments in crossing the eland and the ordinary cow, the rearing of Honduras turkeys, hybrid breeds of ducks, prairie grouse, guans, dusky ducks, &c., the introduction of the Lucioperca, and the artificial breeding of salmon. The Duke of Newcastle was elected president of the society. The council and officers of the society were then re-elected. After a vote of thanks to the chairman, the members examined with great interest specimens of the Chinese sheep, tubers of the Dioscorea Batatas, and eggs of the Honduras turkey, dusky ducks, and other birds.

THE SOURCE OF THE NILE DISCOVERED.—The following letter has appeared in *The Times*:—"Sir,—I have just received from Mr. Layard, M.P., Under-Secretary for Foreign Affairs, the intelligence, so highly gratifying to all geographers, that Captains Speke and Grant have completed their arduous journey across Eastern and Central Africa, from Zanzibar to Khartum, by the White Nile, where they had arrived in safety. As the news has only reached the Foreign Office in a telegram from Alexandria, we are yet unacquainted with the exact line followed by these enterprising men in their endeavour to set at rest the unsolved problem of ages as to the true source of the Nile. I remain, your obedient servant, RODERICK I. MURCHISON.—Royal Geographical Society's Apartments, April 28." A few days later another telegram arrived from Captain Speke, stating that he was in north latitude 14 deg. 30 min. on the Nile, and that all was well, and the Nile "settled." (Sir R. Murchison presumes its source.)

JOSEPH BROOKS, who was hanged at Newgate on the 27th ult., had served in the army during the Crimean war, and afterwards in India and China. At one time he was a military policeman at Canton.

THE French Academy of Sciences has named Admiral Fitzroy corresponding member for the section of geography and navigation, in the room of the late Sir James Clark Ross.

Monetary and Commercial.

CITY, FRIDAY, MAY 15.

The Mexican dollars brought by the West India steamer (about £80,000) have been sold at 64d. per oz., showing an advance of 1¾d. per oz. on the rate realised for the last arrival. This rise is caused by the demand for China, consequent upon telegrams lately received, quoting very high exchanges. Bar silver also exhibits an upward tendency, owing to orders in the same direction.

THE MERCANTILE BANK.

The following is the fifth report of the Mercantile Bank of India, London, and China, to be presented at the meeting, to be held on the 19th inst., from which it will be seen that the profits of the year have been £94,228 (against £60,040 in the previous year), out of which sum ten per cent., or £50,000, has been paid to the shareholders, and £40,000 carried to the credit of the reserve fund. The progress of the bank's business must have been rapid and satisfactory to have given an increase in the profits in one year of fifty per cent.

"The directors have the pleasure of presenting to the shareholders the audited balance sheet, the profit and loss account of the bank, for the year ended 31st December last. After providing for all bad and doubtful debts, and defraying expense of management at all points, the net profit amounts to £94,228. 14s. 1d., to which has to be added a sum of £40. 15s. 1d. undivided profit brought forward from the preceding year, making a total of £94,269. 9s. 2d.

"Out of the above total, £50,000 has been paid in two half-yearly dividends, making together ten per cent. on the paid-up capital of the bank. A further sum of £40,000 has been added to the reserve fund. The unappropriated balance of £4,269. 9s. 2d. is carried forward to the profit and loss account of the current year. The reserve fund now amounts to £100,000, of which £60,000 is invested in Indian Government Securities, as intimated in the last report, and it is the intention of the Court to invest the balance, £40,000, in public securities, as opportunities offer. This fund being now completed to twenty per cent. on the paid-up capital of the bank, as required by the deed of settlement, and the business of the bank being largely extended, the shareholders will be invited to revise Clause 113, with a view to increase the remuneration at present fixed for the directors. Arrangements have been made with Mr. Charles Pearson, Chartered Accountant, Edinburgh, to act as agent for the bank there, for the receipt of deposit money, and the conduct of such other business as required. The directors who retire by rotation are Mr. George May and Mr. Donald Larnach, who, being eligible, offer themselves for re-election, and the Court recommend them accordingly."

COMMERCIAL BANK OF INDIA.

The subjoined report of the annual meeting of the proprietors of the Commercial Bank of India is from the *Bombay Gazette* of April 13:—

The annual general meeting of the proprietors of the Commercial Bank of India, convened under the fifth clause of the second supplement to the deed of settlement, was held in the bank premises in Rampart-row, on the afternoon of the 9th inst., at one o'clock, agreeably to previous notice: W. T. Roper, Esq., chairman.

The order convening the meeting having been read by R. Angus, Esq., the manager, W. Trevor Roper, Esq., then read the report, which was as follows:—

"The directors have the satisfaction of reporting that the profits of the bank for the year 1862 were considerably larger than those of any year since its establishment. The gross profits of the year were Rs. 882,756-7-4. The expenses of management at head offices and branches, Rs. 241,138-1-9; Indian bill stamps, Rs. 13,696-7-6; and Income-tax, Rs. 14,666-10, leaving a nett profit for 1862 of Rs. 613,255-4-1. From this a dividend of four per cent. was paid for the six months ending 31st December, Rs. 200,000, leaving a balance of Rs. 413,255-4-1, which, added to the balance of unappropriated profit for 1861, of Rs. 1,568-3-7, left Rs. 414,823-7-8 to be carried to the reserve fund. It is with deep regret that the directors have to report two very heavy losses incurred at the Hong Kong branch through the frauds of E. L. Moses and D. S. Levi, in the one case, and of Hormusjee and Rustomjee in the other; in consequence of those losses the directors, as they announced in August last, were unable to declare any dividend for the first six months of the year. The directors opened a sub-agency of the bank at Hankow, in June last, and the result of its operations, which have principally been with its superior branch, Shanghai, has fully equalled their expectations."

The Chairman, in reply to enquiries, informed some of the shareholders that after the charter the shares would be reduced to £25, and having thanked them for their attendance, the meeting broke up.

The following is a notification in the *London Gazette* on the part of the Commercial Bank of India to be granted a Charter:—

"In pursuance of an Act passed in the session of Parliament held in the 7th year of His late Majesty King William IV. and in the 1st year of Her present Majesty, intituled 'An Act for better enabling Her Majesty to confer certain Powers and Immunities on Trading and other Companies,' notice is hereby given, that an application has been made to Her Majesty to grant a Royal Charter of Incorporation to a company to be called the Commercial Bank Corporation of India and the East, for the purpose of establishing banks of issue and deposit in Singapore, Penang, the Islands of Ceylon, Hong Kong, and the Mauritius, and elsewhere, with banks, branch banks, and agencies for receiving deposits, issuing notes, granting cash credits, making advances upon approved securities, and generally for the transaction of all business connected with the deposit, exchange, and remittance of monies or securities for money, and all other business usually transacted by bankers under the superintendence and control of a principal establishment in London, and that the said application has been referred by Her Majesty to the Committee of Privy Council for Trade and Plantations.—Dated this 17th day of April, 1863. Clarke and Morice, 29, Coleman-street, London, Solicitors."

The following has been published by the Ceylon Government agents: "Ceylon Government Six per Cent. Debentures Railway Loan, Ordinance 10 of 1860. The half-year's interest, to the 15th May, 1863, will be paid after that date at the office of Her Majesty's Agents-General for Crown Colonies, 6, Adelphi-terrace, Stand."

A call of £1 is to be paid on the shares of the Singapore Gas Company by the 19th inst.

The directors of the Manchester Chamber of Commerce have memorialised the Postmaster-General to cause arrangements to be made, whereby letters intended for the French mail leaving Marseilles for China on the 19th of every month, shall, in future, be received in the Post-offices of the United Kingdom. The reply from the Post-office informs the Chamber that negotiations with the French Government on the subject have been commenced, which Lord Stanley of Alderley hopes shortly to be able to bring to a satisfactory conclusion.

The Ceylon Company have been authorised by the shareholders to issue debentures for a sum not exceeding the unpaid portion of the capital, for one, three, and five years, at 5, 5½, and 6 per cent. respectively.

The British India Steam Navigation Company held a meeting on the 28th ult., when the report was read and a dividend declared; but all information being, on application at the offices of the company, refused, we are left to conclude that either the report, the proceedings, or the dividend were unsatisfactory.

The recent Commercial Treaty entered into by the King of Burmah with the Viceroy of India has been received at the India office, and will doubtless be laid before Parliament at an early date. Its provision for trade with Western China will be found satisfactory.

The Chartered Bank of India, Australia, and China will open a branch of their establishment at Batavia.

The rage for new companies continues. The following have been introduced since our last:—

The Oriental Tea Company for the cultivation of tea in the tea districts of Assam, capital £250,000, in £20 shares; 40,000 acres have been provisionally purchased. The project has been well received. In the list of directors we find the names of William Dent, Esq., jun., late of China, and Lord William Hay, of the Bengal Civil Service.

The Anglo-Indian Cotton Company, capital £500,000 in £5 shares, for purchasing cotton direct from Ryots in the Khandish, and similar localities, and cleaning, dressing, and baling it, in the interior of the country.

The Indian Tea Company of Cachar, capital £100,000, in £10 shares, for the purchace and formation of tea estates.

In the report of the case of the Bank of India, Australia, and China, v. Rich, in *The Times*, it was stated that Mr. Rich

Digitized by Google

had been dismissed. Mr. Rich, who is now in London, has published the following letter:—

"In the report of Mr. Bovill's motion in the above case in *The Times* of the 1st inst., it is stated under the head of Law Proceedings that the action by the bank is brought against me for improper management of the business, on account of which I had been dismissed; but as this is quite contrary to fact I should feel particularly obliged by your doing what you may deem necessary to correct the misstatement. I was never dismissed from the bank's service. I voluntarily threw up my appointment as manager in Bombay months before these proceedings were even contemplated.

"J. RICH."

The steamers *Punjaub* and *Assaye*, lately purchased by Messrs. John Willis and E. M. de Bussche, have been chartered by Government to lay the submarine cable in the Persian Gulf, which is one of the links of the line from London to India.

A Bill introduced by Mr. Layard in the House of Commons, and which has been read a first time, will, if carried through, doubtless check a great evil—viz., the manufacture of unsound cables and anchors. Under the present system, these important requisites for the service of our mercantile marine are not tested under any recognised authorities, and, consequently, in many cases are made of very inferior iron, the effect being to add greatly to the number of shipping disasters. It is now proposed that the Board of Trade shall appoint an inspector to exercise a general supervision over all proving establishments for testing anchors and cables under this Act, and it is provided that it shall be unlawful for makers or dealers to sell unproved anchors or cables.

The preliminary arrangements have been completed with a view to the establishment of an International Financial Association in connexion with the Crédit Mobilier and some of the leading bankers of Paris. The firms interested are understood to be Messrs. Heath and Co., Stern Brothers, Samuel Dobree and Sons, Frederick Huth and Co., Frühling and Goschen, George Peabody and Co., and Robert Benson and Co.

Another combination of equal importance, and which was in course of arrangement previously, has also been formed, which will include, it is said, the principal representatives of the great industrial interests of France and of the chief railway lines, as well as nearly all the leading bankers and capitalists of Paris who are not connected with the Crédit Mobilier. This combination, which is to be called the Société Générale, proposes to confine itself to the promotion of definite undertakings of a public and commercial character, and not to look for its profits from Bourse operations. Among the parties stated to be connected with it are M. Schneider, Vice-President of the Legislative Assembly, and principal of the largest ironworks in France; M. Talabot, of the Paris, Lyons, and Mediterranean line; the Comptoir d'Escompte, Hentsch and Co., Blount and Co., the President of the Chamber of Commerce, and various other bankers and representatives of railways; while it is understood that the head of the association in London will be Mr. Samuel Laing, the late Indian Finance Minister.

The Postmaster-General has entered into a contract with the Royal West India Mail Company for the performance of the West India Mail service, for a period of six years from the 1st of January next. The conditions have not yet transpired.

It is notified that Mr. John Ingram Travers and Mr. Roderick Travers have withdrawn from the firm of Joseph Travers and Sons, in which, henceforth, they will in no way be interested. The sole partners in the future business will be Mr. Archibald Travers and Mr. Samuel Smith Travers. They will conduct the affairs of the future partnership at the same address, and under the same style of firm, as heretofore.

BOARD OF TRADE RETURNS.

The Board of Trade returns for the month ending March 31st, have made their appearance. The following were the exportations to the Far East in that period:—

TO CHINA.—Cotton yarn: The quantity exported in March last amounted to 60,800 lbs., against 530,649 lbs. in March, 1862, and 766,440 lbs. in March, 1861; the amount exported in the first three months of this year was 203,210 lbs., against 1,288,849 lbs. in 1862, and 3,024,010 in 1861. The value of the export of March last was £6,147, against £29,470 in March, 1862, and £34,662 in March, 1861. Cotton goods: The amount exported in March last reached 5,007,244 lbs., against 15,744,663 lbs, in March, 1862, and 43,229,988 in March, 1861; for the three months ending March 31st, the quantity exported reached 6,873,754 lbs., against 26,261,829 lbs. in the same period in 1862, and 102,217,471 lbs. in the first three months of 1861. The value of the exports of March last was £114,537, against £246,851 in March, 1862, and £576,690 in March, 1861. Woolen and worsted manufactures: The quantity exported in March last reached 245,959 yards, against 328,672 yards in March, 1862, and 474,416 in March, 1861; and in the three months ending March 31st, 421,920 yards, against 453,728 yards in the same period of 1862, and 1,182,520 yards in the first three months of 1861. The value of the export of March last reached £40,817, against £41,084 in March, 1862, and £59,302 in March, 1861. Worsted stuffs: The quantity exported in March last reached 1,120,902 yards, against 669,003 yards in March, 1862, and 805,392 yards in March, 1861; and in the first three months of this year 1,880,806 yards, against 1,339,103 in 1862, and 1,315,076 in 1861. The value of the export of March last was £71,306, against £33,110 in March, 1862, and £63,817 in March, 1851. Lead: The quantity exported in March last was 2,413 tons, against 561 tons in March, 1862, and 711 tons in March, 1861; and in the first three months of this year 4,229 tons, against 1,270 in the corresponding period of 1862, and 1,720 tons in the first three months of 1861. The value of the lead exported in March last was £52,743, and in the first three months of this year £92,026.

TO PHILIPPINE ISLANDS.—Cotton Goods: The quantity exported in March last is not specifically given in these returns, but is represented in the sum total for the first three months of this year, which reached 1,645,751 yards, against 3,389,185 yards in the corresponding period of 1862, and 12,437,145 yards in the first three months of 1861. The value of the export in the three months ending March 31st was £37,400 in 1863, against £64,190 in 1862, and £205,941 in March, 1861.

TO JAVA.—Cotton Goods: The quantity exported in March last was 507,720 yards, against 792,486 yards in March, 1862, and 4,605,688 yards in March, 1861; and in the three months ending March 31st, 1,321,596 yards in 1863, against 5,996,915 yards in 1862, and 12,607,534 yards in 1861. The value of the export in March last was £12,687, and for the first three months of this year, £32,444, against £113,827 in the corresponding period of 1862, and £199,089 in the first three months of 1861.

TO CEYLON.—Cotton Yarn: The quantity exported in March last reached 746,534 yards, against 1,930,830 yards in March, 1862, and 4,264,835 yards in March, 1861; and in the first three months of this year, 1,420,765 yards, against 5,096,501 yards in the corresponding period of 1862, and 8,164,743 yards in the first three months of 1861. The value of the export for March last was £17,607, and for the three months ending March 31st, £33,532, against £79,484 in 1862, and 141,695 in 1861.

The exports from London, Liverpool, and the Clyde to the undermentioned ports from April 17th to May 1st in the present year, as compared with the corresponding period in the two previous years, are taken from Mr. Sam Mendels circular:

TO SHANGHAI.—Plain cottons: 4,048,715 yards in 1863, against 9,959,763 in 1862, and 23,548,703 in 1861. Coloured cottons: 527,025 yards in 1863, against 629,432 in 1862, and 792,590 in 1861. Printed cottons: 245,017 yards in 1863, against 1,276,251 in 1862, and 387,830 in 1861. Twist: No shipments from March 17th to May 1st in these years; in 1862, in this period, 750 lbs., and in 1861 2,240 lbs.

TO HONG KONG.—Plain cottons: 1,028,525 yards in 1863, against 7,088,784 in 1862, and 2,872,920 in 1861. Coloured cottons: 37,050 yards in 1863, against 275,190 in 1862, and 111,440 in 1861. Printed cottons: 65,200 yards in 1863, against 79,500 in 1862, and 45,716 in 1861. Twist: 96,030 lbs. in 1863, against 559,180 in 1862, and 336,150 in 1861.

TO MANILA.—Plain cottons: 777,046 yards in 1863, against 988,785 in 1862. Coloured cottons: 330,454 yards in 1863, against 699,959 in 1861. Printed cottons: No exports from March 17th to May 1st in 1863; 72,842 yards in 1862. Twist: No exports in 1863; 1,100 lbs. in 1862.

TO SINGAPORE.—Printed cottons: 1,364,512 yards in 1863, against 3,971,977 in 1862, and 2,795,750 in 1861. Coloured cottons: 439,850 in 1863, against 1,440,552 in 1862, and 285,320 in 1861. Printed cottons: 140,419 yards in 1863, against 274,138 in 1862, and 45,702 in 1861. Twist: 222,400 lbs. in 1863, against 224,260 in 1862, and 95,800 in 1861.

TO BATAVIA.—Plain cottons: 27,600 yards in 1863, against 2,128,967 in 1862, and 1,977,850 in 1861. Coloured cottons: No exports for the above period in 1863; 817,976 yards in 1862, and 1,303,120 in 1861. Printed cottons: No exports from March 17th to May 1st; 1,312,663 in 1862, against 497,050 in 1861. Twist: Nor exports in 1863; 18,810 lbs. in 1862, against 161,825 lbs. in 1861.

TO CEYLON.—Plain cottons: 770,941 yards in 1863, against 1,341,319 in 1862, and 670,167 in 1861. Coloured cottons: 272,764 yards in 1863, against 25,216 in 1862, and 63,522 in 1861. Printed cottons: 435,761 yards in 1863, against 304,181 in 1862, and 145,448 in 1861. Twist: 74,000 lbs. in 1863, against 57,750 in 1862, and 20,102 in 1861.

The amount of bullion by the P. and O. Co.'s steamer *Ceylon*, which left Southampton on the 4th inst., was in gold, to Ceylon, £1,000; to Madras, £265; to Calcutta, £65. In silver, to Singapore, £18,500; to Hong Kong, £6,166; to Foochow-Foo, £523; to Shanghai, £17,405. Total in gold, £1,330; in silver, £42,594.

ARTICLES OF IMPORT.

TEA.—The public are getting the full benefit of the reduction in the duty, and it must give a great stimulus to consumption, in conjunction with the generally growing demand for export it must tend to place the tea trade on a firmer basis than before, and prove of great benefit to the community. Its effect upon the market has been slight; there was a slight excitement for a day or two after the announcement on the 16th, and some transactions took place at an advance of 1d. per lb., but the market has since been very quiet, and prices have now receded to what they were on the day of the Budget, which, owing to several purchases in anticipation of the reduction, had risen ½d. to 1d. per lb. on common to medium kinds, and 1½d. to 2d. on fine kinds of Congou. Low and dusty kinds of Congou have sold to a fair extent at an advance of ½d. to 1d. per lb. Good common is scarce, and we quote it 1s. 1½d. to 1s. 2d. per lb. There has been a fair amount of business in the Sinchune Kais and fair Kaisow kinds, and prices rule about 1d per lb. higher. Fair to good Ho-Hows, Ningchows, and second-class Honams, Monings, and Wopaks have sold to a fair extent

Digitized by Google

at 1d. per lb. advance. Good Kaisows have been rather more inquired for at fully previous prices. There has been a large business in fine to finest Monings and Wopaks, and prices now rule fully as high as at any time of the year. Finest Kaisows continue in demand at fully previous prices. In Tayshans transactions have been limited, but prices show a slight advance. In Oolongs common to fair qualities have been neglected, but good and fine have sold rather more freely at 1d. per lb. advance. In Souchongs there has been only a moderate business; the demand for export has been only limited, and prices show no material alteration. Flowery Pekoes remain much as before. Common to fair Scented Capers have sold ½d. to 1d. per lb. dearer; fine, of Canton make, are in fair request, but Foo-Chow kinds of difficult of sale. Scented Orange Pekoes, but Canton and Foo-Chow kinds, have been rather more inquired for, and prices have recovered fully 1d. per lb. from the lowest point. Uncoloured Japans, up to 1s. 6d. per lb., continue in request. Assam and Cachar kinds of tea have sold readily at public sale at a rise of 1d. to 2d. per lb., according to quailty. In Green Teas there has been a fair amount of business. Common Young Hysons remain difficult of sale, but good and fine have been in fair demand. Good to fine Hysons have also maintained former value, being wanted for export. Imperials have sold to a fair extent at former prices. Gunpowders have been very scarce, and commanded a ready sale; the fine to finest kinds, Ping Suey and Moyune, have sold 2d. to 3d. per lb. higher. Canton-made Teas show no material alteration. The public sales have comprised 64,034 packages, of which 14,016 packages were sold, including 5,900 packages without reserve, and 4,400 packages Indian tea. According to the circular of Messrs. Mitchell and Aspinall, the quantity of tea afloat at present is 26,838,057 lbs., against 25,162,878 at same period last year.

SILK.—We have had another month of small business in silk, the fall in prices being too slight to tempt buyers in the face of the continued depression of trade. It is yet much too early to form any definite opinion as to the result of the European Raccolta, but it is at present progressing most favourably. The arrivals, especially in Japan silk, have been rather large for the time of year, exceeding the deliveries by 2,000 bales, and thus raising the total of our stock to within a few hundred bales of the high point reached on the 1st March. The market at New York continues firm, though less active. We quote: Re-reeled Canton Cumchook, Nos. 1 and 2, $8.25 to 8.50; Long Reel Canton, No. 3, $5.00; Japan, $7.50 to 10.00; Tsatlees, No. 1 to 2, $10.00 to 10.50; do. Hong, $9.00 to 9.50; Taysams, usual reel, No. 1 to 2, $8.25 to 9.00; do., No. 3 to 4, $7.50 to 8.00; do., re-reeled, A 1, none.

SUGAR.—The continuance of liberal arrivals have caused our stocks generally to accumulate, considerable heaviness has lately prevailed, and present quotations are rather under those of our last mail issue. In the early part of the month, a considerable quantity of Clayed Manila was brought to auction, which, meeting no bids corresponding to the current improvement, was all withdrawn, and in effecting sales more recently, decidedly lower prices have been accepted; the only transaction reported in Unclayed, is a parcel to arrive, ex ship. Of Java, a small parcel has been sold at easy rates. The following are among the total sales of the month, viz.:—330 tons Bengal, low and middling yellow Gurpattah, 33s. to 35s.; 180 tons Native Madras, middling to fine brown, 29s. to 30s. 6d.; low and low middling yellow, 31s. 6d. to 33s. 6d.; 210 tons Madras Jaggery, at 27s. to 27s. 6d.; 260 tons Penang, good middling to fine brown, 31s. 6d. to 33s.; low grey to good middling yellow, 33s. 6d. to 36s. 6d.; good grocery, 37s. to 38s. 6d.; 860 tons Clayed Manila, of middling quality, at 31s. 6d. to 32s.; 340 tons Pangassanam, at 29s. 6d.; 540 tons Unclayed, at 16s. (in bond); 110 tons Yellow Java, at 36s. 6d. to 37s., and a few dark grainy East India at 29s. 6d. Current quotations are:—Bengal, Crystalised, 24s. to 27s.; Benares, 22s. 6d. to 27s. 6d.; Date, 19s. 6d. to 25s. 6d.; Ordinary to fine brown, 13s. 6d. to 19s. 6d.; Penang, grey and white, 24s. to 26s.; brown and yellow, 16s. to 23s. 6d.; Madras, grocery, 21s. 6d. to 26s. 6d.; Native, 15s. to 19s.; Jaggery, 14s. to 15s.; Siam and China, white, 22s. 6d. to 27s.; brown and yellow, 14s. 6d. to 22s.; Manila, Clayed, 18s. 6d. to 20s.; Muscovade, 15s. to 16s. 6d.; Java, grey and white, 24s. to 27s. 6d.; brown and yellow, 15s. to 23s. 6d. The stocks of sugar in the principal ports of Europe on 1st May, 1863, was, United Kingdom, 155,500 tons; Holland, 1st hands, 19,600 tons; Antwerp, 800 tons; Hamburg, 3,750 tons; Havre, 1,700 tons; Trieste, 4,320 tons: making a total of 185,670 tons.

COFFEE.—A steady general demand has continued to prevail at further advanced prices. The public sales of Plantation Ceylon, which have been of good extent, have gone off with briskness at stiffening rates, and for coloury sorts a rise of 1s. to 1s. 6d. per cwt. has been realised. Native also has been in rather active request at some improvement. Mocha has been more inquired for, and transactions have been effected at enhanced rates, further business of importance having recently been checked by the higher pretensions of holders. The supply of other East India has been almost entirely restricted to the Singapore description, which has gone off readily at extreme prices. The sales of the month are as follow:—3,000 casks, 2,500 barrels and bags Plantation Ceylon, fine ordinary to low middling, 84s. 6d. to 89s. 6d.; middling to good middling coloury, 90s. to 96s.; fine, 98s. to 100s. 6d.; 600 casks, 6,500 bags native, small to good ordinary, 72s. to 74s. 6d.; fine ordinary to superior 75s. to 77s.; fine picked, 78s. 6d. to 81s.; garblings, 65s. to 69s. 6d. 2,300 packages Mocha, fair to good clean garbled, 94s. to 97s.; common to good long berry, 96s. to 100s. 6d.; and 3,000 bags Singapore; ordinary black 38s. 6d.; common mixed, 65s. 6d. to 67s.; good even pale, 76s. to 77s. 6d.: bold, 79s. to 81s. 6d. The imports into London since our last advice have been large, but as the deliveries also have increased, the stock has not materially augmented, though the comparative surplus is still rather considerable, viz., 1,700 tons; the total stock on the Continent, however, is now less than that of last year. Our quotations are:—Mocha: ungarbled, 60s. to 78s.; garbled, com. to good, 80s. to 97s.; do., fine, 98s. to 105s. Ceylon, Native: Good ordinary to fine, 73s. to 77s.; ordinary, 69s. to 72s. Plantation: ordinary to fine ord., 73s. 6d. to 86s.; fine fine ord. to mid., 86s. 6d. to 91s. 6d.; good mid to fine, 92s. to 102s. Java: 68s. to 93s.; Singapore, ordinary and good ord., 60s. to 76s. Sumatra and Padang, 59s. to 75s.; Madras and Tellicherry, 72s. to 102s.

RICE.—The market for landed parcels remained very inactive for some time after our last advice, and the value was barely supported, but there has since been a rather better demand, and sales of some kinds have been more readily effected, the total for the month being 100,000 bags. Bengal, low and middling cargo sorts, 7s. 9d. to 8s. 6d.; fair to good Ballam and Moonghy, 8s. 9d. to 9s. 1½d.; low to good middling old hard white, 9s. 6d. to 11s.; pearly, 11s. 6d. to 12s. 3d.; fine new, 14s. 6d. to 15s.; common to good Nakrenzie, 8s. 10½d. to 10s.; middling to fair Rangoon, 9s. 3d. to 10s.; fine, 11s.; very low weevily, 6s.; fair Bassein, 9s. 6d. to 10s.; fine, 10s. 9d., and weevily Moulmein, 8s. to 8s. 6d. For arrival, 250 tons of fine white Bengal have been sold at 13s. 7½d. to 13s. 9d. ex ship, or 14s. 3d. landed, no guarantee, and 300 tons of Madras at 11s. 6d., guaranteed. Cargoes afloat have continued in request, and nine, amounting to 9,000 tons, have been taken at again higher rates, viz., Rangoon, 10s. 7½d. to 11s.; Nakrenzie, 10s. 3d. to 10s. 6d.; new Bassein, 10s. 3d.; old, 9s. 3d.; and Larong, 9s. 9d., mostly with guarantee of quality. The following are the current quotations:—Bengal, white, 9s. to 15s. 6d.; Bengal, cargo, 8s. to 9s. 3d.; Madras, 10s. to 12s.; Arracan, Rangoon, &c., 7s. 6d. to 11s.; Java, 10s. to 21s.

SAGO.—This article has been comparatively neglected since our last monthly report, and business was confined to small quantities till lately, when 500 boxes middling small pearl, at public sale, went off with some spirit at 18s. 6d. with a few lots at 19s. Large and medium have been sold in retail lots at 17s. to 19s. Sago Flour. In the early part, a decline of 3d. to 6d. per cwt. was established for this article, at which 3,300 bags found buyers, common to good, 13s. to 13s. 9d.; but only limited transactions have since taken place. Current quotations for sago are 16s. to 20s, and for sago flour 13s. to 14s per cwt.

SPICES.—Pepper, Black: Only a moderate amount of business, but steady prices have mostly been obtained, viz., 9,500 bags, chiefly Penang; common to good, 3⅞d. to 3⅝d., fair Singapore, 3¾d. to 3⅞d., and 600 packages heavy Malabar at 4⅛d. to 4¼d. White: Rather more ready sale; 500 bags Penang have been realised, ord. mixed 4⅛d. to 5d., mid. fair 5⅛d. to 5¼d., good bold 6d., and 500 bags good Singapore at 5¼d. to 5½d.: also 50 cases Tellicherry at 6¾d to 7¼. Cinnamon: The quarterly sales of Cinamon, held on the 27th ult., comprised 2,314 bales Ceylon, a great part of which was inferior to the usual assortment, and with the exception of the low and fine sorts, went rather cheaper. Cassia Lignea: About 2,000 packages have been taken during the month; mouldy and broken 80s. to 85s., com. to good 86s. to 92s. Cloves: 1,500 bags Zanzibar Cloves have been forced off at a reduction of quotations, being ordinary 3¼d., middling to good fair 3⅝d. to 3⅞. Ginger: 400 packets Rough Bengal, in auction, readily brought 66s. to 67s; and retailed lots of scraped Cochin have been placed also at enhanced rates, middling to good middling 75s. to 80s.; while African has been less freely dealt in at 60s. Mace has been offered at public sale very sparingly, and for the pale kinds prices must be quoted higher. Nutmegs: These have gone off slowly at about the former currency. Cardamons: Flat, 5s. to 7s. per lb. Colombo Root: 20s. to 60s. per cwt.

OIL OF ANNISEED 5s. 6d. to 5s. 7d. per lb.; very little demand, 10 cases at auction retired at 5s. 7d. per lb.

HEMP.—Jute: Parcels of the new crop have met a good demand, and notwithstanding a languid tone recently, extensive sales have been effected at prices 10s. to 20s. per ton above those of the 9th ultimo; the old qualities having continued to sell slowly at drooping rates.

SALTPETRE.—Rather important fluctuations have occurred in this market; immediately after a report of that date, a pressure to realize produced a reduction of 1s. per cwt., Bengal 24¼ to 3 per cent. per refraction selling at 35s. 6d. to 37s., upon which, however, a firmer tone prevailed, followed by general briskness in the demand, and large sales resulted at a rally of 1s. 6d. to 2s. 6d. per cwt., 15 to 8 per cent. refraction fetching 37s. to 38s., and 7 to 2½ per cent. 38s. 6d. to 39s. 6d.; but great flatness has recently returned, and to effect even small sales a decline of 1s. to 1s. 6d. per cwt. has been submitted to, 200 bags 2½ per cent. refraction being disposed of at 38s. Current quotations are:—Bengal 36s. to 38s. 6d.; Bombay and Madras, 33s. to 36s. 6d. Nitrate of Soda is 13s. 6d. to 14s. 6d.

COTTON.—Surat, 1s. 1d. to 1s. 6¼d. per lb. Messrs. Lewis and Peat report the market active, with large daily business, and a recovery in prices of ⅛d. to ¼d. Latest quotations:—Broach, 1s. 1⅜d. to 1s. 6⅜d. per lb.; Oomrawuttee, 1s. 1⅛d. to 1s. 6¼d.; Dhollera, 1s. 1¼d. to 1s. 6¼d.; Mangarole, 1s. 1½d. to 1s. 5⅞d.; and Compta, 1s. 1d. to 1s. 5d.; animated. Current quotations are:—Madras, 1s. 2¼d. to 1s. 6¼d.; Surat, 1s. 1d. to 1s. 7¼d. per lb.

TIN.—Messrs. Lewis and Peat report that this market has been almost uninterruptedly inactive, with very small business in Straits alone. Current quotations are: Banca, £127 to £128. 10s.; Straits, £122 to £124 per ton.

JAPAN WAX.—Messrs. Lewis and Peat report that of 101 cases at

Digitized by Google

auction, one-third sold at 75s. to 75s. 6d. per cwt. for good saucer, being cheaper; but block is firm, and considerable business has been done up to 72s. per cwt. privately. Sales advertised. Our quotations are 62s. to 80s. per cwt.

MISCELLANEOUS.—Tapioca: Penang has been purchased to the extent of 2,700 bags without change in value; good to fine white, 2½d. to 3½d.; middling siftings, 1¼d. to 1½d. Castor Oil: Small re-sales effected at 4½d. to 4¾d. per lb. Aloes: £3 to £15 per cwt. Galls: Continue scarce; we quote Japan and China 45s. to 70s. per cwt. Gums: Transactions unimportant, no change of consequence. Madder Root: 23s. to 26s. per cwt., inactive. Senna: 5 bales Pods sold at auction at 1½d. per lb. Teeth, Elephants': 70 lbs. and upwards, £33 to £39 per cwt.; 40 to 60 lbs., £31 to £38; 20 to 40 lbs., £33; Scrivelloes, £12 to £32; Ball, do., cut, £43 to £45; do. do., uncut, £28 to £43; Hollows, £13 to £30: points and tips, £14 to £34. Sea Horse: 4 lbs. and upwards, 4s. to 11s. per lb.; 3 lbs., 2s. to 5s.; 1 to 2 lbs., 9d. to 2s. Tortoiseshell: 6s. to 20s.; 19 packages at auction sold at 6s. 6d. to 8s. 3d. per lb. Bees Wax: 2 cases Bombay sold at £11 per cwt. Ebony Wood: £6 to £13 per ton. Myrabolenes: 11s. to 14s. per ton; dearer. Red Saunders Wood: £7. 5s. to £7. 10s. per ton. Tumeric: 25s. to 30s. per cwt.; scarce and firm. Cowries: 30s. to 38s. per cwt.; flat. Cowries: Fresh, 30s. to 38s. per cwt.; flat. Dead, 22s. to 32s. Horns: Buffalo, 23s. to 45s. per cwt. Buffalo Tips: 25s. to 35s. Deer, 27s. to 55s.; steady. Nux Vomica: 9s. to 12s. 6d. per cwt.; firm. Seed: Linseed, 62s. to 67s. per cwt.; active demand. Rapeseed, 62s. to 67s. per cwt. for arrival good. Shellac: Orange, 170s. to 190s. per cwt.; Garnet, 150s. to 160s. per cwt.; Liver, 150s. to 170s. per cwt.; Block, 100s. to 170s.; market quiet. Turmeric: 22s. to 26s. per cwt. Black Lead: 6s. to 24s. per cwt.; fine in demand. Camphor: China, £7. 10s. to £7. 15s. per cwt.; Japan, flat. Cassia Lignea: 1, 2, and 3 equal, 85s. to 92s. per cwt.; improving. Buds, 260s. to 280s. per cwt.; no supply. Gutta Percha: 1s. 4d. to 2s. 6d. per lb.; fine qualities. India Rubber: 1s. 3d. to 1s 5d. per lb.; better qualities scarce and dearer. Musk, first qualitity, 23s. to 28s.; lower qualities, 12s. to 21s. per ounce. Rhubarb, Dutch, trimmed, 4s. to 6s.; common, flat, 2s. to 4s. 9d.; round, 1s. 9d. to 4s. 6d. per lb. Sapanwood, Bemah, £5 to £8; Siam, £8 to £11 per ton; 75 tons Manila sold at auction. Shells, Mother-o'-Pearl, Singapore, 125s. to 150s.; Manila, 80s. to 95s. per cwt.; cheaper. Soy, 2s, 5d. to 2s. 7d. per gallon; dull. Star Aniseeds, 100s. to 105s. per cwt.; scarce. Sticklac, Siam, 60s. to 85s, per cwt.; good business done at former rates. Turmeric, 16s. to 30s. per cwt. Vermilion, 2s. 2d. to 2s. 3d. per lb.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 10s.; nail rods, £7 to £7. 5s.; hoops, £8. 10s. to £8 15s.; sheets, single, £9. 10s. to £9. 15s.; Staffordshire bars, £7. 10s. to £8; rails, £5. 10s. to £6.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and sheathing, £96 per ton; yellow metal, 8¼d. to 8½d. per lb.

TIN.—119s. for block; 120s. for bar. Tin plates, best charcoal, I.C. 28s. 6d. to 29s. 6d. per box.

LEAD, &c.—English pig, £20. 10s. to £21.; shot, patent, £23. 15s. to 24s.; sheet, £21. 10s.; spelter, £18; zinc, English sheet, £23. 10s.; quicksilver, £7 per bottle.

The following is from the circular of Messrs. French and Smith:—

TIN.—In English there has not been much business, but prices have been well maintained and remain firm. Foreign was very dull the first part of the month, but during the last few days there has been more enquiry, and prices are firm at quotations.

The stocks of foreign tin, here and in Holland, for three years are given below.

	4th May, 1863.			1862.		1861.	
	Slabs.	Tons.	Slabs.	Tons.	Slabs.	Tons.	
Foreign in London, estimated at		2,502		1,790		792	
In Holland	39,452	1,196	29,300	897	32,666	998	
		3,698		2,687		1,790	
In Holland towards next sale	101,325	3,070	139,884	4,283	136,362	4,176	
		6,768		6,970		5,966	

The quantity of Straits Tin afloat for Europe is 689 tons, against 1,040 tons in 1862 and 753 in 1861. Tin plates have been in good demand all the past month, but prices remain comparatively low; the quantity shipped to all parts was about 113,146 boxes, against 75,000 boxes in the same month of 1862. Lead was very quiet all the month, but within the last eight or ten days some movement has taken place, and prices are better again. Spelter remains dull at £18 on the spot, the stock now is 3,943 tons, against 4,729 tons 1st May last year.

According to the circular of Messrs. Pelly, Boyles and Co., the export of metals from 1st January to 30th April has been as follows:—

SHANGHAI.—Yellow metal, 67 tons; sheathing copper, 6; copper rods, 2; bar iron, 849; hoops, 5; sheet, 74; nail rod, 651; spelter, 103; tin plates, 1,010 boxes; pig lead, 2,333 tons; sheet, 77; steel, 85; quicksilver, 3,750 bottles.

HONG KONG.—Yellow metal 57 tons, sheathing coppers 7, bar iron 677, hoops 186, sheets 106, nail rods 485, spelter 25, tin plates 1,412 boxes, pig lead 2,743 tons, sheet 36, steel 21, quicksilver 35,700.

MANILA.—Yellow metal 4 tons, sheathing copper 33, rods 1, bar iron 472, sheets 56, nail rods 15, zinc 20, steel 3.

BATAVIA.—Yellow metal 5 tons, sheathing copper 23, bar iron 62, sheets 166, nail rods 158, foreign 170, zinc 21, tin plates 300 boxes.

SINGAPORE.—Yellow metal 203 tons, sheathing copper 92, bar iron 167, sheets 52, nail rods 200, spelter 35, zinc 24, tin plates 200 boxes, pig lead 722 tons, sheet 26, steel 20.

CEYLON.—Sheathing copper 9 tons, tile tough cake and ingots 3, bar iron 185, hoops 203, sheets 112, nail rods 1, foreign 37, spelter 5, tin plates 205, pig lead 20, sheet 8, steel 6.

Ceylon	£220	—

MANCHESTER MARKETS.

The report for the week ending May 8 is as follows:—There is more confidence in the market than of late, and prices have been gradually gaining in strength during the week. The activity in the Liverpool cotton market has supported this feeling, the sales having been 62,000 bales, of which about one-half have been taken by the home trade, and the remainder for speculation and export. The private telegrams from Calcutta received to-day, however, are not so encouraging as previous ones. The latest of these is dated April 16, which is four days later than the previous ones. At that date the market was dull, and the sales were reported small. Yarns were 3 pice per lb. lower, and 8½lb. shirtings one anna (or 1½d.) per piece lower. In 7lb. shirtings no change. The quotations for shirtings were:—7lb., 8r. 14a., and 8½lb., 9r. 13a. The business in Manchester to-day has not been large in cloth, sellers having shown a disposition to advance their quotations, while buyers, though disposed to operate, are unwilling to give extreme prices. The India advices have had no material effect on the market, and the chief inquiry in cloths is still for India. The upward tendency of prices has had the effect of enabling the holders of goods for other markets to effect sales in cases where they have simply adhered to their old quotations, and several considerable purchases of T-cloths have been spoken of within the last few days. In yarns a strong active market is reported to-day, and sellers say that now they have fully regained all they had lost in respect to price. The inquiry and the buying have been very general for India, China, the Mediterranean, and the home trade. The Germans have been making rather active inquiries, but they have done no business of moment. The yarn-market closes strong, and with a decided upward tendency in prices. The quotations from Mr. Mendel's list are:—Grey Shirting: 7 lb., 15s.; 8 lb., 18s. 9d.; 9 lb. 19s.; T-cloths, 11s. 6d.; White Spot Shirtings, 17s.; White Brocades, 17s. 9d.; Damasks, 27s. 6d.; Maddapollams, 6s. 6d.; Cotton Yarn, 16-24, 2s. 2d. to 2s. 4d.: No. 28-32, 2s. 4d. to 2s. 6d.

FREIGHTS AND CHARTERS.

Shipping continues in good demand, and Charters are readily obtained for Ceylon, Hong Kong, and Shanghai. Outward Freights are likely to advance, should shipments of goods become more active. Homeward Freights are quoted 77s. 6d. from Ceylon; but there is little doing from China, the season being far advanced.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 42s. 6d. measurement. To Nagasaki, 65s. meast. To Hankow: 65s. weight, 60s. measurement. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. measurement. To Shanghai: 50s. weight, 30s. measurement. To Hong Kong: 40s. weight, 35s. measurement. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. to 35s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £41 and £1. 18s. 6d. For Shanghai: £52. and £2. 10s. For Manila, £1. 10s. For the Philippine Islands, Penay, or Zebu, £2. For Singapore, £28 and £1. 9s. 6d. For Penang, £24. For Galle, £30 and £1. 9s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty received tenders on Friday for the Freight of the following Government stores:—To Colombo: 15 tons light measurement, including a fire engine, &c. To Hong Kong: 124 tons navy salt meat, and 12 tons candles, both from the River Thames.

CASUALTIES.

The Juanpore, King, which arrived at Liverpool on the 24th of April from Shanghai, had been in contact the previous day, off Blackwater Light, with the Elizabeth, schooner, from Newport to Waterford, which sank with the master and two boys. The mate and one seaman was saved.

The Tetuan (Span. ship), Anazola, from Cadiz for Manila, which put into Table Bay 20th February, leaky, and with loss of mizen mast, &c., has been condemned and sold; her cargo is to be forwarded to its destination.

Amsterdam, 28 April, The Johannes, Hendrikus, Ferdinand, Lodewyks, from Shields for Sourabaya, has put into Texel, leaky, having struck severely on the Ower's Bank, and must discharge to repair.

New York, April 24. The Delta, str., arrived at Halifax to day from St. Thomas and Bermuda, reports that a Danish brig landed at St. Croix on the 12th April, the crew of the Lapwing (barq.), from Boston to Batavia, which had been captured by the Confederate str. Florida, on the 27th March, in lat. 3, long. 22; two guns and eighteen men from the Florida were put on board the Lapwing.

The Gertrude Whitman, arrived at Bermuda, April 13, from New York for Shanghai, leaky, and with rudder badly damaged, having experienced a severe gale at N.W. 10th April, in lat. 36, long. 39.

Off the Cape de Verds.—March 20, St. Michel, Fradin, from Brest, for Saigon.

At Madeira.—April 10, Tokien (str.), Walker, from the Clyde, and left for Hong Kong. 7, Pekin (str.), Burgoyne, sailed for China.

At Ascension.—March 16, Quartet, from Sourabaya, for Amsterdam. 17, Waterlily, from Japan, for London. 23, Ann Lee, from Ceylon. 29, Netherby, from Colombo, for London. 30, Bombay, from Shanghai, for Liverpool.

Off Ascension, previous to March 31.—Khimjee Oodowjee, Bates, from Hong Kong, for Liverpool.

Off St. Helena.—March 17, Julian, from Batavia, for Amsterdam.

At St. Helena,—March 13, Nueva Engracia, Cucullos, from Manila, and sailed, 14, for Cadiz; 14, Gerardus Jacobus, Rilian, from Manila, and sailed, 15, for London; Agamemnon, Armstrong, from Manila, and sailed for Liverpool; Aracan, Dulhten, from Java, and sailed, 15, for Rotterdam; 15, Jacoba Christina, Jaski, from Batavia, and sailed, 16, for Amsterdam; 16, Bride, Gibson, from Singapore; Lammina Elisabeth, Gersen, from Pasaroeang, and Cornelia Hendrika, Swart, from Batavia, and both sailed, 17, for Rotterdam; 17, Annabella, Culleton, from Sarawak, and sailed, 20, for Falmouth; Majestic, Jones, from Pasaroeang, and sailed, 18, for Falmouth; 18, Eliza Thornton, Maxwell, from Singapore, and sailed, 20, for London; D'Annevirke, Jno. Gensen, from Singapore, and sailed for Falmouth; 19, Doelwyk, Hoffmann, from Batavia, and sailed, 21, for Rotterdam; Amicus, Legeyt, from Ceylon, and sailed, 20, for London; Xulla, Black, from Pasaroeang, and sailed, 20, for the Channel; 21, Hendrik Ido, Ambacht Byl, from Banjoewangie, and sailed for Amsterdam; 22, Capella, Cruisinga, from Sourabaya, and Aletta Augusta, Tinholt, from Batavia, and both sailed, 23, for Amsterdam; 26, Eclipse, Agren, from Batavia, and sailed, 27, for Falmouth; Gitana, Bennett, from Ceylon, and sailed for London; Ternate, Cars, from Batavia, and sailed 29, for Rotterdam; 27, Taffarette, Dereix, from Hong Kong, and sailed for Havre; 28, Vooruit Kool, from Batavia, and

Digitized by Google

sailed, 29, for Rotterdam; 29, Julie Claire, Osteroom, and Koning Willem III., Jong, both from Banjoewangie, and both sailed, 30, for Amsterdam; 30, Holland, Auffnorth, from Java.

At SIMON'S BAY.—February 24, H.M.'s Leopard, steamer, sailed for China.

At NATAL.—March 3, Rochester, Bruce, sailed for Singapore, had sailed 23rd Feb., but put back same day with pumps choked.

At TABLE BAY.—Feb. 20, Louisa Tillman, from Colombo, sailed 25 for London; 27, Anne Catherine Dufour, from Manila, Mach 7, Sze. Chuen, str., Kennedy, from New York, and left 17 for China; 12. Jamestown, Fed. str., from Montevideo, and left 14 for Batavia; 18, The Bride Warkmeister, from Singapore; 20, Cleopatra, Daunbey, from Sourabaya; 2, Wildemah Driest and Mary Silverspane, both sailed for Batavia; 12, Johanna Emilie, sailed for Batavia.

At ALGOA BAY.—March 6th, Macedon, Summerfield, from Sunderland, master requiring medical aid, and sailed 11th for Shanghai; 10, Strata, Florida Jones, sailed for Ceylon.

By James Summers, Magdalen Hall, Oxford, Professor of the Chinese Language and Literature, King's College, London.
Published by JOHN HENRY PARKER, Oxford and London. A few copies have been sent for sale to Mr. HENRY DUDDELL, Victoria, Hongkong.

THE JAPAN HERALD (the only Journal published in Japan) is rendered interesting to the general reader by the usual leaders and discussions on passing events, by its local intelligence, and by frequent notices of the People, their Government, Laws, Literature, and Manufactures, and of the natural productions of the country; whilst the Merchant and Trader will find his interests consulted by a carefully compiled statement of Exports of the two staples, Silk and Tea, of the current seasons, showing the comparisons with the same time last year—also by authentic Market Reports of Imports and Exports, with the usual Shipping List of Arrivals and Departures, in Harbour, &c.
Published Weekly—Price 25 dollars per annum.
Files of this Paper may be seen at the following Offices in London, where orders for subscriptions and advertisements will be received, viz.:—LONDON and CHINA TELEGRAPH, George-yard, Lombard-street; Mr. F. Algar Newspaper Agency Office, 11, Clement's-lane; and Mr. George Street, 30, Cornhill, or such orders may be sent direct to the Proprietors of the *Japan Herald*, Yokuhama, Japan.

Agents in the East.

TO PARENTS AND GUARDIANS.
A LADY residing near the Crystal Palace, in every way qualified for the CARE of YOUNG CHILDREN, wishes to take CHARGE of TWO, between the ages of Four and Seven years, to train and educate with her own children, and share in every comfort and attention of a well-ordered, cheerful, and happy home. Terms, fifty guineas per annum. Parents residing abroad, and wishing to leave their children in England, will find this specially suitable, the Advertiser being fully conversant with India life, having resided in the East.—Address, EDUCATION, Office of this Paper 12, George-yard, Lombard-street, London, E.C.

PREPARATORY EDUCATION, BRIGHTON.
A LADY residing in a healthy locality of Brighton, receives a limited number of BOYS for EDUCATION, and offers superior advantages on moderate terms. Parents who reside abroad would find this a desirable home for their children from 3 to 11 years of age. Satisfactory references given. Address to "Alpha," at the office of this Paper, 12, George yard, Lombard-street, E.C.

JEAN MARIA FARINA Cologne; London 2, Salters'-hall-court, and 16, St. Swithin's-lane E.C., begs to recommend his Stock of EAU DE COLOGNE and LAVENDER WATER in Bond — Double, at 9s.; Single, at 5s. 6d. per dozen. Duty paid—Double, at 21s. sparkling Hock, Moselle, Champagne, and Claret, in Bond and Duty Paid.

MACKINTOSH BALFOUR, General Manager.

Cholera, Dysentery, Diarrhœa, Ague, Fevers &c.
BEWARE of SPURIOUS and DANGEROUS COMPOUNDS, Sold in Imitation of

DR J. COLLIS BROWNE'S
CHLORODYNE.

Certain dishonest and unprincipled Chemists piratically apply this name to worthless compounds—a name invented and applied by Dr. J. C. Browne, M.R.C.S. (ex Army Medical Staff), to his great discovery, which is so extraordinarily curative in the above diseases.
As a proof of its efficacy, a few extracts from numerous testimonials by physicians and surgeons are given:—
From A. MONTGOMERY, Esq., late Inspector of Hospitals, Bombay.
Chlorodyne is a most valuable remedy in neuralgia, asthma, and dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other medicines had failed.
DR. JAS. CAMPBELL,
Surgeon, R.N., H.B.M. Consulate,
Bangkok, Siam.
"Make up for me 400 half-ounce bottles of Dr. J. Collis Browne's Chlorodyne. You will be surprised at such an extensive order from this part of the world, but much experience in its employment has led me to entertain a high opinion of its curative properties in various diseases."
Sold only in bottles, at 2s. 9d. and 4s. 6d., by the Sole Agent and Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury-square, London; and professional testimonials enclosed. None genuine without the words "Dr. J. Collis Browne's Chlorodyne" engraved on the Government stamp.

HOLLOWAY'S PILLS. MANAGEMENT of HEALTH. The complex composition and the delicacy of the functions of the human body are ever tending to produce disease unless the blood be maintained in a pure state. This most desirable object can be accomplished by a judicious use of these purifying Pills, which have the power also of regulating the stomach, liver, &c. These Pills act as alteratives, tonics, and gentle aperients; they overcome flatulence, loss of appetite, biliousness, constipation, and many other inconveniences, which should never be neglected, for fear of worse results. Holloway's Pills surpass all other medicines for alleviating indigestion, heartburn, sick headache, nervousness, and low spirits, which detract so largely from the happiness of thousands who have never tried these Pills.

Dr. Curtis on Marriage, Nervous Debility, Spermatorrhœa &c., with Plates. Post free by the Author, 12 stamps; sealed ends, 20.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour; being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excesses: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Invaluable Lotion, the result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albermarle-street, Piccadilly, London.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"'Curtis on Manhood' should be in the hands of young and old. It is an ably written medical Treatise on Diseases of Error, and those Debilities incidental to Tropical Climates."—Sunday Times, March 23, 1856.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1856.

N.B.—Agents in India: Thacker, Bombay; Von Lintzzy, Lall Bazaar, Calcutta; "Athenæum" Office, Madras; "Observer" Office, Colombo, Ceylon; "Times" Office, Malta. Patients in India and the Colonies can be successfully treated BY LETTER, and medicines forwarded with secrecy and despatch. Consultations daily from 10 to 3 and 6 to 8.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of the above INFALLIBLE PREVENTIVE LOTION.

Published and Sold by MANN, 39, CORNHILL, LONDON; and all Booksellers in Town and Country. The Work may also be obtained for Half-a-Dollar in Hong Kong, on application to

FOR COLOMBO DIRECT, the fast-sailing clipper barque, SKIMMER OF THE WAVES, A 1 eleven years, 396 tons per register, WILLIAM HAMMOND Commander. Loading in the London Docks. This beautiful Clipper is nearly new, and being known for her great speed, is an excellent opportunity for shippers of fine goods. Has good accommodation for cabin passengers.

For Freight or Passage apply to JOHN WILLIAMSON, York Chambers, 55, King-street, Manchester; to ROBERTSON and Co., 5, Newman's-court, Cornhill; or to STUART and SIMPSON, 9, Clement's-lane, Lombard-street, London, E.C.

COLOMBO Direct.—Notice to Shippers.—The favourite and regular trader CONQUEROR, A1, 8th commanded by Captain DAVID, is rapidly loading in the West India Docks, and (having nearly all her cargo engaged) will shortly be despatched.

TOULMIN, LIVINGSTON, and Co., 31, Great St. Helen's, E.C.

Regular Line of Packet Ship.

FOR HONG KONG and WHAMPOA, the splendid Clyde-built clipper TAMERLANE, A 1 twelve years, 764 tons register, ADAM LOGAN Commander, lying in the London Docks. This ship sails very fast, and has excellent accommodation for passengers.

For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

To Sail 20th May.

FOR SHANGHAI, the magnificent Aberdeen-built clipper MARQUIS OF ARGYLE, A 1 eleven years, 515 tons register, R. BELLWOOD, Commander, loading in the East India Docks. This ship, built expressly for the China trade by Messrs. Walter, Hood, and Co., has a full poop, with every requisite for the comfort of passengers, and offers the best opportunity to shippers.

To follow the "Princess of Wales," with quick despatch.

FOR SHANGHAI Direct, the splendid new British-built clipper ship MADURA, A 1 10 years, JOSEPH MATHEWS, Commander; 500 tons. To load in the West India Docks. This beautiful new clipper, just built with all modern improvements, especially for the China trade, is recommended to shippers desirous of despatch.

Apply to Messrs. ELLIOT and Co., 22, Austin-friars; or to HOLMES, KNEVITT and HOLMES, 41, Princess-street, Manchester; and Sun-court, Cornhill, London, E.C.

FOR HONG KONG and WHAMPOA, with quick despatch, the well-known China ship TROAS, A 1 thirteen years, 663 tons register, C. B. DESBOROUGH, Commander; East India Docks. This ship has good accommodation for passengers

For Freight or Passage apply to KILLICK, MARTIN, and Co., 29, Nicholas-lane, Lombard-street, E.C.

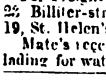
To follow the "Ascendant."

DIRECT FOR SINGAPORE, the splendid fast-sailing clipper ship, COURANTO, A 1 thirteen years, 353 tons register, W. PENRICE, Commander, loading in the West India Docks. Has superior accommodation for passengers.

For Freight or Passage, apply to DOUGLAS and MILLS, 23, Billiter-street, E.C.; or to ANDREW WRIGHT and Co., 19, St. Helen's-place, Bishopsgate-street, E.C.

Mate's receipts will be required before signing bills of lading for water-borne goods.

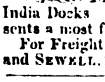
With immediate despatch.



DIRECT FOR SHANGHAI, the splendid clipper-built ship, RALSTON, A 1 ten years, 578 tons register, THOMAS DAVIES, Commander, loading in the East India Docks This fast-sailing and well-known ship presents a most favourable opportunity to shippers.

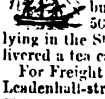
For Freight or Passage, apply to GELDARTLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

With immediate Dispatch, having two thirds of her cargo engaged.



FOR SHANGHAI and NAGASAKI, the splendid fast-sailing British-built ship ANN ADAMSON, A 1 eleven years, 564 tons register, J. HUTTON, Commander; lying in the St. Katharine Docks. This ship has just delivered a tea cargo in splendid condition

For Freight apply to GEORGE DUNCAN and Co., 147, Leadenhall-street, E.C.



ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

Destination.	Ships.	Docks	To Sail.
Shanghai	Hers. of Alma	W.I.D	May 5.
Shanghai	Anc. Archbell	W.I.D.	With des.
H. Kong & Whampoa	Stor. Wortley	W.I.D.	With des.

List of Passengers.

PASSENGERS INWARD.

By this mail per Euxine, arrived at Marseilles May 26.—From Shanghai: Messrs. Godfrey and Ingleden. From Hong Kong: Messrs. Dallas, Tucker, and Gibbs. From Singapore: Mr. Schmidt. From Penang: Lieut.-Col. Greenlaw. From Galle: Messrs. Moire, Venn, and Crowe. To Southampton, per Ceylon, expected to arrive May 31.—From Shanghai: Mr. and Mrs. McKenzie, three children, and native female servant, Mr. and Mrs. Hart. From Hong Kong: Mrs. Bennett, infant, and native female servant, Miss Curnow, Col. Porter, Mrs. Jack, two children, and European female servant. From Ceylon: Rev. Mr. and Mrs. Wise and child, Mr. and Mrs. Beard, Miss Cottam, Mr. and Mrs. Brown, three children, and European female servant, Mr. and Mrs. Mackwood, J. Greig. To Gibraltar. From Hong Kong: Mr. and Mrs. Bustillo and native man servant, Brigadier Zaccagnini, B. Beiro, Mr. de la Matta. To Malta.—From Shanghai: Mrs. and Miss Yates, Miss Fay, two Misses Wild, and European female servant.

By last Bombay mail to Marseilles, per Valetta, arrive May 18.—From Singapore: Mr. Woodbury and lady.

PASSENGERS OUTWARD.

By this mail per Pera, from Southamption, 20th May.—To Shanghai: T. Smith, M. Lamond, Thos. Davies, John Kincaid. To Hong Kong: Messrs. F. W. Kitching, T. B. Allen, R. H. Grant, C. H. and Mrs. Andrews. To Singapore: Mr. K. R. B. Robertson. To Ceylon: J. McHardie. To Calcutta: Messrs. W. G. Ross, T. Pearce, Jas. Mitchell, Jas. Leo, M. Roberston, Staff Assistant-Surgeons R. W. Hare, G. Irvine, and J. H. Oliver. To Madras: The Rev. Dr. Murphy, Messrs. G. Wray, Harding, T. E. Jackson, Mrs. G. A. Harris and infant, G. Mellor. To Alexandria: Mrs. Burbridge.

From Marseilles per Valetta, to leave 28th May.—To Hong Kong: Messrs. G. Wallis, W. Parizot, John Moul, jun., F. White, Streitberg, Mr. and Mrs. Dring, and Mr. N. Loney. To Singapore: Mr. Oliver Robinson. To Ceylon: Messrs. W. D. Gray, B. B. Carson, and J. Robertston. To Calcutta: Mr. T. Willcox, Dr. and Mrs. Bailey, Capt. Briggs. To Madras: Mrs. and Mrs. J. Shaw. To Alexandria: Mr. Woodville.

Per P. and O. str. ———, June 4, from Southampton.—To Shanghai: Mr. John Clark, Mr. Arthur Barnard. To Hong Kong: Mr. Budden. To Ceylon: Mr. Fitzroy Sewell, Mr. A. G. and Mrs. Green, Miss Green, Mrs. Binny Scott, Lieut.-col. J. H. Freeth, R.E From Marseilles, June 19.—To Singapore: Capt. Sherard Osborne, R.N., Mr. H. S. Collins, R.N., Mr. Chapman, R.N. From Suez to Hong Kong: Dr. Otto Martin.

Per P. and O. str. ———, June 20, from Southampton.—To Ceylon: Mr. H. Bowden Smith. To Hong Kong: Mr. E. Norton.

Per French str. Peluse, from Marseilles, May 19.—To Shanghai: Mr. F. Walsh. To Singapore: Messrs. R. Hutchinson and Harrison. To Calcutta: Mrs. Macdonald. To Madras: Mr. Conran.

Summary of News from the Far East.

JAPAN.

There is no news of any importance from Japan, and great anxiety continues to be felt as to the course which will be adopted by Earl Russell.

The arrival of Admiral Kuper is reported. It is said also that he is in communication with the Japanese Government. but nothing further has transpired. The following items are taken from the *Japan Herald* of March 21:—"We have been told that the purchaser of the *Victoria* and *Sir Charles Forbes* steamers is Matzdaira Daizen no-Kami (Nabashima Kay) Prince Hizen, by which name Nabashima is generally known, is the owner also of the paddle man-of-war *Soenbing*, 8 guns, which he received from the Tycoon in exchange for the steam factory ground at Nagasaki; of the screw man-of-war steamer, *Nagasaki*, 12 guns, for which he gave $100,000, the steamer *Gazelle*, and, we believe, also the barque *Armistice*. This Prince is one of the great Kokoshioos of Japan; he is at the head of the important and influential family of Nabashima. His territorial revenue is estimated at 357,000 kokus, or about £300,000 sterling per annum. It is this Prince of whom we wrote some time since as to the manner in which he had proceeded to gather together the opinions of the people of his province before sending his reply to the Emperor on the question of the policy to be pursued in respect to intercourse with foreign nations. And we then mentioned that although we find his name in the Blue-book list of Daimios as 'hostile to foreigners,' he is not only himself favourable to the policy of open intercourse with foreign nations, but took some pains to put himself in a position to be able to assure the Emperor that all the people of his province were unanimous in favour of the same step. We learn that the Japanese Government are making preparations on a grand scale for the forthcoming 'Osetsu' at Miako, and that at Hiogo a large building is now in course of erection, to be in readiness in the anticipated event of a conference with the foreign plenipotentiaries being invited by the Emperor. The depredations of the great number of Loonins now resorting to Yedo have become so numerous and of so bold a character as to have called for the special attention of the Government. A new office named 'Loonin Toritchimazo' has been instituted, with the special duty of looking after and keeping these marauders in check."

The steamer *Fiery Cross*, recently purchased by the Japanese Government from a foreign firm in Japan, has been lost in a typhoon in the Inland Sea.

CHINA.

PEKING.

Once more we are compelled to report that there is no news of importance from the capital.

TIEN-TSIN.

Her Majesty's Consul, Mr. Gibson, who was wounded in an affray with the Nyen-fei rebels, reported in our last summary of news, is out of danger, although still suffering from the wound in his head. The rebels have been driven off from the vicinity of the settlement; their presence had a depressing effect upon the trade of the port.

SHANGHAI.

Considerable interest and no small amount of alarm is being felt at Shanghai by the decision of Sir F. Bruce with regard to the jurisdiction of the Chinese over the foreign settlement. Her Majesty's Minister at Peking wrote on the subject in September last to our Consul at Shanghai, and the despatch, which we subjoin, is now published in the China papers:—

"Peking, September 8th, 1862.

"Sir,—With reference to your letter on the proposals made for the management of Shanghai, I have to observe that there is great misappre-

Digitized by Google

hension of the position of these so-called foreign concessions. The British Concession at Shanghai was neither a transfer nor lease of the land in question to the British Crown. It was simply an agreement that British subjects should be allowed to acquire land for their personal accommodation within a certain space, in order that they might have the advantage of living together. The land so acquired remains Chinese territory, it is subject to the Land-tax, and, if the jurisdiction of the Chinese Government over it is denied, it is denied because, in China, it was deemed essential for the security of British trade that the person and the establishment of the trader should be secured from molestation.

"But the character of the concession has been entirely altered by the acts of the foreigners themselves. Instead of being a foreign settlement, it has become a Chinese city, in which a few foreigners reside amidst a large Chinese population. The security and comfort which were supposed to be derived from isolating the foreign community, have been sacrificed, and land has been acquired, not for the legitimate purpose of accommodating foreigners, but in order to build on it Chinese houses, which are tenanted by Chinese at high rents, attracted by the protection our bayonets afford, and by immunity from their natural authorities.

"This system it is proposed to extend as far as it may suit the interest or convenience of parties on the spot; and it appears that the Chinese population so collected is to be ex-territorialised, as well as the land they occupy. The Chinese Governor is to be deprived of his power of dealing with them, they are to be taxed for municipal purposes, and his interference is to be limited to judging and punishing them in cases which the foreign head of the nation, to which the owner of the property occupied belongs, permits to be brought before his tribunal.

"The consummation of this system is to be the erection of Shanghai into a free port, with a mixed Consular and Municipal Government under the joint Protectorate of the Treaty Powers.

"It is my duty to remind you that the Chinese Government has never formally abandoned its rights over its own subjects nor has Her Majesty's Government ever claimed or expressed any desire to exercise a protectorate over them. The only case in which, consistently with the principles laid down for the guidance of Her Majesty's authorities in this country, the Consul has a right to interfere, is, where the Chinese is in the employ of a British firm, and where there is reason for believing that the arrest of the Chinese servant is an outrage through him on his employer. But it is the interests of the British subject, and not the Chinaman, which are protected.

"I do not understand what interest Her Majesty's Government has in lending itself to a system which is unjustifiable in principle, which would be attended with endless embarrassment and responsibility, and which the Chinese Government would never submit to willingly. Great Britain has no interest except in providing a secure place for British trading establishments; and whatever inconveniences may arise from the conversion of the settlement into a Chinese town, I do not think that Her Majesty's Government will be induced to seek a remedy for them, by extending its jurisdiction over a large section of the Chinese population. Because we protect Shanghai from falling a prey to a horde of brigands, it does not follow that we are prepared to interfere with the natural relation of the Chinese to their own Government.

"I must impress upon you most strongly the importance of not lending yourself to any proposal which will lead, however indirectly, to such serious alterations in our position in China, as are evidently contemplated by some of the residents at Shanghai.

"I am convinced that her Majesty's Government would wish to see the limits of the so-called concession reduced, so as to exclude the Chinese, rather than extended, so as to embrace a greater number of them. Our interests in China are trade and pacific relations with the authorities, and I know no more fertile source of misunderstanding than the collection of Chinese within our limits. This is not a question which affects Shanghai alone; it affects our relations with the whole Chinese empire; and, considering the effect of our example, it is of the utmost importance that we should take no step which cannot be defended upon sound international principle.

"I request you to re-consider the Land Regulations with reference to the principles laid down in this despatch.—I am, &c.,

"F. W. A. BRUCE."

On the 22nd January Sir F. Bruce wrote another despatch on the subject. We give the following extract :—

"I wish you to understand that by Treaty we have no right to interfere between the Chinese people and their authorities; that the words 'Sanctity of the British Concession' have no meaning; and that we have no power to compel the Chinese, who live within the so-termed concession, to pay any tax for local purposes except through and with the consent of their own authorities. I am inclined to think that the whole system at Shanghai is a mistake; that the police arrangements of the Chinese within the lines would be more efficiently and more economically done through themselves than it is done by Europeans, and that our management is both extravagant and oppressive."

At a special meeting convened by Mr. Consul Medhurst on the 31st March, to lay before the community the present position of the question of the "Better Government of Shanghai," there was a full attendance of all concerned. After an able exposition by Mr. Medhurst, who occupied the chair, of the chief points to be considered, the meeting, without discussion, adopted his suggestion, that the Land Regulations be amended in accordance with the principles laid down in Sir Frederick Bruce's despatches; and that a select committee be at once appointed. This was done; and the following gentlemen elected :—Messrs. Dent, Cunningham, Moncrieff, Hogg, Hanbury, and Cock.

The *North China Herald* writes as follows with regard to Sir F. Bruce's despatches from Peking :—"It requires no editorial pen to point out to the foreign residents of Shanghai the importance of the notification from Her Britannic Majesty's Consul published in this day's issue, with the accompanying despatches from the British Envoy Extraordinary at Peking. At no period in the annals of this settlement have there been more important documents regarding the social and political welfare of the community laid before them. The minister of the greatest treaty Power with China herein declares that his fellow-countrymen, who have assisted so materially in building up this wealthy embryo city, have no title to the lands they hold—that British subjects are merely "squatters" in Shanghai. Without discussing the grave questions involved in Sir Frederick Bruce's despatch on this head to Mr. Consul Medhurst, we must confess that we have not read a more able diplomatic document concerning the status of foreigners in China. Viewing it in that light, the opinions therein expressed are deserving of our most serious consideration, and we trust that the land-renters will assemble in their full strength at the British Consulate on Tuesday to deliberate upon the question. Granting that Sir Frederick is correct in his views, the point is, how we shall maintain ourselves against anarchy, under the circumstances which we must now consider as determined. Shall we infuse a Chinese element into our councils and administrations? We can undoubtedly accomplish this, and obtain the powers we need by surrendering to the Chinese authorities entire jurisdiction over Chinese subjects, except where they are in the direct service of foreigners. The powers imperatively required by our Municipal Council, are those which will allow the enforcement of taxation for municipal purposes, the support of a foreign police, and the right to enforce sanitary measures. Beyond that, the direct action of the Chinese and treaty authorities over their respective subjects and citizens, is sufficient for all practical purposes. If the condition of things in this settlement is clearly represented to Sir Frederick Bruce, so that he will realise the manner in which the foreign is mixed with the native population, making it impossible to maintain order and preserve life and property without a strong foreign police; that this mixture has been brought about by the operation of natural causes, which the renters could by no means have prevented; and that, unless some aid is given to organise a mixed Government in which foreign influence and vigour should prevail, most assuredly anarchy and ruin will follow; there can hardly be a doubt but that Sir Frederick will lend his influence with the Chinese Government to carry out a project which, in principle, would be in strict accordance with his views."

The expedition of disciplined Chinese sent from Shanghai for the relief of Fooshan had effected nothing decisive. The soldiers expended all their ammunition, and then were brought to a stand-still by the want of bridges. Major Gordon had gone to their assistance with a strong reinforcement of men and additional supplies of ammunition.

The "Ward Force" at Soonkiang is said to be in a highly unsatisfactory state. The rule of Chinese commanders is eagerly deprecated by the undisciplined troops, and that of foreigners as earnestly appreciated and approved of. The consequence is, that little outbreaks, which might easily become serious, are of frequent occurrence, being provoked by the inequality of discipline exercised by the foreign and the native officer. The last outbreak was caused by two men having been decapitated for looting a shop, they having already been punished for the offence by one of the foreign officers. The timid Chinese officials seemed to admit the dangerous nature of their course of action, for they caused the men to be decapitated at midnight.

Consul Medhurst has retired from office at Shanghai on a year's leave of absence, and been succeeded by Consul Harvey from Ningpo. Mr. Medhurst (says the *China Mail*) quits Shanghai greatly respected, both by those who enjoyed his administration of affairs, and by men of every nation.

Mr. Medhurst, who is a Brother Mason, has written a very long letter to Mr. Underwood with regard to the name to be adopted for the Masonic Hall at Shanghai. In the course of his letter he says :—

"Every public building and private establishment in the place has a designation of some kind, which is found not only useful but indispensable to meet the necessities of business and general intercourse. Most of these names are what the Chinese call 'lucky,' having been given by compradores or servants interested in the respectability and 'good-look-see' of their employers. A few however have not been so happily selected, the sound of the foreign name having simply been represented by native characters, and the Chinese asked to do this, having,

Digitized by Google

by a fatuity peculiar to the race, chosen words of not the most appropriate or agreeable meanings. Instances exist where the precaution of giving a name to a house has not been taken, and in such, the Chinese, who have had occasion to refer to the place, have dubbed it with some designation of their own, probably derived from some notable or ridiculous peculiarity, either of the establishment or its owners.

"In the case of the Lodge, the natives at present know it, I believe, by the name that the library has, but I have not the slightest doubt that ere long the mysterious character of the ceremonials conducted within it will reach their inquisitive eyes and ears, and their diseased imaginations will infallibly hit upon a solution of the mystery by no means complimentary to the fraternity, and the Lodge will be named accordingly. You will at once see how detrimental this result may prove to the name of Masonry in this port, and even beyond it, more especially if you call to mind the fact that to a Chinese everything that is vile and horrible is associated with the very idea of a secret society. If I have carried you with me thus far, the next question is what the Lodge had better be called. On this head I crave your patient perusal of the following remarks. Mencius, who, as you know, was a Chinese sage of ancient days, happened curiously enough in the course of his teachings to touch on the subject of the compass and square, and to demonstrate therefrom to his disciples that, as those instruments were the origin of the circle and the square, so the good man was the perfect exhibition of the relations of human society. His remark, which will be found in Dr. Legge's excellent translation of the Chinese classics, Vol. II., page 168, was as follows:—'The compass and square produce perfect circles and squares. By the sages the human relations are perfectly exhibited.' In consequence, I presume, of this association of ideas the Chinese terms for compass and square have in the course of ages come to express order, regularity, propriety, and at this moment the colloquial Chinese equivalent for the sentence 'in a proper manner,' or 'in accordance with propriety,' is 'Chao kwei keu,' which, being interpreted literally, means 'on the compass and square.' This employment of the names of two instruments, which are important emblems of the craft, to express a moral characteristic, is curiously coincident with some of the first principles of masonry, and it has struck me that the identity may be happily taken advantage of in selecting a suitable name for the Lodge. I propose therefore the Chinese name of 'Kwei-keu-tang,' meaning 'Compass and Square Hall' as the most fitting designation that can be adopted This title will at once associate the building, and the fraternity who congregate in it, in the minds of the uneducated natives, with all that is right and orderly; and to a Chinese who knows anything of his country's literature, the name will carry his memory back to the sacred words I have before referred to, as uttered by the sage, and which, fortuitously perhaps, but none the less distinctly, convey so masonic an idea to the mind. I beg leave to mention here a fact which strongly corroborates the truth of my impression that the mystery connected with a masonic lodge, unless veiled or explained by a suitable name, is calculated, with the ignorant and superstitious heathen, to lead to conclusions injurious to the fame of masonry. There is a lodge in Batavia where I spent many years of my childhood, learning of course, as I have done here, the language of the place. Long before I ever heard of masonry I received impressions inimical to it from repeatedly having had the lodge there pointed out to me as 'Roomah Saitan,' that is, 'the dwelling of Beelzebub,' by which it was then, and I dare say still is, known amongst the native population.

"I may also add that a simple translation of the word 'free-mason' or 'masonic lodge' into Chinese would fail to convey any idea beyond that of a 'free bricklayer' or 'stonemason,' or the 'lodge of a bricklayer,' &c. The Chinese language possesses no equivalent for 'mason,' and hence they call a stonemason a 'stone worker,' and a bricklayer a 'mud and water worker.' It would be impossible therefore to express the term 'mason' alone."

KIU-KIANG.

On the 21st March an armed party of fifty men attacked a Cantonese hong at Kiu-Kiang, and plundered it of four chests of opium and 1,000 taels of silver. The men are supposed to be discharged Imperialists soldiers from Nanking.

The reputation of the place for game is falling off. Deer are still occasionally seen in the neighbourhood, but the feathered tribes are somewhat scarce.

HANKOW.

From Hankow there is little news of importance; the weather has been unsettled. The tea season will commence soon; teas are expected to arrive in the middle of May, a week or two earlier than last year. There will likely be a further decrease in the quantity of tea that goes to Canton, as it was clearly proved last season that it entailed a loss to send teas to Canton from the Hoo provinces.

NINGPO.

The accounts from Ningpo are not very encouraging; no progress has been reported against the Taipings since the capture of Shaou-hing. The Franco-Chinese troops are said to be too much given to general looting.

On the 30th March a very serious disturbance occurred between some Europeans (Custom-house officers) and Chinese officials. It appears that a system of squeezing had long been carried on by the Custom-house boatmen, but meeting with a stout resistance, blows were resorted to and a general *mêlée* ensued; the authorities succeeded in capturing the boatmen and taking them prisoners into the city. The tide-surveyor, Mr. Newberry, stationed at Chinhai, immediately on gaining information as to the whereabouts of his Chinese boatmen, mustered all the Europeans that he possibly could, proceeded to the prisons where they were incarcerated, and demanded that his men should be instantly liberated. The mandarin in charge becoming alarmed at the threatening appearance of so many foreign faces who surrounded him, unlocked the door of the prison, and Mr. Newberry rushed forward where he found the objects of his search in irons. These he speedily released—but on their return to the entrance, he discovered that the door was locked upon him. Threats and the firing of his revolver inside the prison, brought the other Europeans to the rescue, who succeeded in knocking down the door and liberating the boatmen. It is supposed that several other prisoners effected their escape. One young man, a son of a Chinese merchant was shot and died shortly afterwards. The case was investigated by the proper authorities; and we learn that Mr. Newberry has been dismissed the service.

FOO-CHOW.

A daring and successful attack by pirates upon the British schooner *Japonica* was reported as having occurred near Namquan harbour; it resulted in the death of the captain and five of his men; the chief mate and two others escaped by concealing themselves below. The pirates having plundered and abandoned the vessel, the mate and others got ashore and reported the matter to H.M. Consul at Foo-chow, and the gunboat *Staunch* proceeded to the vessel's assistance.

We observe that Messrs. Margesson and Co. have established a branch of their firm at Foo-chow.

HONG KONG.

With regard to the line of policy pursued by Sir F. Bruce, the *China Mail* writes:—"Sir Frederick Bruce's administration of British affairs continues to be marked by great ability and foresight, and is such as to command the respect of all who have the interests of sound foreign relations at heart. The criticisms on Sir Frederick's policy are certainly to the effect that he gives very great consideration to the interests and claims of the Chinese, and that he turns a comparatively deaf ear to various demands made by his own countrymen; but it is beginning to appear that, with some minor exceptions, the desires of foreigners that have lately been submitted to his consideration are such as it would be unwise to grant, in the prospective interests of foreigners themselves. There was perhaps never a time in the history of our relations with the Chinese Empire so fertile with temptations to the taking of false and dangerous steps in general diplomacy, and the best thinkers in this part of the East are decidedly under the impression that Sir F. Bruce is not only fully alive to this fact, but quite equal to the diplomatic position in which he is placed, and possessing an intelligent appreciation of present difficulties, as well as of those likely to arise from an imperfect understanding of existing relations."

The following notifications are from the *Government Gazette*:—

"The Honourable W. H. Adams, Esq., Chief Justice of Hong Kong, having obtained leave of absence on medical certificate, the Acting-Governor has been pleased to appoint Henry John Ball, Esq., to be

Digitized by Google

Acting Chief Justice; and John Charles Whyte, Esq., to be Acting-Judge of the Court of Summary Jurisdiction, until further notice.

"Mr. Whyte will continue to perform the duties of second police magistrate.

"By his Excellency's command,
"W. H. ALEXANDER, Acting Colonial Secretary.

"Colonial Secretary's Office, Hong Kong, 1st April, 1863."

"The Honourable Henry John Ball, Esq., Acting Chief Justice, has been duly appointed to a Provisional Seat in the Legislative Council of this colony.

"By his Excellency's command,
"W. H. ALEXANDER, Acting Colonial Secretary.

"Colonial Secretary's Office, Hong Kong, 1st April, 1863."

A meeting of subscribers to the Gymnasium now established at the back of the Racket-court had been held. Mr. Shaw, of H.M.S. *Princess Charlotte*, was called to the chair; after which Dr. Schetelig, the provisional secretary, read a report, from which it appeared that the building is completed, and that the state of the finances is satisfactory. It was agreed that a subscription of $50 or upwards should constitute the subscriber an honorary member, and one of $10, or under $50, an ordinary member. A further trifling sum would be levied to meet current expenses. The Gymnasium is built in the main of hard wood, the side and the starting poles only being China fir, the roof consisting of a superior mat work. Length, 100 feet; depth, 60 feet; height in the centre part, 30 feet; height in the side parts, 15 feet 20 inches. The following description of the apparatus may interest our readers:—

"1. For exercises of progression: all facilities are given for leaping, vaulting, and running, in the leaping ropes, the vaulting horse, and the leaping pole.

"2. For elementary exercises: two pairs fixed parallel bars, one pair moveable do., two trapeziums, two pairs of rings, one row of four rings, one elastic ladder, one bridge ladder, two horizontal bars.

"3. For free climbing: one vertical rope, one pair of vertical poles, one pair of suspended poles, two slanting ropes, one rosary.

"4. For free and introductory exercise: dumb bells and shells; a sufficient number of foils, singlesticks, masks, boxing-gloves, have been ordered from England."

Outside the building a fixed post has been erected, with a movable head, to throw the dart at.

By the Siamese steamer, *Viscount Canning*, from Bangkok, the captain of the American ship *Hotspur*, and the following passengers who had put to sea in his boat, viz.:—Mrs. Eastlack and boy, Mrs. Abbe's two children, Mr. Eaton, and two Chinese servants, arrived in Hong Kong on the 8th April. The boat had been nine days at sea when it was picked up by a junk, which reached Bangkok thirteen days afterwards. Poor Mrs. Abbe died on the voyage up, but the others are doing well after their great hardships. The crew shipped off in different vessels from Bangkok. It is gratifying to report the safe arrival of the last of the three boats, which contained, together, all the souls who left Hong Kong in the ill-fated *Hotspur*.

The Portuguese gentlemen amateurs gave a performance on the 6th ult. on behalf of the Lancashire operatives; a handsome sum was realised. Some surprise was expressed at the absence of the Acting Governor.

The ship *Boanerges* left Hong Kong for San Francisco on the 1st April; three days afterwards she returned damaged to harbour, reporting having come into collision with the ship *Anglo-Indian*, bound from Foo-chow to Sydney. The Backus Minstrels, who had taken a passage to their native shores in the *Boanerges* were thus thrown back upon their friends in Hong Kong; the gentlemen amateurs at once gave them the use of the theatre for another concert.

The Hong Kong Volunteers' Rifle Match came off very successfully. For the first prize the ranges were 100, 150, 200, and 300 yards. Mr. H. J. Holmes, the prizeman, gained thirty-six points. Two Whitworth rifles, one presented by Mr. J. J. Mackenzie, and the other by Mr. C. F. Still, and a silver cup presented by Captain Kane, were also competed for on the 7th April, the second and concluding day of the match. His Excellency the Governor and Mrs. Mercer, Mrs. Murray, Mrs. Hunter, and Mrs. Morice, sat down (at about 2 P.M.) to a substantial tiffin with the Volunteers, in the Grand Stand. After tiffin, Mrs. Mercer presented Mr. Holmes with the medal. Her remarks were nearly as follows:—"Mr. Holmes,—I have been requested to hand you this medal, and have much pleasure in doing so. You have to be proud of it as a token not only of your skill, but of the attention and diligence you have shown in the study of your duties. It has besides a peculiar value, in being the first medal contended for by a Colonial Volunteer Corps, as has been noticed by the National Rifle Association, whose gift it is."

Captain Kane, in an appropriate speech, presented Lieutenant Tanner, 99th Regt., in the name of the corps, with a gold watch and chain, as a small acknowledgment of the appreciation of the services rendered by him to the corps as musketry instructor for the last twelve months. At the same time, Captain Kane presented Corporal Goodall, R.A., with a silver watch and gold chain, in the name of the corps, for the careful manner in which he performed his duties, and for his untiring efforts to get the corps into an efficient state of drill. Lieut. Tanner returned thanks, and gave expression to the pleasure he had in imparting instruction to the corps, the members of which, he said, paid diligent attention to their duties, and exerted themselves to acquire a thorough knowledge of the use of the rifle.

THE PHILIPPINES.

MANILA.

A Government decree has lately been published, according to foreigners all the privileges enjoyed by natural-born subjects of the Spanish crown. The *Diario* has lately come out with several articles acknowledging the great benefit accruing from foreign commerce and enterprise, and recommending the nourishment of foreign trade.

On the 31st April the Spanish ship *Margarita* arrived from Spain with His Excellency the Regal Commissioner of Administration, D. Patricion de la Escosura, and his numerous suite, on board. His Excellency's ostensible mission is to work a thorough reform in the Administrative departments of the colony. His Excellency is said to have narrowly escaped shipwreck owing to a violent storm on the 30th. The British barque *Macao*, from Bangkok to Shanghai, with sugar and rice, has been driven into Manila by the same gale, after having thrown overboard a great part of her cargo; her damages are considered to be so serious that it is feared she will have to be sold.

COCHIN-CHINA.

P. and O. steamer *Granada* left Saigon for Turon Bay, Cochin-China on the 1st April, and on arrival, Admiral Bonard and suite joined her from the *Semiramis*, intending to proceed to Hue, the capital of Cochin-China, for the purpose of effecting a treaty of peace.

JAVA.

The authorities at Toboali advertise having fished up at sea or along the coast, 621 chests of tea, having the mark Colonsay D. and C., together with some other articles, and a long boat with masts and sails belonging to the lost Dutch barque *Calypso*.

Two of the crew of the American ship *Mary Ann*, Captain Wilson, had arrived at Rhio and reported the loss of the said ship in the straits of Dorian.

Skirmishes continue to take place in the districts around Banjermassing.

Another expedition against Nias is being set on foot.

MALACCA STRAITS.

SINGAPORE.

A very shocking instance of the effect of over-crowding junks employed in the transport of coolies from China to Singapore occurred last month. It appears that 300 coolies were received on board the junk, *Kong Fatt* at Macao, and that only half that number were landed alive. Such a frightful case assuredly demands the strictest investigation. "It is," says the *Straits Times*, "in all probability only an example of many others that never come to our knowledge."

Part of the fleet that went down to the Coast of Borneo had returned; no pirates have been discovered—at least, none have been captured.

With regard to the transfer question, the *Straits Times* writes:—"No political events have taken place since our last summary. There seems to be a disinclination to agitate upon any local subject until the opinion of the present Parliament is ascertained, as to our transfer. From private letters lately received from old residents at home, who still take an interest in the affairs of the Straits, we have every reason to believe that we will not now long remain "a dependency of a dependency."—It is certainly time that such a change took place; scarcely a week passes over, in which the necessity or expedience of legislation on the spot is not brought to our notice. It is true that the Government of India have of late taken more interest in the Straits, and have passed one

Digitized by Google

or two Bills having relation to us; but they have been passed about a year after they were suggested from this, and are really of not much importance. From the delay that has occurred in the passing of those, it will be seen that we would be more rapidly legislated for by the Imperial Government itself."

The *Singapore Free Press* writes:—

"This season the naval authorities seem to have taken decided measures to intercept the Lanun pirates should they venture to proceed up or down the China Sea after the disastrous reception they received last year from the Sarawak steamer *Rainbow*. A force consisting of H.M.'s steam-corvettes *Scout* and *Barossa*, and the steam gunboats *Crown*, *Janus*, *Bustard*, *Haray*, and *Leven*, with the occasional assistance of the Straits steam gunboat *Tonze*, is watching at the southern end of the China Sea, at present near the Tambelans, and we should think that if the pirates appear at all, some of them are certain of being intercepted. The watch will be rather a tedious one, as the pirates in past years have been known to pass through the China seas at intervals from May to August, so that to prevent the possibility of their escape the steamers will require to maintain their cruise for several months. The course usually pursued by the Lanun pirates is believed to be the following: In the month of April they set out from the Sulo Archipelago and their haunts on the north and east coast of Borneo and proceed down the Straits of Macassar. After cruising along the south and south-west coasts of Borneo they cross over to the islands near Billiton, and from thence proceed to Karimata and the west coast of Borneo. In June or July they reach the southern entrance of the China Sea, and after visiting the Tambelans, Anambas, and Natunas groups of islands, they skirt the coast of Borneo until they reach their various head-quarters in September or October at latest. Sometimes, instead of proceeding direct through the Straits of Macassar, pirate squadrons diverge along the north coast of Celebes, then skirt the east coast of that island, and run along the north coasts of Floris, Sambawa, Lombok, and Bali, until they reach the Java Sea. In all these islands they formerly had numerous places of call and refit, and they probably still have some shelters of the kind, although of late years the Dutch navy has destroyed many of these piratical haunts."

The steamer *Singapore*, built for Messrs. Cores de Vries, the Dutch mail contractors, was launched on the 21st ult. She is a paddle steamer of the following dimensions:—Length, 186 feet; breadth, 24 feet; depth, 16 feet. Her gross tonnage is about 600 tons. This is the largest vessel that has ever been built at Singapore, or, indeed, the Straits Settlements, with the exception of one, which was built at Penang, then called the Prince of Wales Island, of the size of 800 tons, in the year 1801.

The American steamer *Sye Chuen*, Captain Kennedy, from New York the 25th of January last, arrived at Singapore on the 15th of April, and sailed for Hong Kong and Shanghai on the 22nd. The P. and O. Company's steamer, *Nubia*, Captain Gaby, arrived on the same day from Galle, with French troops for Saigon, from the *Japon*, which had broken down.

CEYLON.

The weather during the fortnight had been very trying in Colombo; the heat towards the close of it reached an almost unprecedented climax. Several of the "oldest inhabitants," of twenty and twenty-two years' standing, declare the range of the thermometer to be beyond anything in their experience.

The main topic of discussion is that of military expenditure. The general feeling in the colony appears to be that a far larger body of troops is to be sustained on the island than is requisite for public security. The *Colombo Observer* writes:—"This subject of our expenditure for military purposes has so long been a sore one with our legislators and the community—has so frequently been argued and contested *pro* and *con.*—that we, in Ceylon, are prepared to meet any attempt of the Imperial Government to impose further burdens, by measures that may result in our present contribution being reduced to a proper proportion. The great point for which our Legislative Council has fought for, since the new scale of Colonial allowances was framed, is the right to control the expenditure in that direction according to our necessities; and again and again has our Colonial Secretary and his supporters tried to bring this matter to a crisis—failing representations made to the home authorities—by disallowing the allowances entirely from our Supply Bill. Elsewhere, we have pointed out at length the absurdity of supposing that the large body of troops and expensive Staff maintained here are required for internal security, a figment we are surprised to see put forward by men like Messrs. Fortescue and Lyall who have given attention to the subject. We have no hesitation in saying that the force in Ceylon might be reduced one-half at once—and that without the slightest danger of any demand being made upon the moiety for "internal security."

The *Ceylon Times*, writing on the same subject, says:—"So far as the internal tranquillity of the Island is concerned, we can see no pretext for maintaining the present military force. For repelling foreign aggression we are quite unprepared; we have not a fort that could stand an hour's shelling from an enemy's gunboat, and it is difficult therefore to see why we should help to maintain a force that would be confessedly useless in time of war. Rather than yield to this pressure, we would ask to be allowed to maintain our own military on our own footing, and for our own acknowledged wants. As matters now stand, our payments on military accounts amount to about £150,000 a-year. We are to be asked to pay still more, but we should be greatly mistaken if we were not able to maintain a sufficient force for all local purposes, for a sum not much exceeding £100,000 per annum. It is not likely that the colony will submit to any further exactions of this kind, especially when we can employ our money for far better purposes. For years to come the railway and other needful public works will absorb all that can be spared of our revenue, without which outlay we cannot hope to compete with other coffee producing countries.

A very interesting commercial case has been tried in the Galle Court, the decision in which has led to much difference of opinion. A native merchant of the above place sent in a promissory note to the Oriental Bank for collection simply, and not for discount, and to enable the Bank to receive the amount on his behalf, he, as is the custom in such cases, endorsed the note in favour of the bank. Meantime some dispute on accounts having taken place, the endorser of the bill gave notice to the maker, his debtor, not to pay the amount of the said note to his agents the bank, but to himself in whose favour the bill was first made. The debtor paid him accordingly, and the bank then instituted the suit in question, on the plea that they were entitled to payment as endorsees of the bill. The Court however decided against the bank, and it is stated that the case being one of the some importance in a commercial point of view, will be sent up in appeal to the Supreme Court.

A large labour force is already engaged on the railway line, at different stations along the route; principally Tamils, but still with a good sprinkling of Singhalese here and there, particularly where the line passes near their villages; and it is expected that no small amount of the earth-work will be performed through the instrumentality of the latter. The paddy fields and marshes on the first few miles from Colombo, prove one of the greatest obstacles to progress. Of many thousand cubic yards of earth thrown into these by the late Company's officers, little or no trace remain at the present day, and experimental trials made by the contractor in the same manner, have resulted it is stated in little better success. The contractor, however, will not be daunted by this difficulty which he expects to overcome by iron screw piles so largely used for such purposes. These, some feet in diameter, and made in convenient lengths of nine feet each adapted for bolting together, will enable the "black spots" to be rapidly spanned.

The Pearl Fishery for 1863 closed on the 16th April. The result, so far as known, is the sum of £51,017. 17s. 5d., which though some £3,700 less than the amount estimated by the Colonial Secretary, viz., £54,800, is yet, nevertheless, considered to be most satisfactory.

The *Colombo Observer* asserts that Mr. Thomas L. Gibson will succeed Mr. Murray in the Judge-ship at Kandy. The same journal records the death, at the age of eighty, of Mr. J. L. Cramer, late registrar of the Supreme Court, which event took place on the 29th ult., at his residence in Small Pass.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

COHEN—On the 26th inst., at Sunnyside, Edgbaston, near Birmingham, the wife of Philip Cohen, Esq., late of China, of a son.

GITTINS—On the 11th inst., at East Molesey, Surrey, the wife of Thomas Gittins, Esq., of a daughter.

GOTTLIEB—On the 18th inst., at Kallang Dale, Singapore, the wife of F. H. Gottlieb, Esq., of a daughter.

HAPPER—On the 9th ult., at Canton, the wife of the Rev. A. P. Happer, of a son.

KINNEAR—On the 17th inst., at Melville-terrace, Chatham, Kent, the wife of Charles R. Kinnear, Esq., M.D., Deputy Inspector-General of Hospitals and Fleets, of a daughter.

MELBOURN—On the 28th March, at Batavia, the wife of G. Melbourn, Esq., of a son.

MARRIAGES.

ARBUTHNOT—FULCHER.—On the 19th inst., at St. Mark's, Surbiton, by the Rev. W. H. O'Bryen Hodge, assistant-chaplain of the Lock Chapel, assisted by the Rev. E. Phillips, George A. P. Arbuthnot, Esq., third son of George Arbuthnot, Esq., of Norbiton, and grandson of Sir Robert Arbuthnot, K.C.B., to Mary Ellen, only daughter of the late Captain Wm. Fulcher, of Surbiton-hill, and granddaughter of the present Marquis d'Amboise.

CAMERON—KELLY.—On the 20th ult., at St. Andrew's Church, Singapore, by the Rev. A. D. Nicolson, chaplain, John Cameron, Esq., of Singapore, to Frances Hughes, youngest daughter of the late Mr. Nicholas Kelly, Madras Ordnance.

FREEMAN—RAYBONE.—On the 2nd ult., at St. John's Cathedral, Hong Kong, by the Rev. J. J. Irwin, Colonial chaplain, Robert Freeman, youngest son of the late Joseph

Digitized by Google

Freeman of Spring Grove, London to Emma, eldest daughter of William Rathbone, of Broomfield, Southgate. No cards.

OLIVER—SHERSON.—On the 5th inst., by the Rev. J. E. Cumming, incumbent of Newington, George William Oliver, Esq., Royal Marines Light Infantry, youngest son of the late Commodore Sir Robert Oliver, K.C.B., Royal Navy, and Commander-in-Chief of H.M.'s Indian Navy, to Blanche Catharine, only child of the Rev. Robert Sherson, rector of Yaverland, Isle of Wight. No cards.

VINCENT—COOPER.—On the 20th inst., at Pear-tree-green, Church, near Southampton, by the Rev. T. L. Davies, J. H. Vincent, Esq., eldest surviving son of W. Vincent, Esq., R.N., to Clara, daughter of E. Cooper, Esq., Senior Commander in the Peninsular and Oriental Co.'s Service, Woodside. No cards.

DEATHS.

ANSTRUTHER—On the 22nd inst., at 1, Norfolk-street, Park-lane, Philip Anstruther, Esq., late Colonial Secretary of the Island of Ceylon, aged 60.

BREMNER.—On the 7th inst., at 36, Dougas-road, Canonbury, Dugald Seton Bremner, aged 8 years; on the 10th inst., Florence Rosabelle Bremner, aged 10 years; and on the 11th inst., the father, Dugald Bremner, Esq., late of the Oriental Bank, aged 42. Friends will please to accept of this intimation.

DE RAYMOND—On the 20th ult., at Colombo, Mrs. L. H. De Raymond, aged 64 years.

DONNAN—On the 10th ult., at Cocoa-de, Ceylon, the infant son of Capt. Donnan, of the Colonial steamer Pearl.

DOW—On the passage to Foo-chow, on or about the 20th March, Charles H. Dow, Pilot of the Shanghai Pilot Association.

GRAHAM—On the 26th March, at Shanghai from the effects of wounds received at the assault of Tat-seang on the 15th February last, Major Graham, of the Sung-kiang Garrison.

JARVIE—On the 22nd inst., at 10, Park-quadrant, Glasgow, Mrs. Jane Milligan, relict of Robert Jarvie, Esq., merchant, Glasgow, aged 78.

KELLY—On the 24th March, before Fooshan, a walled city near Flower Point, at an attack on it by the Imperialist forces under the Chinese General Lee, Capt. Kelly, of the Sung-kiang Garrison.

MORTIMER.—On the 8th inst., at Hackney House, Southampton, Margaret, wife of Edward Mortimer, Esq., of Ceylon, aged 26.

POTTER—On the 22nd ult., at Hospital-street, Fort, Colombo, after a short illness, Mr. William Potter, aged 38 years.

SPELDWINDE—On the 22nd ult., at Batticaloa, Ceylon, Amelia Louise, wife of Henry Speldwinde, aged 26 years.

STREETEN—On the 19th inst., in the Channel, while on his return from China, Harry Cuthbert Streeten, First Lieutenant of H.M.S. Snake, the third son of the late Rev. Henry Thomas Streeten, of The Manor House, Lydiard Millicent, Wilts, and vicar of Rodbourn Cheney, in the same county. He was crushed to death by a boat, which was torn from its fastenings during a fearful gale. He was beloved and esteemed by all who knew him.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—MACAO.—The stock of old Tyshan still remain neglected; some new season contract teas have arrived, say, about 200 piculs, which are being prepared in Kysow style, for the English market: rates not transpired.

CANTON.—In scented teas little has been done. Capers are somewhat easier. The new crop is expected at market in two or three weeks. Of Canton Greens a few lots of new have been brought forward and have fetched high rates. Country Greens are somewhat cheaper. The following are the settlements reported for the fortnight:—Congou, 8 chops, say 1 chop Hobow, at 19 taels; 2 do. Oonahms, at 21 to 23 taels; 2 do. Oopacks, at 26 to 27 taels; 3 do. Monings at 25½ to 26 taels, and 106 chests new Tyshans at 23½ taels. Scented Teas: 7,500 boxes Caper at 12 to 15 taels for common to fair, and 16 to 17 taels for medium; 800 boxes Or. Pekoe at 22 to 24 taels for middling to good, and 34 taels for finest. Canton Greens: 3,000 boxes old Gunpowder, common 13 to 14 taels, good 23 taels; 1,200 boxes old Young Hyson, fine at 23 taels; 2,000 boxes new Gunpowder, good at 24 to 26 taels; 600 boxes new Young Hyson, fine at 24 to 26 taels.

SHANGHAI.—Black: The Market has been inactive since the departure of the last mail, and the season is drawing to a close. Only two chops have been settled during the fortnight, and it is with great difficulty that the present stock, which is composed of quite common tea, can be worked off. The market at Hankow is nearly bare, and we cannot expect any more arrivals from that port. The new season's crop, however, will be coming in in about six weeks, and it is generally supposed the quality will be far better than at the commencement of last season. Quotations for Hobow, the only kind in stock, Tls. 16 to 20. Settlement for the fortnight 260 chests, and to date 282,895 chests against 202,637 chests same time last year. Stocks 3,600 chests. Greens: There was quite an active demand just prior to the departure of the last mail, and rather heavy settlements were made at that time, as will appear below. The demand however, became less active, and since the mail little has been done. Prices remain the same and stocks are large, while from Kiukiang we are daily receiving additions to the quantity already on hand.

FOO-CHOW.—The market being nearly cleared, purchases have been necessarily small; and are not indicative of any change in price. The settlements of the fortnight are reported as under:—Congou: 1,700 chests and 3,100 half-chests do. at 6 taels for low and dusty up to 18½ taels for flavoury. Flowery Pekoe: 140 chests at 19 taels for fair. Oolong: 1,900 half-chests, at 10½ taels for inferior cargo. Scented Tea: 2,200 boxes at 10 to 22 taels for fair common to good.

AMOY.—The business of the past month has been very small, and no settlements whatever have been made during the past fortnight. The remaining stock principally consists of common Ankoi teas, for which there is no demand. Small musters of plain orange Pekoes of the new crop are expected shortly.

HANKOW.—Only 5 chops remain upon the market, which, being the refuse of the season, it is useless to quote. The season may be said to be over. The total quantity shipped amounts to 468 chops, against 276 ditto last year. Regarding the coming chop, the advices from the country, both as regards quantity and quality, are highly favourable. It seems that copper cash is the currency in the producing districts, and that a scarcity of that article causes business to be somewhat retarded. Some of the contract chops are expected down early in May.

KEWKIANG.—The transactions of the fortnight in Greens have been rather small, owing to the better teas having all been bought up, and causing the assortment on offer to be rather poor. The better teas on the market are firmly held, but the commoner kinds are easier. The following are the settlements of the fortnight:—1,000 half-chests Moyune, fine, at 36½ taels; 1,500 do. Fychow, common to good at 24 to 28½ taels; 2,500 do. mixed leaf and Kewkiang packed at 20½ to 27½ taels. Total, 5,000 half-chests Green. Of Blacks, the only settlement is 300 chests common Hohow at 12 taels. Stocks 22,500 half-chests Green and 2,500 chests Black. The shipments of tea to Shanghai for the season amount to 257,500 half-chests Green and 53,000 chests Black.

RAW SILK.—SHANGHAI: The material advance in the rate of exchange has checked business, which has been limited to 800 bales. The dealers remained firm during the early part of the fortnight, but the small demand, and the scarcity of money compelled some of them to submit to a reduction of taels 5 to 10 per picul on Tsatlees, and the tendency of prices is certainly downwards. The market is cleared of Taysaams, the stock being almost entirely composed of Tsatlees, with a few Yuenfas and Hainings. Very small supplies have been received from the interior; and we have had no arrivals from Japan, so that the stock has now become very moderate, say 1,000 to 1,500 bales. Tsatlees: No. 1, 475 to 485 taels per picul; No. 2, 455 to 465 taels do.; No. 3, 440 to 445 taels do.; market No. 3, 420 to 435 taels do.; No. 4, 405 to 415 taels do.; No. 5, and com., 380 to 400 taels do. Taysaams: No. 1, 420 to 430 taels do.; No. 2, 385 to 405 taels do.; No. 3, 355 to 375 taels do.; No. 4, 5, and com., 320 to 350 taels do. The settlements of the fortnight are reported as 800 bales, against 2,000 bales at corresponding fortnight of last season, and of 1,200 ditto the season before. The total corresponding settlements of the three seasons to date stand thus respectively, 61,200 bales, 65,000 ditto and 76,000 ditto. The corresponding stock at those dates 1,500 bales, 3,000 ditto, and 6,000 ditto.

CANTON.—The coming crop is reported large, and rates are expected to recede. No transactions are reported during the fortnight.

DRUGS.—MACAO.—Cassia Lignea: Sales 800 piculs at $15.60 to 16; stock 800 piculs for which $16 to $16.25 are demanded. Cassia Buds: Sales, 15 piculs at $45; another small parcel of 15 to 20 piculs is now offered at the same price. Cassia Oil: Sales 15 piculs at $100 to $105; stock 15 piculs held at the latter figure. Aniseed Oil: Sales 27 piculs at $136 to $138; stock 100 piculs mostly held for higher rates. Star Aniseed: Sales 70 piculs at $16.50; stock 130 piculs, held at $19.50. Galangal Root: No sales, stock 350 piculs, offering at $3.25. Ginger Preserves: $2.70 to $3 for best. Vermilion: $35.

CANTON.—Cassia Lignea: No sales; quotation $16 to 19½; stock 500 piculs. Cassia Oil: No sales, nor stock. Cassia Buds: a few piculs have been sold at $49; stock 26 piculs. Rhubarb and Gamboge: neither sales nor stock. China Root: No sales; dull at $4; stock small. Galangal: No sales; quotations $4 to $4.25. Galls: Are scarce and wanted, and have advanced to $18. Vermilion: $40 to $41 per lb.

CAMPHOR.—HONG KONG.—The market is dull and declining. The quotation is only $25 per picul.

COTTON.

CANTON.—Owing to the great scarcity of money, no sales of any description have been made during the fortnight, and extreme dulness prevails. Prices are nominally without change. The stock on the market consists of 300 bales Bombay, and 6,000 bales Ningpo and Shanghai.

HONG KONG.—During the fortnight sales of about 2,000 bales Shanghai and 1,500 ditto Ningpo were effected at $20 to 21½, but the advices per mail steamer of a decline in the Liverpool market, combined with very full supplies from the coast, the extreme scarcity of money, and the high rate of exchange, caused rates to fall $1 to 1¼. The quotations are:—Shanghai, $18½ to 19: Ningpo, $19½ to 20, the tendency of the market being down.

SHANGHAI.—Shortly after departure of last mail, supplies from the country came in freely, and as buyers for shipment to England held off, owing to false rumours gaining ground as the depreciation of the article in the Liverpool market, the rate fell and purchases were made as low as 12¾ taels per picul. Latterly, however, the supplies from up country having been retarded by heavy rains, and the later advices from England being more favourable as to the Liverpool market, the rate had advanced, and a good clean article cannot be had under 13½ taels. There is a good demand principally for shipment to Hong Kong. Two ships have sailed for Liverpool during the fortnight, leaving none on the berth. One or two more are wanted.

CHINA IMPORTS.

HONG KONG.

COTTON YARN.—Has been without demand, but the article is in very few hands and will probably not be sold except at higher prices than our quotations; sales here, 82 bales.

GREY SHIRTINGS.—Last mail having brought the news of an important advance of this article at Calcutta and dependent markets, large purchases were effected here, at our quotations. The sales amount to 67,350 pieces chiefly 8¼ lbs. goods, and the demand seems satisfied for the moment. For Chinese consumption there is no inquiry; at Amoy the sales consisted of 900 pieces; at Foo-chow of 2,050 pieces.

T-CLOTHS.—Are in moderate request at former rates; sales, 4,650 pieces; at Foo-chow, 2,000 pieces.

WHITE SHIRTINGS.—Demand continues good, and stocks seem low; sales here, 10,300 pieces; at Foo-chow, 500 pieces.

BROCADES, DAMASKS, AND SPOTTED SHIRTINGS.—Continue in good demand; sales are 2,000 pieces brocades, and 1,000 pieces spotted shirtings.

CHINTZ AND HANDKERCHIEFS.—Sales 1,650 pieces chintz, and 2,270 dozen handkerchiefs.

VELVETS AND VELVETEENS.—In less demand; no sales here.

LONG ELLS.—At the low rates now ruling 500 pieces have found buyers.

SPANISH STRIPES.—Are duller again, 265 pieces having been sold here; at Canton 700 pieces.

CAMLETS.—Are in less demand owing to the high prices; 310 pieces have found buyers.

LASTINGS.—Are less inquired for. No sales to report.

BLANKETS.—Nothing doing.

IRON.—Sales during the fortnight amount to 2,000 bundles nailrod at annexed quotations, 100 bundles hoop, 1,670 bundles bar, and 400 bundles flat; at Canton, 5,000 bundles nailrod have been sold.

LEAD.—Sales here amount to 550 pigs; at Canton, 1,100 piculs have changed hands; at Foo-chow, 1,000 piculs.

TIN PLATES.—There is only a local demand for this article; sales here, 600 boxes.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

SHIPPING INTELLIGENCE.

ARRIVALS.

At SHANGHAI.—March 30, Grenadier, from Liverpool; Heda, from London; Shelburne, from London; Etha, from Cardiff; Onangondy, from Liverpool; Harkaway, from Sunderland. April 4, Vigil, from Liverpool; Elizabeth, from Newcastle. 5, Ellen Rodger, from London. 6, Challenger from London. 7, Marari, from Swansea; Sumatra, from New York; Gabalos, from London; Barraconta, from Liverpool.

At HONG KONG.—April 5, Stella, from Hamburg 13, Coniston, from Liverpool. 12, H.M.S. Perseus, from England.

At SINGAPORE.—April 8, Benvenue, from London. 7, Mavina, from Cardiff; Gloriosa, from Hamburg; Leopard, from England and Simon's Bay. 10, Peiho, from England and Capetown. 11, Osnabruck, from Hamburg; Friedland, from Cardiff; Jean Bart, from Bordeaux; Alida Maria, from Cardiff. 12, Neptune, from Cardiff. 15, Sye Chuen, from New York.

At BATAVIA.—March 31, Chin Chin, from England; Syd Poleu, from Sweden. April 2, Gelderland, from Amsterdam; Borneo, from Boston. 3, Hooghly, from Bordeaux.

At BANGKOK.—April 12, Semper Fidelis, from London.

At MANILA.—March 30, Agricola, from Cardiff. April 3, Margareta, from Cadiz. 6, Helvetien and Alaric, from Cardiff.

At PENANG.—April 22, George Andreas, from Hamburg.

DEPARTURES.

From HONG KONG.—April 2, Raj. of Sarawak, for Liverpool; 5, Gazelle, for Capetown.

From MACAO.—April 4, Mary, for Lima.

From FOO-CHOW.—March 20, Congo, for New York; 25, Anglo-Indian, for Australia; April 1, Albuera, for London; 5, Ceres, for London.

From SHANGHAI.—March 28, Resolute, for New York; Cyclone, for Liverpool; 30, Vanguard, for London; April 2, Truro, for Liverpool.

From SINGAPORE.—April 8, Violet, for London; 10th, Olympia, for Falmouth; 13, Ariadne, for Liverpool; 15, John Patton, for Falmouth.

From BANGKOK.—March 16, Lizzie and Kate, for London.

From MANILA.—March 26, Annie de Bretagne, for Nantes; 28, Corripore, for Cork; 28, John Mayall, for Liverpool; 28, Orient, for Cork.

From PENANG.—April 17, Revere, for New York.

LOADING.

At CANTON for LONDON.—Margaret Mtchell, West Australian, and Monarchy.

At HONG KONG for LIVERPOOL.—Storm King.

At SHANGHAI for LONDON.—M. of Londonderry, Flying Spur, and Thessalia.

At YOKUHAMA for LONDON.—Copernicus.

At SHANGHAI for UNITED STATES.—Benefactress, Cleveland, and Castleton.

At FOO-CHOW.—Hound (full), Honqua.

At SINGAPORE.—Oscar for London; Cathay for Falmouth; Wandrahm for New York; J. W. Sears for New York; G. H. Wappans for Liverpool; Lady Agnes Duff for London; Singapore for Bordeaux; Benvenue for London; Conquest for New York.

At PENANG.—America for London.

At BANGKOK.—Pomone for Bordeaux.

At MANILA.—Governor-General and Tricolour for Liverpool; Luicita for Cadiz and Liverpool.

FREIGHTS AND CHARTERS.

At SHANGHAI.—To London and Liverpool, £3. 15s. to £4. New York, $17.50. Nagasaki, $4 for measurement and 25 per picul dead weight. Kanagawa, $5 for measurement and 30 per picul dead weight. Hankow, 7 to 8 taels for measurement and 4 to 5 mace for dead weight. Foo-chow, $4 for measurement. Amoy, 60 to 70 cents per bale of cotton. Hong Kong, 50 cents per do.

At HONG KONG and CANTON.—For England, £4. For New York, $17.

At MANILA.—For England, £4 to £4. 10s. for sugar, and £5 for hemp.

At BATAVIA.—For England, £3. 12s. 6d. all round.

At SINGAPORE for ENGLAND.—Tin, £3; sago, in boxes, £4; sago flour, £4; gambier, in bales, £3; sugar, £4; black pepper, £4. 10s. for 16 cwt.; coffee, £4. 10s. per 18 cwt.; hides and horns, £4. 10s. per 16 cwt.; gutta percha, £4. 10s.; measurement goods, £4. 10s. for 50 cubic feet.

PASSED STRAITS OF SUNDA.

From England and Continent to China, &c.: March 30, Chin Chin, from Newcastle for Batavia; Duc de Malakoff, Bordeaux to Saigon; April 1, M.M. Peter, Glasgow to Shanghai; Glen Aras, London to Shanghai; 2, Oscar Vidal, Hamburg to Hong Kong; 8, Shakspeare, Cardiff to Hong Kong. From United States to China, &c.: April 1, Borneo, Boston to Batavia. From China, &c., to England and Continent: March 31, Damietta, Whampoa to London; April 2, Kosmos, Canton to London; 3, Kamschatka, Foo-chow to Cronstadt; 7, Gertrudia, Manila to Cadiz; Foam, Hong Kong to Liverpool; 8, Leichardt, Shanghai to London; Rachel, Whamboa to London.

COMMERCIAL POSTSCRIPT.

CITY, WEDNESDAY AFTERNOON.

On the silk market Messrs. Durant and Co. write:—"At the outgoing of the last mail on the 11th inst. all was going well with the European crop, and our market was correspondingly heavy. This continued without interruption, and with a proportionate increase of heaviness and depression of feeling up to mid-day of the 23rd inst, when telegrams were received intimating mischief, and a commencement of the unfavourable symptoms of the last few years just at the critical moment of the crop. These reports continue, but still are not so universal or so decided as to make it quite clear. The impression is that the crop will not much exceed that of last year, but it will at least equal that, and the cost is expected to be decidedly lower. The only effect upon our market hitherto has been to diminish the anxiety of holders to press sales, and to some moderate extent to draw out buyers, but except at the lowest prices made they hesitate to purchase."

ARRIVALS NOT INCLUDED IN THE TABLES.—May 23, at London, from Galle and Colombo, Ann Lee; 25, at Deal, from Banjoewangie, Koophandel; 21, off Dungeness, from Batavia, Konig Willem III., and Nederland en Oranje; 26, off Plymouth, from Shanghai, Robert Henderson. May 23, at Texel, from Banjoewangie, Capella; 27, off Falmouth, from Foo-chow-Foo, Marco Polo.

DEPARTURES.—May 25, from Deal for Shanghai, Bedfordshire; 22, from off the Lizard for Batavia, Ridderkirk; 22, from Sunderland for Singapore, Sea Bird; 25, from London for Cardiff and Shanghai, Magdalena. May 25, from Deal for Shanghai, Island Queen; 22, from off Folkstone, for Shanghai, Powerful; from Cardiff, for Shanghai, Lord Collingwood; for Singapore, Andromeda; April 22, from Bermuda, for Shanghai, Gertrude; May 25, from Cardiff, for Galle, Tamatave; 26, from Shields, for Shanghai, Oliver Cromwell.

SPOKEN.—Havering, Shanghai to Liverpool, 11 April; City of Durham from Foo-chow-Foo, 12 March, 23 S., 69 E.; Amsterdam, Dutch ship, Sourabaya to Amsterdam, 4 April; Baram (?) Sourabaya to Amsterdam, 9 April; Malta, Manila to Falmouth, 6 March, 29 S., 63 E.; Amsterdam, Batavia to Amsterdam, 11 April, 3 N., 23 W.; A French ship, showing 3rd d.p. No. 2,691, Toulon to Cochin China, 18 May, 37 N., 4 W.; California, Liverpool to Batavia, 13 May, 48 N., 17 W.; Julie Claire, Java to Amsterdam, 1 May, 24 N., 10 W.; Viola, ship, Manila to Queenstown, 11 Feb.; Diedrich Pentzien, Ceylon to London, 12 Mar., 30 S., 40 E.; Celebes, Java to Amsterdam, 28 S., 9 (?) E.; Java, Bali to Rotterdam, 3 April, 34 S., 17 E.; Eastward Ho, Singapore to Falmouth, 17 April, 10 S., 12 W.; Boreas, Cardiff to Singapore, 24 April, on the line 21 W.; Canaan, Manila to London, 29 April, 4 N., 22 W.; Victory, Canton to London, 8 May, 26 N., 36 W.; Gabalva, barque, London to Shanghai, 25 April (?), 18 S., 108 E.; John Vanner, Colombo to London, 10 Mar., 33 S., 32 E.

At MADEIRA, May 6, Tien-tsin, Chinese gunboat, from Falmouth, and left 9th for China.

At ST. HELENA.—April 18, Appelina, Weighill, from Shanghai; 19, Radnagore, from Shanghai for London.

LAID ON at LONDON.—For Hong Kong and Canton: Queen's Own. For Singapore: Elizabeth Thornton.

LAID ON at LONDON.—For Manila: Burdeos of Habana, No. 2; for Colombo: Tar. At Liverpool.—For Colombo, Queen of Commerce.

Digitized by Google

The Admiralty have invited tenders for the conveyance of six tons of medical comforts to Singapore from the River Thames.

At LIVERPOOL.—For Hong Kong and Canton: Bella. For Manila: Jalswar. For Singapore: Bonaventure.

RAILWAYS AND ROADS IN THE EAST.

The Times' Calcutta correspondent writes:—

"Colonel Phayre, the Chief Commissioner, is anxious to make a survey of Captain Sprye's proposed route to Esmok, though all here scout the idea of a railway for the next half century. A road, however, would open up the Shan country. In Assam, Major Agnew has achieved an important feat; he has taken a small steamer up the Berhampooter, as far as Sudya, our utmost station, which cannot be more than 200 miles from the Yang-tse, where it enters China Proper. As we have just pacified the Jyntea savages on the hills to the south, and made engagements with the Abors, and other tribes who shut us out from the country beyond, I have every hope that next cold season will see an attempt, the first since our surveyors were driven back, and two French priests were murdered, to penetrate by this route into Eastern Tartary and China. Again, the subject of a road from Darjeeling to Lassa has been revived. The activity in tea planting is so marvellous that already the planters are crying out for room, and at Sudya the country is one mass of the finest limestone.

"More visionary to some than a railway to Esmok will seem the project broached by Russia and seriously entertained by English engineers, of connecting the Indian and Russian system of railway communication by the Oxus valley and the Caspian. If you take the map you will find that the swiftest and almost direct route between Calcutta and London is this—from Raneegunge to Buxar, there cross the Ganges, and through Oude and Rohilcund to Umballa, joining the Punjab Railway to Lahore. Thence a fine road leads to Peshawur, and a tunnel under the Indus at Attock is more than half bored. Leaving India on we go through the Khyber Pass, past Jellalabad and Cabul, through the Hindoo Koosh, and strike on the Oxus, following it as far as Khiva, whence there is the ordinary caravan route and wells to the Caspian, where a Russian steamer waits us. Arrived at Astrakhan we shall find in a few years the St. Petersburg Railway completed by Sarats, on the Volga, to that city, and from Lemberg by Kiev to the same place. The route is two days shorter than by the Euphrates Valley, or eight days in all from Calcutta to London. The only difficulty is between Peshawur and the Caspian, and the only engineering trouble would be the Hindoo Koosh. It will be more easy to make a railway in Central Asia than along the Ukran coast where Alexander's army perished, and where it is difficult to protect a line of telegraph. We do not expect to see the Euphrates Valley line go further than Bussorah for many years, any more than the Caspian line further than Astrakhan and Peshawur on either side. Both I believe to be great world routes, which in time will be the chief means of transit between India and Europe. But, as the tendency of events is to check Russia in Europe, and propel its force in Asia, to the decided advantage of the latter, there can be little doubt that the project of the Caspian Railway will not be dropped. Russia has little chance of Constantinople, and is not inclined to see Turkey the highway to the East when there is a shorter route by her own provinces."

MAIL STEAM-PACKET SERVICE.

There are now 130 Channel and ocean mail steamers subsidised by the British Government. The mail steam-packet service has been in existence twenty years, and during that period about thirty packets have been wrecked, in which upwards of 2,000 persons lost their lives, and through which £3,000,000 worth of property was destroyed. Our channel and ocean mail steamers traverse nearly three million miles and carry a couple of millions of passengers in the course of a year. Since the Atlantic has been crossed by steam twenty steamers (mail packets and others) have been lost in that ocean. The most dreadful loss of an Atlantic steamer was that of the *Austria* by fire, in the middle of the ocean, with nearly 1,000 persons on board. The actual outlay for the service in the twelve months ending March 31st was £952,987, showing an increase of £40,981 on the previous year. The postal contracts for what may be termed the channel and coast service, including lines of steamers connecting with Calais and Ostend, cost the Government in this time £109,847; the Cunard service, £174,840; British North America, West Indian Stations, £237,479; Central and South American, £56,433; West Coast of Africa, £30,000; Cape of Good Hope, £25,000; Point de Galle and Sydney, £76,486; Australia and New Zealand, £13,000; Alexandria, Ceylon, Calcutta, Hong Kong, and England, including a branch from Marseilles to Malta, £162,125; Aden and Bombay, £22,000; India, by alternate weekly communication to Bombay and Calcutta, for the conveyance of additional mails, £21,000; paid for the Peninsular Mail service, £15,500; Southampton and Alexandria, for the conveyance of additional mails, £5,000; China, to and from, for conveyance of additional mails, £24,000. These special items do not include the moiety paid by the colonies in aid of the service; there is also an allowance to Government agents on board the contract packet of £952,987. Home packet establishments, pensions, and contingencies raise, as stated above, the whole amount to £956,878. Deducting receipts from ocean postage, about £470,000 may be considered as expenditure for purely postal services. From July 1st of this year, a contract comes into operation with the Galway Packet Company for transmission of mails from Galway to American ports involving an annual outlay of £58,500.

NEW ROUTES TO THE PACIFIC.—The advices from Nicaragua received on the 14th inst. by the West India mail give some particulars of the progress of the exploration just commenced by Captain Bedford Pim, R.N., with the view to establish a railway and steam transit from the Atlantic to the Pacific. Captain Pim arrived at Greytown from England on the 9th of April, and started on the 11th for Bluefields, accompanied by two civil engineers whom he had brought with him, where he obtained a large force of Indians and Creoles to cut a path through the woods. Returning with these men to Gorgon Bay, which he contemplates as the starting point of the line, he built a house as a general rendezvous, and stored it with provisions under charge of a Rama chief. From Gorgon Bay he took his party about eight miles south to the Rama River, with the idea that its course might pass somewhere near his proposed route, and thus enable him to start two parties from about the centre of his line, and so cut east and west at the same time. Captain Pim was right in this conjecture. He explored and made a survey of the river, and landed on the left bank about twenty miles from the sea, whence he started off two parties—one cutting through the forest easterly towards the Atlantic; the other westerly towards the Lake of Nicaragua. Each party consisted of fourteen men, headed by a civil engineer. They commenced work on the 16th, and when Capt. Pim left on the morning of that day, each party had cut about a mile through the bush, with every prospect of running a line of levels right across by the end of the month. The starting station, nearly midway, was only one hundred and twenty-seven feet above the level of the sea, and not a hill of any sort could be seen. It was considered, therefore, that there is every chance that the route will afford easy gradients from end to end. Each party was supplied with needful stores and provisions, and the weather was favourable. The political condition of the Republic, however, was as threatening and uncertain as possible. The Canada papers mention that the people of the Red River settlement have petitioned the Provincial Parliament for the opening of a road from Canada to British Columbia through the Red River and Saskatchewan regions, and the establishment of a telegraphic line. This route would form part of the link from London to the Pacific, as already noticed by us.

ANCIENT CHINESE ENAMEL WARE.—A selection of beautiful specimens of ancient Chinese enamel ware, from a private collection at Peking, including a large and fine font and vase, and other pieces of rich form recently received from China, were disposed of by auction last week. The following merit notice:—Lots 70-2. A triple gourd-shape bottle, with flat sides, very richly decorated with flowers and scrolls in compartments; a very rare specimen. A beautiful bowl of bright blue enamel, decorated with coloured flowers and borders and characters, with the companion bowl—35 guineas. 75-6. A magnificent font and cover, with Kylin top and elephant's head supports in metal gilt, the whole richly ornamented with flowers, scrolls, and devices; and a pilgrim's bottle, of sexagonal form, with handles and metal edges, beautifully decorated in flowers, &c., on a bright blue ground—£45. 78-80. A beautiful small font and cover, on tripod feet, Kylin top and handles, richly ornamented in colours, and a perforated and enamelled stand for the same; an urn, of rare form, ornamented with flowers and arabesques, on a lapis blue ground, and metal gilt ribs and foot; and a very ancient incense bowl and cover, with green and white ornamentation in flowers and scrolls, and metal handles—£45. 88. A magnificent vase and cover, of the finest enamel, with top and handles in metal gilt, designed as dolphins, the groundwork of a brilliant blue, richly ornamented with flowers in various rich colours, a splendid work of art—120 guineas. 89. A noble font and cover, Kylin top and tripod supports equally magnificent—90 guineas.

POSTAGE OF LETTERS TO INDIA, CHINA, &c., *via* MARSEILLES.—On the 1st of June next, and thenceforward, the whole of the postage upon the letters forwarded, *via* Marseilles, to the East Indies, China, Australia, or any place to the eastward of Suez, will be charged by the British scale of weight, instead of, as at present, by the British scale for the British inland and sea postage, and by the French scale, advancing by steps of a quarter of an ounce, for the French transit rate. The following will be the amount chargeable upon such letters from the date specified:—Addressed to India, Ceylon, Mauritius, Australia, Tasmania, or New Zealand, not exceeding half an ounce in weight, 10d.; above half an ounce and not exceeding 1oz., 1s. 8d.; above 1oz. and not exceeding 2oz., 3s. 4d.; above 2oz. and not exceeding 3oz., 5s.; every ounce after the first, 1s. 8d. Addressed to Penang, Singapore, Hong Kong, China, Java, Labuan, Japan, Borneo, the Moluccas, or the Philippine Islands, not exceeding half an ounce in weight, 1s. 4d.; above half an ounce and not exceeding 1oz., 2s. 8d.; above 1oz. and not exceeding 2oz., 5s. 4d.; above 2oz. and not exceeding 3oz., 8s.; every ounce after the first, 2s. 8d.

THE DEBATE ON CHINA.—The *Spectator* says, "A singularly pertinent question was asked last night by Mr. Liddell in the House of Commons, 'Does the Government intend to found an Anglo-Chinese Empire?' The debate, extending over several hours, and very good throughout, was listened to by about twenty members—the noble lord at the head of the Government asleep, apparently, on his seat. In vain Mr. Cobden and Mr. Danby Seymour stormed at this 'contempt of public opinion on the part of Her Majesty's Ministers;' there was no echo from the Treasury bench. So, it seems, China may be quietly conquered, or annexed to India, with the tacit consent of our House of Commons."

SIR JOHN BOWRING had the honour of an audience with the Emperor Napoleon on Sunday at the Tuileries.

THE Court of Directors of the East India Company have unanimously elected Colonel Sykes, M.P., as chairman of the company for the year ensuing.

Correspondence.

THE TRADE OF THE PHILIPPINES.

To the Editor of the *London and China Telegraph*.

SIR,—The article on "Our Trade with the Philippines," in the *London and China Telegraph* of 16th inst., is calculated to mislead many of your readers. Having resided some years in the Philippines, I will endeavour, with your kind permission, to rectify a few of the more important inaccuracies which struck me on perusing the article.

1. Mr. Loney, to whom much credit is due for his successful exertions in developing the trade of the Southern islands of the Philippine group, is Her Britannic Majesty's Vice-Consul at the free ports of Iloilo, in the island of Panay, not at *Polillo*, so often referred to in the article. Polillo is a small, and, comparatively, unimportant island, situated off the east

Digitized by Google

coast of Nueva Viscaya, a province of Luzon. It has little trade, and exports no sugar; but it is evident to me that Iloilo is the port *meant* by the writer, whenever Polillo (probably by a typographical error) is mentioned.

2. "The export of sugar from Polillo (read Iloilo) last year was about 120,000 tons." It would be nearer the mark to say 120,000 *piculs*, which was about the actual quantity, equal to 7,500 tons. The *total* export of sugar from the Philippines last year was the largest ever known, amounting to 1,267,425 piculs, equal to 79,214 tons, and it was distributed as follows, viz.:—

To Great Britain	601,533 piculs.	
Australia	431,654	„
Boston and New York	106,670	„
California	66,564	„
China	42,619	„
Spain	18,385	„
Total	1,267,425 piculs, against 848,890 piculs in 1861, and 875,396 in 1860.	

3. "In glancing at the direct imports we receive from the Philippines, we notice there has been an increase in copal, which now reaches about 1,400 tons, but a total cessation in the supply of mastic. This, we suspect, arises from a confusion of names for one and the same article." The Philippine forests do not produce copal; for 1,400 *tons*, read *cwt. of mastic*.

4. "Indigo has advanced to nearly 900 cwt." The exports of this article at Manila in 1862 were as under, viz.:—

To Great Britain	3,013 *quintals* of 100 lbs.	
New York and Boston	388	„
Spain	35	„
Total	3,436 quintals, or say 3,067 cwt., against 3,707 cwt. (chiefly to England) in 1861, and 2,206 cwt. in 1860.	

The following particulars of exports of other staples from Manila last year may be interesting to you and some of your readers, viz.:—

HEMP: To Great Britain	221,947 piculs.	
„ New York and Boston	229,394	„
„ California	9,000	„
„ Calcutta	2,110	„
„ China	1,600	„
„ Australia	1,340	„
„ Spain	886	„
Total	466,277 piculs, against 382,449 in 1861, and 395,724 in 1860.	
CORDAGE: To Australia	21,009 piculs.	
„ China	7,162	„
„ Singapore	2,646	„
„ Java	560	„
„ California	335	„
Total	31,712 piculs, against 22,880 in 1861, and 22,829 in 1860.	
COFFEE: To California	8,015 piculs.	
„ France	8,268	„
„ Great Britain ...	4,927	„
„ Australia	2,282	„
„ China	3,375	„
„ New York & Boston	71	„
„ Singapore	78	„
Total	27,116 piculs, against 30,486 in 1861, and 17,280 in 1860.	
CIGARS: To Great Britain ...	10,452 *mille*.	
„ Spain	1,891	„
„ New York & Boston	1,425	„
„ Australia	13,483	„
„ China	10,458	„
„ Singapore & British India	11,462	„
„ Java	4,690	„
„ California	1,253	„
Total	55,114 *mille*, against 116,812 in 1861, and 126,730 in 1860.	

The great decrease in the export of cigars is attributable to the fact that, since the beginning of 1862, none have been sold by the Manila Government for exportation. By last advices, however, the usual monthly auctions were about to be resumed.

I enclose my card, and trusting that the interest you take in the subject may serve as an apology for my troubling you with this communication,

I remain, Sir,

Your constant Reader and Subscriber,

London, 19th May, 1863. FILIPINO.

THE TRADE OF THE PHILIPPINES.

We have received the following communications on the subject of the trade of the Philippines noticed in our last issue, and in which the writer committed some errors, which we thank our correspondents for pointing out:—

To the Editor of the *London and China Telegraph*.

SIR,—In your valuable article on the Philippines, the port Polillo should be Iloilo. The export of sugar from ILOILO should be given at 12,000 tons instead of 120,000 tons. Of these 12,000 tons, 6,000 were sent to Australia from Iloilo, and 6,000 to Manila. Polillo is a quite distinct and unimportant place, with very few inhabitants, whereas the province of Iloilo alone has 549,000 inhabitants, and the island of Panay, on which it is situated, 750,000. The steamer spoken of in the article of 16th May, is already running between Manila and Iloilo.

Your obedient Servant,

London, May 25. N. LONEY, H.M. Vice-Consul, Iloilo.

Continental Intelligence.

SPAIN.

The *Madrid Gazette* of the 23rd states that the commander of the Spanish expeditionary corps in Cochin-China had informed the Government that the troops' baggage and stores were to leave Saigon on the 1st of April. "Thus," adds the official journal, "terminates the mission of our troops in that country, after a long and difficult mission." Colonel Palanca was to proceed at once to Hué for the exchange of the ratifications of the treaty of peace between the Spanish and Annamite Governments.

FRANCE.

The elections absorb the public mind; no other news has a chance of exciting interest along with them. The principal feature in the electoral movement of 1863 is the part taken in it by all parties, which imparts to it truly the character of a political revival. The ancients of political life are again drawn into the circle of action by the prospect of discussions in the Palais-Bourbon. The young generation, comprising those who were at the age of twenty in 1848, is not acquainted with old parties, and intends to make the most of the present, as well as to show that they are not inferior to those who occupied the stage before them. Both young and old, therefore, throw themselves into the political arena—Thiers, Berryer, Marie, Odilon, Barrot, Montalembert, Lasteyrie, Prevost, Paradol, Weiss, Floquet. The three last, together with a few obscure names, represent only the new generation. Since 1852 political activity has been torpid in France. In 1857 it again timidly reared its head in the persons of the Five, but only to-day does it seem ready to claim its old power. It is remarkable that in the midst of the electoral agitation new names are not nearly so numerous or important as old. The fact that M. Thiers has come forward as a candidate excites the keenest interest, especially as M. de Persigny, the Minister of the Interior, is doing his utmost to prevent his election. It has been truly said that Persigny has so paraded and overacted the interference of the Government that he has made the candidates whom it supports contemptible, and those whom it opposes really formidable.

One of the principal events of the day at Paris is a fresh attack of M. de Persigny on the liberty of free discussion by the press. To the astonishment of all, the Home Minister in the present instance has launched his bolt at one of the Government's earnest supporters, *La France*, the charge against the journal being that "in affecting to express the secret thoughts of the Government daily, but specially in the article incriminated, it distorts and disguises its policy in the elections, so as to mislead public opinion."

The Parisian press has been thrown into a state of great excitement by the appearance of a despatch from the Turkish Government on the subject of the Isthmus of Suez Canal. The document, which is published in the *Courrier du Dimanche*, condemns the scheme in the strongest terms. It states that no Government at all solicitous of its honour or independence can countenance a scheme of the kind, which would place all the important points on the Syrian frontier in the hands of a foreign Power; and denounces the conduct of M. de Lesseps, whom it describes as having "snatched 50,000 men forcibly from the bosoms of their families to employ them on the work of his canal." For these reasons the Sultan sets his face against the continuance of the works until certain conditions regarding the "concession of lands," "the neutrality of the canal," and the "abolition of forced labour" are satisfactorily settled, and then the other conditions "may be taken into consideration." Such a heavy blow against the pet project of the French Government and people cannot fail to produce a great sensation, and is not likely to be quietly received by the Government.

The *Moniteur de l'Armée* publishes some interesting news from China to the 31st of March. Prince Kung, yielding to the repeated recommendation of the European representatives, had resolved to reorganise the Chinese army. That army, which according to official reports should consist of 1,000,000 infantry and 800,000 cavalry, has not one-tenth of the number

Digitized by Google

under arms. It is composed of Tartar troops exclusively employed in the guard of the Emperor's person and in the defence of the principal towns. These troops are, moreover, badly armed, badly officered, badly organised, and devoid of all military enthusiasm. They are quite incapable of resisting the Taipings, who would have possessed themselves of Peking long since had it not been for the European troops. Prince Kung, perceiving at length that such a state of things cannot longer be continued, and being confirmed in that belief by the Empress-Mother, who comprehends that the safety of her son is identified with that of the dynasty, has resolved to create an active army, while retaining the one under arms. The new army is to be organised and armed after the European fashion, and commanded by European officers, or by natives educated at the military school by French professors. This school, to which none are admitted but young Chinese who show a disposition for a military life, will, it is expected, produce officers capable of contending with the Taipings.

The newspapers announce the death of Madame de Lamartine, at the age of sixty-nine. She was of English birth, and, according to her friends, was not only a devoted and affectionate wife to the poet-statesman, but was his guide, counsellor, and friend in all matters of difficulty. Lamartine himself is, it is added, seriously ill.

King Ferdinand of Portugal, travelling under the name of Count Villaviciosa, is now staying in Paris. He is lodged at the Tuileries, in the apartments formerly occupied by his son Don Pedro, the reigning sovereign. Viscount Paiva, one of the ministers, accompanies King Ferdinand.

Colonel Colson, who was deputed by the Minister of War to examine the state of the cemeteries in which the French who fell at Sebastopol are interred, has returned to Paris. It is said that he found the cemeteries in a state of the most deplorable ruin. Almost all the monuments were thrown down and profaned. The Russian authorities excused themselves on the ground of the impossibility of discovering the perpetrators of these acts of Vandalism. The French Government, it is said, is now determined to collect the remains of the brave warriors in one great ossuary, over which a mausoleum is to be erected in their memory. The entire is to be enclosed by a solid wall, and an officer who served in the Crimean War is to be appointed to guard it.

News from Mexico states that Admiral Junien de la Graviere has relinquished the command of the French fleet to Admiral Bosse, and has left for Brest. He is the bearer of news from Puebla to the 17th, at which date it was asserted that the French had captured a redoubt situated at the corner of the Plaza de Armas. The siege of the remainder of the town continued, with excellent prospects.

A meeting of the congress appointed by the different European Governments for the purpose of establishing a general system of international postage has been held at the Hotel des Postes. The object of the congress is to introduce, not only a uniform system of payment, but of weight and general postal legislation, and to turn to account, in the general correspondence between civilised nations, such improvements as have been found practicable and useful. Sir J. Bowring represented the Sandwich Islands.

The Duke of Chartres, second son of the late Duke of Orleans, is about to marry his cousin, the daughter of the Prince de Joinville. To legalise the marriage in France it is necessary that notice shall be posted up in the Mairie of the former domicile of both. Accordingly, at the moment the Duke d'Aumale's case was before the Tribunal of the Seine the following notice was exhibited at the Mairie of the Louvre, in the first Arrondissement of Paris :—

"M. Ferdinand d'Orleans, Duke de Chartres, aged 22, domiciled in England in the Palace of Claremont, and in France in the Palace of the Tuileries, and Mademoiselle Amélie, Princess of Orleans, aged 18, also in the Palace of Claremont, and in France in the Palace of the Tuileries."

The marriage will be celebrated on the 11th of next month.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, May 22.

The Second Chamber of the States-General has recommenced its sittings after the adjournment for the Easter recess. The President announced the reception of some Government Bills, which were, as usual, referred to the different standing committees to report on to the House. After some other formalities were disposed of, Mr. van Bosse rose for the purpose of putting a question to the Colonial Minister on an important subject. In one of their last sittings the Minister had laid on the table a great number of documents having reference to the concession for a railway between Samarang and the Regencies, with the express understanding that their contents were to be kept secret. It was useless for him (van Bosse) to insist on what must be apparent to every member, namely, that a free use of these documents was absolutely necessary to enable the different sections to examine the matter and draw up the report. He therefore wished to ask the Colonial Minister if he was still prepared to confirm the condition of secrecy he had imposed. Mr. de Brauw supported the former speaker, and said that it was quite impossible to draw up a report if the question of secrecy was strictly adhered to. He had another question to put, and that was, if the papers communicated to the Chamber contained the whole of the documents on the subject, as on the former occasion he understood the Minister to say there were some wanting. In reply, the Colonial Minister urged the necessity of keeping secret the contents of the documents produced, as they were confidentially drawn up, and not intended for publication. But as he had no wish to increase the work of the sections, he could not refuse them the right of making use of the documents in their deliberations, and while drawing up their report, as well as during the subsequent general debates in the Chambers; but he appealed with confidence to the discretion of the members to be careful in the use they made of the papers. Mr. Storm van Gravesande stated his impression was that the Minister had promised to lay before them a supplementary report from Mr. Stieltjes, which insinuation the Colonial Minister indignantly denied.

Mr. Banck and his party have sent to the Second Chamber of the States-General a copy of their petition to the Governor-General of Netherlands India, dated November 12, 1862, asking for a concession to construct railways in Java, and accompanied by a draft of the conditions under which they were willing to execute the works.

The negotiations so long pending for the redemption of the Schelde Dues have been happily brought to a final close, Belgium undertaking to pay the stipulated amount, 17,141,640 florins, to Holland, bearing herself one-third of the sum, and arranging with the other maritime States of Europe for the separate quota of each. The Treaty between Belgium and Holland was signed on the 12th inst. at the Hague by Baron Dujardin on the part of Belgium, and by the Prime Minister Thorbecke and the Finance Minister Betz for the King of Holland.

The *Staatsblad*, No. 25, publishes the text of a Royal decree dated 21st of April, 1863, containing general regulations for the synchronous enjoyment of pensions and pay by colonial pensioners, who are, or may be, employed in the Dutch service at home. The following are the principal clauses :—

"Art. 1.—Pensions chargeable on the revenues of the colonies and other possessions of Holland out of Europe may be enjoyed at the same time with pay received from the home Government under the following conditions :

"Art. 2.—Salaries of more than 2,000 florins per annum received by persons in the enjoyment of pensions of more than 2,000 florins per annum at the charge of the colonies and possessions abroad are subject to a reduction for each 100 fl. of pension above 2,000 fl. This reduction is fixed at 50 fl. for every 100 fl. of pension above 2,000 and not more than 3,000 fl., and increases as follows: *a*. 25 fl. for each 100 fl. of pension above 3,000 and not exceeding 4,000 fl.; and *b*. 50 fl. for every 100 fl. of pension above 4,000 fl. Fractional parts of 100 fl. to be liable in proportion.

"Art. 3.—No deduction shall be made when either the pension or the salary amount to less than 2,000 fl. Salary shall on no account be reduced below 2,000 fl. by the operation of the preceding article.

"Art. 4.—This decree does not apply to heads of departments under the general Government of this country at home, whose pensions from the Colonial Treasury are suspended whilst they are so employed and in the receipt of salaries.

"Art. 5.—The stipulations of this decree are to be deemed in operation from the 1st July, 1862. The Ministers for the Colonies and for the finances are charged with the joint execution."

A book has just been published by Broese and Co., of Breda, entitled "Not in this Manner will you Elevate the Javanese." It is written by Younker J. van Schmidt auf Altenstadt, who spent a long time in India, and professes to relate his experiences gathered in Java. The object of the work appears to be to refute the opinion entertained by many persons that the present low *status* of the Javanese with respect to civilisation and improvement hinders the abolition of the existing system of forced employment. The author fearlessly contradicts such an assumption as untenable, and maintains that the slavish subjection in which the Javanese are held by their native

Digitized by Google

Princes does not exist to so great an extent as is generally supposed, and that it is only the fear of the despotic tyranny of their chieftains that makes them submit. According to Mr. van Schmidt, the Javanese are well aware that they are without any protection, and that the existence of these native Princes is the greatest curse for the population. The gist of the author's argument is that the energy of the Javanese might be greatly increased, and their present depressed condition relieved, by a reorganisation of the inland Government, increase of the number of European civil functionaries, improvement of the inland policy, a healthy incitement to free labour, and the abolition of the numerous existing abuses which overpower the natives and deprive them of all moral courage are the measures he recommends.

Two other works on Java are advertised. The first is called, "Are the Colonies a Blessing or a Curse for Holland? a Voice from Java," by P. Jansz, Missionary Teacher; and the other is, "A Conversation at Coffee," by P. Knuttel, Officer of the E. I. Civil Service, now on leave of absence in Holland. Both are published by H. Hoecker, at Amsterdam.

The King has conferred the insignia of a Knight Grand Cross of the Civil Division of the Order of the Netherlands Lion upon Mynheer Thorbecke, Prime Minister and Minister of the Interior. This mark of the Royal approbation has given very general satisfaction to the country.

Another batch of Naturalisation Bills has been brought into the Second Chamber, among which are the names of Messrs. W. G. Bosse, T. H. Eisinger, and H. F. Von Ende, all residing in Netherlands India.

The Netherlands Trading Company have chartered the following vessels to load cargoes of coals at Newcastle for Java:—

Aldebaran,	Capt.	Meiboom,	600 tons,	for Sourabaya.
Zeemeeuw,	"	Kayser,	500 "	"
Herman de Ruyter,	"	Esink,	600 "	"
Henriette,	"	Van Loenen	400 "	Cheribon.
Laura and Adele,	"	Lundt,	600 "	"
Hollandia,	"	Wap,	650 "	"
Heemstede,	"	Termarsch,	800 "	"

The freight ranges from 24 fl. 50 cents. to 27 fl. 50 cents.

The Company further invite tenders for a first-class vessel to convey to Java 125 men, supplementary troops, including 12 non-commissioned officers, and with cabin accommodation for four officers; the ship to sail in the course of June.

H.N.M.'s first-class sailing corvette *Pallas*, 20, Captain Lieutenant van Jogh, arrived at Vlissingen from Batavia on the 15th inst.

The two fourth class steam corvettes *de Briel* and *Aart van Nes*, of 10 guns each, which have been building in the Royal Dockyard at Vlissingen since 1861, are now nearly completed, and will shortly be launched.

The first-class paddle steamer *Ardjoeno*, 8 guns, is ordered to be commissioned for colonial service on the 1st of July. Captain Lieutenant E. M. Baak is appointed to the command of this fine vessel.

The Japanese Government having commissioned the Netherlands Trading Company to order a large screw war-steamer to be built for them in this country, the contract has been given to the well-known shipbuilding firm of Messrs. Cornelis Gips and Son, of Dordrecht; but as their building yard is not sufficiently roomy to execute this addition to their regular business, they have purchased a suitable piece of ground at Wilgenbosch, which they are at present engaged in turning into a new and extensive building-yard. This gives employment to a large number of artisans, and if this first steamer gives satisfaction in Japan, it is expected that further orders may be received at a future date. It is understood that Japan pays a large sum for the expense of fitting up the new yard.

Major F. G. Hoffmann, of the East Indian army, now in this country on leave of absence, has been presented with a handsome silver tea service by the officers of the 15th Battalion at Padang. The plate was manufactured by Dickhoff and Salm, of this city, and presented to the Major by Captains Schlüter, de Geer Boers, le Clercq, Termytelen, M'Gillavry, and N. Volkerts, and First Lieutenant J. K. Shoch—all of the Indian army, who repaired in full uniform to the residence of the Major for that purpose. The principal piece of plate bears the inscription "A tribute of esteem from the Officers of the 15th Battalion to their respected Major F. G. Hoffman, 3rd December, 1862 (the date of the Major's departure from Sumatra).

The ratifications of the Commercial Treaty between Holland and the Swiss Republic have been exchanged at Berne. One of the stipulations of the Treaty is that Switzerland shall enjoy the right of appointing Consuls and Consular Agents in Netherlands India.

PASSENGERS ARRIVED.

Per *Baron van Hardenbroek*, Capt. Hemny, at Amsterdam, from Padang: Major F. G. Hoffmann and Captain K. W. van Heemskerck, both of the East Indian army, and Mr. A. W. Butsche Ipenburg.

Per *Quartett*, Capt. Mulder, at the Texel, from Banjoewangie: Mr. J. J. Veertlang.

Per *Telegraph*, Capt. Roluf, at Amsterdam, from Padang: Mr. and Mrs. P. van Geelen, Mr. P. C. de Reu.

Per *Jacoba Christina*, Capt. Juski, at Amsterdam, from Batavia: Mrs. Beckof and five children, Mr. and Miss Leweder, Mr. Neuman, Mrs. Schreuder and child, Mr. Berghaus.

Per *Doelwyk*, Captain Hoefman, at Rotterdam, from Batavia: Mr. J. A. W. van Ophuyzen, Resident, lady, five children, and Javan servant; Major and Mrs. Raat and family, Mr. and Mrs. C. Swating and child, Messrs. C. Prins and K. Appe, eleven passported soldiers.

Per *Lammina Elizabeth*, Capt. Gerson, at Brouwershaven, from Banjoewangie: Mr. J. C. Graoue, First Class Engineer, Royal Dutch navy; fourteen passported soldiers.

PASSENGERS OUTWARDS.

Per *Huydecoper*, Capt. Block, from Rotterdam to Sourabaya: Mr. and Mrs. S. H. Wander and son, Mrs. van Marle, Mr. and Miss van Bommel.

Per *Gerard Pieter Servatius*, Capt. Wamsteker, from Amsterdam to Batavia: Mr. J. Backhoven and Mr. J. J. Cornelissen.

Per *Meppel*, Capt. van Dam, from Amsterdam to Japan: Mr. J. van der Vlies.

Per *Almonde*, Capt. Surie, from Amsterdam to Batavia: Mrs. Roduner, Miss Soetens, Mr. and Mrs. Miola and four children, Messrs. van der Burgh, Heins, Houtzagers, Reynst, Kempees, and Hazenburg.

COMMERCIAL.

COFFEE.—With the exception of 2,100 bags of Padang, ex *Celeritas* and *Paul Johan*, there has been but little business done in East India descriptions; but though the dealings are limited the values are well supported. Various indications lead to the expectation that this calm will be succeeded shortly by a breeze in the market.

TEA continues in its firm position, but is rather inactive, in anticipation of the sale of the cargo per *Marco Polo*.

SUGAR.—The company's sale at Rotterdam on the 12th inst., of 71,439 kranjangs of Java, went off with great spirit. There was a good deal of competition both for exportation and home use, and the whole quantity was sold at prices ranging from 1 to 2 fl. above those obtained at the March sale. The following table shows the result:—

Standard sample.	Kranjangs.	Average sale prices.	As compared with the March sale.
No. 9 yellow	135	29½ florins	2 florins higher.
10 "	278	30¼ "	1¾ "
11 "	2,032	31¼ "	1½ "
12 grey	4,350	32¼ "	1⅝ "
13 "	8,692	33⅛ "	1½ "
14 half-white	5,830	34⅛ "	1¼ "
15 "	4,439	36¼ "	1⅝ "
16 white	13,991	37⅛ "	1¾ "
17 "	10,381	37⅞ "	1 "
18 "	5,632	38¼ "	½ "
19 "	6,410	39 "	¼ "
20 "	2,292	39½ "	¼ lower.

Since the sale the market has been quiet. Refined sugars are dull; the demand for Russia has ceased, and prices have a tendency to decline.

RICE continues in moderate demand for cleaned descriptions, and full rates are easily obtained. The want of paddy is keenly felt, and as the prices in the producing countries have fallen considerably, it is hoped that fresh supplies will soon arrive to enable the mills to be set to work again.

SPICES.—Nutmegs No. 1 of 1862 have experienced some demand, and 61 cents were paid. There is also some disposition to purchase Java cinnamon No. 3 at favourable rates. In pepper several transactions are recorded, amongst which one of 1,096 of black at 22¼ cents. Java vanille has recovered from its sluggish position last week, and commands now better prices and an easier sale. There is a lively demand for Japan Soy.

TOBACCO.—Since last mail there have been no sales of Java. Stock 3,502.

HIDES in a very depressed state. Arrivals since last mail:—1,238 ox, and 36 buffalo, per *India*, from Batavia; 44 ox, and 95 buffalo, per *Telegraph*, from Padang; and 246 ox, and 413 buffalo, per *Jacoba Christina*, from Batavia.

INDIGO is in great favour, and several considerable purchases have been made at an advance of 15 to 20 cents on last sale's prices.

TIN.—Notwithstanding the meagre demand for Banca, holders remain firm, and no purchases can be made under 76½ fl.

DRUGS.—The Company has announced a large quantity of goods for sale on the 3rd of June, at Amsterdam, amongst which are 4,500 chests of Japan vegetable wax; 464 bales of camphor; 336 chests of gum damar; 561 pieces, 3 chests and 9 kranjangs of gutta-percha; 12 chests and 29 packages of india-rubber; 700 chests of sago; and 12 chests of tapioca. Immediately after the Company's sale the following private goods will be put up: 1,382 bags of sago flour; 900 kilogr. of gutta-percha; 534 packages of cassia vera, and 90 chests of gum damar.

RATTANS.—Previous prices fully sustained. A parcel of 4,309 bundles ex *Wassenaar*, has been taken. No other sales reported.

SALES OF SHIPS IN HOLLAND.

The London & China Telegraph.

LONDON, THURSDAY, MAY 28, 1863.

THE ANGLO-CHINESE PROTECTORATE.

IT is unfortunate that the Empire of China is so far from our own shores. The distance serves to mystify the policy which we are pursuing in that country; it serves also to make many Englishmen quite unconcerned as to the ultimate result of that policy. The news that reaches us mail after mail of assaults upon the rebels, of successes or reverses, of the loss of life and destruction of property, is all regarded as a matter of course since a chronic state of warfare is the normal condition of China, and the vocation of Englishmen in that Empire is either to make war or to make money. The country squire, blessed, it may be, with a wild soldier-son, is glad to think that he is employed on active service in the Far East. He knows, indeed, that it is difficult to reap honour in that field, but emolument is more easily gained, and sometimes more keenly appreciated. Loot and war go hand in hand, and you cannot have the advantage of the one without the annoyance of the other. The country gentleman to whom we have been alluding, is indeed interested in China news, but only so far as it pertains to his son; he is the representative of a comparatively small class in this country. A far wider interest is represented by the mercantile community, and it is probably to our merchants alone that we must look for a clear comprehension of Anglo-Chinese politics. But we repeat again, that the nation at large, and even the statesmen of the country, evince little more than a benevolent curiosity in the condition of the Celestial Empire. They think, no doubt, that it would be well for JOHN CHINAMAN to possess the civilisation of JOHN BULL, and they believe it is as much for his advantage to own the superiority of Englishmen, as it is for ours to enforce it. But so long as tea and silk are abundant, and commerce is comparatively unimpeded, they do not much care whether we back the Imperialists against the Taipings, or preserve a distinctly neutral policy. How true this assertion, is may be seen by the indifference with which a debate on China is regarded in the House of Commons. No matter whether Mr. LIDDELL were right or wrong in his recent statements and arguments with regard to British policy in China, the responsibility of our position there and the mighty interests at stake, ought surely to have brought together a full House. The question he proposed to discuss was one of national importance, yet the representatives of the nation showed that they were disposed to leave it in the hands of the Government, and thus virtually to sanction all that has been or will be done by it.

We have watched with no small interest the fluctuations of Earl RUSSELL'S policy with regard to the intestine struggle now raging in China, and how a declaration of absolute neutrality one year has changed to a policy of active interference in the next. The thirty-mile radius plan did not seem to us to annul the declaration of neutrality we had previously made to the Taipings, since Earl RUSSELL, in approving the proposal, gave Sir FREDERICK BRUCE to understand, "that Her MAJESTY'S Government do not wish force to be used "against the rebels in any case except for the actual protection "of the lives and property of British subjects," and that "it "would be contrary to the wishes and instructions of Her "MAJESTY'S Government if any of Her MAJESTY'S naval, military, "or civil authorities were to sanction any general interference in "the hostilities carried on between the Imperial Government "and the Taipings." But a few short months have entirely changed our position in China. We have embarked on a great enterprise, the issue of which it is impossible to foresee. Government has permitted English officers to serve under the Emperor of CHINA; the Foreign Enlistment Act is repealed in their favour, and although the old declaration of neutrality has not been withdrawn, there can be no doubt that we are in reality at war with the Taipings. Right or wrong, for ultimate evil or for good, this is the true condition of affairs; but until Mr. LIDDELL brought the subject before the House it had not been discussed in Parliament. In the earlier part of his speech, indeed, Mr. LIDDELL traversed ground which has been several times trodden before, but at the close he referred to Captain SHERARD OSBORN'S expedition. "For what," he said, "was this mag-"nificent expedition designed? Was it to control the acts of "the Chinese Navy, which Mr. BRUCE described as manned by "pirates armed with Imperial authority? He would not ask "why it was that the Foreign Enlistment Act which was carried "into effect against honest English traders with a rigour that "was offensive to the majority of the English people, should be "set aside in favour of the Emperor of CHINA? Here we had a "most distinguished officer going out to aid a foreign Power, "and relieved from the consequences of the Foreign Enlistment "Act."

If ever any point in our Foreign Policy demanded full investigation and discussion, the subject thus alluded to by Mr. LIDDELL demanded it, yet the debate appeared to excite little interest, and it seemed as though Mr. LAYARD was glad to make use of a Parliamentary subterfuge in order to avoid a reply. He has however since repudiated any intention of this kind, but we need not wonder that the few members present, who were really alive to the urgency of the subject, should have denounced the silence of the Under-Secretary. Mr. COBDEN, whose opinions on China matters we are very far from accepting, said truly that "our relations with "China, whether viewed in connexion with our commerce, or as "a great political question, or in reference to the interests of the "mass of the people, was one of the gravest and most important "questions that could be submitted to Parliament." Mr. H. SEYMOUR observed that "Government was bound to give some "explanations on these weighty matters," and Lord NAAS, after observing that his thirteen years' experience in the House furnished him with no precedent for the conduct of the Government that evening, gave notice, which he has since repeated, that he will shortly call the attention of the House once more to the subject. We are glad to learn that one more opportunity will thus be afforded for a thorough investigation of our present position and policy in China, and we trust that the apathy of the public and the corresponding apathy of honourable members, will not prevent Lord NAAS from gaining the ear of the House and extracting from the Government a full explanation of the course they have recently adopted.

"THE TIMES" ON THE LAST CHINA DEBATE.

IN a leading article, which we insert elsewhere, devoted to a review of Mr. LIDDELL'S speech, *The Times* finds fault with that gentleman for asking useless questions, for reiterating time-worn statements, and for indulging "the pleasant illusion "that it is possible at any time to re-open a political question, "and start afresh upon so entirely new a basis as to be completely "exonerated from all the obligations of the previous course." According to the leading journal, it is foolish to dilate on what is past, in considering our present relations with China, and unless we can give an infallible prescription for China difficulties, they had better not be discussed at all. "What are we to do?" says the writer, "we are quite ready to admit that we are miserable "sinners—we do that every Sunday—but what are we to do "other than what we are doing in the matter of China?" And again he says—"The question always is, 'What are we to "'do?' Unless Mr. LIDDELL, or Mr. BAILLIE, or Mr. COBDEN "was prepared to answer that simple question, we cannot share "their disappointment that Mr. LIDDELL'S motion was simply "negatived without a word of reply."

The whole point of *The Times'* article centres on this query, and we maintain that there is a gross fallacy in such a line of argument. We are not going to take up the cudgels indiscriminately for Mr. LIDDELL, whose views on British relations with China differ in many respects from our own; but we venture to affirm that the "simple question" thus propounded is not the only question or the first question to which an answer is required. The English nation does not merely ask what we are to do in China, but demands, with the member for Northumberland, a full statement from the Government of what we are now doing in

Digitized by Google

that empire, and why we are acting as we are? The explanation looked for by the country may prove, indeed, that the course we are pursuing is the only one open to us; it may prove that a British protectorate will be as advantageous to us as to the Chinese, that an Anglo-Chinese fleet and army cannot, whether successful or otherwise, produce any disastrous complications, that a direct war with the Taipings to which this and other aggressive movements on our part virtually amount, will be no impediment to trade; or, lastly, the explanation may even show that despite all appearances to the contrary we are still maintaining a strictly neutral attitude. Who can say what may or may not be demonstrated by a Government statement?

Mr. LIDDELL, in asking for such an explanation with regard to British policy in China, was naturally led to review our past conduct in that country. *The Times* indeed affects to regard such a review as irrelevant; but how, in the name of wonder, can we estimate the worth of any line of policy unless we are fully conversant with the events which have led to its adoption? It needs no prophet to tell us that our policy in China ten years hence will be intimately dependent on the measures adopted at this time by Lord PALMERSTON'S Government. *The Times* does not attempt to defend or to oppose those measures, but argues that we have been led on step by step to our present position in China—a truism which no one will deny—and that it is vain to discuss how we arrived at it,—which is by no means so evident a proposition. On the contrary, we hold that this subject is one which demands the fullest possible discussion, and that the infraction of an Act of Parliament, and the inauguration of a new, and perhaps an expensive and perilous policy in China, should not be accomplished without being deliberately reviewed in Parliament and receiving the sanction of the House.

THE BISHOP OF LABUAN.

MOST of our readers are acquainted with the charges made against the diocesan of the Borneo Mission by Mr. SPENSER ST. JOHN. They have been discussed in these columns, and both here and elsewhere have, as we think, been fully disproved.* Mr. ST. JOHN'S bold assertion that the overbearing conduct of the Bishop has been the real cause of the defection of the clergy, and the failure, complete or partial, of the mission, has not, as far as we are aware, been sustained by a single testimony from the men to whom he so confidently appeals. Mr. ST. JOHN will not believe that certain of the missionaries left the mission field for the reasons they assigned. It would be ignominious, he asserts, for clergymen to desert their posts on account of ill-health, or insecurity to life; and he adds that if the Bishop's statements be correct, his clergy "lightly undertook duties which they as lightly abandoned." Among other gentlemen referred to in Mr. ST. JOHN'S "Vindication," he mentions "three St. Augustine's men," and says that their testimony as to the character of the Bishop "will be conclusive evidence when called for in the cause of justice." One of these gentlemen—the Rev. WM. HACKETT—has, we are glad to see, voluntarily come forward in answer to Mr. ST. JOHN'S challenge, and by quotations from letters written by the other two, who are now in Australia, as well as by his own statements, he proves that ST. JOHN'S assertions with regard to Dr. MCDOUGAL'S conduct to his clergy, are utterly without foundation. In a letter to the *Straits Times*, dated March 26, Mr. HACKETT says that if Mr. ST. JOHN had taken the trouble to ascertain the facts in the cases to which he refers, "he would "have spared himself the humiliation of having his words flatly "denied;" and then gives in detail the causes, forcible enough in all truth, which led to the removal of the three St. Augustinians from Sarawak. Mr. HACKETT testifies also to the uniform kindness, consideration, and friendship which he "experienced at Dr. MCDOUGAL'S hand," and expresses his regret that Mr. ST. JOHN "should have allowed his vindictive "feelings to have gained such an ascendancy over him, as to "make him so utterley regardless of truth, and in such sweeping "language to condemn as untruthful a large body of clergymen, "with their Bishop at the head of them."

It happens, unfortunately, that Dr. MCDOUGAL'S muscular tendencies on board the *Rainbow*, and his letter to *The Times* describing that engagement with the pirates, are mixed up in some people's minds with Mr. ST. JOHN'S charges. But these matters are perfectly distinct; and it is quite possible to question the wisdom of Dr. MCDOUGAL'S conduct in a difficult and peculiar position, which was far beyond the range of common episcopal experience, and yet, at the same time, to give him the full credit to which he seems to be entitled, as an earnest, devoted, missionary Bishop.

* See *London and China Telegraph*, Jan. 15.

THE STRAITS SETTLEMENTS.

IN the month of November last we stated that negotiations had been renewed between the Indian and Colonial-offices for the transfer of the Straits Settlements. The matter moves slowly, but still it may be said that there is progress, and very recently a deputation of the merchants of Singapore, headed by Mr. CRAWFURD, had an interview with the Duke of NEWCASTLE on the subject. The great difficulty which has hitherto stopped the way is, as we have before stated, the financial one, but it is believed by many that the joint revenues of the three Settlements, which amount to £130,000, are sufficient to cover every charge, civil and military.

Literature.

Personal Narrative of Three Years' Service in China. By Lieut.-Colonel FISHER, C.B., Royal Engineers. Richard Bentley.

COLONEL FISHER states that this volume has no claim to be regarded as a history, but that it is simply a narrative of his own personal experience. But although not history in the strict sense of the term, a book like this will always prove of great service to the historian. The author is evidently a shrewd observer and a truthful narrator. While doing his work as an engineer officer no trifle seems to have escaped his notice, and the record of what he did and saw forms an admirable addition to the literature which has sprung out of the war in China.

The volume commences with the capture of Canton in 1857. Colonel Fisher's experience of the alliance does not seem to have been favourable. He remarks that it makes you look out very sharply for yourself, and tells us how one morning he observed a French marine inscribing on the doors of the houses, in letters a foot high, "Magazine Français No. 1," "Magazine Français No. 2," and so on. The Colonel knew that the subject of appropriation had not been discussed, and adds, "So I got a piece of chalk and marked all the others as 'British Military Stores,' and as my chalk was more expeditiously used than his paint, I got the best of it." It is now clearly ascertained that the common people in Japan, unless goaded on by their officials, are not at all unfriendly to foreigners, and Mr. Fortune's experience in that country, where he ever found the children his warm friends, agrees with that of Colonel Fisher in China. "My test," he says, "was the behaviour of the little children, old enough to understand their parents' conversation, but too young to be such adepts in dissimulation, or have such power of self-command as to exhibit towards us the utmost confidence; little children would let me take them out of their father's arms, as I rode down the street, and enjoyed a ride with me as much as if I had been their best friend." But the Colonel knew the art of winning over parents, whom we suspect have the same weakness all the world over. "I used to like going into the cottages sometimes, to visit or 'chin chin' the country people, who invariably brought out tea; to take notice of the baby was the sure way to make yourself popular, and at the expense of patting its cheek you might establish a great reputation in the village." Wherever our author went he seems to have been equally fortunate, and so his opinion of "John Chinaman" is by no means unfavourable. "I really believe," he observes, "that the occupation of Canton must have had an immense effect on the feelings of the Chinese towards us. Many and many of the prejudices and false ideas arising from ignorance and the wilful misrepresentations of their officials must have been swept away;" and again:—"So just and firm was the rule of the Allies, so consistent were they in their policy, and so anxious to support the native authorities in all their righteous dealings, that the lesson cannot have been lost on a people so observant as the Chinese."

Digitized by Google

Colonel Fisher's narrative of the unfortunate attack on the Pei-ho forts is the most graphic we have yet met with. After the squadron sailed south he was ordered to remain and survey the coast—which he accomplished with great difficulty and by a number of skilful manœuvres—to the extent of about a hundred and fifty miles. The account of this expedition, full as it is of curious incidents and amusing details, forms a valuable portion of the "Narrative." Considerable interest too attaches to Colonel Fisher's account of the landing at Pehtang, of the capture of Tangkoo, and of the difficult engineering operations which he so successfully accomplished. We do not wonder that his health broke down under the excessive labour. On the very day that his company was ordered to march to Peking, Colonel Fisher was sent down to the hospital-ship *Mauritius*, from whence, after two weary months, he received permission to return to England.

Our space has only permitted us to glance at a work which contains much information which is likely to prove of permanent interest, and merits no small meed of praise. But we have said enough to attract the attention of our readers to the volume itself.

Spirit of the Press.

WHAT CAN WE DO IN CHINA?

THE TIMES.

Mr. Liddell shares with many excellent persons a mode of viewing things which we regard with unaffected admiration and envy. He lives in the pleasant illusion that it is possible at any time to re-open a political question, and start afresh upon so entirely new a basis as to be completely exonerated from all the obligations of the previous course. Any time these five-and-twenty years we have had a rather complex state of affairs in China. Any time it was simply impossible to retrace our steps, and what we had to do was to make the best of a bad job. It is needless to repeat how one thing led to another, and how we generally found the work cut out for us before we, at home, had much voice in the matter. That is one of the necessities of an empire upon which the sun never sets. But the result is that we have always to consider what is next to be done, and how to conduct further a great operation of some kind or other, which has already made much more progress than we are aware of. At this moment, or rather at the last date, we were protecting from invasion and outrage the neighbourhood of our free ports and factories; and, as it was necessary to protect maritime trade and to teach the Chinese to defend themselves both by land and by sea, there is, by a suspension of the Foreign Enlistment Act, an Anglo-Chinese force about to be employed against the rebels. At this moment it is impossible to say how we stand in those regions, and whether we are even holding our own. The probability is that we are, and on that probability we act. But what is the state of the case, even on Mr. Liddell's own supposition? It is that the Chinese Government has lost all credit with the people; that the latter look to us to defend life and property; that the Taipings, without any Government of a sort that we could have relations with, and without the least guarantee for order or humanity, are committing terrible ravages, and threatening our position in a most alarming manner; and that they are regarded with very natural horror by the timid populations who have gathered under our guns. In this case we stand on our defence, and only add such a moderate amount of aggressive operations as a besieged city finds necessary in order to compel the besiegers to keep at a distance, and not court a collision. Let us suppose the worst that could possibly happen in China. That worst, just now, would be the overthrow of the Imperial Government, and with it the British Protectorate, and the entire Anglo-Chinese system which Mr. Liddell deprecates. What, then, if we were to hear, some early day, of a universal calamity, differing only from the Indian Mutiny in its completeness, the free ports destroyed, the Europeans massacred, and the Taipings masters of every foot of ground and every life in that part of China now in question? We should naturally begin to accuse ourselves, and we should find the proper topics in Mr. Liddell's speech. We have done there as our fathers did in India. We have mixed war and commerce; we have entered as traders, and held our ground by arms; we have encouraged smuggling and given occasions to rebellion; under our shelter all sorts of irregular practices have grown up, with that impunity which arises from the certainty that we shall side with the breaker of the law against the enforcer of it; we have impoverished China, without enriching ourselves; we pay in armaments more than we receive in compensation on any other head. All this may be said; all has been said a thousand times; all has some truth in it; all would be thundered on our heads with bitter force in the day of calamity and rebuke. But even supposing that we are ready to go out into the wilderness, to sit under Mr. Liddell, in sackcloth and ashes, what are we to do? We are quite ready to admit that we are miserable sinners—we do that every Sunday—but what are we to do other than what we are doing in the matter of China? This is just what Mr. Liddell does not tell us. He does not urge Government to prevent Captain Sherard Osborn from sailing, and to disavow the Anglo-Chinese force. He does not maintain that our merchants are to confine themselves to their own factories, and wait to see how scrupulously the Taipings will discriminate between Europeans and Chinese Imperialists, as each city successively falls into their hands. He does not advise us to tell the population of China that we think the Taipings have a good deal to say for themselves, and will, therefore, let them do as they please. It avails not to allege that on the showing of history we have weakened the Government of China, and so led to a general disregard of its authority. The present state of the case is what we have to deal with, and if the Chinese authorities cannot prevent the disorders which Mr. Liddell remarks upon, neither can we, unless, indeed, we interfere even more in the affairs of China, undertake even more of her domestic management, and give her Government even more of our dangerous and insincere protection. Will Mr. Liddell just consider that lamentation is not legislation, and that effects may be traced to causes without being thereby cured? There is a great deal to complain of in our own country, and much of it may be traced to causes deeply seated in our history. But to refer social maladies and political difficulties to the conquest of England by William the Norman and of Ireland by Henry II., to the Reformation and the Revolution, to the wars of the last and the present century, and to our vast Indian and Colonial Empire, though very interesting to the historical student, can hardly affect the drawing up of one single Act of Parliament or vote of public money. The question always is—What are we to do? Unless Mr. Liddell, or Mr. Baillie, or Mr. Cobden was prepared to answer that simple question, we cannot share their disappointment that Mr. Liddell's motion last night was simply negatived without a word of reply.

STANDARD.

"What are we to do?" is the old excuse for mischief or idleness. "It can't be helped" has ruined fortunes and empires. Yet this is the apology bolstered up for our pernicious meddling in Chinese affairs. We are in it, and we must go on or be drowned. "What can we do?" said Ministers to themselves on Friday evening. "What can we do?" echoed our leading contemporary on Saturday morning. "What can we do?" is the plea of every incompetent in the country. Mr. Liddell, on due notice, had addressed a most able and luminous statement of our relations with China to the House and Government in order to elicit a clear and emphatic opinion on the policy we are pursuing in that distant country. The exposition necessarily given implicated the Cabinet in a series of measures calculated to involve this kingdom in evils from which it will be impossible to extricate itself without an immense expenditure of blood and treasure. There was a weighty censure on the Government most forcibly proven. But how did Ministers meet it? By helpless and indecent silence. What were they to do? They could not answer, and they remained mute. All our recent transactions in China are errors. The opening of the Yangtse river is an admitted mistake. It afforded vast facilities to the rebels; it filled the stream with pirates of every nation, most of them under the command of desperate and lawless European sailors. This was the result of attempting to open 600 miles of river to trade during the height of a barbarous civil war, carried on with the most inhuman atrocities on all sides. The consequence is the utter confusion of any legitimate protection to commerce. The Imperial authority is set at defiance. The customs dues are abandoned, the rebels are supplied with the munitions of war, and our people are continually brought into collision with them. We had engaged to protect property and life within a radius of thirty miles of the treaty ports, and to effect this we are forced to be ever sword in hand against the encroaching and victorious Taipings. For all this the British taxpayer has to pay. The nation, too, has to suffer in character. What are foreigners to think of that neutrality which expends a full million or more a year in meddling in the affairs of China, in coming between an oppressed people and their declared resolves, and which will only afford a sneering and callous look at the monstrous atrocities which are fast reducing the United States to a desert? Lord Palmerston openly declared a few nights ago in the House of Commons, that "it is not fitting for one foreign nation to interfere in the internal affairs of another." Where is the noble Lord's consistency? The excuse of "What can we do?" will not avail, and ought not, here. Our course is clear. Let us abstain from intervention. Let Captain Osborn's expedition be discountenaced. Let us pocket the millions we are wasting in idle attempts to protect a trade which must run risks so long as a fierce civil war prevails. This may not be a satisfactory course, but, at all events, it is better than the expensive and ruinous one now pursued, and in the end will leave us every way gainers.

MANCHESTER DAILY EXAMINER.

We have no doubt there is too much truth in the statement that England, France, Russia, and America are really contending for supremacy in China. Very likely we are no worse than our neighbours. But why should not we be better? Why should we contest for such a gain of a loss as will be the duty of governing China, to whoever is unfortunate to appropriate it? Surely India is quite enough for us—and the Government of India is mere child's play to what the government of China would be. To aim at conquest in that country would be a piece of madness, at which we are convinced, the people of this country will never connive, if they are not kept in the dark until it is really too late to help themselves. But if we do not intend conquest, what can be more foolish than our present policy, or more disastrous to those whom we affect to favour? Under our auspices, the rivers at present nominally under the control of the Imperialists are becoming infested with pirates and smugglers; the authority of the Government of Peking is set at naught in the most reckless manner; its subjects are taught to appeal to the representatives of foreign Governments against the authority of their own sovereign, and thus in every way we are aiding in the disorganisation of the Empire. Of course we are doing this as we do all manner of violent things in Asia—under the pretence of furthering trade; but there is no reason to believe that our present measures are likely to be a bit more successful than those which, according to the Shanghai Chamber of Commerce, have resulted in our having to pay in increased duties on the export of silk and other articles, the paltry indemnity which we extorted for the cost of the late war. The more this question is looked at the more we are convinced it will be found that our true policy is to apply to China the principle we have adopted in dealing with European and American countries. There is no doubt that, substantially, that country is now divided into two *de facto* empires. Let us recognise both, and do our best to trade with both. No facts which have yet transpired have shown that this is impossible, for the attempt has never yet been made in good faith. At all events, let us not gradually commit our honour to the impossible task of resuscitating an empire which bears the stamp of inevitable decay; and let us not allow our good name to be sullied by the service of English officers and sailors under the flag of a semi-barbarous potentate.

SPECTATOR.

Are we prepared to rule China? For that is the question which Parliament has to decide. Every successive mail explains more clearly the magnitude of the enterprise which Mr. Layard tries so sedulously to show

Digitized by Google

through a diminishing glass. Members and constituents are, we suspect, alike contented with the present state of affairs. They are not prepared to advocate openly the conquest of China, or even a visible Protectorate, nor are they quite sure they want so new and so vast a responsibility as the organisation of a new Government for three hundred millions of men. But if Providence and Lord Palmerston have the courage and will to do the work for themselves, and lead England on to empire in China, without asking too many votes, why, then, they highly approve of that development of Britain's manifest destiny. Any result except defeat must, it is thought, be beneficial. If Captain Osborn becomes Vizier under a Chinese Sovereign, and Englishmen rule all China, as they once ruled India, through a Mogul, there will be a boundless field for British daring and enterprise. If he only acquires the control of the Yang-tse-kiang, the trade of that glorious valley, second in wealth and population only to that of the Ganges, will supply the place of all we may lose in the terrible American struggle.

PRESS.

From the manner in which the Government dealt with the question raised by Mr. Liddell, relative to our policy in China, it would appear that neither Lord Palmerston nor Mr. Layard, who were the only Ministers present on the occasion, was prepared to enter into a defence of the extraordinary inconsistency which has marked our proceedings in that country. The Ministry originally started with the determination to have nothing whatever to do with the contest which is now going on between the Taepings and the Imperialists. We were to preserve the strictest neutrality, and to remain perfectly contented so long as we could keep clear of the complications around us, and defend our interests from injury or attack at the several treaty ports. Instead, however, of having maintained that most satisfactory position, we now find ourselves actually engaged on the side of the Emperor of China in carrying on a war against the Taepings, who have not only never given us the least offence, but who, on the contrary, have shown the utmost desire and solicitude to live on terms of peace and amity with us. It is not to be wondered at, then, that the Government endeavoured to shelve a discussion from which they had so little to hope, and so much to fear. Their unprecedented conduct, however, cannot be attended by any good results. On the contrary, it has already done them the greatest injury. It has gone forth to the country, by the clearest of all proofs, that the policy which the Ministry have been pursuing in China is so injudicious and inconsistent in its character, and so full of danger in its tendency, that it could not be defended "on the spur of the moment," but that time was required in order to concoct a defence of what must appear to all impartial people to be a most crooked, unwise, and unprecedented course of action.

LIVERPOOL DAILY POST.

The Administration has, for peace and war in distant parts, substantially all the powers of a despotism, and can commit the nation to the most desperate adventures, through mere whim, caprice, or apathy. In the earlier stages of such affairs it is impossible to interfere. And later on, when the facts begin to creep out, the question, "What are we to do now we are in this quarrel?" is sufficient to ward off any really judicious investigation, and to prevent the retracing of any steps that have been taken. Thus quietly and imperceptibly the stream of events flows on, till at last we find ourselves saddled with some great war, in which neither our sympathies nor our interests are engaged, or embarked in some enterprise which we cannot abandon with honour, but which we cannot pursue with either glory or profit. It is high time that sufficient pressure should be brought to bear upon the Chinese policy of the Government, to squeeze out of it at least some of its irrationality, costliness, and evil.

THE RACE CUPS FOR CHINA.

The silver presentation race cups will be forwarded by the next mail to Hong Kong and Shanghai, by Messrs. Sarl and Sons, silversmiths, 17 and 18, Cornhill, who have most beautifully executed the work entrusted to them.

The above presentation consists of a silver gilt cup, elaborately chased, with racing subjects in dead silver "in bas relief," the cover having full length figures of horse and jockey in full costume in dead silver, and bearing the following inscription:—

Shanghai Races. Autumn Meeting, 1862.
MILITARY PLATE,
Presented by the Officers of H.B.M.'s Regiment at Shanghai.
Won by "Godolphin," the property of Alexander Cock, Esq.
Ridden by Capt. Wortham, R.A.

This cup stands upon an ebony base, with silver gilt enrichments.

The next cup is a handsomely-chased silver gilt vase, also mounted on an ebony stand, with silver gilt ornaments.

This vase is elaborately chased with race-horses, &c., on the one side, and bearing an inscription on the other. The handles are formed by two griffins of frosted silver, and the cover is surmounted with a flying horse, also in dead silver. The inscription is as follows:—

Tien-tsin Races, Autumn Meeting, 1862.
COMPRADORES CUP, CONTRIBUTION CUP, and GREAT NORTHERN STEEPLECHASE.
Won by "Hackney," the property of James Cock, Esq.

The next are two silver epergnes, consisting of beautifully-chased oak trees, with massive bases of rock work and fern leaves, having two figures of "Mare and Foal" in dead silver. There are shields placed upon each base, containing the following inscriptions:—

Shanghai Races, Autumn Meeting, 1862.
FLYAWAY STAKES.
Won by "Inheritor," the property of Jas. Cock, Esq.
Ridden by Capt. Wortham, R.A.

Shanghai Races, Autumn Meeting, 1862.
GARRISON CUP (Steeplechase, 3 miles).
Won by "Miss Mowbray," the property of J. Markham, Esq.
Ridden by Johnstone Smith, Esq.

There are also two elaborately-chased silver claret jugs, with subjects emblematical of racing, chased on either side, and two shields for inscription—

Shanghai Races, Spring Meeting, 1860.
TSATLEE CUP.
Won by "Spider," the property of James Cock, Esq.
Ridden by E. Waller, Esq.

Shanghai Races, Autumn Meeting, 1860.
LEGATION CUP.
Presented by the Hon. F. W. Bruce, and the Members of H.B.M.'s Legation, China.
Won by "Spider," the property of James Cock, Esq.
Ridden by Herbert Smith, Esq.

The last piece of this presentation consists of a very elaborately designed silver salver, with a beautifully-chased mount of the vine pattern, and medallions of racing subjects, viz., the "Weighing," the "Start," the "Race," and the "Winner." The inscription, which is placed in the centre of the salver, is as follows:—

Shanghai Races, Autumn Meeting, 1861.
FLYAWAY STAKES.
Won by "Spider," the property of James Cock, Esq.
Ridden by Alexander Cock, Esq.

HOUSE OF LORDS.

APPEAL CASE.—MAY 21ST.

This was a case curious in its historical associations. Lord Clive gave five lakhs of rupees of his own, and three more of Jaffier Ali Khan's, to the Company, to establish a pension fund for European soldiers in the service of the Company. There are now no such soldiers, and Sir J. B. Walsh, as representative of Clive, claims the money. The lower courts all held that the trusteeship had passed to the Crown, but the Lords decided that the trust was a "common personal contract" to repay in certain contingencies five lakhs of rupees. The contingency, described by Clive as "the Company ceasing to employ ships and European soldiers," has occurred, and the Court, therefore, decreed the money in favour of the appellants. All annuities or pensions granted before 1858 must continue to be paid, but subject to them the property rests with Lord Clive's representatives. The pensions being two old men, the fund will in a few years be worth having, particularly if the sicca rupee be calculated, as it ought to be, at half-a crown.

Naval and Military.

THE CHINESE EXPEDITION.—Captain Sherard Osborn, C.B., has engaged his passage by the mail of 4th June from Southampton, together with Messrs. Collins and Chapman, both Royal Navy, who are to act as secretary and storekeeper. The Kwangtung, noticed in our last, has been despatched from Falmouth under command of Captain Allen Young. The Kwangtung is an iron paddle wheel steamer of the following dimensions:—Length, 185.0; width, 24.0; depth of hold, 12.8; tonnage, builders' measure, 522 tons. She is constructed entirely of iron, having her bulwarks of this material; and her sides, for the whole length of engines, boilers, and magazines, are of an extra thickness. She is divided into numerous compartments by iron water-tight bulkheads, and her bow is made particularly strong, with a projection below the water which will serve as a ram. Her decks and all the deck fittings are of teak, and the whole of them are carried out as in Her Majesty's vessels of this class. She is rigged as a brig, and is heavily sparred for the voyage out to China. The draught of water on trial was 10.4, but when at work in China it will not be more than from 9.6 to 9.9, as she had on board a large extra amount of stores and coal for seven or eight days' steaming at full power. The speed at half boiler power, and working most economically, was about seven knots per hour, the engines making eighteen revolutions. Everything throughout, in both ship and machinery, worked most satisfactorily; and Commodore Osborn expressed to the Messrs. Laird how pleased he was at the efficient and liberal manner in which they had completed their contract with the Chinese Government. Apart from this trial, which was what might be considered the seaman's trial of the Kwangtung, there had been a prior one for the satisfaction of the builders, similar to the ordinary trials of Her Majesty's ships. The Kwangtung then realised a mean speed of over thirteen knots per hour, the engines making thirty-six to thirty-seven revolutions, with an indicated power of 700 horses.

Field-Marshal Lord Clyde is rapidly recovering from the illness under which he has been suffering, which, though severe, was happily not of the critical character that might have been inferred from reports.

Lieutenant-General Wearing, of the Royal Marines Light Infantry, died on the 19th inst. This casualty will advance Colonel Thomas Holloway, C.B., now Colonel-Commandant at Plymouth, to the rank of Major-General, who will be succeeded by Colonel John H. Gascoigne, C.B., Second Commandant at Woolwich.

Her Majesty's ship Leander has been compelled to proceed to Portsmouth Harbour for repairs. This fact does not augur well for her usefulness as senior officer's ship in that distant quarter, the southern division of the Pacific. The Leander only left the Nore on the 17th inst., and in four days she has been to a certain extent put *hors de combat*.

Admirals Sir Thomas John Cochrane, G.C.B., and Sir George Francis Seymour, G.C.B., have been appointed Vice-Admiral and Rear-Admiral of the United Kingdom.

The post of Aide-de-Camp to Her Majesty, attached to the Royal Marine forces, is placed at the disposal of the First Lord of the Admiralty by the promotion of Colonel Holloway, C.B.

The Swedish screw corvette Lagerbjelke, Capt. Herkepe, arrived at Spithead, from the Cape of Good Hope and St. Helena, sailing from the Cape on the 10th of March and St. Helena on the 25th. Easterly winds and fine weather were experienced throughout the voyage until yesterday, when a strong westerly gale was fallen in with. The Lagerbjelke on anchoring exchanged salutes with Her Majesty's ships Victory and Edgar, and with the saluting battery of the garrison.

The screw steam gunvessel Snake, 4, Commander John Moresby, which arrived in Plymouth Sound on the 19th, left Hong Kong January 26, the Cape of Good Hope March 31, St. Helena April 11, and Ascension April 18; she crossed the Line April 23, and touched at St. Vincent May 2. The Snake experienced fine weather from Hong Kong until the evening of the 19th inst., when about 40 miles south of the Lizard. There, in a heavy squall from N.E. by E., a sea struck her on the port side abaft the mainmast and washed away about 20 feet of the bulwarks. At the same time, the cutter was washed away from the crutches and fell on Lieut. Henry C. Streeten, who was taking shelter under the bulwarks on the weather side, and crushed him to death. The second master, Mr. Samuel M. Spry, was injured.

The launch of an iron-cased vessel, built for the Russian service from a Russian design, took place at the Thames Iron Works and Shipbuilding Yard, Blackwall. She is named the Pervenetz, or "Firstling," and she

Digitized by Google

is the first iron-clad ship in the Russian navy. That Government appears to have made a good start in her design. To take only one of her qualities—she draws fourteen feet water, which is lighter than any ship in the English iron-cased fleet except the Enterprise, and she is only one-third the size. The nearest approach to her in size is the Royal Sovereign, now converting on Cowper Coles' principle, but she is calculated to draw twenty-two feet of water. It will be seen, therefore, that the Russian designer has shown great skill in his plans.

The half-yearly inspections of the troops at Aldershott were completed last week. On Monday his Royal Highness the Duke of Cambridge, accompanied by Lieut.-Col. Clifton, Lieut.-Gen. Sir J. Yorke Scarlett, K.C.B., Lieut.-Gen. Sir Richard Airey, K.C.B., and Lord Elcho, arrived at the back camp shortly after 9 a.m., and minutely inspected the 2nd Brigade, which was formed in line on the Queen's-parade, under the command of Brigadier-Gen. Bates. The brigade having marched past in open column of companies in slow time marched back to the ground and reformed line; Major A. H. Cobbe put the 87th Royal Irish Fusiliers through the manual and platoon exercise, which was admirably executed. Several field and light infantry movements, by the three regiments constituting the brigade (the 26th Cameronians, under Lieut.-Col. Carey, the 76th Regiment, under Col. Smyth, C.B., and the 87th, under Lieut.-Col. A. Murray) were then performed. At the conclusion his Royal Highness highly complimented Brigadier-Gen. Bates on the general appearance and discipline of the brigade. His Royal Highness then proceeded to Cæsar's camp, where the artillery and cavalry brigades were drawn up in two lines, with the cavalry in advance. His Royal Highness having been received with a Royal salute proceeded to inspect the brigades, which marched past in open column of batteries and squadrons. Various other movements were performed with such steadiness and precision that the Duke complimented nearly every battery and squadron as they passed on their riding and appearance. The troops forming these brigades were C and G batteries Royal Horse Artillery, under Colonel the Hon. G. T. Devereux; A and B batteries, 4th brigade Royal Artillery, under Lieut.-Colonel E. A. Williams—Col. Gambier, C.B., Brigadier; the 6th Carbineers, under Lieut.-Col. Sawyer, the 12th Lancers under Lieut.-Col. Oakes, and the 13th Hussars under Lieut.-Col. Jenyns—Major-Gen. Hodge, Brigadier. The troops returned to their quarters about two o'clock, after which his Royal Highness honoured Lieut.-Gen. Sir J. L. Pennefather with his company at luncheon. He returned to town in the afternoon.

The hired transport Frances arrived at Spithead on the 16th inst., with military invalids and time-expired men from regiments serving at the Cape of Good Hope, who embarked on board at Capetown, on the 17th of March, the ship sailing on the following day, and calling in at St. Helena on the 31st of March. The troops during the voyage have been under the military command of Captain Montagu Barton, of the 85th Light Infantry, and in medical charge of Assistant-Surgeon Leet, of the Cape Mounted Rifles. The other passengers by the ship comprise Lieutenant Woodroffe, of the Cape Mounted Rifles, Deputy Purveyors Toller and Wright, and the wife of Deputy Purveyor McDonnell. The troops consist of 89 invalids and 11 time-expired men, in the following proportions:—Royal Artillery, 2 men; Royal engineers, 1 man; 2nd Battalion, 10th foot, 21 men, 21 women, and 4 children; 2nd Battalion, 11th Foot, 16 men and 2 women; 2nd Battalion, 13th Foot, 17 men, and 2 women, 2 children; 85th Light Infantry, 16 men; 103rd Foot, 1 man, 1 woman, and 1 child; Cape Mounted Rifles, 26 men, 4 women, and 5 children. The disembarkation will take place under the superintendence of the Quartermaster-General's department, at Portsmouth, and the time-expired men will be forwarded to depots, and the invalids to the Royal Military Hospital, at Netley.

The Esk, 21, screw corvette, of 1,169 tons, and 250-horse power, has been commissioned, at Portsmouth, for service on the Australian station.

The Curacoa, screw steam frigate, Capt. Sir William Wiseman, sailed from Spithead for the Australian station, where Sir William will assume the position of Commodore.

The trial of the Black Prince, 40, iron screw frigate, Capt. Wainwright, took place at Portsmouth on the 22nd, and was concluded at a late hour. Capt. Broadhead superintended the trial with his staff. Six runs were made with full boiler power at the measured mile, the mean speed of the six runs being 13.501 knots. The revolutions of the engines were, *maximum*, 54½, and the mean 53½. The load on the safety valve was 25lb., and the indicated horse power 5,309. The draught of water was 26ft. forward and 27ft. aft. The propeller was a Griffiths, one of 24ft. 6in. diameter, 28ft. 6in. pitch, and 4ft. 10in. length. Two runs were next made at half boiler power—six boilers, the mean speed of which was 12·221 knots, the revolutions of the engines being 47. The trials of speed having been concluded the ship was next tried in making circles under full steam. With a starboard helm the full circle was made in 10 min. 3 sec., the half circle in 5 min. 20 sec., the angle of the rudder being 18 degrees, with two turns of the wheel, and the revolutions of the engines 48, having been 54 previously to commencing the circle. With a port helm the full circle was made in 10 min. 25 sec., the half in 5 min. 32 sec.: the angle of the rudder was 22½ degrees, the turns of the wheel 2½, and the revolutions of the engines 48. There were in both instances 12 men at the wheel.

Parliamentary Intelligence.

HOUSE OF COMMONS.

CHINA.

(May 18th.) Lord NAAS gave notice that shortly after the Whitsuntide recess, on the motion of going into Supply, he should call the attention of the House to the state of affairs in China, and on the following evening (19th) Mr. LAYARD, referring to the debate of Friday (the 15th) endeavoured to explain his conduct by saying that it was not his impression alone, but that of many hon. members, that he could not speak more than once on the motion that the Speaker leave the chair. It was owing to no want of respect to the House that he remained silent.—Upon this Mr. BENTINCK remarked that he thought the frequent debates on subjects of foreign policy were not particularly conducive to the credit of the House, as such debates were likely to draw the country into war.—Lord R. CECIL quite agreed with what had fallen from his hon. friend as to the danger of departing from a policy of non-intervention, but certainly the speech of his hon. friend the member for Northumberland (Mr. Liddell), which was intended to prevent the Government from taking the part of the Tartar dynasty in China, and involving this country in boundless complications in that distant land, could have no such tendency. With respect to the China debate, the Under-Secretary had mistaken the facts. He gave the House to understand that he was obliged to abstain from speaking at that time in order that he might speak afterwards.—Mr. LAYARD said that he had acknowledged that he was mistaken.—Lord R. CECIL: The hon. gentleman said that he was prepared to speak, and that he took notes. He was not wanted to take notes, but to speak. He sat still on the bench, looking exceedingly indignant at all the charges which were made, but when the Speaker put the question he did not interfere, but allowed the debate to fall off. He was sure that the Government would reap no advantage from this, the most discourteous proceeding to a private member that he could remember.—Mr. M. MILNES did not think there had been any intentional discourtesy on the part of Her Majesty's Government on the evening of the China debate, for he could not conceive what possible advantage was to be expected from such a course.

THE CHINA WAR.

(19th.) Sir S. NORTHCOTE asked the Chancellor of the Exchequer whether it was the intention of the Government to surrender into the Exchequer the balance of £526,100 remaining unissued from the vote of credit for the China war.—The CHANCELLOR of the EXCHEQUER replied that the time had not yet come when it would be practicable to make a surrender of the balance referred to by his hon. friend.

(19th.) Lord NAAS asked the Secretary of State for the Home Department how many licences had been issued under the royal sign manual granting permission to British officers to enter the service of the Emperor of China, and to fit out and equip vessels for the Chinese Government, in consequence of the request made by the Under-Secretary of State to Mr. Clive, in his letter dated the 30th July, 1862.—Sir G. GREY replied that there had been two applications, and the licences were prepared, but no licences had ever been issued after the date of the letter referred to. Those for whom the licences were made out did not avail themselves of them, and an order in Council was afterwards prepared declaring the licence to be unnecessary.

MR. THOMAS VEITCH.—Mr. Thomas Veitch, whose name as associated with China and Japan will be familiar to most of our readers, the head of the eminent firm of nurserymen of Exeter and Chelsea, died suddenly on the 14th instant, under very melancholy circumstances. The venerable gentleman, who was 70 years of age, lost his wife, to whom he was much attached, a few days previously, and she was to have been buried on that day. Before the funeral, Mr. Veitch went out into his nursery to gather lilies to strew on his beloved wife's grave, and shortly after his return into the house he fell down and expired.

Monetary and Commercial.

CITY, MONDAY, MAY 25.

TELEGRAPHIC COMMUNICATION WITH INDIA.

The negotiations between the Porte and Her Majesty's Government for a telegraphic service to India, *via* Bagdad and the Persian Gulf, have been concluded, and a convention on the subject signed during the past week. In the prospect of this, Mr. Mansfield, commissioner in Scinde, has arrived in Bagdad, to superintend, in concert with Col. Kemball, the final arrangements for the service; and orders have also been forwarded to the Porte's engineers, to hasten the completion of the line between the latter town and Bussorah. As the whole of the wire and most of the posts are already on the ground, there is reason to hope that this may be accomplished before the summer sets in.

The charter of the *Tweed* (late *Punjaub*), and *Assaye*, to convey the submarine portion of the line from England, was noticed in our last. The *Marian Moore* and *Kirkham* have also been engaged. It is intended to despatch these vessels with the cable (which is the thickest one yet manufactured) about the middle of July, and if success attend the laying, the whole line will be complete from London to Kurrachee by the end of the year.

The half-yearly report of the directors of the Peninsular and Oriental Company will recommend the usual dividend of 3½ per cent., and an additional payment of 1½ per cent.

The directors of the Oriental Tea Company (Limited) have notified that, difficulties having arisen as to the completion of

Digitized by Google

the purchase of the estates referred to in the prospectus of the company, they have resolved to return the deposits in full. At the same time it is intimated, that they "hope still to make arrangements for the purchase of the estates, which they are informed are more extensive, by 250 acres of tea plant, than the quantity originally stated in the prospectus, and on which the purchase-money was calculated."

Mr. Philip Anstruther, the deputy-chairman of the Bank of Egypt and Metropolitan and Provincial Bank, late Colonial Secretary at Ceylon, died on the 22nd inst.

Mr. D. Davidson having resigned the managership of the British and American Exchange Bank, from ill health, Mr. Skinner, who has had eighteen years' experience in the Oriental Bank, has been appointed to replace him; and proceeded on the 23rd inst. to New York to organise the agency of the British and American Exchange Bank in that city, and to make other arrangements for the commencement of business.

The third report has been issued by the Labuan Coal Company, which announces contracts concluded with Government and the P. and O. Co., and the hire of a screw collier of 1,600 tons. The balance sheet shows the receipts to be £75,121 from shares, and the outlay £83,282; besides £3,806 sent to Labuan to pay off the Sultan of Borneo, &c. The outstanding liabilities are £14,808, and the cash on hand £2,840.

A gentleman will proceed by an early mail to assume the management of the branch of the Bank of Hindustan about to be opened at Shanghai.

THE MERCANTILE BANK.

The fifth annual meeting of this bank was held on the 19th inst., when the report, which will be found in another column, was unanimously adopted. It will be observed that the profits for the past year amounted to £94,228 (against £60,040 in the previous year). The progress of the bank's business must have been rapid and satisfactory to have given an increase in the profits in one year of 50 per cent. A branch of the bank has been opened at Yokuhama, Japan, under the management of Mr. Robert Brett, who has had several years' experience as accountant in the Shanghai branch.

The Chairman, in moving that the report and balance-sheet be received and adopted, said: Gentlemen, the report and statement of accounts which you have taken as read, require scarcely any comment from me, as the figures given in our accounts sufficiently speak for themselves and indicate a considerable increase in the business of the bank during the past twelve months; and, gentlemen, I am happy in being able to say that the business has been of a most satisfactory character. During the period which has elapsed since our last meeting our deposits have increased to the extent of £600,000, and we have been able out of the profits on our business for the past year to write off all the losses incidental to it, and we are thus enabled to present to you a clear sheet. There is only one of those transactions to which I now think it necessary specially to refer, and that is the loss which you are aware we sustained at Hong Kong. The directors, I assure you, caused the strictest inquiry to be made into all the circumstances of the case, and the result has been to acquit our manager there of all blame in the matter. Indeed, so far from his having acted with carelessness or indiscretion, we have ascertained that he acted with great energy and propriety. The loss, I am sorry to say, has proved to be somewhat in excess of the amount originally estimated, but our manager, as I have before stated to you, is in no way to be blamed for it. We originally supposed that £8,000 would cover the whole loss, but a thorough investigation into all the circumstances of the case, and subsequent events, have shown that it amounts to £13,000. So much for the opium fraud; but, as I have already told you, that and all our other losses have been written off, and we now start with a clear sheet.

As regards the reserve fund, we have been enabled to add to it £40,000, and by doing so we have increased it to £100,000. The whole of that fund, as it stood before we so increased it, is invested in eligible securities, and, as occasion may offer, we shall similarly dispose of the other £40,000. We have, in reference to our reserve fund, now reached the maximum fixed by our charter, which requires that it should amount, at the least, to 20 per cent. of our paid-up capital; but looking to the importance of such a fund in an institution like ours, it is the opinion of the board that it would be very unadvisable to limit it to that amount. On the contrary, we are of opinion that, as our business increases from year to year, so we ought proportionately to that increase to add to our reserve fund, as our doing so will draw after it the public confidence. The accounts received from all our branches are, I am happy to say, all of a most satisfactory character, and I think we may congratulate ourselves on the fact that they are administered by a most efficient staff of officers, second to none in any bank whatever. My predecessor in this chair told you that, when the reserve fund amounted to the sum fixed by the charter, we would consider the advisability of paying our dividends on the 1st of January and the 1st of July in each year, and I have now to announce to you that, for the future, we shall take that course, and we shall also, whenever the accounts for the year may warrant us in doing so, pay you a bonus, though I repeat we attach the utmost importance to increasing our reserve fund; and our first consideration must be given to that object.

Since we had last the pleasure of meeting you, we have opened a branch, or rather an agency, at Edinburgh, for as we have not by our charter the power of carrying on banking business in Scotland, the office to which I refer has been opened merely for the reception of deposits and the payment of dividends. It has, however, been so short a time open that as yet we can form no nion of its probable success. We have also completed arrangements for opening a branch in Japan, and our Shanghai manager, in whose judgment and discretion we have the utmost confidence, after a visit to that country, has reported to us that no danger exists, that our prospects there are most satisfactory, and that the branch is likely to prove a successful one.

Mr. J. A. Russell, one of the auditors, having connected himself with a new bank, in course of formation, has resigned his appointment. The vacancy will accordingly have to be filled up, and the directors have invited Mr. James Murray Robertson, of the firm of J. M. Robertson and Co., of Colombo, Ceylon, who has long been a strong supporter of the bank, to fill the office, subject to your election of him.

The next matter which I wish to call your attention to is the amount of remuneration which we, your directors, receive for conducting the business of the bank. When it was first started, our remuneration was fixed at £1,800 per annum for five directors, but as, since then, the business of the bank has doubled, and we have been able to put aside £100,000 for a reserve fund, we think the time has arrived when we may freely call on you to increase that to £3,000 per annum, for the increased number of six, which is not, I think, by any means too much, considering the duties we have to perform, and the present position of the bank. I have not anything farther to add, but expressing my readiness to afford you any other information that you may desire, in respect to the position and prospects of the bank, before moving the adoption of the report and accounts.

No shareholder having asked any questions, the following resolutions, proposed by the Chairman, and seconded by Sir Frederick J. Halliday, K. C. B., were then unanimously agreed to:—

1. That the report of the directors, balance-sheet, and auditors' report, now presented to this meeting, be received and adopted.

2. That George May and Donald Larnach, Esqs., having vacated their offices as directors of the corporation, by virtue of the Deed of Settlement, and being duly qualified for re-election, be re-elected accordingly.

3. That John Smith, Esq., of the firm of Messrs. W. Nicol and Co., Bombay, and James Murray Robertson, Esq., of the firm of Messrs. J. M. Robertson and Co., Colombo, be elected auditors for the ensuing year, and that their remuneration be £100 sterling per annum.

4. That Messrs. Coleman, Turquand, Youngs, and Co., public accountants, be employed to audit the accounts during the ensuing year, in conjunction with the auditors already appointed.

5. That, having regard to the report of the directors, which has been submitted o this general meeting, the remuneration of the directors be, and the same is hereby increased from the sum of £1,800 to the sum of £3,000 per annum; such increase to take effect from the 1st day of January last.

That the thanks of this meeting are due, and are hereby tendered to the Chairman, Court of Directors, and Managers, for their attention to the interests of the Corporation, as exhibited in the accounts now before the meeting.

We are authorised to state that the directors of the Chartered Bank of India, Australia, and China have made arrangements for opening forthwith a branch at Batavia.

There is a surfeit of money in Holland, for in the last two weeks two new banks have been erected on the Crédit Mobilier system, and their capital, amounting to five millions sterling, was privately subscribed in two days. One of these banks is under the immediate patronage of the Crédit Mobilier of France, and its shares are already quoted at a premium of 40 per cent. The shareholders of the Bank of the Netherlands have just received a dividend of 16 per cent. on the business of last year, and its shares are at a premium of 80 per cent.

The biddings for 30,00,000 rupees (£300,000) in Bills on India took place on the 20th at the Bank of England. The proportions allotted were—to Calcutta, 16,70,000 rupees; to Bombay, 12,00,000 rupees; and to Madras, 1,30,000. The declared *minimum* price was as before, viz., 1s. 11½d. per rupee on Calcutta, and 1s. 11¾d. on Bombay and Madras. The applications within the limits were for upwards of 100 lacs (£1,000,000). Tenders on Calcutta at 1s. 11½d. receive about 28 per cent.; on Bombay, at 1s. 11⅞d., about 31 per cent.; and all above these prices in full. Those on Madras receive in full.

According to a return lately printed of the total liabilities on the revenue of India (which return has been made up to the end of last year in England, and to the 30th April, 1861, in India), the amount of interest-bearing debt issued in India is £71,836,509, and of liabilities not bearing interest £14,631,454, making an Indian aggregate of £86,467,963. To this is to be added the London debt of £3,640,017 on East India bonds, £13,003,000 on East India debentures, £15,720,100 on Indian 5 per cent., and certain miscellaneous sums, making together £36,077,909, which brings the complete total up to £122,545,872. This is exclusive of the charge for the dividend at the rate of £10. 10s. per annum on the £6,000,000 capital stock of the East India Company, and likewise of the liabilities on railway guarantees.

A meeting of the Hong Kong and China Gas Company will be held on the 1st June next.

Digitized by Google

The amount of bullion by the P. and O. Company's steamer *Pera*, from Southampton on the 20th inst., was:—In gold: To Alexandria, £20,000; to Ceylon, £2,000; to Madras, £555. In silver: To Penang, £3,300; to Singapore, £14,900; to Hong Kong, £153,083; to Shanghai, £84,127. otal in gold, £22,555; in silver, £255,410.

ARTICLES OF IMPORT.

TEA.—During the past fortnight our market has been very quiet, and although importers generally have held their Teas firmly, yet prices for medium kinds of Congou, which have come to hand somewhat freely, have given way, whilst, on the other hand, those under 1s. 4d per lb, and over 2s. per lb. have been firmly supported; the demand both from the trade and exporters has been moderate, but deliveries for home consumption and export continue large. Low and dusty kinds of Congou have met with a fair demand at former prices; also those with leaf. Good common remains at 1s. 1½d. to 1s. 2d. per lb. Fair flavoury kinds have sold at previous prices up to 1s. 5d. per lb., but those ranging from 1s. 6d. to 1s. 9d. per lb. have ruled ½d. to 1d. per lb. lower. Fair to good Hobows and Ningchows, and second class Honams, Monings, and Wopaks, also, have sold fully 1d. per lb. lower. Good and fine of all description continue firmly supported. Tayshans have been taken at rather higher prices for good and fine kinds. Oolongs, Souchongs, and Flowery Pekoes show no material alteration. Common to fair Scented Capers, of Canton make, remain much as before; good to fine have been inquired for; Foo-Chow kinds have also been rather more in request. Scented Orange Pekoes have not been so readily saleable for Canton make, but fair to good Foo-Chow kinds maintain the late advance. Uncoloured Japans continue in request at former prices. Assam teas are without alteration, there having been none offered at public auction. In Green Teas there has been a considerable business, but the last day or two the trade have bought less readily, and it is with difficulty that the late extreme prices for Gunpowder can be got. The qualities most in demand have been the good and fine Moyune kinds, which have sold as high as 3s. 8d. per lb. for half-chests superfine Gunpowder. Ping Sueys have also sold up to 3s. 10d. per lb. for No. 1 kinds. Hysons and Imperials show no alteration. Some sales of good Canton made Gunpowder have been made at full prices. Common to fair sorts are without alteration.

SUGAR.—The home trade continue to evince great indisposition to operate, and although holders have kept the market but scantily supplied, sales are extremely difficult to effect, and only small purchases have been made on the spot, again at easier prices. Public sales of East India have again been entirely suspended, and nothing of consequence has transpired. The demand for landed parcels has continued extremely languid. Our quotations are:—Bengal: Crystalized, 24s. to 27s.; Benares, 22s. 6d. to 27s. 6d.; date, 19s. 6d. to 24s. 6d.; ordinary to fine brown, 13s. to 19s. Penang: Grey and white, 23s. 6d. to 26s.; brown and yellow, 16s. to 23s. Madras: Grocery, 21s. to 26s.; native, 15s. to 19s.; jaggery, 14s. to 15s. Siam and China: White, 22s. 6d. to 27s.; brown and yellow, 14s. 6d. to 22s. Manilla: Clayed, brown and yellow, 18s. to 19s. 6d.; Muscovade, 15s. 16s. 6d. Java: grey and white, 23s. 6d. to 27s. 6d.; brown and yellow, 15s. to 23s.

COFFEE.—Ceylon: Extensive supplies of Ceylon are now arriving, and materially reduced rates have in some cases been submitted to. The public sales of 518 casks, 337 barrels and bags Plantation have gone off languidly, at a decline in prices ranging from 6d. to 1s. 6d. per cwt., viz., low middling to middling, 86s. 6d. to 90s.; good middling to fine, 91s. to 102s. 6d. Native likewise has sold about 6d. per cwt. cheaper, viz., 99 casks, 628 barrels and bags, by auction, good ordinary to superior, 73s. 6d. to 74s. 6d. Mocha: 218 packages, offered by auction, were partly realised at steady rates, good clean garbled, 96s. to 96s. 6d. East India: At public sale, 773 bags Manila went as follows.—even brown Padang kind, 68s. to 70s.; bold pale, 76s. to 77s. Jamaica: Only 29 packages have been brought to auction, which sold at moderate prices. Current quotations are:—Mocha: ungarbled, 60s. to 78s; garbled, com. to good, 80s. to 97s.; fine, 98s. to 105s. Ceylon: Native, good ordinary to fine, 72s. to 76s. 6d.; ordinary, 68s. to 71s.; Plantation, ordinary to fine ord., 73s. to 84s.; fine fine ord. to mid., 84s. 6d. to 90s.; good mid. to fine, 91s. to 102s. Java: 67s. to 93s. Singapore: ordinary and good ord., 60s. to 76s. Sumatra and Padang: 58s. to 75s. Madras and Tellicherry: 72s. to 102s. Malabar and Mysore: good ordinary, 74s. to 76s.; fine ord. to fine, 76s. 6d. to 103s.

RICE.—Since our last report the demand has been more limited, but prices are fairly maintained, the private sales comprising only about 15,000 bags, common to good Ballam and Monghy (Bengal) 8s. 3d. to 9s.; a few Nakrenzie 9s. 10 d., and a floating cargo of 780 tons Bassein, at 10s. 6d. open charter guaranteed. Of 3,591 bags white Bengal at public sale, only about 1,000 bags have been sold, part bold hard grain at 12s. to 12s. 6d.; 4,244 bags Nakrenzie, and 13,584 bags Rangoon were withdrawn. Current quotations are, Bengal white 9s. 15s. 6d. per cwt.; cargo 8s. to 9s. 3d.; Madras 10s to 12s.; Arracan, Rangoon, &c., 7s. to 11s.; Java 10s. to 21s.

SAGO.—We quote Pearl at 16s. to 21s. per cwt.; sago flour 13s. to 14s. About 200 bags have been sold at 13s. 9d. The stock on hand is about 1,250 cwt. of sago; and 1,987 cwt. sago flour.

SPICES. Black Pepper: Business in this article has again been confined to small parcels by private contract, at previous rates. Our quotations are, Malabar, &c., 3⅞d. to 4¼d. per lb.; Eastern, 8½d. to 4d.; White, 5d. to 1s 2d. In white the market is firm; no auctions held, and on small orders for the supply of immediate wants ¼d. per lb. advance obtained; arrivals and sales advertised. Pimento: About 800 bags have been placed privately at 2½d. per lb. for low middling to good middling, a few ordinary grey at 2¼d. Cassia Lignea: 514 boxes, at auction, were bought in, but afterwards realised as follows: low middling and middling 86s. to 88s., mouldy, 87s. 100 chests good middling quality have also been taken by private treaty at 89s., cash. Current quotations are, 1, 2, and 3 quality, 85s. to 92s. per cwt.; Buds, 260s. to 280s. Cinnamon: Ceylon, we quote, 1st sort, 1s. 1d. to 1s. 11d.; 2nd, 1s. to 1s. 9d.; 3rd, 10d. to 1s. 4d.; 4th and Jungle, 7d. to 11d.; Malabar and Tellicherry, 7d. to 1s. per lb. Market inactive; arrivals. Cloves: Only small purchases of Zanzibar have been made at steady rates. We quote Amboyna and Penang, 4d. to 1s. 4d.; Zanzibar and Bourbon, 3⅞d. to 4d. per lb. Ginger: This market remained very quiet till recently, but the demand has improved, and good business has been done within the last few days, upon terms quite equal to the currency of our last; operations also for arrival. Bombay firm and inquired for. 374 bags Bengal at auction. We quote East India, common, 66s. to 67s. per cwt.; Cochin and Calicut, 68s. to 120s. Nutmegs, 1st quality, garbled, 2s. 6d. to 3s. 9d. per lb.; 2nd and 3rd ditto, 11d. to 1s. 6d.; nothing doing; arrivals.

HEMP.—Jute Transactions since our last very restricted, there being very little demand at previous rates, which are generally required by holders, and of 7,309 bales at auction, about half sold at £19. 2s. 6d. to £29 for common to fine new, prices being 5s. to 10s. per ton lower, except for really good classes. Arrivals: Current quotation is £19 to £29 per ton. Manila: At a slight reduction in terms large business has been accomplished, and upwards of 10,000 bales reported sold, mainly at £23 to £25. 10s. per ton for ordinary to very good roping. Only 583 bales at auction, half sold. Arrivals: Quotation £23 to £26 per ton. Sunn: Steady at £15 to £30 per ton. 75 bales Bombay at auction sold at £24 to £25 per ton: and of 656 bales Kurrachee, half sold at £27. 10s.

SALTPETRE.—A dull tone has again prevailed in the market, though the business done shows no material change in value, viz., about 2,000 bags Bengal, 10 to 9½ per cent. refraction, 36s. 6d.; 5 to 2 per cent., 37s. 6d. to 38s.; and 400 bags (March shipment) for arrival, at 38s., with allowances. The stock on hand is 7,393 cwt. We quote Bengal 36s. to 38s.; Bombay and Madras, 33s. to 36s. 6d. per cwt. Nitrate of Soda is 13s. 6d. to 14s. 6d. per cwt.

COTTON.—Owing to advices from America, and the various rumours since in circulation, this market has been dull throughout the week, and only small sales have been effected at a decline of ¼d. per lb., viz., middling fair Compta (Surat) 1s. 4d.; fair to good fair Tinnivelli Madras, 1s. 4¾d. to 1s. 5¼d.; fair Western, 1s. 6d.; Coconada, 1s. 5d.; fair and fully fair Bengal, 1s. 1¾d.; good fair China, at 1s. 4d. to 1s. 4¾d.; and Madras, for arrival, at 1s. 4½d. to 1s. 5⅞d. Our quotations for Madras are 1s. 2¼d. to 1s. 6⅞d. per lb.; Surat, 1s. 1d. to 1s. 7½d. per lb.

TIN.—This market has latterly become very animated; operations large, especially in Straits. Latest prices, £126 full prompt, £125 cash, and £127 per ton for arrival; and for Banca £128. 10s. Current quotations are—Banca, £128. 10s. to £129. 10s.; Straits, £124 to £126 per ton. The stock on hand of Banca is about 2,500 tons.

JAPAN WAX.—Small sales of block effected at 72s. per cwt. for good; 101 cases at auction, all retired; sales advertised of saucers. Current quotations are 62s. to 80s. per cwt.

MISCELLANEOUS.—Rum: The market has been very inactive, and few transactions have occurred. Aloes, Soccotrine and Hepatic, £3 to £15 per cwt.; nothing doing; Cardamoms, Malabar, 5s. to 7s. per lb.; Caster Oil, 4¼d. to 4⅝d. per lb.; Coculus Indicus, 9s. to 12s. per cwt.; Colombo Root, 2 s. to 6Os. per cwt.; Galls, blue, 100s. to 110s. per cwt.; scarce; we quote Japan and China at 40s. to 80s.; sorts, 70s. to 85s.; Gum Amoniacum, drop, 90s. to 130s. per cwt.; block, 30s. to 70s.; Animi, first size, £8 to £10. 10s., fully £1 cheaper; second and third size, £5. 10s. to £7. 10s.; partially scraped, £2 to £5. 10s.; Arabic, picked, 32s. to 57s.; sorts, 25s. to 35s.; Assafœtida, drop, 100s. to 120s.; block 25s. to 90s. Kino: £10 to £14. Myrrh: 1st quality, £9 to £11. 10s.; 2nd, £4 to £8. Olibanum: white 70s. to 80s. per cwt., very firm; reddish, 50s. to 65s.; pickings, 8s. to 32s.; Madder Roots: 23s. to 26s. per cwt. Nothing doing. Senna: 2½d. to 6d. per lb. Seed: Linseed, market active, 72s. to 74s. per qr.; Rapeseed, 64s. to 71s. per qr.; Guzerat, 73s. to 76s. per qr. Teeth, Elephants': No alteration; 70 lbs. and upwards £33 to £39; 40 to 60 lbs., £31 to £38; 20 to 40 lbs., £27 to £33; Scrivelloes, £12 to £32; Ball do. cut, £43 to £55; do. do. uncut, £28 to £43; Hollows, £13 to £30; Points and Tips, £14 to £34; Sea Horse: 4 lbs. and upwards, 4s. to 11s. per lb.; 3 lbs., 2s. to 5s.; 1 to 2 lbs., 9d. to 2s. Tortoiseshell: 6s. to 20s. per lb. Bees' Wax: White, £10 to £11 per cwt.; Yellow, £7 to £8. Ebony Wood: £6 to £13 per ton; 7 tons Bombay at auction, retired; arrivals. Myrabolanes: 11s. to 14s. per cwt.; firm, with moderate private business. Red Saunders Wood: £7. 2s. 6d. to £7. 7s. 6d. per ton; quiet, arrivals. Turmeric: 25s. to 30s. per cwt.; very scarce and firm, much inquiry. Bees' Wax: Bleached, £9 to £9. 10s. per cwt.; quiet.

Digitized by Google

Unbleached, £7 to £8 per cwt. Cowries: Fresh, 30s. to 38s. per cwt.; flat, all offered, retired arrivals. Horns: Buffalo, 23s. to 45s. per cwt.; nothing doing, arrivals of buffalo horns. Do. Tips, 25s. to 35s.; all sorts. Deer, 27s. to 55s. Nux Vomica: 9s. to 12s. 6d. per cwt.; nothing doing. Safflower: Good to fine, £6 to £7 per cwt.; improved, 104 bales at auction mostly sold at £4. 12s. 6d. to £6. 12s. 6d. per cwt. for middling to good, arrivals. Inferior to middling: £3. 10s. to £5. Shellac: Orange, 160s. to 190s. per cwt. Garnet, 140s. to 155s. Liver, 140s. to 160s. Block, 90s. to 160s.; prices lower; arrivals and sales advertised. Black Lead: 6s. to 24s. per cwt.; fine quality in demand; arrivals and sales advertised. Camphor: China, £7. 7s. 6d. to £7. 15s. Japan, £7. 7s. 6d. to £7. 15s. Cocoanut Oil: Cochin, £49 to £51 per ton; Ceylon, £46 to £49; Sydney, £43 to £46. More business done at a slight decline. Cubebs: £5. 5s. to £5. 15s. per cwt. Dragon's Blood: In reeds, £11 to £15 per cwt.; in lumps, £4 to £11. Galangal Root: 24s. to 27s. per cwt. Gum Benjamin: Sumatra, firm; 1st quality, £15, to £16; 2nd do. £11 to £14; 3rd do. £6 to £10; 4th do., £1 to £5. Damar: 35s. to 52s. Gambooge: Picked, £8 to £10; in sorts, £4 to £7. Gutta Percha: 1s. 4d. to 2s. 6d. per lb. Firm; fine qualities wanted; enquiry for low prices arrived. India Rubber: 1s. 3d. to 1s. 6d. per lb. Market improved; prices advancing. Mace: 1st quality, 1s. 8d. to 2s. 3d. per lb.; 2nd do., 9d. to 1s. 2d. Arrivals and sales advertised. Musk: 1st quality, 25s. to 28s. per lb.; lower qualities, 12s. to 21s. Nothing doing. Oil of Anniseed: 5s. 6d. per lb.; moderate private transactions. Caja puta: 2½d to 3d. per ounce; Cassia: 7s. 10d. to 7s. 11d. per lb. quiet at higher quotations, sales advertised. Sapan Wood: Bemah, £5 to £8 per ton, flat; Siam, £8 to £11. Shells: Sincapore, 125s. to 150s. per cwt.; Manilla, 80s. 95s. Soy: 2s. 5d. to 2s. 7d. per gallon. Star Aniseeds: 100s. to 105s. per cwt. scarce, much wanted. Sticklac: Siam, 60s. 85s. per cwt. flat. Battans: 3s. to 10s. per 100; firm, but nothing doing. Rhubaab: Dutch trimmed, 4s. to 6s. per lb.; common, flat, 2s. to 4s. 9d.; round, 1s. 9d. 4s. 6d. Terra Japonica: Cutch, Pegue 24s. to 28s. 6d. per cwt.; Gambier 20s. 6d. to 22s.; moderate business.

ARTICLES OF EXPORT.

MANCHESTER MARKETS.

The review of the past week's market may be given in a few words. Owing to the uncertainty created by rumours of an armistice in America, which came in the early part of the week, the prices of both yarn and cloth were weakened, and there has been an almost total suspension of business until yesterday, when the advices brought by the steamer somewhat restored confidence in the belief that the war is likely to continue. The maintenance of present prices seems almost entirely to depend upon this condition, and yesterday and this morning spinners and manufacturers have again fallen back on the full quotations of last week. There has not been much business, but still some operations have resulted. Large offers have been made at a shade lower, but sellers would not accept them. The market closes with a much more cheerful feeling, and as large contracts are still in course of execution, millowners are busy, though they have not secured many fresh orders. The circular of Sam Mendel quotes Grey Shirtings, 7 lbs., 15s.; 9 lbs., 19s. 6d. to 20s.; T-Cloths, 11s. 6d.; White Spot Shirtings, 18s; White Brocades, 18s. 3d.; Damasks, 31s.; Maddapollams, 6s. 9d.; Cotton Yarn, 16-24, 2s. 2d.

FREIGHTS AND CHARTERS.

There is less inquiry for shipping, the late demand for the various ports having been better supplied. Coal freights are lower. Homeward freights are firm, and there is a good demand for first-class ships of medium tonnage at 80s. to 82s. 6d. from the Rice Ports, and 80s. from Manila.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 42s. 6d. mea. To Nagasaki: 65s. To Hankow: 65s. weight, 60s. mea. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. measurement. To Shanghai: 50s. weight, 30s. measurement. To Hong Kong: 40s. weight, 35s. measurement. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. to 35s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £41 and £1. 18s. 6d. For Shanghai: £50 and £2. 9s. For Manila: £1. 10s. For the Philippine Islands, Penay, or Zebu: £2. For Singapore: £26 and £1. 4s. For Penang: £24. For Galle: £26 and £1. 6s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have engaged freight for sundry Government stores in the Troas; also for 76 tons heavy and 73 tons light goods in the Alchymist, both from the River Thames to Hong Kong, and in the Teviot for 23 tons heavy and 11 tons light goods to Trincomalee.

The P. and O. Company have contracted for the conveyance of 6,000 tons of coal from the North to Hong Kong.

CASUALTIES.

The Paul Johann, Rooy, from Shields for Batavia, which put into Brouwershaven 6th May, was assisted in there, having lost topmast and foreyard.

The Arbutus (schr.), of Southampton, was abandoned May 4th in lat. 46 N., long. 10 W., and soon after sunk; crew saved by the Colcroom, Hall, from Penang; arrived in the Downs May 11th.

The Queen's Own, Flanagan, which arrived at Deal May 12th from Shanghai, reports that she saw the wreck of a large vessel on Alceste Reef, Pulo Leat, China seas, and that on May 6th, in lat. 47 N., long. 10 W., she picked up several pieces of wreck, apparently from a vessel of about 200 or 300 tons, and passed a large portion of a vessel's side and boat's chock, seemingly the result of a collision.

The Louisa Hatch (American), Grant, from Cardiff to Galle, with coals, was captured and burnt on the 10th April, off Fernando Noronha, in lat. 4 S., by the Confederate steamer Alabama, after she had taken from her all the coals she required.

SHIELDS, May 20.—The Anna Elise (Dutch barq.), de Roever, for Batavia, grounded on Sadler's Point last night when coming out of Northumberland dock, and will have to discharge part of her cargo to get off.

The Louis Kniffler, Seemann, for Japan, put back to Cuxhaven 21st May with mainyard broken.

The Oneida, from Shanghai for New York, with tea, was captured and burnt on the 23rd March, in lat. 1 S., long. 29 W., by the Confederate steamer Florida.

At ST. HELENA.—March 31, Jeddo v. Rossen, from Java, and sailed 1 April, from Rotterdam; Ceylon, Sullivan, from Manila, and sailed 1 April, for Queenstown; April 3, Passaroeang, Strootman, from Java, and sailed 4 for Amsterdam; 4, Wilhelmina, Koster, from Batavia, and sailed for Falmouth; 11, Speedwell, Holdsworth, from Hong Kong and Cape; Empress of India, McMillan, from Shanghai; Malvern, Clarkson, from Japan, for London; 7, Henricus, Gerardus Vander Zee, from Banjowangie, and sailed 9 for Amsterdam; 11, Juno, Nicolai, from Samarang; 12, Northern Light, Forbes, from Ceylon, for Gibraltar; 13, Queen of the North, Crombie, from Shanghai, for London; Eastward Ho, from Singapore, for Channel; April 11, Bittern, Taylorson, from Shanghai, for Montreal; 12, Excelsior, Hunter, from Japan, for London; Odin, Willman, from Java, for Channel; Nederland, Hoekstra, from Batavia, for Amsterdam; Bertha, Beker, from Batavia, for Bremen.

Off ST. HELENA.—April 1, Enterpe, from Sourabaya, for Rotterdam.

At TABLE BAY.—March 27, Land o' Cakes, sailed for Colombo.

THE NEW DOCKS AT SINGAPORE.—The large graving dock at Singapore is, we are informed, now in good working order. There is every convenience for discharging cargo, refitting, and coaling both sailing and steam vessels, as the yards possess laths and every other appliance for repairing iron steamers, &c. We refer to the advertisement of the Singapore Dry Dock in another column.

HOLLOWAY'S OINTMENT AND PILLS.

MEDICINAL EFFICIENCY.—In cases of glandular and other diseases arising from hereditary taints, the use of these healing and purifying remedies are always followed with the most gratifying results. The Ointment must be well rubbed upon the skin, as near as possible to the ailing part, and the Pills should be taken every night in alterative rather than purgative doses. These excellent medicaments will then act in unison, quell the local mischief, re-establish purity and order through the system, and spare unmerited suffering or untimely death. Numerous testimonials exist from persons who were thus cured of ulcerations, diptheria, quinsey's, gathered glands, disfiguring skin diseases, &c., and who assert that but for Holloway's remedies, they must have perished.

W. F. THOMAS & CO.'S
PATENT SEWING MACHINES.

TO TAILORS, SHIRT COLLAR, GLOVE, BOOT, AND SHOE MAKERS, SADLERS AND OTHERS.

FOREIGN, COLONIAL, and Country users of SEWING MACHINES, who cannot get them adjusted or repaired when imperfect or out of order, must necessarily rely on the respectability of the maker for obtaining a really serviceable Machine suitable to their requirements. The high reputat on which, during the last fourteen years, the Machines made by W. F. Thomas and Co. have acquired for the perfection of their workmanship, insuring uninterrupted action and non-liability to derangement, entitle the make s to the confidence of persons residing in the country and abroad, and of intending Emigrants, to whom any disappointment in the quality of the Machine must be attended with serious inconvenience.

The Machines are made of various sizes, and adapted for every kind of work. The stitching produced is alike on both sides of the material. There is no cord or ridge, and the thread cannot be pulled out. Lists of prices and specimens of the work can be had on application to—

W. F. THOMAS & Co. (the Original Patentees), 66, Newgate-street, and 1, Cheapside, London.

BENJAMIN ELLAM,

N.B.—Merchants, Shippers, and Saddlers supplied as usual, on the most liberal terms.

BENJAMIN ELLAM, 213, PICCADILLY, LONDON.

CHOLERA, DYSENTERY, DIARRHŒA, AGUE, FEVER, SPASMS, &c. The Safest and Best REMEDY is that marvellous remedy known as

CHLORODYNE,

which was discovered by Dr. J. Collis Browne, M.R.C.S.L. (ex-Army Medical Staff), and the SECRET OF HIS RECIPE CONFIDED ONLY to J. T. DAVENPORT, pharmaceutical chemist, 30, Great Russel-street, Bloomsbury-square, who is the sole manufacturer. Medical testimony furnished by the highest authorities in military, naval, and Civil practice, and numerous gratifying statements from the public generally, establishes this property as invaluable. It relieves pain, soothes the system, inducing refreshing and soothing sleep without producing or having any unpleasant effects like opium, and may be taken at any time in a few drop doses. Extracts from the General Board of Health, London, as to its efficacy in Cholera:—"Third Stage, or Collapse—In all cases restoring the pulse. So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases." From Dr. Andrew Smith, Director-General Army Medical Department:—"I have seen it used, and apparently with much advantage." From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an anti-spasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am perfectly satisfied with the results." From Dr. M. M'Mullrun, of New Galloway, Scotland:—"I consider it the most valuable medicine known." Dr. M'Grigor Croft, late Army Staff, says:—"It is a most invaluable medicine." Dr. Gibbon, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa." Dr. I. Baker, Bideford:—"It is without doubt the most valuable and certain anodyne we have."

Sold in bottles, 2s. 9d. and 4s. 6d., by the sole Agent and Manufacturer, T. DAVENPORT, 33, Great Russell-street, Bloomsbury square, London; or sent carriage free on receipt of Stamps or Post-office Order, and with Professional Testimonials enclosed. None genuine without the words "Dr. J. Collis Browne's Chlorodyne" engraved on the Government stamp on each bottle.

*** Beware of counterfeits sold under the same name. Orders can be sent through any of the Agents of this Paper.

SINGAPORE DRY DOCK.

The Patent Slip and Dock Company are READY to EXECUTE, in the most efficient manner, REPAIRS to SHIPS and STEAMERS of all descriptions, under the supervision of European Shipwrights and Engineers. The dock admits two vessels at one time, being 400 feet in length, with a depth of water ranging to 15½ feet.

There is extensive Wharf Warehouse and other accommodation, together with the usual conveniences for the discharge, refitting, and coaling of vessels; also lathes and every appliance for the repair of iron Steamers.

CHARTERED MERCANTILE BANK OF INDIA, LONDON, AND CHINA.

Incorporated by Royal Charter.

Paid-up Capital, £500,000; Reserve Fund, £100,000.

Head Office—5, THREADNEEDLE-STREET, LONDON, E.C.

COURT OF DIRECTORS, 1862-1863.

GEORGE GARDEN NICOL, Esq., Chairman.

Donald Larnach, Esq.	Sir Frederick James Halliday, K.C.B.
George P. Robinson, Esq.	David Trail Robertson, Esq., Ex-officio.
George May, Esq.	
Thomas Stenhouse, Esq.	

DAVID TRAIL ROBERTSON, Esq., Chief Manager.

FIFTH ANNUAL GENERAL MEETING.

At the Fifth Annual General Meeting of the Shareholders, held on the Bank's premises, in Threadneedle-street, on the 12th May;

G. G. NICOL, Esq., Chairman, in the Chair.

The notice convening the Meeting, and the following Report and Statement of Accounts were read:—

The Directors have the pleasure of presenting to the Shareholders the Audited Balance Sheet, and Profit and Loss Account of the Bank, for the year ended 31st Dec. last.

After providing for all bad and doubtful debts, and defraying expense of management at all points, the net profit amounts to £94,228. 14s. 1d., to which has to be added a sum of £40. 15s. 1d. undivided profit brought forward from the preceding year, making a total of £94,269 9s. 2d.

Out of the above total, £50,000 has been paid in two half-yearly dividends, making together 10 per cent. on the paid-up capital of the Bank. A further sum of £40,000 has been added to the reserve fund. The unappropriated balance of £4,269. 9s. 2d. is carried forward to the profit and loss account of the current year.

The Reserve Fund now amounts to £100,000, of which £60,000 is invested in Indian Government Securities as intimated in the last report, and it is the intention of the Court to invest the balance, £40,000, in public securities as opportunities offer.

Arrangements have been made with Mr. Charles Pearson, Chartered Accountant, Edinburgh, to act as Agent for the Bank there, for the receipt of Deposit Money, and the conduct of such other business as required.

The Reserve Fund being now completed to Twenty per cent. on the paid-up Capital of the Bank, as required by the Deed of Settlement, and the business of the Bank being largely extended, the Shareholders will be invited to revise Clause 113, with a view to increase the remuneration at present fixed for the Directors.

The Directors who retire by rotation are Mr. George May and Mr. Donald Larnach, who, being eligible, offer themselves for re-election, and the Court recommend them accordingly.

The Shareholders will have to appoint Auditors for the current year.

GENERAL BALANCE,

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Valetta, arrived June 10.—From Shanghai: Messrs. H. Luxton and J. Gilman. From Hong Kong: Mr. B. Gonzalles, Capt. Blow, Mr. D. Quintana and European male servant, Brigadier-General Staveley, C.B., Mr. W. P. Galton, Mr. Vacher. From Singapore: Mr. and Mrs. Rigg and child, Mr. J. Rigg, Messrs. Fitzpatrick, Schurmann, Mason, and Haverkamp. From Galle: Mr. E. Francis.

To Southampton, per Pera, expected to arrive June 17.—From Hong Kong: Mr. T. Crawford, Mrs. Piercey and two children, Miss Gimsen, A. J. Rapoza, E. C. Hultham, J. H. Nebbi, P. Otson, Mr. G. King. From Singapore: Capt. Tucker, Mrs. Farrant, three children, and servant.

To Gibraltar.—From Hong Kong: Messrs. Tait and Belis.

Per last Bombay mail, to Marseilles, per Vectis, arrived June 3.—From Shanghai: Mr. J. F. Carter, Mr. W. Davison. From Hong Kong: Mr. R. J. Fearon.

To Southampton, per Ellora and Massilia.—From Shanghai: Mr. and Mrs. Medhurst, infant, and two servants. From Galle: Mr. and Mrs. Daniels, two children and ayah.

To Suez, per Jeddo, arrived May 27.—From Shanghai: Mr. R. Miller, Mr. W. J. Kipp, jun. From Hong Kong: Mr. G. B. Farnam. From Singapore: Dr. Foulerton. To Alexandria from Singapore: Mr. R. Zapp, Mr. and Mrs. Hubener, three infants and servant.

PASSENGERS OUTWARD.

By last Mail, per Ripon, from Southampton, June 4.—To Shanghai: Messrs. John Clark and Arthur Bernard.—To Hong Kong: Messrs. Budden and Alfred Bean, Deputy Commissiary-General Maturin.—To Singapore: Mrs. Bennett.—To Ceylon: Mrs. Findlay and infant, Mrs. Binny Scott, Mr. A. G. and Mrs. Green, Miss Green, Lieut.-Colonel J. H. Freeth, R.E., Messrs. Mortimer and Fitzroy Sewell.—To Calcutta: Mr. and Mrs. W. Ainslie, infant, and child, Capt. Ormsby, Messrs. Mitchell and Coryton.—To Madras: Lieut.-Colonel Boileau.

From Marseilles, per Steamer, June 12.—To Hong Kong: Mr. Loney.—To Singapore: Captain Sherard Osborn, R.N., Mr. H. L. Collins, R.N., Mr. Chapman, R.N.—To Calcutta: Messrs. Muller and A. M. Dowleans.—To Madras: Mr. John Maskell.—To Alexandria: Mr. Nicaty.—From Alexandria.—To Shanghai: Mr. Weeks.—From Suez.—To Hong Kong: Dr. Otto Martin.

Per P. and O. steamer, June 20, from Southampton.—To Ceylon: Mr. H. Bowden Smith, Mr. J. B. Bailey, Miss Mary Kennedy. To Hong Kong: Messrs. P. V. James, R.N., G. White, R.N., S. S. Sugden, C. Hirtzul, E. Norton, C. S. C. Watkins, and J. C. Thomas. From Marseilles June 28.—To Shanghai: Mr. Soutar. To Ceylon: Mr. R. S. MacLagan.

Per P. and O. steamer, July 4, from Southampton.—To Ceylon: Miss Davey, Mr. E. Astley.

Per P. and O. steamer July 20, from Southampton.—To Shanghai: Mrs. Beal. From Marseilles July 28.—To Singapore: Mr. and Mrs. R. C. Woods and two sons.

Per Madura, for Shanghai: Charles Edward Hawkes Elliot and Richard Luscombe Elliot, L.R.C.P.; M.R.C.S.; and L.M. Eng.

Summary of News from the Far East.

JAPAN.

The news received by this mail is of considerable importance. The reparation demanded by our Government is more definitely stated, and it is clear that unless there is a full compliance with our claims on the part of the Japanese Government coercery measures are to be immediately adopted. Colonel Neale had been instructed by Earl Russell to demand the trial and capital execution of the murderers of Mr. Richardson; a heavy pecuniary penalty on Japan for that offence; and a considerable compensation for the sufferers or their surviving relatives. Should Colonel Neale's demands not be complied with in the precise terms laid down in this *ultimatum*, he reserves to himself the right of adopting coercive measures of a nature and duration "proportioned to the degree of ill-advised obstinacy or resistance which the Japanese Government may assume." Before making these demands it was necessary to have a fleet ready at hand to show that we were capable of enforcing them. Accordingly a fleet was stationed in the harbour of Yokuhama, under the command of Admiral Kuper, consisting of the *Euryalus*, *Pearl*, *Argus*, *Centaur*, *Ratler*, and *Racehorse*, with gunboats *Havoc* and *Kestrel*; these were shortly to be joined by H.M.S. *Ringdove*, *Encounter*, *Scout*, and *Coromandel*, along with the gunboat *Hesper* with coals and stores. Two Dutch and two French vessels-of-war were also present with the English fleet. The *ultimatum* was sent in on the 6th April and twenty days allowed for its being satisfactorily replied to. The latest dates from Yokuhama are to the 15th April, up to which time no reply had been received. The Tycoon, however, had previously left for Miako (March 23rd), and the *ultimatum* had been sent after him to the capital. The Mayor of Kanagawa is said to have expressed himself, in a communication to the Admiral, to the effect that the Tycoon's government was not strong enough to arrest and punish Shimadzoo Sabaro, father of Prince Satsuma. This man was one of the murderers of Richardson, and it will be recollected that the Tycoon then expressed his comparative helplessness in the case. In the present emergency it is alleged that the Mayor of Kanagawa has suggested that satisfaction should be taken from the Prince of Satsuma himself, by the seizure of the Loo Choo Islands, which are his property, and yield a revenue of half a million sterling per annum.

We quote a consular notification published by Dr. Winchester at Yokuhama:—

Her Majesty's Consul does not deem it necessary to introduce the communication, the purport of which he is directed to impart to the community, by any lengthened statement.

All Her Majesty's subjects in this country are aware of the grave and fatal occurrence which took place on the 28th June and 14th September last.

These have naturally engaged the serious attention of the Government, and Her Majesty has directed her *Charge de Affaires* to demand in her name such reparation and redress as the gravity of the circumstances requires:—

"Yokuhama, April 6th, 1863.

"Sir,—I have already made known to you the purport of a note I have this day presented to the Japanese Government, containing a declaration of grievances and unrequited outrages of which British subjects have been the victims and sufferers, and for which, under instructions from Her Majesty's Government, I have demanded a specific reparation within a noted period of time.

"The attack upon Her Majesty's Legation at Yedo on the 28th of

Digitized by Google

June last, when two of the guard of H.M.S. *Renard* were treacherously murdered, and the subsequent barbarous murder of Mr. Richardson on the 14th of September, and murderous assaults committed on the same occasion upon a lady and two other gentlemen, British subjects, are special outrages for which reparation is demanded.

"That reparation comprises the trial and capital execution of the murderers of Mr. Richardson, a heavy pecuniary penalty on Japan for that offence, and a considerable compensation for the sufferers, or their surviving relatives.

"It is sincerely to be hoped that the Government of the Tycoon, influenced by wise and just reflection, will yield a ready compliance to the demands thus rendered necessary by these unprovoked and outrageous acts.

"On the other hand, in the possible contingency which exists of the Japanese Government refusing to accede to those demands, or hoping to evade them by futile arguments or procrastination, it becomes my duty to apprise you of the inevitable adoption in such an event of coercive measures by the Rear-Admiral Commanding-in-Chief Her Majesty's Naval Forces in these seas, now arrived here with a considerable force, and furnished with instructions to the above effect analogous to my own.

"Twenty days, dating from the 6th instant, is the period allotted as the term which I will await the definite and categorical reply of the Japanese Government, and the nature of which, when received, will decide the adoption or otherwise of coercive measures, the duration and severity of which will be proportioned to the degree of ill-advised obstinacy or resistance which the Japanese Government may assume.

"Under such circumstances, I have to instruct you to call a meeting of the British residents within your consular jurisdiction, or of a committee appointed by them, and make known to them the purport of this despatch, with a view that Her Majesty's subjects may individually adopt such precautionary measures for the safeguard of their commercial interests as they may deem expedient; while in regard to general measures of defence against the contingency of aggression or attack upon the several settlements during the continuance of coercive operations, the Rear-Admiral Commanding-in-Chief H.M. Naval Forces will very shortly propose to concert with the diplomatic agents and naval commanders of foreign States on the spot respecting the adoption of such combined arrangements as may be practicable and expedient.

"I have to request you to communicate the purport of this despatch to your colleagues, the consuls of friendly nations residing at Kanagawa and Yokuhama, with the least possible delay.

"E. ST. JOHN NEALE.

"True copy,—CHARLES A. WINCHESTER."

"I request you will particularly take notice that the object of H.M. *Chargé d'Affaires* in directing me to acquaint you with the tenor of his despatch is to enable British subjects to take such timely measures of prudence and precaution, in reference to their commercial and individual interests, as they may consider the circumstances require them to adopt.

"The Admiral proposes to concert with the chiefs of the other foreign nations such arrangements as may tend best to secure the safety of the settlement.

"It is especially my duty, in the grave state of our relations with the Government of this country, to impress upon you in the plainest terms the expediency and necessity of observing the greatest circumspection and courtesy in your intercourse with the natives of all ranks and classes—to avoid all acts which may lead to complications likely to render still more difficult the position of those entrusted with the control of Her Majesty's affairs in this country, and, by the exercise of a discreet self-restraint, shun all occasions of unnecessary exposure to personal risk.

"I have only further to state, that the foregoing contains all the material information which under present circumstances it can possibly be in the power of H.M.'s *Chargé d'Affaires* to foresee or make them acquainted with. The whole question is in a future which rapidly approaches, and during which it is hardly necessary to say that your safety and protection, so far as the same may be practicable, will be an object of anxious solicitude. "CHARLES A. WINCHESTER, H.B.M.'s Consul."

With regard to this notification the *China Mail* writes:—

"The inference to be drawn from this notification and Colonel Neale's letter is that, in case of satisfaction not being otherwise obtained, the Admiral will proceed to lay Yokuhama in ashes, as well as other places in the event of the Japanese proving obstinate. The present display of force in Japan is what is called in diplomatic language, 'a strong demonstration,' and it is to be hoped that the Admiral will see his way clearly before laying any of the towns in ashes. Previous experience in China has amply proved to us that a visit to the capital is more effectual in furthering negotiations than are hostile operations at places of less importance; and, although it is quite befitting that our demands should be made on the spot where the latest outrage was committed, it ought not to follow that the peaceful inhabitants of an unoffending place should be made to atone for the crime of one of the native nobility. To destroy Yokuhama would be neither humane nor politic, and we are convinced that the Admiral and Colonel Neale will afterwards make a move in a different direction. The bombardment of the nobles' quarters in Yedo might have brought the Gorogio to a unanimous and friendly view of the foreign question, but the nobles anticipated that move, and cleared out of Yedo altogether. They should be followed to Miako, if war is to be the mode of dealing with the Japanese; for the nobility are the rulers, and have nearly all the influence. Meantime, while the Tycoon, who has undoubtedly given the foreign question much attention, is absent on a visit to the Mikado, it would be ill-advised to proceed to extremities; while nothing could be objected to any steps having for their object the capture of Prince Satsuma or the seizure of his property."

Of course this uncertain state of affairs is in the highest degree unfriendly to trade, and we are told that the foreign communities at the friendly ports are busy concerting measures for their safety in the event of hostilities, and that at Yokuhama the shipmasters had met and organised means of communication with the shore by signals, so that the foreign residents might get speedy shelter on board ship in case of danger.

CHINA.

PEKING.

There is no news by this mail from the capital.

TEIN-TSIN.

All is said to be perfectly quiet in the city and environs; but in the interior the country is in a disturbed state, which affects the trade at this port, as it prevents the inland traders from travelling with safety. So far, therefore, the season has opened with unusual dulness, but it is hoped that it is only temporary, and that in a few weeks commerce will assume greater activity. Mr. Gibson, late acting Consul at Tien-tsin, who was wounded in an engagement with the marauders from the Shantung province, is now progressing favourably towards convalescence. It is reported, with reference to these insurgents, that Captain Coney of the 67th, with his disciplined China force, had a second engagement with them, when they were driven across the frontier with considerable slaughter.

SHANGHAI.

Brigadier-General Brown had arrived to relieve Brigadier-General Staveley. Shortly after his arrival it transpired that he intended to reduce the garrison. H. M. 31st Regiment, and the wing of the 67th, were shortly to take their departure from the settlement, the former for England the latter for Hong Kong, where General Brown intends to remove the head-quarters of the British land forces in China. Major Govan's Battery of Artillery was also to leave, and Captain Murray, R.A., remains in charge of the depôt. The 5th Bombay N. L. I. proceed to India, and 22nd Regiment of the same force relieves them. In that case the 2nd Beloochees under Colonel Hough will form the garrison of Shanghai.

General Burgevine had returned from Peking, having completely succeeded in the object of his visit. It is stated that, not only has he been reinstated by the Emperor in command of the Song-kiang force, but that a Commissioner has accompanied him from Peking to enforce the measure on the local mandarins. This act of the Chinese Government must, of course, involve important changes in the command of the disciplined Chinese and garrison of Song-kiang.

Major Gordon has gained a decisive success over the rebels at Fooshan, and relieved the garrison of Chiang-zu, which he found reduced to great straits for want of animal food and ammunition. Having joined his force to that of Major Tapp, which was already on the spot, he commenced operations on the 6th April by opening fire from a 32-pounder and from four 12-pounder howitzers on a strong stockade erected by the rebels on the east bank of the creek leading to Chiang-zu, a little above Fooshan. Fooshan itself is ruined and deserted, but afforded excellent cover for the guns and troops during the bombardment. The fire of another 12-pounder howitzer was, at same time, directed against a second stockade on the west bank. After three hours' bombardment, the storming party, under command of Captain Belcher, of the Ningpo battalion, was ordered to advance to the assault, boats having previously been arranged to form a bridge over the creek which had checked Major Tapp's men on a previous occasion. The assault was successful, and the stockade carried; but the rebels, swollen in numbers by large reinforcements from the direction of Chiang-zu, showed so threatening an appearance in the open that Major Gordon deemed it advisable to collect his guns and men within the stockade and rest there for the night. The following morning the enemy was found to have abandoned the country and retreated on Soo-chow, so the disciplined Chinese, accompanied by a considerable force of mandarin troops, made their way unmolested to the gates of Chiang-zu. The mandarins of that city received Major Gordon in great state, and showed much delight at having been relieved. They had been closely beleagured since a day or two after they had given in their allegiance to the Imperialists, and had no animal food or provision of any other kind than rice left in the city. They were also out of ammunition, and were thus unable to use any offensive measures against their opponents. The failure of several successive endeavours to relieve them had caused them much anxiety. Chiang-zu itself is a considerable city, situated about nine miles inland from the right bank of the Yang-tse. It is built on the slope of a hill, and commands a fine view of a well-cultivated tract of country. Major Gordon returned to Song-kiang almost immediately, leaving 300 men to garrison, temporarily, the east stockade. In the meantime, the British expeditionary force, which had been sent to patrol the country within the thirty-mile boundary, had been in active movement.

Digitized by Google

Kah-ding, Wycon-sin, Lu-dong, Co-lun-sin, Lu-di-jou, Lo-tien, Wong-ze-jow, Lu-ka-dong, and Le-ho were each visited. The only place where the rebels appeared in any force was at Le-ho, and here they ventured to fire a few shots across the creek at our men. No one, however, was injured, and as Capt. Murray, R.A., the commandant of the expedition, had peremptory orders not to cross the boundary, and, moreover, had only a small portion of his men with him, he took no steps to punish them. Captain Murray returned to Shanghai on the 10th of April.

Writing on the relief of Chiang-zu and the victory at Foo-shan, the *North China Herald* says:—"The expedition led by Major Gordon was the fifth which has set out to endeavour to drive the rebels from the neighbourhood of Foo-shan, and raise the siege of Chiang-zu, during the last three months, for which the garrison of the latter city has bravely held out. Major Brennan made the first attempt in the beginning of February, with five hundred men and a couple of 12-pounder howitzers, but failed to effect a landing for want of boats, and returned to Shanghai. He set out again a few days later, towing these very necessary articles behind the steamer; landed, and after two days' sharp fighting had again to retire. The mandarins next determined to try the efficiency of their own resources, and accordingly sent five thousand flags, spears, and jingals to the scene of action, together with one mortar, borrowed, we believe, from Song-Kiang, the whole in charge of the well-known Vincenti, Ward's favourite orderly, who was shot in the leg, and the expedition failed. Major Tapp conducted the fourth attempt, at the head of about nine hundred men of all arms and several pieces of artillery; but this force was discovered, before it had been landed twenty-four hours, to be deficient in almost every requisite of an expedition—tents, ammunition, bridges, and commissariat stores for the officers. Men and officers had to sleep on the open ground; the gun ammunition ran out before the rebels showed any inclination to vacate their stockades; and when it was determined to try an assault no bridges were forthcoming to cross a creek some thirty feet wide, which lay in front of their position. Major Tapp had to retire, entrench himself, and send to Song-Kiang for more ammunition. In the meantime the command of the Song-Kiang force had devolved on Major Gordon, who, taking advantage of the recent proclamation, permitting British officers joining the Chinese service to go anywhere that may be necessary, without regard to boundaries, determined himself to proceed to the spot, with 500 infantry, 200 artillery, four guns, and a supply of the the lacking munitions of war. A British expeditionary force, consisting of 300 men and two field guns, under the command of Captain Murray, R.A., set out at the same time to patrol the country within the upper portion of the thirty miles' boundary; and we are assured, by the uneasiness which their neighbourhood caused to the rebels, morally contributed to Major Gordon's victory. The rebels have been routed; Chiang-zu relieved, after a three months' siege, when reduced to the greatest straits for want of animal food and ammunition, and a large tract of well-cultivated country placed in the hands of the Imperialists. After this determined defence, under such very adverse circumstances, there is no room for fear as to the safety of the city, now that the wants of its defenders in these respects have been supplied. But from its vicinity to Soochow, the country will always be liable to inroads by the rebels; and we fear that, unless it is held by the Imperialists in great force, the crops with which it is covered are more likely to find their way to the granaries of Chung-wang than to Chiang-zu. We presume it is hardly intended to leave the 300 disciplined Chinese to garrison the east stockade permanently; but even mandarin troops ought to be capaple of holding this and the other strong works, between Chiang-zu and the Yang-tse, from which the rebels have with so much difficulty been driven out. We trust that the cloud which for a few months obscured the fortunes of the Song-Kiang force has passed away; that it will now resume its wonted activity, and that the victory at Fooshan and the relief of Chiang-zu will prove a prelude to a long train of further successes."

On the 31st March and 1st April, the inhabitants of Shanghai and the surrounding country for at least one hundred miles, and the officers and crews of vessels in the estuary of the Yang-tse Kiang and off the coast from fifty to one hundred and fifty miles, observed during these two days and nights what is generally termed a "dust storm." During the first day it passed over the settlement in clouds resembling a dense mist, obscuring the sun as it would on a misty day; while all night long the sky was overcast, without any stars being visible Although there was not much wind below, yet these clouds aloft moved at a rapid pace from N.W. to S.E. All this time a fine dust fell more or less, of an ash-grey tint, and so light that it floated in the atmosphere like the minute sporules of the wing-seeded ferns. In this manner it searched into the crannies of the houses, settling down in quiet places, and clinging to the curtains and hangings. Outside in the streets it swept along, covering one's clothes and hair, flying up the nostrils and causing the eyelids of many to smart and become inflamed. Next day the same phenomenon continued even more remarkably than on the previous day. About half-past three in the afternoon one brownish cloud of dust was so dense that for a quarter of an hour the sun was obscured as if it had set. Towards evening it cleared up, but the sun set hazily and with a pale sickly hue. Throughout the night it continued the same as before—dark, with the dust still falling. On the following morning, April 2, the phenomonon had passed over and the weather assumed its ordinary aspect, with sunshine.

Miller's hotel at Shanghai having been twice on fire during one fortnight, was destroyed by the second conflagration. No lives were lost. It is supposed that the fire was the work of an incendiary.

Public attention had been turned to the policy adopted by Sir F. Bruce in withdrawing from the Consul the power he has by treaty of examining into cases where a breach of treaty is alleged to have taken place, and of taking evidence on the matter in his own court. It is now ruled, that confiscation shall be made by the Chinese authorities and adjudicated upon by them solely; all that the Consul can claim being a copy of the grounds upon which the confiscation was made, and a précis of the evidence that was given in the case; these to be furnished him when he thinks proper to apply for them to the Taoutae.

The *Titania*, Hamburg barque, had just arrived at Woo-sung from Manila. It appears that an Italian took a passage in her for Shanghai; and during a gale of wind off Formosa on the 4th April, the Italian taking advantage of the captain looking at his chart in the cabin some time during the night, rushed on him and inflicted several severe wounds with a knife. The captain rushed on deck immediately, pursued by the Italian, and losing sight of his victim, rushed furiously on the mate inflicting several severe wounds on him also, exclaiming at the time, "I will take the ship to Shanghai." The crew then came up to the mate's assistance, and he (the Italian) was knocked down by one of the men with a handspike and killed on the spot. The captain and mate are recovering from their wounds.

HANKOW.

Conflicting accounts of rebel marauders threatening the city have been received; but whether they are Taipings or Shantung rebels has not transpired. It is reported that they were within fifty miles of the place. Many of the Chinese merchants had taken alarm and were conveying their property on board junks. The foreign residents showed no disposition to treat the matter seriously, as similar threatenings have passed over without the appearance of an enemy within the thirty mile circuit. However, the alarm appears to have unsettled business for the time.

KIUKIANG.

The British settlement is being rapidly improved by a "Municipal Council," and also by the erection of a Bund, or Praya, which will be not only a protection against flooding in the river, but a great facility in the landing and shipment of goods.

NINGPO.

Affairs are in a bad state, owing to the license allowed to the Franco-Chinese force, in looting and oppressing the people. Shaou shan, a city about twenty miles beyond Shaou hing, has been evacuated by the rebels.

HONG KONG.

The Custom-house question is discussed in the *China Mail*, which writes as follows:—"The conflict is one between English and Chinese law; and the question is, shall an offender against the revenue laws of China be fined, by confiscation, without any trial after the English fashion? Sir F. Bruce, who is a deep and able diplomatist, says, in effect, for what reason we shall perhaps afterwards know, "The offender (or alleged offender), shall have his case decided upon by the Taoutai, without even the presence of an English official; the grounds of confiscation given in evidence shall be at your service on demand." Chinese law, whatever that may be, is to be the sole tribunal, henceforth, for determining the ownership of

Digitized by Google

many a goodly foreign cargo. The seizer is to be the judge, and is to be the reporter of the case, in writing, to the Consul, when that officer's curiosity is moved to enquiry. This is not according to the treaty, nor is it according to the very genius of all past legislation for British subjects in China. The Earl of Clarendon says, in a despatch to the Superintendent of Trade, dated 24th June, 1853, "the territorial Sovereign (of China) has formally renounced in favour of the British Crown all civil and criminal jurisdiction over British subjects." It is therefore with serious alarm that we behold our representative at Peking ruling otherwise, and saying that confiscation of property by the Chinese Custom House is not to be interfered with any more, the Consul being allowed simple to peruse a report of the facts attending the seizure, as reported by the Taoutae, who is also the judge, and whose reports no English official has an opportunity of verifying. This is much as if a swindler not only tried his own case, but furnished his own report of the trial to the press. We wrote not long ago pointing out to statesmen at home that the Foreign Inspectorate of Customs was, as then constituted, a rock a-head in international relations. And, though only a few weeks have elapsed since we pointed the finger at what we conceived to be a danger, matters have assumed an aspect worse than before. If things are to stand as they are, it would be well to know what eminent advantages our statesmen are deriving for the privileges they are giving away. It would be well to learn from Sir Frederick Bruce's able pen—assuming that he writes his own despatches—what he precisely means by steering the ship among rocks and breakers. Statesmen should not delay in taking measures to ascertain what the prospects of Chinese relations are, and why important treaty rights are being silently surrendered by those in charge of affairs in China, or by those at the head of the Government at home."

About five years ago Mr. T. Sacharoff, member of the Russian College at Peking, published a work entitled "The Rise and Fall of the Chinese Population," which was subsequently translated into the German language. The Rev. Mr. Lobschied has undertaken to translate this work, and the first instalment of his labours appears in the *China Mail*.

The *China Mail* notes as a matter of prime significance that there had been no escapes from gaol during the fortnight.

The Postmaster General issued had a circular pointing out that detriment arose in correspondence, owing to letters passing through tropical climates being sealed with wax.

It is stated that the beggars who infest Hong Kong are about to be deported to Canton, where the authorities have consented to receive them.

CANTON.

A correspondent writes with great indignation to the *China Mail* on the proposal of the *Daily Press* to appropriate the Canton Fire Brigade Fund towards the erection of a city hall and theatre in Hong Kong. The writer, who dates from Canton,

The *Daily Press* states that this community consists of but eighteen individuals—that it claims by its protest the Fire Brigade Fund for its church—and that all the trade of Canton has deserted it for Hong Kong.

"1st. It may suffice to state that this community does not consist of merely eighteen individuals; and, inasmuch as the protest is signed by twenty-seven, it would seem that the editor of the *Daily Press* assigns a wide limit to the credulity or blindness of his readers.

"2nd. In the second place, this community does not claim, by its protest, the Fire Brigade Fund for the church, as a perusal of that document will show.

"3rd. And again, however much this settlement may appear to be dwarfed by its formidable neighbour, it may be as well to mention that a very respectable business still clings to it, as its trade returns show.

"This community advances the principle that though the individuals composing it may have changed, and its numbers may have been reduced, it is still a community; that those of its members who have subscribed to works of public utility for its benefit, if they have, under the circumstances of the Fire Brigade Fund, any right to demand back their subscriptions, which may well be questioned, have certainly no right to dispose of the subscriptions of others for an object of a totally different character in a totally different place."

THE PHILIPPINES.

MANILA.

Several heavy shocks of earthquake had been felt at Iloilo, and great danger has resulted from a heavy gale. Fifty-two vessels, chiefly coasters, are reported lost, but most of the crews were saved. The British ship *Osprey* was driven on shore near Zamboanga by the currents—crew and part of cargo saved. The American ship *Annie Bowen* was totally lost by the gale. A letter from Iloilo, dated 6th April, says:—"On Monday last we had a terrible vaguio; it lasted only for two hours, but in that brief period it committed sad havoc. People estimate the loss at half a million of dollars. Several unfortunate people lost their lives at the fishing-stakes, and at least four people were killed ashore near here by falling timber. Of all the jetties in the river the only one uninjured is one built by Mr. Higgin last year; most others have fallen in altogether, including a bran new one where the steamers used to put up. No one of our Iloilo vessels have suffered damage as far as is known."

The same writer says,—"We have lately had to lament the loss of two most estimable men, Don Pedro Tajonera, the Port Captain, who was carried off suddenly, and Don Jose Torres y Busquer, the Alcalde of Camarines, after a lingering illness. The latter gentleman formerly practised in Manila, and was respected by all classes as emphatically 'the honourable Spanish lawyer.' He would never receive presents, nor take up a cause he did not know to be just. I am sorry to say that his good and confiding nature was taken advantage of by some French and English adventurers, who pilfered him of all he possessed."

COCHIN CHINA.

The *Straits' Times* contains an interesting account of the ceremony observed on signing the Treaty of Peace between France and the Emperor of Cochin China, on the 16th of April:—

The leading points of this treaty, the preliminaries of which were arranged a year ago, were as follows:—

"1st.—The cession of the three provinces of Saigon, Donnai, and Mytho, to the French.

"2nd.—The payment of twenty-five millions of francs by the Annamites towards defraying the expenses of the war.

"3rd.—That the Cochin Chinese should not part with any portion of their territory to a foreign Power, without the consent of the French Government."

From the narrative we have mentioned, written by an eye-witness of the ceremonial, we extract the following:—

"When within a few miles from Hué we were met by a large force of Annamite soldiers, commanded by mandarins of distinction, who performed the part of escort to the spacious quarters which had been provided. Of course the appearance of so large a body of Europeans for the first time at this place caused the greatest curiosity on the part of the natives, and it was with the greatest difficulty that the Annamite escort could keep them from completely blocking the passage, so anxious were they to regard our persons; at the same time there was not the slightest disposition to offend, although naturally carried away by their curiosity to behold so strange a sight, we always found them inclined to be civil and obliging. It had been arranged that the following day should be devoted to a royal audience with the Emperor, for the purpose of affording the two Ministers the opportunity of stating officially the object of their visit. Accordingly at ten o'clock next day the expedition with its escort was conducted to the palace or citadel of the Emperor. Here the arrangements had been carried out with all the style and pomp of Eastern magnificence. The audience chamber was of immense size, and most elaborately and richly decorated, at the further end of which, upon a slight throne, and surrounded by his chief mandarins, and all the royal princes, in full court costume, was Fro-Duk, the Emperor of Cochin China. He appears to be about thirty-five years of age, and of a most pleasant and amiable expression of countenance. Admiral Bonnard and Col. Palanca, with a mandarin of high grade, were placed facing the Emperor, but at some distance; in their rear were members of the staff, &c., all of course in full dress. The Admiral and Col. Palanca each made a short address, to the effect that they were sent by their respective Governments for the purpose of ratifying and exchanging the treaty. This was replied to by the Emperor, in the usual terms, that he was pleased to meet them, and trusted amicable relations would always exist between them, &c. These speeches were duly interpreted, and the conference ended.

"Upon leaving the citadel a large force of Annamite soldiers, about 5,000, were drawn up to salute the Ministry. They were uniformed in a most tawdry manner, and armed with lances and old flint lock muskets. Their appearance did not tend to remind one of a volunteer review. There was, however, one very curious and interesting feature in the affair in the shape of a body of forty elephants. These hugh monsters were richly and tastefully decorated with gold and scarlet trimmings; their tusks were of immense size and gilded; they bore upon their backs some eight or ten men each, and obeyed the orders given by their drivers with that sagacity peculiar to the animals. The Annamite soldiers could certainly take a lesson from them. On the following day a session of three or four hours was held at the citadel between the Ministers and the five principal mandarins for the purpose of ratifying the treaty. To do business with these people requires time and patience. However, at the end of three days, all parties came to an understanding, and the treaty received what is supposed to be the signature of Fro-Duk. All business being concluded, a day or two more was spent in visiting the city, and regarding whatever was curious in this strange and hitherto unknown country. The city of Hué, or as it should be more correctly termed the fortress of Hué, is insulated—the river bounds it on two sides, and canals, over which neat stone bridges are thrown, on the other two. It is about 5,000 feet or nearly one mile square, built entirely of granite, and constructed upon military principles. The work mounts from 80 to 100 guns. It was planned and built by Colonel Oliviet, of the French Engineer Corps, who visited this country in 1786 with Pere Adran, under a promise from Louis XVI. of aid and protection, which unfortunately was never carried out, owing to the revolution of '89. These works were evidently considered at the

Digitized by Google

time sufficiently strong to repel any attack that could be brought against them, and no doubt they were; but now a-days a fleet of gun-boats would shell them out in no time. There now remained nothing more to do. The instalment of the indemnity amounting to $200,000 (in ingots worth about $15 each) was paid over to the ministers, and they were informed that boats would be in readiness on the evening of the 19th to take them to the mouth of the river. The Emperor declined giving them a chance to see the river by daylight, so at eight o'clock the expedition started, and although it is but twelve miles distance, they kept humbugging in the river all night, only arriving at five o'clock the next morning – so jealous and fearful are these people that the approach to the city should be known."

JAVA.

Great rejoicings took place in Samarang, Sourabaya, Solo and Djocjo, on receipt of the news that the King had confirmed the concession formerly granted by the Governor-General, for the construction of a railway from Samarang to the interior. Addresses of thanks are to be transmitted from Samarang, Batavia, &c.

In the residency of Palembang on Sumatra, the tigers are said to be as troublesome as in the island of Singapore, while at Bencoolen elephants have made their appearance in large troops and done very great damage, especially to the rice fields.

A vessel which had taken 4,000 piculs of rice from Sourabaya to Macassar, was obliged to return with her cargo to Java, owing to the great fall in price of that article.

MALACCA STRAITS.

SINGAPORE.

The *Singapore Free Press*, after quoting the information given in the *London and China Express* of March 26th with regard to the new currency of Hong Kong, says :—"It is to be regretted that the British Government should have determined to give this currency so completely a local character by placing the name of Hong Kong upon the coins. They have apparently overlooked the fact that in other British possessions the dollar is as current as in Hong Kong, and that there is in these places as great a necessity for a recognised decimal currency. Mauritius, with a trade of the annual value of between five and six millions sterling, and the Straits Settlement with a commerce valued at above fifteen millions sterling per annum, both use dollars and have to draw their supplies of the circulating medium from foreign sources. It would be much better if the Government gave a more general character to the proposed coinage and made it consist of a British silver dollar and subordinate parts in silver and copper. This would at once secure for it a very wide circulation and of course the profit to the Government would be proportionately larger. As the Straits Settlement must soon become a Crown colony, provision will ere long require to be made for its currency, and it would be better that one general system would be adopted for it and Hong Kong, &c., instead of each place having a distinctive coinage. We trust this matter will be represented to the home Government, and that, unless the arrangements for the Hong Kong coinage are too far advanced to allow them to be altered, the coinage will be made of such a general description as to allow of its being used by all the colonies using the dollar currency and decimal system of accounting in their commercial transactions."

Her Majesty's steamer *Australian*, Captain Niblett, with the British ship *Sesostris*, Captain Wells, in tow, from Madras the 18th April, having called at Penang, arrived at Singapore on the evening of the 27th, with the 44th Regt. M.N.I. on board.

CEYLON.

The Governor had so far recovered from his recent indisposition as to be able to resume his journey through the Badulla district. The marriage of the Prince of Wales was to be celebrated throughout the island on the 26th ult., by firing Royal salutes and closing the public offices. "It is a reproach to us," says the *Ceylon Times*, "that we should have been so long in following the example set us in this respect by almost every other British colony and dependency, and if the meagre programme at present put forth is to be the extent of our rejoicing on this occasion, Ceylon will indeed have little cause to boast of her demonstration of loyalty towards her future King and Queen."

The railway progresses as rapidly as could be expected. A large number of labourers are at work at different points of the line, both on earthwork and masonry, and Government are now occupied in taking over land required for this purpose.

The Customs returns of the whole island for the first quarter of this year have been published. The following statement will show the gross returns from each province for the quarter, and the increase and decrease compared with the corresponding period of last year :—

	1863.	1862.
Western Province.....	£60,119	50,892
Southern Do.....	10,308	9,117
Northern Do.....	2,797	2,339
Eastern Do.....	463	478

There is, therefore, a net increase on the quarter of £11,322. It will be seen that three provinces contribute to this increase, and in the fourth the decrease is insignificant.

The prominent topic of the fortnight has continued to be that of the military expenditure, which has received ample discussion in the columns of the local journals. On the 25th ult. the subject was to be brought forward for discussion at the annual meeting of the Planters' Association, by separate resolutions to be moved by Mr. Harrison and Mr. A. Nichol. These resolutions take up the subject very fully, so that, while Mr. Harrison proposed to memorialise, through the proper authorities, that no additional burden be imposed on the colony, and that an investigation take place as to its internal military requirements, Mr. A. Nicol would point out, in a supplementary resolution, that the course advocated by the Home Government would seriously interfere with the continued prosperity of Ceylon. The practical conclusion which the colonists have generally and very unanimously adopted is, that if the Imperial Government be really anxious to curtail the expense incurred in the island for military purposes, there is plenty of scope for reform in the severe pruning of an expensive staff and a reduction of the general military force maintained.

Amongst other business to be brought before the Planters' Association will be the subjects of expenditure on roads and the importation of labour. Great complaints are made with regard to the roads, and it is declared that if energetic means be not at once resorted to in the metaling of the principal lines of connection, most of them will be impassable by the end of the year. The committee appointed by the Governor to inquire into the best means of working the roads of the island, are prosecuting their researches, but nothing is as yet known as to the progress made by them.

It appears that the departures of Coolies from Ceylon, by northern ports, are much in excess of the number last year, whilst the arrivals are fewer. Here are the totals in round numbers for the four first months of each year :—1862, departures 12,200 ; 1863, do. 19,000 ; 1862, arrivals 5,500 ; 1863, do. 3,300. It is also worthy of remark that in the present year of women and children have been twenty-seven per cent. of the total, or very nearly double the proportion for the same period of last year.

The *Ceylon Times* gives the following reasons for the non-consumption of cotton in Ceylon : "There are several reasons why this cultivation has not taken place. There is no confidence felt in present high prices ; there are but certain districts of Ceylon where the climate would prove suitable to cotton, though the soil might elsewhere produce it. There is the old difficulty of labour, and lastly, we can assure our correspondent that what has been pleasantly termed 'encouragement on the most liberal terms' on the part of our Government, exists only on official foolscap. Neither the Imperial nor local Government will depart one inch from the beaten track in the matter of cotton culture. It was at one time thought that Crown land could be had for this purpose on easier terms, but applicants have been told that no such concession can be made, and, in the opinion of "Red Tape," the cost of land forms such a small item in the affair that capitalists need never consider it in their calculations. If cotton will pay, argues "Downing-street," it can afford to pay the full price for land. This is on the supposition that success is certain, and that only capitalists will undertake the culture of cotton ; the truth being, that the result would be most uncertain, and, therefore, a concession in price was asked ; and, secondly, that not capitalists but small cultivators would have gone into it, had the Government thought fit to "afford encouragement on most liberal terms." But who shall fathom the philosophic depths of the official mind ?

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

DENNIS—On the 6th inst., at Hill-side, Streatham, the wife of John Dennis, jun., Esq., of a daughter.

GINGER—On the 1st ult., at Colombo, Mrs. A. R. Ginger, of a daughter.

GOTTLIEB—On the 18th April, at Kallang Dale, Singapore, the wife of F. H. Gottlieb, Esq., of a son.

Digitized by Google

HARVEY—On the 3rd inst., at Blackheath-park, the wife of John Harvey, Esq., of a son.
JARMAN—On the 24th April, at Hong Kong, the wife of James Jarman, Assistant Superintendent of Police, of a daughter.
JOHNSON—On the 6th inst., at Ryde, Isle of Wight, the wife of Captain J. O. Johnson, H.M.S. Pembroke, of a daughter.
KEER—On the 30th April, at Kornegalle, Ceylon, the wife of Lieut. J. Manners Keer, C.R. Regt., of a son.
MACLAY—On the 18th April, at Foo-chow, the wife of the Rev. R. S. Maclay, of the American Methodist Episcopal Mission, of a son.
PERERA—On the 30th April, at Pettah, Colombo, the wife of Mr. F. B. Perera, of a daughter.
REYNE—On the 2nd ult., at Ambeganuwa, Ceylon, the wife of H. E. Reyne, Esq., of a daughter.
SWINHOE—On the 27th May, the wife of Robert Swinhoe, H.M.'s V.-Consul at Formosa, of a daughter.
WALDOCK—On the 12th ult., at Kandy, the wife of the Rev. F. D. Waldock, of a daughter.
WATSON—On the 29th May, at Blackford House, Aberdeenshire, Mrs. J. P. Watson, of a son.
WILSON—On the 7th ult., at Neuga Kaddura Estate, Ceylon, the wife of A. Wilson, Esq., of a son.

MARRIAGES.

CAMERON—KELLY.—On the 20th April, at St. Andrew's Church, Singapore, by the Rev. A. D. Nicholson, Chaplain, John Cameron, Esq., of Singapore, to Frances Hughes, youngest daughter of the late Mr. Nicholas Kelly, Madras Ordnance.
DUNN—COOKSON—On the 16th April, at St. John's Cathedral, Hong Kong, by the Rev. J. J. Irwin, colonial chaplain, John George Dunn, of Shanghai, to Sarah Nesfield, fourth daughter of the Rev. Charles Cookson, Vicar of Maxey, Northamptonshire.
KELLY—FRASER.—On the 6th ult., at St. Paul's Church, Kandy, by the Rev. John Ireland Jones, B.A., the Rev. William Frederick Kelly, Chaplain of Matelle, to Eliza, youngest daughter of the late Lieut.-General John Fraser, colonel of H.M.'s 37th Regt.—No cards.
MOTTAU—LANGENBERG.—On the 7th ult., at Wolfendahl Church, Ceylon, by the Rev. A. Young, A.M., Col. Chaplain, Mr. James Walter Mottau, of the Colombo Cutcherry, to Emily Arabella, eldest daughter of Mr. J. A. Van Ligenberg, Chief Clerk of the Audit Office.
LEEKE—HORNBY.—On Tuesday, the 2nd inst., at St. Peter's Church, Eaton-square, by the Rev. Canon Hornby, brother of the bride, Vice-Admiral Sir Henry Leeke, K.C.B., K.H., M.P., to Georgiana Lucy Cecilia, only daughter of the late Rev. Geoffry and the Hon. Mrs. Hornby.

DEATHS.

ARCHER—On the 18th April, at the Seaman's Hospital, Hong Kong, Henry Archer, late chief officer, steamer *Iron Prince*.
FRANKLIN—On the 23rd April, at the Government Civil Hospital, Hong Kong, Peter Franklin, destitute seaman.
CARSON—On the 7th ult., at his residence in the Fort of Colombo, George Bell Carson, Esq., aged 35 years.
SIEMSEN—On the 9th April, at sea, on board the ship *Thrudvang*, Peter A. Siemsen, second officer.
TUCKER.—On the 28th ult., of dysentery, on his way home from China, at the Hotel de l'Univers, Marseilles, Horace Stanley, aged 19½ years, the fourth beloved son of the late Capt. W. Tucker, of Harewood-square, London, and of Mrs. Tucker, of Tunbridge, Kent.
WITTEBRON—On the 28th April, at Kornegalle, Ceylon, Mr. Samuel Peter Wittebron, third son of Dr. David Wittebron, late of the Colonial Medical Department.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—CANTON.—The advance in exchange, the proximity of the opening of the market for new teas, and the questionable tenor of the advices from England, combine to make buyers chary of Congous. Holders, on the other hand, are very firm, and the consequence is, that the business done in that description has been very limited. Tyshans of the new crop have, however, been taken to a moderate extent at full rates. In Scented Teas the scarcity of the flower has retarded the new crop, very little of which is ready, [illegible] both new and old, have taken, the latter at one tael decline. For the new Scented Orange Pekoes, the prices offered fall much below the teamen's ideas and consequently no business has been done. A small business has been transacted in Canton Greens, whilst of Country Greens purchases to some extent have been made for shipment to the United States.

SHANGHAI.—Black: Settlements and shipments for the fortnight are reported at 2,500 chests, making a total to date of 286,912 chests against 205,544 chests same time last year. Stock 1,700 chests Congou, 800 chests Flowery Pekoe. Green: The sudden rise in exchange has checked buyers, the settlements for the fortnight have been small, at a reduction of two taels on previous rates. Re-shipments on owners' account have been considerable, but receipts from Kiu-kiang are now falling off and the stock at that port is entirely composed of common teas. Settlements and re-shipments for the fortnight—25,000 half-chests, making a total to date of 328,282 half-chests against 292,377 half-chests same time last year. Stocks are estimated at 21,000 half-chests.

FOO-CHOW-FOO.—The entire settlements of the fortnight are comprised in 300 chests and 1,400 half ditto. Congou at 6 to 18 taels for broken leaf to flavoury. The stock remaining on the market consists of 1,000 chests Congou, 700 ditto Pekoe, 1,100 half-chests Oolong, and 800 boxes Scented Teas. The total supply of Congous for the present season amounts to 572,700 chests, against 524,500 ditto last season.

HANKOW.—No transactions are reported as having taken place during the fortnight, and the market is all but cleared. The new Teas are expected early in May, and are stated to be both plentiful and good.

KEWKIANG.—Black: No settlements are reported. Shipments to Shanghai on native account have further reduced the stock to two chops common Hohow. Green: The chief buyers appear now to have closed their operations for the season, and only 1,550 packages have been settled during the fortnight at about previous rates. Teamen do not appear willing to sell at any serious decline, notwithstanding the near approach of the new season; but some of the larger holders, finding no demand to exist here, have been shipping to Shanghai—whither it is probable that, did not the restrictions imposed on shippers by the enforcement of the additional coast-trade duty interfere, the major portion of the stock would be at once directed. Last quotations are repeated. Fychow Sityuen common to medium, taels 22 to 26; Moyune, medium to fine, taels 29 to 37. A few supplies have been dropping in, and one or two chops Kiu-kiang packed tea have been placed on the market since date of our last, so that the stock has slightly increased, and now embraces nearly 23,000 packages.

YOKUHAMA.—The market has fallen $5 per picul, the stock for sale being fully 7,000 piculs, which was mostly of inferior descriptions. The quotations were—$4 to 7½ for common, up to $30 to 31 for the finest. The exports for the present season to date are reported as under:—To London direct, 2,212,000 lbs.; to United States direct, 1,057,700; to Shanghai, 1,077,800; to Hong Kong, 95,000: total, 4,442,500 lbs, against 5,847,133 lbs. corresponding period last season. The holders seemed desirous to realise, and a further reduction was expected.

NAGASAKI.—The market was well supplied, and the article was procurable at $2.50 to 5 for common, up to 25 for the best.

RAW SILK.—SHANGHAI.—The great scarcity of money has caused the dealers to be anxious to realise, and buyers having held back, a considerable reduction has been established, say 15 to 25 taels per picul on Tsatlees, Hainings, and Yuenfas, and 10 to 15 on Taysaams. The transactions since last mail have amounted to 700 bales and arrivals from the country having been very trifling the stock is again reduced. There have been 629 bales received from Japan, but it is possible that present political difficulties may interfere with future supplies from that quarter. Tsatlees, No. 1, 470 taels per picul; No. 2, 450, do.; No. 3, 430, do.; market, No. 3, 410 to 420, do.; No. 4, 390 to 400, do.; No. 5 and common, 360 to 370, do. Taysaans, No. 1, 400 to 410, do.; No. 2, 380 to 490, do.; No. 3, 350 to 360, do.; Nos. 4, 5, and common, 300 to 335, do. Yuenfa, No. 1, 430, do.; No. 2, 400 to 410, do.; No. 3, 365 to 380, do.; No. 4 and common, 330 to 355, do. Hainings, 330 to 420, do. Hong Tsatlees, none. Sewhing's fair to good, 330 to 340, do.; middling to inferior, 310 to 320, do. The settlements of the fortnight, including Japan silk, amount to 1,300 bales, against 2,500 corresponding fortnight of last year, and 3,300 similar period the year previous. The stocks for those periods stands thus—now 1,000 bales, against 2,000 last season, and 6,000 the season before.

YOKUHAMA.—The settlements for the month reached 1,750 bales; the demand continued good, and stocks were low, say about 750 bales. The quotations were:—Ida: Best, none; mid., 525 to $500; infr., 450 to $475. Mybash: Best, 550 to $570; mid., 525 to $550; infr., 500 to $520. Sodai: Best, 500 to $525; mid., 475 to $490; infr., 450 to $460. Oshio: Best: 525 to $550; mid., 475 to $500; infr., 400 to $450. Coshu: Best: none; mid., 475 to $500; infr., 450 to $460. Hatchoges: 375 to $400. Taysaam sorts: 425 to $500. The export of the season to date stands as under:—To London direct, 6,295 bales; to the United States, 91 bales; to Shanghai, 13,178 bales; to Hong Kong, 497 bales; total, 20,061 bales, against 7,261 bales corresponding period last season.

DRUGS, &c.—Cassia Lignea, about 1,000 pls. of the new crop have come to market, but nothing has as yet been done in the article. Cassia Oil, no stock, nor quotation. Cassia Buds, about 30 pls. are on the market—$48 is about the quotation. Of Rhubarb and Gamboge there is no stock. China Root, no sales—only 100 pls. are on the market—the quotation is $4 to $4.50. Galangal 200 pls. are in stock—the quotation is $4 to $4.25. Galls are scarce and wanted at $18. Vermilion is high—say $40 per box. Camphor.—Hong Kong.—The sales of the fortnight amount to about 2,300 pls., at $22 unpacked; and 700 pls. at $23 packed, leaving a stock unsold on the market of 1,200 pls. The stock in Formosa is known to be considerable. The price is expected to decline still further. At Nagasaki the article is quoted in the market at $25; but one of the stipulations in the late purchase of a steamer was that 2,000 pls. Camphor should be taken in part payment at $22.

CHINA IMPORTS.

HONG KONG.

COTTON YARN has been without demand, but the article is in very few hands, and will probably not be sold except at higher prices than our quotations; sales here, 9 bales. Grey Shirtings: Since the large purchases reported by last mail nothing of importance has been done, and there exists no demand whatever. About 1,250 pieces heavy weights have been sold. At Foo-chow, 15,950 pieces have been bartered for Tea. At Amoy, 500 pieces are sold; at Canton, 1,500 pieces. T-Cloths: are in moderate request at former rates; sales, 9,550 pieces. At Foo-chow, 1,900 pieces. At Amoy, 500 pieces. White Shirtings: demand continues good, and stocks seem low; sales here, 1,850 pieces. Brocades, Damasks, and Spotted Shirtings: continue in good demand; sales are 120 pieces Damasks. At Canton: 960 pieces Coloured Brocades. Chintz and Handkerchiefs: sales 1,750 pieces Chintz, and 2,100 dozen Handkerchiefs. Velvets and Velveteens: In less demand, sales here 420 pieces. Long Ells: At the low rates now ruling 500 pieces have found buyers; at Canton, 200 pieces. Spanish Stripes: Are duller again, 276 pieces having been sold here; at Canton, 700 pieces. Camlets: Are in less demand owing to the high prices; 390 pieces have found buyers. Lastings: are less inquired for. No sales to report.

IRON.—There have been no sales here during the fortnight, excepting 80 piculs Bar Iron; in Canton, sales amount to 1,250 piculs Nailrod, 110 piculs round do., and 450 piculs Bar Iron. Lead: Sales here amount to 430 pigs; at Canton, 2,000 piculs have changed hands; at Foo-chow, 160 piculs. Tin Plates: There is only a local demand for this article; sales here, 167 boxes.

COALS.—Englisc Steam, $8 50c. to $9.

EXCHANGES ON LONDON.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

SHIPPING INTELLIGENCE.

ARRIVALS.

At SINGAPORE.—April 30, Melissa, from Sunderland. May 1, Guiding Star, from Hamburg. 2, Alice, from Cardiff. 5, Wilhelmina, from Rotterdam.

At PENANG.—None.

At BATAVIA.—April 15, Noordster, from Shields; Triton, from Rotterdam. 24, Mathilde, from Amsterdam: Oceaan, from Amsterdam; Sir Isaac Newton, from Cardiff. 26, Doggersbank, from Rotterdam; Watergeus, from Shields; China, from Cardiff.

At HONG KONG.—April 20, Norman, from Shields. 24, H.M.S. Leopard, from England. 28, Sea Lark, from New York: Beatrice, from London.

At SHANGHAI.—April 7, Leymoon, from New York. 8, George Avery, from Shields. 9, Panama, from Liverpool; Shause (str.), from New York. 10, Amoy, from Portsmouth. 13, Belle of West, from New York. 14, Mandarin, from New York. 20, Kestrel, from London.

At MANILA.—April 21, Hermetin from Cardiff.

DEPARTURES.

From SINGAPORE.—April 24, Cathay, for Falmouth; 27, Wandrahm, for New York. May 1, Conquest, for New York.

From PENANG.—April 30, America, for London.

From BATAVIA.—April 19, Padang packet, for Holland; 22, Vriendschap, for Holland; 23, Java packet, for Holland; 27, Galilei, for Holland.

From FOO-CHOW.—April 9, Java, for London; 15, Hound, for New York.

From SHANGHAI.—April 17, M. Londonderry, for London; 18, Thessalia, for London; 20, Manila, for New York.

From MANILA.—April 10, Voladira from Falmouth; 17, Luisita for Cadiz.

LOADING.

At SINGAPORE.—Oscar for London; Finland for Liverpool; Benledi for London; T. W. Sears for New York; G. H. Wappaus for Liverpool; Ystroom for Liverpool; Lady Agnes Duff for London; Singapore for Bordeaux; Benvenue for London, *via* Penang; Snow Squall for New York *via* Penang.

At PENANG.—Wandralim for New York; Golconda for London.

At CANTON for LONDON.—Carribean, John Scott, and West Australian. For United States, Europa.

At SHANGHAI for LONDON.—Harkaway, Antipodes. For United States, Castleton and Benefactress.

At FOO-CHOW for LONDON.—Flying Spur. For United States, Honqua.

At YOKUHAMA for LONDON.—Dunmore and Copernicus.

At HANKOW for LONDON.—Challenger and Annette (steamer.)

PASSED STRAITS OF SUNDA.

From England and Continent to China: April 17, Chassze, London to Shanghai; Banian, Londan to Hong Kong; 21, Valdivia, Liverpool to Hong Kong; 22, Royal Bride, Liverpool to Shanghai; King Arthur, Liverpool to Shanghai; Nuevo Lautero, London to Manila; Frederick Cardiff, to Manilla; Sir Isaac Newton, Cardiff to Singapore; Prince Regent, Cardiff to Hong Kong; 23, Charlotte, Newcastle to Hong Kong; 24, Queen of the Age, Sunderland to Hong Kong; 25, Macedon, Sunderland to Shanghai; 26, Chrysolite, Liverpool to Hong Kong; Edinburgh Shields to Shanghai. From United States to China: April 22, Hamlet, Boston to Hong Kong; 26, Osaca, New York to Shanghai. From Port Natal to China: 25, Rochester, Port Natal to Singapore. From China, &c., to England and Continent: 15, Ferozepore, Shanghai to London; 16, Peterborough, Whampoa to London; 17, Isabella, Singapore to London; 21, Caldera, Shanghai to Liverpool; 23, Violet, Singapore to London; Cumberland, Hong Kong to Liverpool; Lauderdale, Canton to London; Cyclone, Shanghai to Liverpool; Olympia, Singapore to Falmouth; Leander, Manila to Queenstown; Anne de Bregtagne, Manila to Nantes; 24, Vanguard, Shanghai to London; 25, Martaban, Shanghai to London. From China to United States: 17, Guinea, Amoy to New York; 22, Resolute, Shanghai to New York; 24, Franklin, Manila to New York.

FREIGHTS AND CHARTERS.

HONG KONG.

Clipper ships to load teas are wanted. The following are some of the settlements of the fortnight:—

ENGLAND.—John Scott, British ship, 635 tons, on the berth at Whampoa, for London, current rates, (about £4 per ton.) Carribean, British ship, 874 tons, on the berth at Whampoa, for London, current rates about £4 per ton. Maritana, British ship, 1,208 tons, Manila to England, (Channel for orders), £4 per ton for sugar, £4. 10s. hemp and light freight, with 10s. extra if ordered to the Continent. Maggie Leslie, British barque, 486 tons, to load at Foo-chow at current rates.

UNITED STATES, &c.

Europa, Am. ship, 846 tons, on the berth for New York, $20 per ton. Viking, Am. ship 1,340 tons, on the berth for San Francisco, current rates for cargo (say $8 per ton) $26 per head for passage. Camden, Am. ship, 540 tons, on the berth for San Francisco, with passengers only, $26.50 per head. Esk, Brit. ship, 403 tons, on the birth for Vancouver Island, $8 to $10 per ton. Robert Lowe, Brit. steamer, 1,474 tons, on the birth for San Francisco, *via* Japan, rate of freight as per description of goods.

AUSTRALIA.

Emma Colvin, Brit. ship, 830 tons, Manila to Sydney, £4. 10s. per ton. Kingfisher, Am. ship. 1,268 tons, hence to Melbourne and (or) Sydney, £3,100 in full if to Melbourne only, £100 extra if sent to Sydney.

SHANGHAI.

The following are the current rates of freight: To London and Liverpool, £3. 15s. to £4. To New York, $16 to 18. To Nagasaki, $4 per ton and 25 cents. per picul. To Kanagawa, $5 per ton and 25 to 30 cents. per piecl. To Tien-tsin, 5 to 7 taels per ton. To Hankow, 7 to 8 taels per ton, and 4 to 5 mace per picul. To Hong Kong, Amoy, and Foo-chow, $3½ to 4 per ton, 50 cents. per bales cotton.

MANILA.

The English ship Areta loads for Liverpool at £4 for clayed sugar, and £5 per ton for hemp. The Tricolor (reported in last as loading for the same port) has engaged some unclayed sugar at £4. 5s. per ton.

SINGAPORE.

Freights to England have slightly declined. The Belida has been laid on for London at £2. 5s.; tin, £3; antimony ore, £3. 5s.; gambier, £4 per ton light goods. The Eng Goang (Russian) for Liverpool at £3. 2s. 6d. dead weight, and £4 per ton light goods. Tin, £2. 5s. per 20 cwt.; sago in boxes, £4 do., sago flour, £4 do.; gambier in bales, £3. 5s. do.; sugar, £4 do.; black pepper, £4 per 16 cwt.; coffee, £4 per 18 cwt.; hides and horns, £4 per 16 cwt.; gutta percha, £4 per 20 cwt.; measurement goods, £4 per 50 cubic feet.

CASUALTIES.

SHANGHAI.

The Carl Beijer sustained considerable injury in a gale at Chefoo, and has been condemned. She was purchased for the use of the Customs.

Captain Parks has undertaken to raise the Lord Lyndhurst ashore on the North Spit at Woosung, by pumps, &c., for taels 6,000. The extent of the leak must be very considerable, as she is totally under water at the top of the flood tide; so that great difficulties must be overcome before he can complete his task successfully. She is too far into the channel to be permitted to remain there for any length of time, as the strong tides which daily sea against her will form such a barrier of mud, as to bring up ships of heavy draft bound for Shanghai, and eventually close the passage against them altogether.

COMMERCIAL POSTSCRIPT.

CITY, FRIDAY AFTERNOON.

The price of Mexican dollars to day is nominally 5s. 7d. Bar Silver 5s. 1½d.; both very flat.

It is believed that the tender of the P. and O. Company to run a fortnightly service to Australia will be accepted, provided the Colonial Government furnish a portion of the increased subsidy.

ARRIVALS NOT INCLUDED IN TABLE.—June 8, at London from Colombo and Tuticorin, Gitana; 9, from Colombo, Diedrich Pentzien; at Deal from Foo-chow-Foo, Patrician, from Ceylon, Ottodine; 5, Off Dungeness from Rangoon, Eclipse; 6, at Portland Roads from Foo-chow-Foo, Burman; 4, Off the Start from Batavia, Holland; 6, at Copenhagen from Batavia, Eclipse; 5, at Altona from Singapore, Dannevirke; 6, at Texel from Batavia, Nederland; 6, at Brouwershaven from Pasaroeang, Carin from Banjoewangie, Jeddo; 5, at St. Mazaire from Maulmain, Sarah Park; 6, from Ceylon, Ephrem; May 24, at Boston from Manila, Aurora; June 7, at Brouwershaven from Batavia, Maria Anna, from Sourabaya, Frientje Fenna, from Banjoewangie, Vooruit, Hendrina, Louis Meyer, Johannes Anthonius, Java; 9, at Deal from Java, Celebes; 10, at London from Singapore, The Bride; 5, at Clyde from Maulmain, Laurel; 7, at Texel from Sourabaya, Aolus, from Banjoewangie, Julie Claire, Passaroeang, Admiral de Ruyter, Henricus, Gerardus, Willem Hendrick, Friesland, Joan Melchoir, Kemper; from Passaroeang, Clio, from Java, Odin, from Banjoewangie, Jane; 8, Pollux, Elizabeth; 8, at Brouwershaven from Banjoewangie, Juno; at Texel from Banjoewangie, Nieuwland; 11, at Falmouth from Maulmain,

Digitized by Google

Kasan; 11, at Liverpool from Shanghai, Geelong; 8, at Crushaven from Manila, Malta; 7, at Texal from Banjoewangie, Koophandel; 8, Acadia.

DEPARTURES.—June 8, from Deal for Singapore, Catherine, barque; 7, from Shields for Batavia, Pekin; 7, from Sunderland for Shanghai, Herald; off Aldboro' for Shanghai, Aldebaran; 8, from Liverpool for Ceylon, via Cardiff, Ferris; May 28, from Madeira for China, Kwang Tung, str.; June 11, from London for Cardiff and Shanghai, Simoda; 6, from Marseilles for Ceylon, Tapio; 11, from Liverpool for Colombo, Queen of Commerce; for Hong Kong and Canton, Juanpore; for Manila, Barnaga.

SPOKEN.—Julie Claire, from Batavia, 47 N., 11 W.; Amsterdam, Banjoewangie to Amsterdam, May 7, 42 N., 12 W.; Juno, Dutch, Samarang to Rotterdam, May 31, 46 N., 18 W.; Teuderten, Sourabaya to Rotterdam, April 2, 31 S., 10 E.; Ottilia, for Singapore, April 24, 2 S., 24 W.; Dina, Batavia to Amsterdam, May 5, 6 N., 25 W.; Acadia, Sourabaya to Amsterdam, May 19, 35 N., 42 W.; Daylight, ship, London to Singapore, April 24, 1 N., 21 W.; William Henrick, barque, Sourabaya to Rotterdam, June 3, 49 N., 8 W.; St. Bougairils, barque, of Bordeaux, for Batavia and Singapore, April 23, 1 N., 23 W.; Sourabaya, barque, Batavia to Amsterdam, May 30, 46 N., 21 W.; Northern Light, barque, Colombo to Gibraltar, May 3, 6 N., 24 W.; Batavia, Dutch barque, for Batavia, May 7, 2 N., 25 W.; Elizabeth Rose, Liverpool to Ceylon, April 18, 21 S., 26 W.; Prady (?) French, Liverpool to Ceylon, 65 days out, April 25, 6 S., 27 W.; Avery, barque, Colombo to London, April 17, 8 S., 83 E.; Albion, Colombo to London, March 20, lat. 3, lon. 80 E.; Golden Fleece, ship, London to China, April 5, 39 S., 21 W.; Chaasze, London to Shanghai, Jan. 25, 29 N., 22 W.; Ravensbourne, barque, Sunderland to Shanghai, Feb. 19, 25 S., 30 W.; Excelsior, barque, London to Colombo, March 31, 40 S., 35 E.; Prinses Amalia, Rotterdam to Batavia, April 12, 4 S., 21 W.; Wilhelmine, Banjoewangie to Amsterdam, May 16, 32 N., 37 W.; Willem Daniel, Banjoewangie to Amsterdam, June 3, 48 N., 8 W.; Athlete, Hamburg to Hong Kong, May 16, 4 N.; Alexander, Sunderland to Shanghai, May 18, 6 N., 23 W.; Jacob, Java to Rotterdam, May 7; St. Harlequin (?), French ship, Colombo to Marseilles, 34 days out, March 11, 29 S., 40 E.

LAID ON AT LONDON.—For Hong Kong and Canton, Red Riding Hood. At Liverpool, for Shanghai, Kirk Connell; for Singapore, Thomas Blythe. At Greenock, for Hong Kong, Madras; for Colombo, Corsair's Bride; for Hong Kong and Canton, Patrician.

At Table Bay, April 28, Fanny, sailed for Batavia; 29, Singapore, sailed for Manila.

At Algoa Bay, April 18, Norma, sailed for Singapore; 25, La Plata, sailed for Singapore.

LAST NIGHT'S PARLIAMENT.

SINGAPORE.

Mr. LYALL inquired of the Under-Secretary for the Colonies, whether the Government of Singapore would shortly be transferred from the Indian to the Colonial Department; and, in the event of such transfer, whether it would entail any charge on the Imperial Exchequer?—Mr. C. FORTESCUE said, that a deputation of gentlemen connected with the Straits Settlement had an interview with the Duke of Newcastle, a few days ago, when they requested that the subject of transferring those settlements to the Colonial-office might be again taken into consideration, representing that the revenues of Singapore and the other settlements had so far increased as to make it certain that no charge would fall on the Imperial Treasury. In consequence of this, communications had been opened between the Indian and Colonial Departments, to see whether arrangements could be made for the transfer. He would remind the House that the arrangement made on the former occasion was entered into upon the ground that his noble friend, the Secretary of State was unwilling to bind the House to a vote in aid of the revenues of Singapore.

THE LITTLE BASSES ROCKS, CEYLON.

On the motion that a sum not exceeding £28,914 be voted for erecting and maintaining lighthouses abroad, Mr. CHILDERS asked for some explanation of this vote. If satisfactory details were not given in relation to the item of £8,000 for the Little Basses Rocks Lightship, he should be compelled to take the course he had been about to press on a former occasion when the House was counted out—namely, of moving that the vote be reduced by that amount.—Mr. M. GIBSON said the sum of £8,000 was asked as a re-vote, and was intended to cover the cost of a lightship actually constructed, and on the point of being moored.—Mr. CHILDERS said the proposal to station lightships on the coast in question had been deliberately rejected after an inquiry extending over several years. Permanent lights were required, and it had been proposed to erect two of them at a cost of £4,500. But, although £54,000 were spent on only one of those lighthouses no competent engineer was sent out to undertake its erection, the ship for which the vote was taken never went there; in fact the whole thing had been completely messed. There was no urgent need for taking this vote at present, and the House might well pause till it had some definite information before it. He moved that the vote be reduced by £8,000.—Mr. AUGUSTUS SMITH supported the amendment. There was no reason why the payment of this £8,000 should be thrown upon the taxpayers of England. Madras was the port which would benefit most by the proposed expenditure, and only 314 English ships annually left that port, as compared with 3,915 belonging to the island of Ceylon. There might have been some reason for showing consideration to the island of Ceylon at a time when its funds were not in a very flourishing state, but for the last five or six years it had enjoyed a considerable surplus revenue.—The amendment was negatived.

CHINESE ART.

(LONDON REVIEW.)

If there had not been some enthusiastic virtuosi among the Chinese, we should not have seen any of their interesting bronzes; they must have perished in a climate certainly not so favourable for preserving them as that of Egypt. Confucius refers to the museums formed by persons of rank; he mentions Lin-tze, a minister of state, and Tung Choo (A.D. 200), who were collectors. In the time of Lord Macartney's embassy, the Viceroy of Canton, Yuen Yuen, was a great collector. The practice of burying vases with the dead led to many being dug up to be sold to the museums; so that, notwithstanding the edict of Tsin-Che Hwang-Te, the builder of the Great Wall, ordering all memorials of the past to be destroyed, and all books burnt, many have escaped. The oldest ornament seen upon these is the fret-work stamped in a band round the body of the three-legged vessels; and the shape of these rude vases, excepting the legs, is not unlike the earthen vases found in British tumuli. They were used only for religious purposes; those of gold, and with three legs, being significant of the possessor's imperial rank; those of fine copper, with four legs, being for ministers of state; while to the literati were allotted iron vases. In the matter of prize cups, the Chinese are far before us; they gave them as rewards for agriculture in their earliest times, and the cup was preserved as a family honour; many of these bear the words "sheep," "ox," "hog," besides the universal ornamental work in fretted lines, and strange pieces in relief, with something like a rude eye here and there, which was the Chinese artist's way of representing the all-seeing eye of the Almighty One looking out of the clouds and thunder. Generally, too, the dragon Lung, god of rain, is to be traced in the clouds; he is an important ornamental personage on everything—he forms the imperial heraldry, and makes the great figure in the carnival in his honour, known as the Feast of Lanterns.

Another ornamental form is the globe in relief, with the strange conventional clouds and thunder as supporters at the sides, perhaps with a few curved lines ending in an involuted spiral. An example of this kind was the vase 718, said to be about 1200 years B.C. 727 and 728 were other examples; and 912, an incense burner, showed the circle enclosed in a raised diamond fret on a tooled ground—a very good piece of ornamental arrangement. The circle is the symbol of perfection, or the male sex; the square represents the female, and inferiority. Fuh-he, the founder of the empire (B.C. 3300), laid this down. The handles of these vases are generally formed of some animal's head and neck, often the lynx, a lizard, or the fabulous kylin—a sort of Cerberus, upon whom the Chinese delight to lavish all their powers of displaying the grotesque and the terrible combined. The wine vases are frequently of good form, not unlike the glass we know as a beaker. The ornament upon them is often arranged in a leaf-shape, the point rising towards the brim, as in the beaker 903 in this sale.

In enamel work the Chinese show precisely the same cleverness up to a certain point, without any development. It is evident that they were familiar with the art, and its application to metal work, but the enamelled cap-stand in this collection shows no advance upon the earliest specimens. They used the champlevé, the cloissonné, and the painted enamel, but the former processes they excelled in. The best examples have a decided Persian character, noticeable generally on the bowls, as in 337, which has a very elegant running pattern of flowers. No. 332 showed the Persian physiognomy, in the three female musicians playing musical instruments like long shepherds' pipes, very distinctly. Another good example of early work was the oblong tray, 340. In all of these the design is too good for Chinese art; and, moreover, it resembles some modern Turkish enamellings that are very common. The colours are remarkable for purity of tint, as is generally the case. The probability is that the better specimens are due to Persian and other teachings, and the coarser work of the screens and other objects belongs to the Chinese entirely, as the conventional design always shows.

It is remarkable that in painting, as seen on china and other materials, the Chinese show the greatest facility and aptness in imitating natural forms and colours, of flowers especially; and yet they exhibit so little pictorial faculty. Here, again, it would seem they are radically deficient in the true endowments of art. They have not the power to idealise and create a new work from the suggestions of nature; they could not conceive a Doric column, nor carve an Apollo, nor paint a picture. Lumqua, one of their first modern painters of those strange fac-simile figures representing the sort of Rake's Progress of the Opium-eater, said very naïvely: "What see can do, what no see no can do." This they do also in the solid with equal perfection, as might be observed in the extraordinary toy-group 1239, in Mr. Russell's collection. In this the artist was not satisfied with imitating to the life a Tartar of rank on horseback going hawking with a stout countryman servant and the hawks, but he made the heads and the eyes move with the slightest tremour. This curious example was brought home by Lord Macartney. After all, perhaps, the best example of Chinese art-work—though, it is true, a gross, yet glorious caricature—is the familiar willow-pattern plate of our tables; this may really be studied as a perfect compendium of their art.

The poverty of their designs is seen in the way they carry out the imitating principle into all objects of personal use. The hardest stones they cut with infinite labour into the form of fruits, flowers, and animals, where other people far behind them in the actual technical means produce beautiful boxes in chased and engraved metal, with pictures in enamel, with jewels set in ornamental forms, and with endless fancy displayed in all kinds of work.

Closely connected with this crude use of natural objects is that love of the grotesque and its brother feeling for the terrible which belong to all people in a primitive or savage state. We find it in the ancient Mexican works of Yucatan, in the American aborigines, in the Islanders of the Pacific, in the Scandinavian and old Norsemen, in our own Norman carvings of monsters that grin at us in sacred places in such incongruous companionship with saints, martyrs, and heroes. Indeed, there are abundant examples of the same condition in the archaic works of the Greeks. It is as if Gibbon's remark, "that the savage tribes of mankind as they approach nearer the condition of animals preserve a stronger resemblance to themselves and to each other," were confirmed by the similarity of the archaic ornament in widely-separated nations. The peculiarity as to the Chinese is, that with great manipulative skill, extraordinary imitative faculty, and some chemical art, their art has never felt the influence of moral and intellectual culture, and therefore it remains barbaric in intention, however admirable as workmanship. As M. Emile Montégut so well says:—"Le génie de l'artiste n'est pas tout dans les arts, il lui faut une matière sur laquelle il puisse s'exercer, et cette matière sa volonté est impuissante à lui donner; c'est l'humanité qui fournit á l'artiste cette matiére morale."

EXTRAORDINARY CRUELTY IN AN INDIAN REGIMENT.

Public indignation has been aroused by the announcement of the circumstances relative to the death of Sergeant Major Lilley. The terrible episode of an individual act of tyranny is as follows:—On a slight regimental squabble as to whether Colonel Crawley had or had not been absent from the monthly parades of his regiment, Sergeant Major Lilley proved an adverse witness as well as two others. Colonel Crawley subsequently had these men arrested and confined during the most suffocating period of an Indian summer, in rooms like ovens. One prisoner became a maniac, and was released. To Sergeant Lilley, the confinement had special aggravations. His wife was sinking in mortal disease in the same room, and was just kept alive by wine and spirits prescribed by the hospital doctors. The sentinel paced up and down outside. But it seems that Colonel Crawley had heard that this wretched woman had attempted to communicate with another woman outside. The Colonel then ordered the sentry to pass from the outside to the inside of the cell. This close arrest continued until the court-martial was at an end, the confinement having lasted from the 28th of April to the 25th of May, and on that day, in stench and in suffocating heat, and in mental agony, produced by oppression and calumny, Lilley died. His wife died some days later, and the sutler's bills for her wine being reported to Sir Hugh Rose, the Commander-in-Chief in India, in remarks which were ordered to be read at the head of the dead man's regiment, attributed his death to habitual intemperance. The Commander-in-Chief, however, has publicly acknowledged that poor Lilley's memory is clear from the stigma cast upon it; and he has condemned all the officers concerned in this tragedy to a gentle censure, a general eulogy, and a complete impunity! But there still remains an unpunished crime of blood-guiltiness, and the men who have perpetrated this act must be put upon their justification before some unsuspected tribunal, or law and justice are nought in India.

LOSS OF THE "CANADA" PACKET-SHIP.—The new iron ship *Canada*, Captain Wilson, has been lost while on a voyage from London to Monreal, having been "nipped" in one of the huge fields of ice which are to found in the Atlantic floating down from the northward in the early part of the spring of the year. The *Canada* left the Thames about the first week of last month, and on the night of the 26th ult. loose detached ice was fallen in with. The ship wore round to the S.E. in order to clear huge fields which came drifting up, and early on the following morning the ship was suddenly surrounded with ice. Another effort was made to wear ship, when the tiller broke on the rudder head into several pieces, and it was then discovered that the vessel was hard and fast in the ice, and striking heavily. Attempts were made to repair the rudder, and in the latter part of the day the ice somewhat cleared, when it was discovered that she was making water fast. Many of the bolts and rivets were gone, and beams and bulkheads were started by the ship being crushed in the ice. Cargo was thrown overboard, the pumps were energetically applied, and everything done with a view of keeping the ill-fated vessel afloat. It was evident, however, she was doomed, the water was fast rising in her, and a passing ship being sighted, a signal was fired, and the sail bore down towards them. She proved to be the ship *Able Seaman*, from London, which took on board all from the *Canada*, which was abandoned with eighteen feet of water in her hold. The *Able Seaman* cruised about the spot, and later in the day the *Canada* was observed to be hemmed in with icebergs and suddenly to disappear. The *Canada* was nearly 1,000 tons burden, and was largely insured at Lloyd's. Another ship, called the *Aronica*, from Quebec for Liverpool, is reported to have been seen in a distressed condition in the ice. Her fate is not exactly known.

DISCOVERY OF OLD COINS.—In a very singular manner some old and valuable coins were found at Malton a few days since. A workman threw out of excavations in Castlegate the remains of a beast's horn, out of which fell a mass of soil, from which 13 old coins were picked up. The man, believing them worthless, sold them for 3d., but they have since fallen into the hands of an antiquary, who found them to be one coin of King John and twelve silver coins—groats, half-groats, and pennies—of Edward I. and Edward III. It is believed the old horn contained more coins, which have not been found. On the other side of the way, and immediately opposite the place where the coins were found, several finely-carved stones, evidently fragments of a highly-enriched building, have been found. It is not known that any important building ever stood in the locality, but a market cross, of which the base remains, formerly stood near.

THE TURKS ON THEIR TRAVELS.—With the view of giving an opportunity to the Turks of visiting Europe and acquiring such knowledge and information as may be advantageously employed towards the progress of their own country, an excursion trip (*train de plaisir*) is being organised at Constantinople, and is receiving the support of the Government. The first expedition is to consist of 150 or 200 young Mussulmen, including it is said, the sons of some of the leading statesmen and pachas. M. Misierie is charged with the arrangements of the voyage, and a staff of interpreters and *employes* who have some knowledge of Europe is to be attached to the expedition. The programme includes a visit to the French capital, *via* the Mediterranean and Marseilles; from thence to England, and back again, by way of Germany, Vienna, and the Danube, to Constantinople. The charge made, comprising travelling expenses, subsistence, and sightseeing, is to be £70.

PENSION TO MRS. ATKINSON.—We observe that Mrs. Atkinson has been placed on the civil list, "in consideration of her husband's contributions to geographical science, the fruits of six years' explorations in Eastern Siberia and Mongolia—during which she accompanied him, and aided in preserving a record of his researches - and of his having expended all his means in these efforts, leaving his widow totally unprovided for."

THE QUEEN'S BIRTHDAY.—Sir Rutherford Alcock was at the reception given by Lady Palmerston on the Queen's birthday, and in the list of those present at the State banquet given by the Duke of Newcastle, we observe the names of Sir Hercules Robinson and Mr. Callaghan, Governor of Labuan.

GOLD IN BRITISH GUIANA.—Gold has been found in the streams and quartz formation of the Cuyuni, in British Guiana, in sufficient quantities to remunerate the searchers. It is curious that this is the region which Raleigh believed was an El Dorado. Shakspeare makes Falstaff speak of "a region in Guiana all gold and bounty."

SALE OF M. CHAILLU'S COLLECTION.—A sale of interest to naturalists and curators of museums will take place on the 12th inst., when M. Du Chaillu's collection will be disposed of. Among the objects are "magnificent gorillas," chimpanzees, and other monkeys and animals, and also a choice collection of African bird-skins.

MR. LUDWIG WIESE has been appointed Consul at Hong Kong for H.M. the King of Sweden and Norway.

THE Senate of the Free and Hanseatic City of Hamburg has appointed Mr. Rudolph Sehlmacher to be Consul for that Republic at Sourabaya.

LORD CLYDE is, we are happy to learn, progressing favourably after his recent illness.

SENHOR DA MOREIRA, late the Brazilian Minister in London, will reside in Paris until the settlement of the dispute between England and Brazil.

Continental Intelligence.

FRANCE.

The result of the Paris elections is a brilliant victory for the Opposition. Of the 235,250 votes given in the mairies of Paris, the candidates put forward by the Government have obtained only 82,607. A result like this has not been seen since Paris has had representatives to vote for. It is such as no one, friendly or adverse, ventured to hope for or to fear; and, what is more remarkable still, is the fact that most of the opposing candidates have been returned by overwhelming majorities. Perhaps the greatest interest has been excited by the election of M. Theirs, who, in spite of the opposition of the Minister of the Interior, has been elected for the second district of Paris by a majority of 11,112 to 9,857 votes for the Government candidate. The Opposition has gained important successes in the provinces also. There are still rumours of changes in the Ministry, and among high functionaries. M. de Persigny, it is said, goes out; and people speak of a mission to St. Petersburg to bring over the Czar to ideas of conciliation towards Poland. Others think that if he quits the Ministry he will simply remain member of the Privy Council, but with an allowance of 100,000f. yearly.

The *Pays* says that Prince Napoleon, after leaving Egypt, will proceed to Constantinople, with the intention of removing or lessening the difficulties attending the question of the Suez Canal.

The trial of M. Montluc, late Mexican Consul at Paris, and four others, accused of having carried on a foreign correspondence for the purpose of exciting hatred and contempt against the Government of the Emperor, has ended in their acquittal.

The race for the "Grand Prize," came off at Paris on June 1st. The event had been looked forward to with deep interest in the sporting world both in England and France. It resulted in the victory of an English horse, but a victory so gallantly contested that the French turf may even in its defeat pride itself in having beaten on equal terms some of the best English horses of the year, and among them the favourite of the Epsom Derby. The occasion attracted an unusual concourse of sportsmen. Ranger won; the French favourite, La Toucques, running second, and Lord Clifden only fifth. The Emperor was present, and was warmly cheered by the English.

The trade of Paris is at present in a very flourishing condition. The great number of new buildings constantly going forward gives occupation not only to the thousands of hands engaged in building, but likewise to the tradesmen employed to furnish them. The great manufacturing establishments in and near Paris were never more fully occupied than now. The Suez Canal Company have given large orders for a variety of machinery. Six new iron bridges have been lately ordered by Spanish companies, besides 400 tons of sheet-iron prepared for the construction of bridges bespoke some time since. Coppersmiths are likewise actively engaged, and the operatives employed in the preparation of lighthouses for the coast work two hours a-day more than usual. Sugar refiners and manufacturers of chemical ingredients are doing a fair share of business. Notwithstanding the large quantity of porcelain imported into France since the commercial treaty between Great Britain and France, the china and glass manufacturers in Paris are not complaining. Although this is the dead season for paper-stainers, those in the Faubourg have still occupation for all their hands for another month at least. The cabinetmakers in the same quarter are receiving fresh orders every day. The fabrication of iron furniture, which was introduced into France about twenty years ago, has become of great importance, and promises to take a high position in the export trade. The French manufacturers excel in giving lightness and delicacy to such articles.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, June 6.

Ten whole days consecutively have been passed by the Second Chamber of the States-General in long-winded debates on the definitive settlement of the ninth section of the Budget (the Colonial Department), without hitherto having brought it to a close. After meeting at eleven o'clock A.M., and discussing the subject in all its bearings till late in the afternoon—when the exhausted stomach tells the members it is time to go to dinner, and the sitting is adjourned till the following morning—an uninterrupted succession of attack and defence has been carried on, and anyone would imagine the subject exhausted. It shows, however, the importance attached to it by the Chamber, and many members usually no orators and chary of their words appear to have bottled up their stock of speeches and uncorked them on this occasion, perhaps the only time during the session that they gave the rein to their tongues. Both parties desire the maintenance of the present system of culture in Java; the conservatives, however, wish to introduce some slight modifications, whilst the liberal party on the other hand are clamorous for more essential reforms. The most remarkable speech was that made by the opposition member, Mr. Gevers Deynoot, who has himself passed many years in the East, and gave a long and succinct account of the state of affairs, where, according to his account, there was ample room for improvement. Among other things he complained bitterly of the neglected state of the three principal ports in Java—Batavia, Samarang, and Sourabaya. On arriving at Batavia a stranger must be unfavourably impressed with the state of the harbour, the river that runs through the town being useless from the accumulation of mud. The energetic Governor-General has appointed a commission to afford the needful relief, and he hoped the Colonial Minister would firmly support him in the execution of this laudable purpose. He described the state of these ports as a living proof of the lamentable supineness of the Dutch Government. Samarang, he said, no longer deserves the name of a seaport, and about the other and lesser ports on the island, the less said of them the better. He then attacked the Government on the state of the lighthouses on the coast, of which, he said, there were only four in the whole Eastern Archipelago abounding everywhere, as it is known to do, in the greatest dangers and difficulties of navigation, rendering it quite a wonder that so comparatively few accidents occurred, as moreover the sea-charts are very imperfect and by no means to be relied on. Only last year a valuable naval officer, now on the Eastern station, proposed the erection of iron lighthouses similar to those placed by the English on the coast of Ceylon, for which he was duly snubbed by the Government who decided that none but stone lighthouses should be built. It is true that a survey is being at length made of the Straits of Banka, but he wanted to know if the exertions of the Government were to be compared with what the British had done for the Straits of Malacca and Singapore, and whether it was not by far a more honourable and useful occupation for the officers of the Dutch ships of war in the East to be employed in surveying the coasts and islands than lounging on shore in perfect idleness, which disgusted many efficient and scientific officers, and compelled them to throw up their commissions and retire from the service. He then complained of the communication both by land and by water, and was unable to say which was in the most forlorn condition. The water communication was in the hands of a company that exercised a frightful (*schromelyk*) monopoly. The company of Mr. Cores de Vries received a subsidy of half-a-million of florins annually, and in the absence of all competition did just what they liked. What struck him as most unusual was that Government officials were made to pay more passage money than others; and, in fact, it appeared to him not that the steamers were placed on the lines for the convenience of the public, but rather that the interests of the public were made subservient to the owners of the steamers. With reference to the oppressed state of the Javanese, he complained that the Government had done nothing for their development and relief. Mr. Money had said, in his work on Java, that he never saw a more flourishing peasantry; but he (Mr. Gevers) was uncertain which was most to be wondered at—the ignorance of the author or the unwarrantable boldness of his assertion. He then drew a lively picture of their depressed condition, which he described as peculiarly melancholy, asserting that the mother country looked on Java only as a source of revenue, but that nothing was done to improve the island or instruct the inhabitants. One of the greatest faults in our colonial system, he concluded, is the dependency of the Governor-General on the Minister for the Colonies, who, in the little Hague, at a distance of ten or twelve thousand miles, dictates every trifling order sent out for the Government of a colonial empire so vastly superior in size and population, and second to none in the world with the exception of England. The whole system requires a complete and radical re-organisation, and I am glad to see, by the Ministerial "Memorial of Explanation," that the Minister entertains the same opinions.

On the other side it was Mr. Wintgens who pleaded most strenuously for the maintenance of the present system, defending it from all attacks with an eloquence and energy worthy of a better cause.

After the general debates were brought to a close, the different clauses were gone through separately, and the whole Bill was finally passed by a Ministerial majority of 18, the numbers being 43 ayes, against 25 noes.

The Netherlands Trading Company have chartered the following twenty-five first-class vessels to load cargoes of produce in Java for this country.

Ship.	Captain.	Port of Discharge.
Emergens ..	J. R. Smit ..	Amsterdam
Wassenaar ..	A. Hofstee ..	"

A letter from Harderwyk states that a detachment of supplementary troops consisting of 125 men and 12 non-commissioned officers, under the command of Captain J. D. Landzetel, of the East India Infantry (returning to duty from leave of absence to this country), and accompanied by Lieut. Younker, J. H. von Schmidt auf Altenstedt, and Lieut F. H. Schoenmaker, both of the East Indian army, are under orders to march on the 20th of June to Rotterdam for embarkation at that port in the chartered transport *Kosmopoliet*, Capt. J. Koning, for Netherlands India.

H. N. M. fourth class screw corvette *De Briel*, 10 guns, has been successfully launched at Vlissingen, and is to be fitted out immediately to reinforce the squadron in the Eastern Archipelago.

Despatches have been received at the navy department announcing the safe arrival at Monte Video on the 14th of April of H.N.M. second-class sailing frigate *Prins Alexander der Nederlanden*, of 22 guns, Capt. M. Cazawx van Staphorst, on her voyage to the Indian Archipelago. All well on board. The above frigate sailed from this country on the 15th of January last.

The private trade exports from Java to Holland during the month of March were as follows:—

Per *Travancore*: 2 piculs coffee, 118 piculs india rubber, 206 piculs gum damar.

Per *Hendrika*: 11,590 piculs sugar, 78 leggers arrack, 100 piculs rattans, and 1,965 hides.

Per *Ouderkerk an der Amstel*: 2,710 piculs coffee, 7,585 piculs sugar, 150 piculs rattans, 74 piculs pepper, 1,500 hides, 15,668 kilogr. indigo, and 547 piculs gum damar.

Per *Madura*: 7,655 pic. sugar and 100 pic. of rattans.

Per *Electra*: 665 pic. coffee, 12,013 pic. sugar, 67 pic. rattans, 3,888 hides, 5,195 pic. tobacco, 182 pic. sapanwood.

Per *Triton*: 3,828 pic. coffee, 3,232 pic. sugar, 172 pic. rattans, 588 hides, and 5,019 kil. indigo.

Per *Kalimas*: 4,460 pic. sugar, 685 pic. rattans, and 5,019 kil. indigo.

Per *Eva Johanna*: 274 pic. coffee, 15,018 pic. sugar, 200 pic. rattans, 1,050 pic. tobacco, and 400 pic. gum damar.

The number of vessels that arrived in this country from the East Indies during the month of May was twenty-five, against thirteen in April, thirty-six in March, and thirty-four February. Of these fifteen discharged at Amsterdam, and ten at Rotter-

Digitized by Google

dam. Ten brought cargoes for the company, and fifteen for the private trade. Twelve came from Batavia, two from Sourabaya, seven from Banjoewangie, one from Samarang, one from Tjilatjap, and two from Padang. Collectively they brought 61,622 bags of coffee, and 43,364 kranjangs of sugar.

The ship *Capella*, Capt. J. Kruisinga, arrived at this port from Banjoewangie, has brought over two young spotted leopards and a large python, presents from Mr. R. Lawick, at Sourabaya, to the Zoological Society, *natura artis magistra* in this city.

A handsome iron barque of 800 tons, for the East India trade, built at the yard of Mr. Fop Smit, at Kynderdyk, for Messrs. Louis Bienfait and Co., of this city, was successfully launched last week, and christened the *Cornelia*.

H.N.M.'s first-class screw corvette *Metalen Kruis*, 16 guns, which has been lying dismantled at the dockyard wharf in this city all the winter, has been taken out to Nieuwe Deep by a party of seamen and riggers to be overhauled and fitted out for service in Netherlands India.

At the last week's ordinary meeting of the Royal Academy of Sciences, Mr. Staring read a paper on the diluvial formations in Java, and Mr. Buys Ballot gave an account of an extraordinary ring round the sun, observed at Sourabaya on the 24th of January last.

A large and highly interesting collection of Japanese objects of manufacturers and industry is now open to public inspection at "The Apollo," on the Hoogesluis, in this city. The collection was made by the well-known ethnologist and naturalist, Colonel von Siebold, who lately returned to this country from a lengthened residence in Japan, whither he was sent on an important mission by the Netherlands Trading Company.

By the last Cape mail intelligence has been received that the wreck of the Dutch ship *Willem de Zwyger*, Capt. van den Dries, from Banjoewangie to Rotterdam, lost on the coast of South Africa, had been sold by public auction for £189. 12s., including the remains of the cargo.

Mr. J. J. Schneither, officer of the first-class in the East India Civil Service, who is entrusted with the duty of reorganising the postal service in Java, has taken his passage to Netherlands India in the Rotterdam frigate-built ship *India*, Capt. C. Vonck, which vessel sailed for her destination on the 31st of May (see list of "passengers outwards").

A letter from Harderwyk states that Lieut. H. J. Beukman, of the E. I. Artillery, is under orders to embark at Rotterdam in the *Zephyr*, Capt. W. H. Schey, on the 8th inst., for Java.

The numismatical cabinet of the University of Leyden has lately been enriched with several scarce and valuable coins, among which is a Batavian Rupee of 1783, a present from Mr. D. F. van Heyst, of Leyden. On the averse are the words *Derhammin Kompani welandawi* (money of the Dutch Company), and on the obverse *Ila djazirat Djawa al Kabir* (for the Island of Great Java). This coin is now very scarce, but there is a description and drawing of it in the work published by E. Netscher and J. van der Chys, on the coins of Netherlands India, Plate III., No. 206.

The King has granted a pension of 3,000 fl. to Vice-Admiral Byl de Vroe, one of 1,800 fl. to Captains J. C. Baak, and H. F. Valentini, and one of 1,500 fl. to Captain Lieut. R. C. Sloos, all of the Dutch Royal navy. There has also been a promotion in that branch of the service. Capt. A. A. de Vries has obtained the rank of Rear-Admiral, three Captain-Lieutenants are made full Captains, four Lieutenants of the first class are promoted to be Captain-Lieutenants, four sub-Lieutenants to be First Lieutenants, and fifteen midshipmen to be sub-Lieutenants.

A petition has been presented to the Second Chamber by Mr. G. G. Bakker, of Amsterdam, respecting his claims to the estate of the late Mr. Alting, formerly Governor-General of Netherlands India. Several petitions have also been received from the Chambers of Commerce of many different towns in support of the Bill for the concession to Poolman and Consorts for the construction of railways in Java.

Major-General J. H. Konig, formerly Colonel-Commandant of the Colonial Recruiting Depot at Harderwyk, has received from the King of Prussia the insignia of Knight Commander of the Royal Order of the Red Eagle.

The Netherlands Trading Company advertises in the name of the Colonial Department for tenders of 120,000 coffee bags in four lots, to be sent in by the 12th inst. at latest, when the contracts will be adjudicated to the lowest bidders.

The iron-built clipper *Ternate*, Captain Cars, having on board the young Japanese, who are to be educated in this country, arrived on the 2nd inst., at Brouwershaven, after a voyage of a hundred and sixty days.

PASSENGERS ARRIVED.

Per *Cornelia Hendrika*, Capt. Swart, at Rotterdam from Batavia: Mr. N. G. van der Bosch, ten passported soldiers.

Per *Aletta Augusta*, Capt. Tinholt, at Amsterdam from Batavia: Mr. G. J. van Dyk, and Mr. W. A. van Dyk.

PASSENGERS OUTWARDS.

Per *Willemina and Clara*, Capt. Abrahamsz, from Amsterdam to Batavia: Capt. G. J. Cochius, East Indian Army, and lady; Mr. J. P. Gericke, officer of the E. I. Civil Service, lady and child; Mrs. van der Plas and child; Mrs. C. Hummel, Miss P. L. d'Artillact Bril, Miss N. Filet; Messrs. W. Zix Raaven, D. Erdbrink, A. Ruyl, A. H. Fokker, and A. J. Cochius.

Per *India*, Capt. Vonck, from Rotterdam to Batavia: Mr. and Mrs. J. J. Schneither, Mr. de Bruyne.

Per *Asia*, Capt. Molinaar, from Amsterdam to Batavia; Messrs. J. C. ten Hoven and H. C. Deuffer Wiel, administrative officers of the navy; Messrs. E. Jung, J. J. Valkenoff, A. de Bruyn, and H. M. Taunay.

COMMERCIAL.

COFFEE.—Since last mail the market is very inactive owing to the firm demands of holders, which checks business, and the dealings have been limited to a few purchases for dealers who are out of stock and must replenish them at any price. The only sale of private trade goods to report was 1,000 bags of bright Java, ex *Eugenie*, at 46 cents. Company's lots are not to be had without paying a trifling advance on last sale prices. The deliveries hitherto have been much smaller than in previous years, being for the first five months 389,782 bags, against 413,600 bags in 1862, 552,831 bags in 1861, and 419,602 bags in 1860. On the other hand, the stocks on warrants are larger, being at present 144,374 bags, against 77,500 bags at this period of last year, 108,877 bags in 1861, and 178,637 bags in 1860.

TEA is firm. A sale of 1,100 quarter-chests of China Congo, ex *Sunda*, bought in at the sale of the 1st of April last, is reported.

SUGAR.—There is little to say about this article, which has been very quiet all the fortnight for raw and refined. Of the former the values are not lower, but for the latter the dealers are doing their best to spoil the market by offering goods at reduced prices. There is, however, a better feeling with the refiners, who are reluctant to enter into fresh contracts at present rates.

RICE continues to be well supported, and several sale of table-rice are reported at full values.

SPICES.—There is some demand for No. 1 nutmegs and amboyna cloves, and several parcels of Java cinnamon have changed hands. Soy still commands an easy sale. On the whole there is no alteration in prices.

HIDES.—Considerable transactions in East India have taken place, amongst which 1,238 Java ox and 38 buffalo, ex *India*, 180 Java ox, ex *Baron van Hardenbroek* and 730 buffalo ex same ship. Full prices are realised and the market closes firm. At Rotterdam the following parcels were sold:—1,500 ox per *Lady Aeyedia*, 2,500 do., per *Cornelis Wernard Eduard*, 500 do., per *Electra*, 1,686 per *Sir Ralph Abercromby*, 1,246 do., per *Elizabeth*, 1,700 do., per *Ringhorn*, 1,000 do., per *Quartett*, 1,147 do., per *Susanna Johanna*, 853 buffalo, per same ship, 1,000 do., per *Arracan*, and 994 do., per *Nelly*. The stocks consist of 11,273 E.I. buffalo, and 13,948 do. ox.

TIN.—Large dealings in Banca have taken place at successively rising prices. After the departure of the last mail, 3,000 blocks were sold at 77 fl., 300 at 77¼ fl., 2,500 at 78 fl., 2,500 at 78½ fl., and during the last few days several sales are reported at 78¾ fl., whilst 79¼ fl. is the last price at which business has been done, and 80 fl. is now demanded. The company's sale will be held on the 24th inst., and will consist of 103,300 blocks, together with a maximum of 20,000 more, should they arrive in time to be included. The deliveries of Banca are about the same as last year, being 35,048 blocks for the first five months of this year against 34,071 in 1862.

INDIGO.—Prices are well maintained but the sales were inconsiderable.

RATTANS.—Several transactions have been done in private trade goods at full prices; amongst others, 2,340 bundles, ex *Baron van Handenbroek*, and 1,900 do., ex *Quartett*.

TOBACCO.—Java descriptions calm, and no alteration in values. Stock, 3,542 bales.

Result of the public sales held in the City on the 3rd inst.:—

BY THE NETHERLANDS TRADING COMPANY.

Japan Wax	A, 1,138 chests	41¼	to	41⅝	fl.	per 50 kilogr.
„ „	B, 1,505 „	37¾	to	39⅜	„	„
„ „	C, 1,101 „	34	to	34¼	„	„
„ „	D, 346 „	32½	to	33½	„	„
„ Camphor	464 tubs	93	to	94	cwts.	per ½ kilogr.
Gum Damar	202 chests	20	to	21¼	„	„
Cassia Vera	375 „	30	to	31½	„	„
Japan Cassia	484 „	10			„	„
Gutta Percha	1,760 kilo.	141			„	„
Do.	1,075 „	105			„	„
India-rubber	51 mats	104½	to	105½	fl.	per 50 kilogr.

LONDON, FRIDAY, JUNE 12, 1863.

THE NEWS FROM JAPAN.

THE storm which has so long threatened to burst over the heads of foreigners in Japan, is still looming in the distance. The news we have recently received from that country shows that there is at present a lull, but at the same time a feeling of intense expectation, if not anxiety as to the future. What reply will the Japanese Government make to the demands of Earl RUSSELL? What instructions have been given to Admiral KUPER? Is the indemnity for the murder of Mr. RICHARDSON to be paid under the alternative of war? These are the questions which every one is asking just now, and to which no definite answer can be given. £125,000 is a heavy tax upon the Japanese for the murder of a European—so heavy, indeed, that they may well hesitate to pay it, and being a brave and warlike people they may probably feel, as Prince KAGO felt at the first proposal to admit foreigners into the country, that it would be better to die fighting.

It is evident that the probabilities are in favour of war, although it is possible that the Japanese Government would be willing to stave off that contingency until it is more fully prepared to cope with its unwelcome visitors. We hear of ships of war being purchased or built, and that the utmost efforts are making to secure a sufficient supply of ammunition. How vain all the efforts of the Japanese would be against the mighty power wielded by Great Britain, is self-evident to Englishmen. At the same time the cost in men and money of a war with Japan would be enormous, and far beyond any advantage which might ultimately accrue to trade. It is the interest of our merchants to keep on the best possible terms with the common people, and to avoid, as far as practicable, irritating the Daimios. Gladly would they eschew politics altogether, but the obstructions thrown in their way, as well as the insecurity of life and property, force them, in spite of their wishes, to look beyond the range to which they are limited by commerce. But if there be a war, the responsibility of having originated it will not rest with the merchants; neither our present nor our prospective trade with Japan would sanction recourse to arms; if it can be justified at all, it must be, as we have often said before, on political grounds alone. Certainly it would be ignominious to retire altogether from the country. But this is not all; it would be in the highest degree perilous to our interests in the Far East, and for the sake of these interests, which are even now imperilled by the encroachments of Russia, the diplomacy—not always honest and above-board—of America, and the ambitious policy of France—we shall probably require, even at the sword's point, the full execution of our treaty rights.

SIR FREDERICK BRUCE AND THE SHANGHAI "CONCESSION."

IF the recent action of Sir FREDERICK BRUCE, which has carried such dismay into the councils of the "Landrenters," as they are called, of Shanghai, were productive of no less beneficial results than to check speculation in building sites at Shanghai, we should not have a word to say against his now celebrated despatch to Consul MEDHURST, of 8th September, 1862. Gambling in "town-lots" is the curse of all newly-opened centres of commerce, and cannot be too suddenly or severely checked by those who may be fortunate enough to possess the requisite power. But the fact that many Chinese have been permitted to rent godowns within the charmed limit has further imported into the question an element of international law which, of course, opens the gate for diplomacy to "take distinctions" which do not readily occur to plain men of business. Thus, in the case before us, our Envoy at Peking insists on the distinction, recognised by jurists, between a "concession" and a "cession." His argument stated inversely amounts to this, that unless land be actually "ceded," that is to say, unless the power which so cedes declares that it absolutely surrenders all sovereignty over the domain in perpetuity, its jurisdiction over such of its subjects as may for any reason, secret or avowed, settle within the limits specified in the agreement, remains intact, and in fact unimpeachable. But then he grants that the Chinese Government agreed "that British subjects should be allowed to *acquire* land for "their personal accommodation in order that they might have "the advantage of living together." Now, as so much depends upon words, we should much like some learned sinologue to explain to us what is the actual Chinese phrase used in the agreement, and that once ascertained, what is its precise equivalent in English. If Sir FREDERICK BRUCE means to say that all residents upon the British concession are simply "squatters"—for that is what his decision really amounts to—he should have used the verb *occupy*. There are only three modes of acquisition of land within the limits of an independent empire—by conquest, by purchase, or by actual cession, without any direct consideration specified. No State or sovereign can concede the right to acquire land; he or it can only concede the right to occupy or to settle. To concede the right to acquire land is but a diplomatic circumlocution for cession *pur et simple*, when the limits within which such right of acquisition can alone accrue are clearly specified. It is here, therefore, that the first difficulty must be cleared up, and though so high an authority as Earl RUSSELL has endorsed Sir FREDERICK'S *dictum*, we must have more light as to the precise wording of the agreement. At present Sir FREDERICK maintains our theory, but demolishes it by using the words which justify another theory diametrically opposed to it.

Whether the residents within the concession will feel very comfortable at being told that they are mere cumberers of the soil till some Chinese mandarin shall reclaim it, with all its improved capabilities, for his Imperial master remains to be seen. One thing is certain, that if the principle laid down by Sir FREDERICK BRUCE is to be pushed to its legitimate conclusions, the most serious troubles are in store for that settlement. Not merely the dispossessed Chinese will be alienated on finding themselves still amenable to the exactions from which they supposed they had delivered themselves by paying a handsome sum of money for the privilege of sharing the protection of the English quarter, but the rest of the inhabitants will not be slow to apply the moral of a house divided against itself. Anywhere in the East, it matters not the locality, once let it be understood that the foreigner subsists purely upon sufferance, and that his own authorities will not uphold him in the assertion of what, by a "stretching of formularies," as Carlyle calls it, they consider illusory rights, but which he honestly supposed he possessed, and our *prestige* and supremacy receive a severe shock, if indeed the isolated little community that is the victim of these verbal subtleties does not, by its seeming defencelessness, invite open attack. The French are wiser in their generation. They have occupied the ground far later than ourselves, but they are going in for a cession out and out. With them there is never any hair-splitting about the difference between cession and concession—between acquisition and occupation—between permanent ownership and squatterdom. We have no wish to argue that the fundamental principles of law and justice are not to be observed with a semi-civilised kingdom. But we do say that those who in such a case as the present rely upon international law, would be puzzled to find any precedent by which to decide the question here at issue. And the reason is obvious. This is the first instance known of any such formal agreement being drawn up between two Sovereign Powers. What would be thought of a proposition gravely made by our Foreign-office to the Cabinet of the Tuileries to have the English residents at Paris or Tours declared competent to "acquire land for the purpose "of being enabled to live together?" Yet that which would savour of downright idiocy in the case of two civilised monarchies, and not only never has occurred but never can occur under such conditions, we hope to find work smoothly when semi-barbarous craft and unblushing mendacity, or open violence, if it could be ventured upon, are always ready to take advantage of our assumed weakness and internal dissensions!

It is singular how utterly unpractical the Anglo-Saxon mind is

Digitized by Google

with reference to the application of general principles. If there was one thing more certain than another it was that, in 1841, we had the opportunity of acquiring what land we required at the various treaty ports in the only mode possible in the East, *by right of conquest;* and had we then asserted our undoubted right, and insisted on a complete cession of the necessary space, to be available for all purposes short of colonisation by emigration, and shown a dignified moderation in the extent of our demands, we should have acquired the respect of the Chinese, we should have avoided serious misunderstandings amongst ourselves, we should in all probability have had none of the recent war, and we should not have furnished a handle for other nations to accuse us of the wretched hypocrisy of once more affecting to forego our rights out of consideration for a barbarous people. Foreigners reproach us with the sneer—only too well founded—that we obtain footing in new centres of commerce, professing the same dissimulating humility with which a Bishop elect, after exhausting all his energies in indirectly intriguing for his elevation, receives his appointment with an unction *volo episcopari*. Why should we refuse to recognise the workings of GOD'S Providence, when all experience and all history combine to declare them? It is written in far more permanent record than the archives of the Peking Embassy, that European civilisation—English, French, or Russian, or perhaps all these—is destined to extinguish that of China. The current of history will not be stemmed, far less arrested, by wretched diplomatic quibbles about the difference between "concession" and "cession," nor even by the distinction we have already set forth as to acquisition being something totally above and beyond mere right of occupation. The immediate effect of Sir FREDERICK BRUCE'S despatch will be a very considerable dislocation of trade at Shanghai—or possibly serious mischief—no ordinary triumph for your thorough-bred *acutus cantor formularum*, as all diplomatists necessarily are. Looming in the future, it requires no prophetic eye to see the gradual annexation of the Flowery kingdom, with many of the same phases as marked the absorption of the Great Mogul's heritage in HER MAJESTY'S Indian Empire—the only strictly analogous case we remember of in history. A century since, France was intriguing against England at Calcutta and in Mysore—or, as now, *mutato nomine*, at Peking and Shanghai. And not even Sir FREDERICK BRUCE, however acute and well-meaning, will be able to prevent the parallel from being carried out to its utmost limits.

NEW STEAMERS FOR CHINA.

It has been announced in *The Times*, that Messrs. Denny and Co., of Dumbarton, on the Clyde, have entered into contracts for building a paddle-wheel steamer, of 1,400 tons and 350-horse power, for Messrs. Gibb, Livingstone, and Co. The same firm have also contracted for a paddle steamer, of 2,000 tons and 450-horse power, for Messrs. Jardine, Matheson, and Co. We have not had an opportunity of gaining further particulars at present.

Literature.

A small volume, just published by Messrs. Aylott and Son, entitled "Who to Consult?" will be found very useful to invalids who may require medical advice. The writer gives the names of all the principal London physicians and the diseases for the treatment of which they are principally famed. It is true, indeed, that any good general practitioner and family doctor is able, if called upon, to recommend the most suitable physician; but for those who have no such doctor, and who prefer seeking at once the highest medical assistance, this *brochure* may prove of considerable service.

It is understood that among the names suggested by the Prince of Wales for the honorary degree of D.C.L. at the coming Commemoration was that of Professor Kingsley. This name has, however, been withdrawn, on account of the determined opposition offered in the Hebdomadal Board by Dr. Pusey, Dr. Mansel, and others. Their ground for opposition was, it is said, the heretical and immoral character of Mr. Kingsley's works, more especially of "Hypatia." A strange judgment truly! for Mr. Kingsley's aim in that work, even supposing him mistaken in the mode of its development, is assuredly noble and praiseworthy.

Among the few interesting books recently published, we may mention Mrs. Fanny Kemble's "Journal of a Residence on a Georgian Plantation in 1838-1839" (Longman and Co.), a work of intense interest, and conveying a profound moral at the present time, when it is the fashion in some circles to speak lightly of the evils of slavery. "Lispings from Low Latitudes; or Extracts from the Journals of the Hon. Impulsia Gushington" (John Murray), a humorous and clever skit on the failings of a lady who has a ridiculous fancy for intellectual pursuits, is also a popular book of the day, and has been honoured by a review in *The Times*. A very admirable article in the current number of the *New Monthly Magazine*, calls attention to a work brought out by the same publisher, entitled "The Naturalist on the River Amazon," by Henry W. Bates. Any one who reads the review is almost certain to read the volume. *Macmillan* has this month "More about Neapolitan Prisons;" an article by Mr. Hamerton, entitled "Furniture—an After-Dinner Conversation;" one on "Animal Design and Landscape," and several other papers of interest. But in our opinion the choicest morsel in the number is a poem by Dean Alford, the best short poem of his with which we are acquainted, entitled "Filiolæ Dulcissimæ." To a pamphlet just published on "Tea Cultivation in India," by Dr. Nassau Lee (Allen), we shall call our readers' attention in the next number of this journal.

Tables for Estimating the Cost of Remittances to Shanghai and Hong Kong in Bar Silver, Mexican Dollars, Drafts on India, and Carolus Dollars. By F. M. PAGE. London: Edward Colyer, 17, Fenchurch-street.

THE purport of this work is sufficiently indicated by its title. It is a necessary and handy manual to merchants and others engaged in trading or financial transactions with China and India. The particulars of charges on bullion to both these countries are furnished, with per centage for addition of interest, &c., also the means of determining the cheapest mode of remittance to China, according to latest advices compared with rates in London. The requirements of the merchants in China are taken into account, the cost being given in their own current of all forms of remittances received, including drafts on India. The tables of per centage on charges, interest, and agent's commissions are so constructed as to be applicable to any alterations on rates of freight, &c. This is an evident improvement on the commercial tables issued at Shanghai five years since, since which time, too, there have been very material alterations in the charges on the transactions to which this work relates. These tables are got up in fine style, and though occupying but thirty-nine pages, appear to furnish every desirable particular. The means of information possessed by the author constitute a guarantee of their absolute correctness.

THE PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY.

On the 2nd inst. the forty-fifth half-yearly meeting of the above company was held at their offices in Leadenhall-street, Mr. Anderson in the chair; when the following report was read and agreed to:—

"The present report relates to the half year only; and it may be mentioned, for the information of any new shareholders, that in conformity with the deed of settlement, accounts and financial statements are submitted at the annual meetings of the company held in December.

"THE COMPANY'S FLEET.—The present stations, and particulars of the tonnage and horse-power of the vessels composing the company's fleet, are shown as usual in the tabular statement prefixed to the report. Since the last annual meeting, the *Poonah* and *Carnatic* have been completed, and have each made a voyage to Alexandria and back, with satisfactory results. The *Rangoon* was launched on the 4th of April, and the building of the *Golconda*, *Delhi*, *Baroda*, and *Syria* is progressing rapidly. Paddle-wheel vessels being most suitable for the line between Marseilles and Alexandria, the directors have contracted for a new ship of this description to reinforce that service. The hull of the vessel, to measure about 2,000 tons register, is being constructed by the Thames Ironworks and Shipbuilding Company; and the contract for the engines, of 450 horse-power, has been taken by Messrs. Rennie and Co. The ship has been named the *Rhoda*. The small steamship *Union* has been sold on advantageous terms in China.

THE LOSS OF THE "COLOMBO."—The directors regret that they have to report the loss of one of the company's first-class steamers on the Calcutta and Suez line. The *Colombo* was wrecked on the Island of Minicoy, in the Arabian Sea, on the 19th of November last, while on her voyage from Point de Galle to Aden, with the passengers, mails, and cargo from India, China, and Australia. It is with a feeling of deep thankfulness the directors are enabled to state that all the passengers were landed in safety: although, owing to the nature of the coast, and the state of the weather, the ship was irretrievably injured, and filled very shortly after she struck. The circumstances attending the wreck subsequently became the subject of an official inquiry, under the authority of the Board of Trade, which resulted in the acquittal of the commander and officers, as was fully reported in the newspapers at the time. The amount at which the *Colombo* will stand in the company's books at the end of the financial year, namely, about £65,000, will be debited to the "Proprietors' Underwriting Account." The *Mooltan* has taken the place of the *Colombo*, on the Calcutta station,

Digitized by Google

and the following particulars may be interesting in connection with this subject. The intelligence of the loss of the *Colombo* was received in England on the 8th of December. The *Mooltan* was immediately ordered out, and was despatched from Southampton on the 24th idem; she reached Calcutta on the 4th of March, namely, in seventy days, and brought to Suez the India, China, and Australian mails, which were delivered in London on the 16th of May.

THE POSTAL SERVICE.—It was stated in the last annual report, that the directors had submitted a tender for a fortnightly line of steamers between Bombay and Aden, pursuant to advertisements from the secretary to the Post-office, but that at the date of that report no reply had been received. They have, however, since been informed by letter from the Postmaster-General, that the Government "are not prepared to take any further steps at the present time in this matter." The board have been recently requested by the Post-office to state the terms on which they would be willing to double the existing mail service between Sydney, Melbourne, and Point de Galle, under the general conditions of the current contract; and they have accordingly made a proposal which they have reason to believe is satisfactory to the Home Government, and will be equally so to the colonies concerned. As Australia contributes one-half of the subsidy, the tender has to be submitted to the approval of the colonial authorities before an arrangement can be concluded.

"THE TRANSIT THROUGH EGYPT.—Although the transit has not formed the subject of a paragraph in every report, the directors have never relaxed their endeavours to obtain the introduction of improvements in that most important part of the overland route. The announcement of the accession of his Highness Ismail Pacha to the Viceroyalty of Egypt having been almost immediately followed by the report that at the reception of the consular body his Highness expressed his determination to devote all his energies to the prosperity of the country and to the development of its internal wealth, it appeared to the directors that a favourable opportunity was afforded for strengthening those commercial relations which exist between the Government of Egypt and the company. They accordingly appointed a deputation from the board to proceed to Egypt, to present an address of congratulation to his Highness on his accession, and to express their hope that the improvement of the transit would be regarded by him as a measure of importance. The deputation was received by the Viceroy with every mark of friendly consideration, and a report of the ceremony, with the reply made by his Highness to the address, is appended thereto.

"The directors are happy to state that the commercial operations of the half-year have been satisfactory, and that the financial position of the company enables them to recommend that an additional payment of 1½ per cent. be made, with the usual half-yearly dividend of 3½ per cent. They think it probable that it will be more convenient to the proprietors to receive this payment at present than to have it postponed until the close of the year, when the dividend from the ordinary income is usually supplemented by any profit that may accrue on the proprietors' underwriting account. The warrants for the half-year ending 31st March last will accordingly be calculated at the rate of 5 per cent. on the paid-up capital, and they will be payable, free of income-tax, as usual, on and after the 24th of June."

Parliamentary Intelligence.

HOUSE OF COMMONS.

TURKEY AND HER DEPENDENCIES.

(May 29th.) A debate on Turkey was opened by Mr. GREGORY, who considered that it was time we should change our policy in that country, which was not only illogical and inconsistent, but at the present moment actually inexpedient:—

"The fear of Russia had been the mainspring of our policy in the East. He was not disposed to say that the apprehension was exaggerated. He was not prepared to say that the old aggressive spirit of Russia had died out, or that its old diplomatic cunning had been forgotten. The intrigues of Russia in Greece, Circassia, and the Danubian Principalities showed that she was still intent on the policy of the past; but Russia in 1863 was very different from Russia in 1853. The Crimean war had used up all the material elements of Russian strength. No one save a person who was in the East at the time could form an idea of the profound impression which was created by the fall of Sebastopol. The day before the news arrived the general impression throughout the East was that the power of Russia was irresistible. The day afterwards the impression was as general that the prestige and reputation of Russia had crumbled into dust."

He urged the violation by the Porte of solemn stipulations entered into with its dependencies, and appealed to high authorities to show the incurable vices of Turkish administration. He described the condition of the Christian population of the provinces subject to the Porte, extracting evidence of the oppression and exactions to which Christians were exposed from the statements and admissions, sometimes reluctant, in Consular reports, which represented the discontent and disloyalty of Bosnia and Herzegovina as owing to the gross misconduct of the Turkish officials. There would be a ray of light if England ceased to be the crutch of Turkey, and if she exerted her moral influence, and insisted upon the stipulations towards the dependencies of the Porte being carried out. Mr. Gregory then concluded his speech by moving for papers.—Mr. LAYARD admitted the importance of the subject discussed by Mr. Gregory—the problem how to deal with and decide the Eastern question—and began by observing that the account given by Mr. Gregory of the political history of Servia and of the obligations contracted by the Porte towards the Servians was inaccurate, and he entered with some minuteness into the details of the political relations of the two parties, contending that the Porte had been the protector of the people of Servia against their own Government, having been brought on this very account to the verge of a war with Russia. With regard to the general condition of Turkey, he accused Mr. Gregory of deriving his facts from obsolete accounts of bygone times, and appealed, in his turn, to the Consular reports,—which, when favourable to the Turks, where unjustly stigmatised by Mr. Gregor as "cooked and garbled,"—which represented the condition of the Christians in Turkey as greatly improved. He stated the large increase which had taken place in the trade of Turkey, the moderate taxation (less than 10s. a-head), the reduction of duties, and various improvements in the administration, remarking that the present Sultan was giving up a large sum monthly out of his civil list. He deprecated such speeches as Mr. Gregory's as calculated to inflame and irritate the Mahomedan population, by inspiring them with a belief that we meditated their extermination.—Mr. COBDEN, after observing that European Turkey contained a population of 15,000,000, of which number 3,000,000 or 4,000,000 were Mahomedans and the rest Christians, said that the question was, whether our foreign policy ought to be in the interest of a small minority of Mussulmans, or in the interest of the Christians. Yet, at the present time, the evidence of a Christian was not received in the courts of law against a Mahomedan. The consequence of the treatment of the Christians in Turkey was, that they were becoming more and more dissatisfied with this state of things; and ought we to be surprised that, as they saw no prospect of redress, they should be disposed to take the law into their own hands? It was a fallacy to suppose that we had bound ourselves to more than to maintain the territorial integrity of Turkey, and we should apply the principle of non-intervention to the case of internal disturbances there.—The CHANCELLOR of the EXCHEQUER, in reply to Mr. Gregory and Mr. Cobden, declared that it was the policy of Her Majesty's Government to uphold the civil and political privileges of the Christian subjects of the Ottoman Empire, believing that the true interests of that empire were best promoted by improving their condition. Deplorable pictures had been drawn of the state of Turkey, and he would be a bold man who should maintain that the dominion of the Turks had been productive of happiness to mankind; but what was the use of these highly-coloured pictures, unless to recommend a particular policy? We had got the fact of the existence of an Ottoman Power in Europe, and if we were not prepared to encourage a general crusade against it we should not enter upon a policy that might prove the source of greater evils.—After some remarks by Mr. GRIFFITH, the motion was withdrawn.

THE OVERLAND ROUTE TO INDIA.

(May 29th.) Mr. TORRENS asked the Secretary of State for India whether Her Majesty's Government had taken into consideration the advantages that might result, politically and financially, from using the route through Egypt for our troops going to and returning from India; whether any correspondence on the subject had passed between the Secretary of State and any of the chief authorities at either of the Presidencies in India on the subject; and, if so, would there be any objection to lay the correspondence upon the table?—Sir C. WOOD said the attention of the Government had been directed to the subject, and he had been in communication with the naval and military departments as to the best mode of carrying the measure into execution. Of course, there were several material considerations connected with the matter—financial considerations and others relating to the health of the troops on their passage—which required to be studied. A committee of the House had investigated the subject some time back, and had reported against it; but circumstances had since considerably changed, and he was inclined to think favourably of the possibility of carrying the suggestion into execution. The attention of the Home Government had been called to the subject by the Government of Bombay; but it would be of no use to lay the correspondence before the House, as in its present state it would only mislead. He hop , however, to be able soon to come to a definite conclusion.

MILITARY OFFICERS IN CHINA.

(29th.) Mr. LIDDELL asked the Under-Secretary of State for War whether British officers temporarily employed in commanding or drilling Chinese militia are still borne on the strength of their respective regiments; whether, while so employed, they received Her Majesty's half-pay; and whether their promotion went on in the ordinary course.—The Marquis of HARTINGTON said that as these officers were merely lent for the purpose of drilling militia, and were available for any duty which they might be called on to perform, they were still borne on the strength of their regiments. For the same reason they still received regimental full pay, and not having been required to quit the British service their promotion still went on. At the same time, he might mention that these officers were not allowed to proceed with the militia they were training beyond the 30 miles radius.

CAPTAIN DEW AT SHAOU-HING.

(29th.) Colonel SYKES asked the Secretary to the Admiralty whether it was the intention of the Admiralty to submit the conduct of Capt. Roderick Dew, of Her Majesty's ship *Encounter*, to the judgment of a court-martial for carrying on military operations in China beyond the thirty miles' radius from a treaty port, at the siege of Shaou-hing, fifty miles from Ningpo, in which the life of Lieut. Tinling, of Her Majesty's ship *Encounter*, was sacrificed, in disobedience of the instructions conveyed in Earl Russell's despatch to Mr. Bruce, dated the 26th of August, 1862.—Lord C. PAGET said that the Admiralty had received no official intelli-

Digitized by Google

gence with regard to the death of Lieut. Tinling, probably because the admiral was at Japan, the other side of the station. They had received, however, a private letter from Captain Dew, in which he stated that he and Lieut. Tinling had accompanied the French officers to the siege of Shaou-hing as amateurs. Of course the Admiralty could not say what they would do until they received official information on the subject.

LIEUTENANT TINLING.

(June 4th.) Colonel SYKES asked the Secretary to the Admiralty whether, consequent upon the communication made by him to the House on the 1st of June, respecting Captain Dew's report of the death of Lieutenant Tinling, of Her Majesty's ship *Encounter*, under the walls of Shaou-hing, it was the intention of the Admiralty to call upon the Admiral commanding in the China seas for a special report of the circumstances which led Captain Dew and Lieutenant Tinling to be engaged in two unsuccessful assaults upon Shaou-hing; and by whose authority they were engaged in the siege; whether Captain Dew was held responsible for the 8-inch howitzer, lent by General Stavely to aid in the siege of Shaou-hing, and generally to report what foundation there was for the statements in the Shanghai newspapers that the Paymaster of the *Encounter* was dangerously injured by an explosion of gunpowder at Shaou-hing, and that after the repulse of the second assault at Shaou-hing, Captain Dew visited Shanghai to obtain supplies of siege ammunition, and by his agency induced a body of European adventurers of all nations to proceed to Shaou-hing as military volunteers. He observed that the statements embraced in the question were not his own, but had appeared in a Shanghai newspaper.—Lord C. PAGET could assure the hon. and gallant gentleman that he should be very happy to give him any information that lay in his power with regard to the matters in question. The Government expected to receive a full report from the Commander-in-Chief on the Chinese station—Admiral Kuper—in reference to the circumstances connected with the death of Lieutenant Tinling, who was a young and meritorious officer. He might add that the Admiralty had no knowledge of an 8-inch howitzer, or any other gun, having been lent to a Chinese force. He might, moreover, state that he had, with the view of giving the hon and gallant gentleman every information he could on the subject, applied to the War-office, and that he had been informed by them that they had received no communication whatsoever, either official or private, to the effect that a gun had been lent to a Chinese force. It was not, he might observe, the intention of the Admiralty to give any orders at present on the subject.

THE ATTACK ON TRINGANU.

(5th.) Sir J. HAY said he should ask the House to consider the deplorable case of the attack on Tringanu on this day three weeks. He trusted that long before that time the Secretary of State would be able to attend to his duties in Parliament.

LIGHTHOUSE ON THE LITTLE BASSES ROCK, CEYLON.

(8th.) Mr. CHILDERS called attention to an item of £8,000 for a floating light on the Little Basses Rocks, Ceylon. These rocks were in the direct line of the steamers between Point de Galle and Madras, and as early as 1826 it was represented to the Government that they ought to be lighted. In 1848 the Government made up their minds to do something, and wrote to Ceylon for advice how lighthouses could be erected. Six years afterwards, in 1854, they got reports showing that floating lights were impracticable, and strongly recommending the building lighthouses on both the Basses Rocks, for the estimated sum of £4,500. In 1855 Parliament voted £3,000; in 1856, £17,000, and £6,000 for a steamer to carry the materials; in 1857, £8,000; in 1858, £10,000; and in 1859, £10,000, making a total of £54,000, for which there was never any other estimate than the one of £4,500. The lighthouse was not put up, and he saw it on the wharf at Point de Galle. In 1860 they were told that they could not put up a lighthouse, and that they must have a floating light, which was in the first instance condemned. Accordingly, in 1861, the House voted £8,000, and in 1862 £2,000 more, for a floating light. The money was not expended, and now they were asked to vote £8,000. There ought to be some limit to the credulity of the House, and he should move to strike out the £8,000, leaving the Government to bring some evidence next year whether a fixed or a floating light was the best and what money would really be required. He begged to move the reduction of the vote by £8,000.—Mr. AUGUSTUS SMITH thought Ceylon itself ought to pay for the lighthouse.—Mr. M. GIBSON said it was quite true that a great many errors had in former years been committed with respect to the erection of lighthouses on the Bass Rock. The engineers were deceived as to what was to be done, and a great deal of money had been thrown away. It had been considered by the most competent judges that the best mode of lighting the rock would be by means of a floating lightship. Now, he did think it would be unreasonable to charge Ceylon for the lightship, inasmuch as she was constructed rather for the protection of the general trade of this country than because of any special interest Ceylon had in the matter. It was, he thought, a duty which England owed to the world and to her own commerce to place lights on those barren islands in her possession, where necessary, for the purpose for preventing wrecks. Sir J. SHELLEY concurred with the right hon. gentleman in thinking it right that we should maintain lighthouses where required in our own possessions for the protection of ships and trade. He must, however, say that he believed the numerous mistakes which had occurred with reference to the erection of those buildings were to be attributed mainly to the fact that they were provided under the sanction of the Board of Trade, and not of a properly-constituted Board of Works.—Mr. PEEL reminded the committee that the sum of £8,000 was voted last year for the construction of the lightship in question. She had not been finished at the close of the financial year, and the money was not available for her construction. The present, therefore, was simply a re-vote.—Mr. CHILDERS said the vote was taken not last year, but the year before. The discussion was not continued, as there were not forty members in the House.

Legal.

THE CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA V. RICH.

This was an action against the defendant, late agent and manager of the company's bank at Bombay, for negligence in the discharge of his duties as such manager, and for lending their money to persons who were unsubstantial, and ought not to have been trusted, in violation of his instructions. The defendant now applied for power to inspect letters, books of account, &c., on which the plaintiffs founded their claim, it being argued that this was in accordance with the practice of Chancery. These documents were not like deeds, muniments of title or accounts, or the like, which showed the facts of the case on one side or the other, or on both, but were merely communications between the company and their agents abroad with a view to obtain information in support of their own case. Such communications could not be disclosed to the advantage and assistance of the opposite party. No authority went to that length, and this Court was not prepared to establish such a precedent. The object of the new procedure, no doubt, was to give the courts of common law the powers of courts of equity as to discovery; but there was no case to show that even in equity there could be such discovery.

THE FORGERY ON THE BANK OF HINDUSTAN.—Herbert Dawson Slade, aged thirty-one, who had been convicted of forging and uttering three bills of exchange, each for 3,000 rupees, and one cheque for the payment of £30, with intent to defraud the Bank of Hindustan, China, and Japan, has been sentenced to six years' penal servitude.

THE SUEZ CANAL.—Nubar Pacha, the new Egyptian Minister of Foreign Affairs, is expected from Alexandria during the coming or following week, to settle once for all on behalf of the Viceroy the question of the Suez Canal. The answers of the British and French Governments to the despatch of A'ali Pacha on the subject are looked for about the same time. It is likely, therefore, that in three weeks or a month this long-vexed "difficulty" will have received its solution. From the tone of the Porte's note, it is easy to forecast the probable nature of the settlement.

A NEWSPAPER in the English language, the *Rio Mail*, is now published in Rio de Janeiro.

Naval and Military.

The Geyser, paddle-steamer, has arrived at Portsmouth, with the military and naval supernumeraries and invalids from China and St. Helena, who arrived at Devonport on board Her Majesty's ship Sanspareil. They consisted of seven men of the 67th Regiment, twenty men of the 99th, three men of the 31st, two men of the Royal Engineers, two men of the Commissary Department, and eight women and children, under the command of Captain Townsend, of the 99th Regiment; one military prisoner, under sentence of penal servitude for life for killing a Chinese woman, and one for two years' imprisonment for striking his superior officer. The military invalids were forwarded to Netley Hospital, the naval to Her Majesty's ship Victory, and the military time-expired men to their respective depôts. The Geyser also brought from the Sanspareil fifty five non-commissioned officers and men of the Royal Artillery, under Lieut. Lloyd, who arrived home in the ship from St. Helena. They were landed and sent into temporary quarters at Portsmouth. Mr. George Penfold, paymaster of the Sanspareil, died on the passage from China.

Her Majesty's screw troopship Himalaya, Capt. Edward Lacy, arrived at Spithead on the 6th inst. from the Cape of Good Hope, with the 85th Regiment on board, and other military and naval passengers. The officers of the 85th on board comprise Col. G. W. Grey (commanding), wife, and two children; Major F. E. Appleyard, wife, and child; Capts. the Hon. J. G. Boyle, C. J. Harford, wife, and two children, W. Hallowes, wife, and one child, C. W. Hogge, D. H. Mytton, and W. H. Mathew; Lieuts. Finch White, H. M. Chichester, C. Doughty, W. C. Henderson, R. W. H. Noyes, G. H. Stace, C. C. Parkinson, and the Hon. F. H. A'Court; Ensigns G. R. S. Ramsbottom, J. Davison, F. C. Lewin, and Avory Webb; Lieut. and Adjt. W. H. Drage, wife, and one child; Surg. J. W. Johnstone, wife, and six children; Quartermaster W. H. Watts, wife, and one child; and Assist.-Surg. H. C. Herbert. The remaining military officers on board comprised Capt. Clarke, wife, and child, 2nd battalion 13th Foot to join regimental depot; and Capt. Cusack, late 24th Regiment, unattached. The naval officers on board were Lieut. Coldstream Robinson, invalided from H.M.S. Seringapatam; Mr. Maitland, master, invalided from H.M.S. Orestes; Mr. Albert Lew, paymaster, invalided from ditto; Mr. German, chief engineer, invalided from ditto; and Mr. Stack, gunner, invalided from H.M.S. Argus. The Himalaya sailed from Portsmouth on the 15th February last, with the 96th Regiment on board, for the Cape of Good Hope. At daylight on the 20th of February she sighted Madeira, and on the 24th anchored at St. Vincent to coal. From St. Vincent she sailed again on the 26th, and she arrived at Ascension on the 5th of March, sailing thence again on the following day, sighting St. Helena on the 9th, and arriving in Simon's Bay, Cape of Good Hope, on the 18th. Here the Himalaya coaled and awaited orders until the 26th of March, when she sailed for East London. She arrived there on the

Digitized by Google

28th, and disembarked on the following day the 96th Regiment, with which she had said from Portsmouth. She afterwards embarked the 2nd battalion of the 13th Regiment, with which she sailed for the Mauritius on the 31st of March. The Mauritius was reached on the 8th of April, when the 2nd battalion of the 13th were landed, and the 2nd battalion of the 5th Foot, which had been relieved by the 13th, were received on board. The Himalaya sailed on her return to the Cape on the 16th of April, arriving at Natal on the 23rd, where she disembarked the right wing of the regiment, and took on board the right wing of the 85th, leaving Natal on the 25th for East London, where she arrived on the 26th, exchanged the left wing of the 2nd battalion 5th Regiment for the left wing of the 85th, and proceeded on to Simon's Bay, where she arrived on the 29th of April. Coal and provisions having been filled up, the Himalaya commenced her homeward voyage to England on the 6th of May, and touched at St. Helena on the 14th—the passage from the Cape to St. Helena having been made under sail alone. She anchored at St. Vincent on the 24th for coal. On the 26th she finally got under way for England, and she anchored at Spithead about 3.30 P.M. on Saturday, having gone over a distance since leaving England in February last of 18,000 miles, and this with an average expenditure of under forty-eight tons of coals per diem when under steam. Such a service as this, we may safely assert, has never before been equalled. At St. Helena the Himalaya left Her Majesty's paddle sloop Sphinx, Commander Jones, on her way from China for England, to pay out of commission, completing with coal and provisions. Orders were received by the military authorities at Portsmouth, by telegram, to despatch the Himalaya on to Dover, where the 85th Regiment are for the present to be stationed. The Himalaya weighed her anchor at Spithead, and sailed in accordance with these orders.

Vice-Admiral Sir Michael Seymour, G.C.B., Port Admiral and Naval Commander-in-Chief at Portsmouth, entertained the heads of the military and naval departments of the port and garrison at a full dress dinner at the Admiralty-house, in celebration of Her Majesty's birthday.

The steam sloop Hydra, at Woolwich, about to take the place of the surveying ship Medina, Captain Spratt, C.B., in the Mediterranean, has been undocked, and will be shortly out of the shipwrights' hands, when she will be given over to the superintendence of Lieutenant Wilkinson, for the fitment of the new charthouse, and other peculiar arrangements necessary on board.

The Royal Oak, 35, screw iron-cased ship, 4,056 tons, 800-horse power, Capt. Frederick A. Campbell, has arrived at Sheerness from Folly Point. In taking up her moorings in the harbour she ran foul of the mooring lighter, and carried away some of her head gear, but as soon as the damage had been remedied she was swung for the adjustment of her compasses. Vice-Admiral Sir W. J. Hope Johnstone, Commander in-Chief at Sheerness, proceeded with his staff to inspect the vessel, and expressed himself much gratified with the admirable state of efficiency to which she had arrived, and with the zeal and activity displayed by her officers and crew.

The official Admiralty designs, prepared under the direction of Mr. Reed, for the re-construction of the wooden frigate Belvidera, 51, as an armour-plated frigate, have been received at Chatham Dockyard, and are now being copied to scale preparatory to the vessel being taken down and re-constructed under No. 7 shed, where preparations are making for commencing the work as soon as a sufficient number of hands are released from the other vessels now in progress. The statement that the Belvidera is to be converted into an armour-plated frigate, according to the plans of Mr. Laing, the master shipbuilder at Chatham, is not strictly correct. Although he prepared designs for the new vessel, they were not acted upon by the Admiralty. The Belvidera, as well as the whole of the five armour-plated frigates ordered to be built in accordance with the recent decision of the House of Commons, are to be constructed from the designs prepared by Mr. Reed.

It is stated that the Achilles will be ready to be floated out of the dock in which she is building during the month of September, or some three or four months earlier than was originally anticipated. One hundred and fifty of her armour-plates, or nearly one-half of the whole number, had been bolted to her sides. On the port and starboard quarters the plates are of a uniform thickness of 4½in., but in the less exposed portions plates varying from 4in. to 3in. will be used. The whole of the slabs of iron hitherto used have been prepared at the Park-gate Ironworks, Yorkshire, and are of rolled iron, which, besides being easier to work, is believed to possess several important advantages over the plates formed under the hammering process. Each plate is 15ft. in length by about 3ft. 3in. in width, but during the last few days several new kinds of plates have been received at the dockyard of a size much larger than any hitherto used at the establishment. These have all been subjected to the usual tests, which they have stood without showing any appreciable flaw.

The hired iron steam transport Samson, Capt. Gilley, went down to Woolwich Arsenal under orders to ship 868 tons of war stores, consisting of guns, shot, shell, and light goods, for Cape Coast Castle, West Coast of Africa. War stores are also about to be shipped from Woolwich for Toronto, Halifax, Trincomalee, Simon's Town, Auckland, the Cape of Good Hope, Corfu, Gibraltar, Malta, Hong Kong, and other British colonies and possessions.

The Resistance, 16, screw iron frigate, Capt. W. C. Chamberlain, in No. 10 dock at Portsmouth, was officially examined and reported upon by the master shipwright and his staff relative to the condition of her bottom plates, which when the ship was last in dock were coated on opposite sides with the composition of Mr. Hay, the chemical assistant at Portsmouth dockyard, and that of Messrs. Peacock and Buchan, as applied to the bottoms of the steamships of the Peninsular and Oriental Company. The ship has since then been afloat less than seven months, and, considering the time, both sides of her bottom are foul; one, however, is much more so than the other, and is also more covered with barnacles. The starboard side has long grass in the wash of the water-way at the bow and quarter, and the remainder of that side of the bottom is studded with small tufts of grass averaging one inch in length, and from three to four inches apart. There are also a few patches of barnacles where the composition has been disturbed, but in very few other places; and there are very few spots of corrosion. The port side has the same description and length of grass at the bow and quarter, and the same description of short tufts of grass, studded at about the same intervals, but it has more adhesive matter altogether than the opposite side. The surface of the composition from the keel to the bilge plates amidships is thickly studded with barnacles. This having been the working anchor's side, there is the usual amount of corrosion to be seen on the bow from the abrasion of the composition by the chain cable, which must always attend the use of copper anti-fouling compositions on the bottom of iron ships.

A letter received by our Chatham correspondent (*Times*) from on board the iron-clad frigate Royal Oak, describes the performance of that vessel in the run from Chatham to Spithead as being in the highest degree satisfactory. After leaving the Nore all the fires were lighted and the vessel was put at full speed, when, notwithstanding a strong head wind (force 5 to 7) and a heavy rolling sea, the iron-clad attained a speed of eleven knots an hour, and that, too, against a strong breeze. The Royal Oak's steering qualities are described as excellent. Although the sea broke completely over her bows in the run down channel, she exhibited scarcely any pitching or rolling. The ventilation of the ship gives the most complete satisfaction.

Monetary and Commercial.

CITY, THURSDAY, JUNE 11.

Biddings for £400,000 (instead of £600,000, as has been customary at this period of the month) in bills on India took place at the Bank of England. The proportions allotted were —to Calcutta, £220,000.; to Bombay, £160,000; and to Madras, £20,000. The declared minimum price was, as before, 1s. 11½d. per rupee on Calcutta, and 1s. 11¾d. on Bombay and Madras. The applications within the limits reached nearly £2,000,000. Tenders on Calcutta, at 1s. 11½d. will receive about 29 per cent., on Bombay at 2s. about 34 per cent., on Madras at 1s. 11¾d. about 36 per cent., and all above these prices in full.

The East Indian Railway Company have put forth a prospectus for the construction, without a Government guarantee, of an auxiliary loop line of 120 miles between their stations at Barakur and Luckieserai. The main object is to develop a coal district, whence it has become essential for the company to obtain supplies, and at the same time to open an additional channel for the main traffic to the upper part of the Ganges, which will obviate the future necessity of doubling the existing line. As the proposed loop will run along the base of the angle formed by the present railway between Burdwan and Luckieserai it will shorten by 60 miles the distance to Luckieserai and all stations beyond it. The capital of the Auxiliary Company will be £1,200,000, in shares of £20, and the undertaking will technically be entirely distinct from the East Indian Company, although it is contemplated that the capital should be subscribed rateably by the East Indian proprietors, and that the whole system should thus be worked for one body. A good revenue is expected to be obtained from the coal-fields, and certain concessions and subventions, which have hitherto been accorded to encourage companies willing to undertake railways in India without a guarantee, will be applied for, and are expected in regular course to be obtained.

Mauritius Government 6 per cent Debentures for £400,000 are about to be offered to public competition by Her Majesty's Agents-general for Crown colonies. This forms the second instalment of the loan of £1,000,000, authorised by an ordinance of the 29th April, 1862, for the construction of railways in the colony, the first portion of which, amounting to £200,000, was placed on the London market on the 8th November last. The railways are said to be in favourable progress, and the contractors, Messrs. Brassey and Wythes, expect to have the first section ready for opening during the present summer.

The owners of the steam line between this country and the Mexican port of Matamoras have discontinued the service pending the decision of the British Government respecting the late seizures by the United States cruisers. In this way a large trade is left open to be monopolised at New York and Boston, who are known to be active in its prosecution, and the commercial interests of the country are damaged at a time when it is more than ever important that every legal outlet should be made available in order to compensate for the circumstances by which the industry of Lancashire is affected.

More than £300,000 having been subscribed to the Atlantic Telegraph Company for a new attempt to connect the two hemispheres, letters of allotment were to-day issued by the directors.

From Buenos Ayres it is stated that the inauguration of the works of the Rosario and Corboda Railway, which is to be constructed by Mr. Wheelwright, took place on the 20th of April, in the presence of President Mitre. The passenger traffic on the portion of the Northern Railway already opened continued

Digitized by Google

to be very satisfactory. The questions in relation to the Southern line were still unsettled, but it was thought they would soon be adjusted in favour of the company. The election of Governor of the province of Buenos Ayres was fixed for the 2nd of May, and Senor Saavedra, the present Governor, being popular, was thought likely to be re-elected if some doubts about the legality of a re-election could be overcome.

At the meeting of the Peninsular and Oriental Steam Navigation Company the directors' report (which will be found in another column), recommending the usual half-yearly dividend of 3½ per cent., and an additional payment of 1½ per cent., was adopted.

At a meeting of the Hong Kong and China Gas Company (Limited), held on the 1st of June, the report, already published, was adopted.

The following satisfactory statement relative to the progress of the Turkish revenue is from the *Levant Herald* of the 20th inst.:—

"The budget still remains in the portfolio of the Minister of Finance; we are assured, however, that it will circumstantially show an effective revenue of £15,000,000, as against 10,000,000 for 1859. A week or ten days at most will probably enable us to test the worth of these figures. In the meantime we are able to give official news of the metropolitan customs returns for the quarter ending March 13. For January the receipts were, exclusive of the spirit and tobacco duties, 4,295,758p., as against 1,327,299p. for the corresponding month of the preceding year, or an increase of 227 per cent. For February they were 4,385,614p., against 1,664,958p. for the same month of 1862, or an improvement of 162 per cent. The receipts of March were 4,975,477p., as compared with 2,734,093p. for February, 1862, being an increase of about 81 per cent. These returns amply bear out all we have said as to the snbstantial augmentation in this branch of the Malieh's income, and go far to explain the improvement in the gross revenue of the year."

The new Venezuelan loan of £1,000,000 at the price of 60, and which it was said was deferred for a short period, has now been brought forward under the immediate sanction of Messrs. Matheson and Co. and Messrs. Smith, Payne, and Smiths.

The exports from London, Liverpool, and the Clyde to the undermentioned ports, from May 17th to June 2nd, were as follows:—

To SHANGHAI:—Plain cottons, 1,198,610 yards; coloured cottons, 87,000 yards; printed cottons, 12,000 yards.

To HONG KONG.—Plain cottons, 959,224 yards; coloured cottons, 176,531 yards; twist, 120,400 lbs.

To SINGAPORE.—Plain cottons, 1,614,229 yards; coloured cottons, 451,823 yards; printed cottons, 67,002 yards; twist, 105,700 lbs.

To BATAVIA.—Plain cottons, 3,360 yards.

To CEYLON.—Plain cottons, 661,300 yards; coloured cottons, 17,220 yards; printed cottons, 166,811 yards.

BOARD OF TRADE RETURNS.

The Board of Trade returns, for the month endiug April 30, have made their appearance. The following were the exportations to the Far East in that period:—

To CHINA.—Cotton Yarns: The quantity exported in April last amounted to 57,860 lbs., against 422,180 lbs. in April, 1862, and 738,600 lbs. in April, 1861; the amount exported in the first four months of this year was 261,270 lbs., against 1,711,029 lbs. in 1862, and 3,762,610 lbs. in 1861. The value of the export in April last was £5,705, against £29,766 in April, 1862, and £34,424 in April, 1861. Cotton Goods: The quantity exported in April last reached 2,778,951 lbs., against 12,948,863 lbs. in April, 1862, and 22,822,215 lbs. in April, 1861 the value of the export of April was £68,567, against £197,349 for April, 1862. and £289,233 for April, 1861. Woollen and Worsted Manufactures: Exported in April last 201,157 yards, against 244,696 yards in April, 1862, and 316,368 yards in April, 1861; value of export for April last £28,894, against £30,587 for April, 1862, and £39,546 for April, 1861; exported in the four months ending 30th April, 623,077 yards of the value of £102,317, against 244,696 yards, of the value of £87,303, in the corresponding period of 1862, and 1,498,888 yards, of the value of £187,361 in the first four months of 1861. Worsted Stuffs: Exported in April last, 308,267 yards, against 577,437 yards in April, 1862, and 610,456 yards in April, 1861; and in the first four months of this year 2,189,073 yards, against 1,966,630 yards in the corresponding period of 1862, and 1,925,532 yards in the first four months of 1861. The value of the export for April last was £27,175, against £28,586 in 1862, and £46,519 in 1861. Lead: Exported in April last, 963 tons of the value of £20,505, against 22 tons of the value of £13,481 in April, 1862, and 367 tons of the value of £7,843 in April, 1861; total export for the first four months of this year, 5,192 tons, against 1,901 tons in the corresponding period of 1862, and 2,087 tons in the first four months of 1861.

To PHILIPPINE ISLANDS.—Cotton Goods: Exported in April last, 1,555,604 yards, against 1,759,514 yards in April, 1862, and 2,508,586 yards in April, 1861, and in the four months ending 30th April, 3,201,355 yards in 1868, against 5,148,699 yards in 1862, and 14,945,781 yards in 1861; the value of the quantity exported in April last was £39,842, against £32,872 in April, 1862, and £42,514 in April, 1861.

To JAVA.—Cotton Goods: The quantity exported in April last is not specially given in these returns, but the total for the four months is stated at 1,321,596 yards, against 10,118,198 yards in 1862, and 16,174,302 yards in the first four months of 1861; the value of these quantities being for 1863 £32,444, for 1862 £188,068, and for 1863 £251,268.

To CEYLON.—Cotton Yarn: Exported in April last 44,000 lbs., against 20,500 in April, 1862, making for the first four months o this year a total export of 118,000 lbs., against 137,750 lbs. in the corresponding period of 1862, and 76,350 lbs. in the first four months of 1861; the value of the export for April last was £5,200, against £1,700 in 1861.

The amount of bullion by the P. and O. Co.'s steamer *Ripon*, from Southampton on the 4th inst., was, in gold:—To Madras, £2,927. In silver:—To Madras, £17,000; to Singapore, £18,250; to Hong Kong, £63,370; to Shanghai, £175,760. Total in gold, £2,927; in silver, £274,380.

ARTICLES OF IMPORT.

TEA.—Our market has lately been very dull and the amount of transactions smaller than for any previous month this year; the demand from the trade and exporters generally having been very limited, and prices for medium descriptions of Congou have given way, the quantity on offer being large, whilst those under 1s. 4d. and over 2s. per lb. have been better supported owing to their being in less abundant supply. It is satisfactory to observe that the deliveries continue on a very large scale, both for export and home consumption; the clearances from the London warehouses for last month were almost eleven million pounds, whilst those for April amounted to nearly ten millions, so that should they be continued on anything like this scale, the supplies from China will all be wanted, as the quantity now afloat is very little more than sufficient for two months' deliveries on such a sale. Low and dusty kinds of Congou have met with a fair demand, but latterly prices have ruled rather in favour of buyers; those with leaf maintain about former value. Good common remains firm at 1s. 1½d. to 1s. 2d. per lb. Fair flavoury kinds show but little alteration. Fair Kaisow kinds have sold fully 1d. per lb. lower. Fair to good Ho-hows, and Ning-chows, also second class Honams, Monings, and Wopaks have been freely offered, and sales latterly show a reduction of 1d. to 1½d. per lb. on last month's quotations. Good to fine Kaisows, also Monings and Wopaks, although in limited demand. have been firmly held, and previous prices fully supported. Some fair Tayshans of new import have been sold at 1s. 1d. per lb.; good to fine have realised full prices for small quantities. Common to fair Oolongs show no alteration; good to fine have been rather more wanted. Souchongs have only been in limited demand, and prices have ruled rather easier. In Flowery Pekoes transactions have been small, and prices irregular. Common to fair Scented Capers, of Canton make, show no alteration, being difficult of sale; good to fine have been rather more in request; as also the medium Foo-Chow kinds. Canton-make Scented Orange Pekoes have not been so readily saleable; good Foo-Chow kinds maintain the late advance, and fine have been more enquired for. Uncoloured Japans up to 1s. 6d. per lb. continue in request. Sales of Assam and Indian tea will take place to-morrow. In Green teas there has been a fair amount of business, the arrivals have been large, and generally put on the market. Common Young Hysons still remain difficult of sale, and lower prices have been established, especially for common Japan kinds; good to fine have been more in demand, and prices have been fully supported, especially for Moyune kinds. Common to fair Hysons have been difficult of sale, and owing to larger supplies good to fine have given way in price to the extent of 1d. to 2d. per lb. Imperials have sold at full rates. Common to fair Gunpowders have sold to some extent, latterly, however, prices have rather given way. Good to fine Ping Sueys have sold freely up to 3s. 10d. per lb. for No. 1; good to fine Moyune kinds have also sold with spirit at from 2s. 10d. to 3s. 8d. per lb., the latter price, however, only for very small lots of extra superfine, but the last few days it has been difficult to obtain these prices. Fair to good Canton-make Gunpowders have sold at former prices, but Young Hysons continue neglected, and only saleable at very low rates. There has been only one public sale, comprising 44,250 packages, of which 13,199 packages were sold, including 10,209 packages offered without reserve.

SILK.—We have to report a month of very limited business in silk. At one moment considerable fears were entertained that the European crop, which in the early stages had appeared all favourable, was going badly, but this produced no great effect—the feeling was too short lived. Some slight disposition was manifested to buy at the lowest prices previously established, but any attempt to obtain improved prices was determinedly resisted, so that the only real effect was to check the fall which had been going on tardily but continuously for some weeks. During the last fortnight we have had more or less alternation of hope and fear as to the

Digitized by Google

rop, but at the present moment the balance of feeling is clearly in favour of the result being a decided improvement upon the last few years. One hing is certain; it is very generally expected that there will be material reduction in cost. Trade is unfortunately so bad that consumers are more or less indifferent as to these little fluctuations of feeling. The arrivals of the month have not been large, but the deliveries have been very small, hence the stock shows a slight increase, and is, in reality, considerable; especially of Japan silk; and it is this class particularly that feels the influence of the expectations as to European crop. The next periodical public sales are fixed to commence on the 24th instant. At New York the following are the quotations:—Re-reeled Canton Cumchook, Nos. 1 and 2, $8.25 to $8.50; Long Reel Canton, No. 3, $5.00; Japan, $8.00 to 10.00; Tsatlees, No. 1 to 2, $10.00 to 10.50; do., Hong, $9.00 to 9.50; Taysams, usual reel, No. 1 to 2, $8.50 to 9.00; do., No. 3 to 4, $7.25 to 8.00; do., re-reeled, A 1, none.

SUGAR.—The better demand which prevailed at the date of our last issue was followed by greater activity at the opening on the 2nd inst., and this having since been well maintained, a large business has been done at rates mostly showing an advance on those previously current. The transactions reported by private contract are of moderate extent, embracing 9,000 bags Clayed Manilla at 31s. 3d., and 330 hhds., 442 bags and barrels Surinam, the hhds. 32s. to 33s., bags 32s. The parcels brought forward by auction were as follows:—13,775 bags Unclayed Manilla, which were bought in at 28s. 6d. to 29s., but since placed at 28s. to 28s. 9d. At public sale on the 5th inst. 1,464 bags Gurpattah Bengal were all realised, fine brown to low yellow 32s. to 33s. 6d.; but of 2,897 bags Native Madras only about one-third was sold at and afterwards, ordinary brown to low yellow 28s. 6d. to 31s. 6d. Current quotations are:—Bengal, Crystallised, 24s. to 27s.; Benares, 22s. 6d. to 27s. 6d.; Date, 19s. 6d. to 24s. 6d.; ordinary to fine brown, 13s. to 19s. Penang, grey and white, 23s. 6d. to 25s. 6d.; brown and yellow, 15s. 6d. to 23s. Madras, Grocery, grainy yellow and white, 21s. to 26s. 6d.; Native, brown and yellow, 15s. to 19s.; Jaggery, 14s. to 15s. Siam and China, white, 22s. 6d. to 26s. 6d.; brown and yellow, 14s. 6d. to 22s. Manila, Clayed, brown and yellow, 18s. to 19s. 6d.; Muscovade, 15s. to 16s. Java, grey and white, 23s. 6d. to 27s.; brown and yellow, 15s. to 23s.

COFFEE.—Ceylon: The public sales of plantation, comprising 1,066 casks, 862 barrels and bags, have gone off with increased spirit as quoted; fine ordinary to low middling 82s. 6d. to 87s. 6d.; middling to good middling 88s. to 93s.; fine up to 103s. Native also has experienced a similar reduction, but the whole of 19 casks, 1,812 barrels and bags was disposed of, small 71s. 6d., good ordinary 72s. to 73s., superior 75s. 6d. On the 15th inst., a liberal supply of Ceylon was offered by auction, amounting to 833 casks, 172 barrels and bags plantation, and 191 casks, 2,370 bags native, which were taken off with more freedom at fully the rates above quoted. Mocha: 122 packages at auction were held firmly and withdrawn. East India: At public sale 143 bags, even pale Manila were sold at 75s. 6d. to 76s., as also 300 bags Singapore privately at 75s. We quote Mocha: ungarbled 60s. to 78s.; garbled, com. to good 80s. to 97s.; fine 98s. to 105s. Ceylon: Native, good ordinary to fine 71s. 6d. to 75s. 6d.; ordinary 68s. to 70s. 6d.; plantation, ordinary to fine ordinary 73s. to 82s.; fine fine ordinary to middling 82s. 6d. to 88s. 6d.; good middling to fine 89s. 6d. to 102s. Java: 67s. to 93s. Singapore: ordinary and good ordinary 60s. to 75s. Sumatra and Padang: 59s. to 74s. Madras and Tellicherry: 72s. to 102s.; Malabar and Mysore: good ordinary 74s. to 75s.; fine ordinary to fine 76s. to 103s.

RICE.—The general appearance of the market remains unaltered, cargo sorts being well supported, while the white qualities must be quoted rather cheaper. Only about 13,000 bags have been sold privately, ordinary cargo, Bengal, 8s. 3d.; low Nakrenzie, 7s.; and fine Rangoon, 11s. At public sale, 6,343 bags Bengal were barely half disposed of as follows:—Middling to good Ballam, 8s. 6d. to 9s.; good new pearly white, 14s. to 14s. 6d.; 1,857 bags damaged Madras went at 7s. 6d. to 10s. 6d.; 980 bags ordinary Arracan were bought in. On the 5th inst., 2,122 bags white Bengal, in public sale, were withdrawn, but a portion is supposed to have been since sold on moderate terms. We quote:—Bengal, white 9s. to 15s. 6d.; cargo 8s. to 9s. 3d.; Madras, 10s. to 12s.; Arracan, Rangoon, &c, 7s. to 11s.; Java, 10s. to 21s.

SAGO.—This is in fair demand, and the bulk of 1,352 boxes, at auction, was taken off at, and subsequently: Fair to good small Pearl, 19s. to 19s. 6d.; fine medium, 19s. 6d.; good, 18s. 6d. to 19s.; and large grain at 18s. Quotation for Pearl is 16s. to 21s. per cwt. Sago Flour: Business in this article has been comparatively unimportant. Current rates, 13s. to 14s. per cwt.

SPICES.—Pepper: By auction 2,279 bags of Penang have been offered, and realised at and afterwards, at rather lower prices; fair West Coast 3⅜d., and Trang 3⅝d.; privately, however, small sales have been effected at previous rates, Singapore 3⅜d. to 3 13-16d., and Penang 3⅜d. to 3½d. White.—139 bags of middling Penang were taken at 5⅛d. to 5¼d., but of 1,177 bags of Singapore only a trifling portion, fair quality, was sold at 5⅜d. to 5½d., which is ⅛d. per lb. cheaper than the last sale; the remainder was withdrawn. We quote Malabar, &c., 3¾d. to 4¼d.; Eastern, 3¾d. to 4d.; White, 5d. to 1s. 2d. per lb. Pimento: 708 bags at public sale were all taken off, but at barely the former value; ordinary to good, 2⅝d. to 3d. per lb. Current quotation, 2½d. to 3d. Cassia Lignea: Nothing of moment has occurred. Cloves: Retail lots of Zanzibar have been placed by private contract at 3½d. to 3¾d. 13 cases of good bright Penang sold at a rather material reduction, viz., at 1s. 2½d. per lb. 247 bags of Zanzibar Cloves were disposed of at about former prices, dark to good 3⅝d. to 3¾d. We quote Amboyna and Bencoolen 4d. to 1s. 3d., Zanzibar and Bourbon 3¼d. to 4½d. per lb. Ginger: At public sale 30 cases of middling Cochin found buyers at 75s. to 77s. We quote East India, common, 66s. to 67s. per cwt.; East India, Cochin and Calicut, 68s. to 135s. per cwt. Cinnamon: Current quotations are Ceylon: 1, 2, 3, 11d. to 2s. 6d.; Malabar and Tellicherry, 7d. to 1s. per lb. Nutmegs: These have gone off steadily, 98 cases being nearly all sold; small to good middling, 11d. to 1s. 4d.; bold, 3s. 4d.; also 17 casks of Dutch, partly limed, at 9d. to 10d. 23 cases of middling and fair red Mace were half realised at 11d. to 1s. Our quotations are 6d. to 4s. per lb.

SALTPETRE.—We are still unable to notice any improvement in the market, and only limited transactions have been reported at the following rates: 9 to 7½ per cent. refraction of Bengal 36s. to 38s. 6d., and 5½ to 5 per cent. at 37s. 6d. Nitrate of Soda: A floating cargo of 350 tons has been sold for arrival at Liverpool at 12s. 9d. per cwt. Current quotations are: Bengal, 36s. to 38s., Bombay and Madras, 33s. to 36s. 6d.

COTTON.—The market has been quiet this week, and prices are barely sustained, the total business being 2,700 bales; fair Kurrachee (Surat) 14d., middling fair Compta to middling fair Broach 16½d. to 17⅛d., middling fair to very good Tinnivelli Madras 13½d. to 17⅝d., fair Western 17¼d. to 18d., and Coconada 17d. to 17¼d. Only 300 bales have been sold for arrival. Our quotations are, for Madras, 1s. 3d. to 1s. 6⅜d.; Surat, 1s. 1d. to 1s. 7½d.

HEMP.—Jute: £19 to £29 per ton. Transactions since our last very important; of 15,624 bales at auction four-fifths sold, generally at 10s. to 15s. per ton improvement, prices ranging from £18. 15s. to £29. 2s. 6d. for common to fine; business to a fair extent also done privately. Arrivals and sales advertised. Manilla: Current quality, £23 to £26 per ton, in increased demand, and rather dearer; of 2,500 bales at auction two-thirds sold, mainly at £24 to £25. 7s. 6d. per ton for ordinary to good roping. Sales advertised. Sunn: £15 to £30 per ton; very firm; auctions confined to 272 bales Bombay, sold at £24. 5s. to £28. 15s. per ton. Arrivals, and sales advertised.

TIN.—The improvement reported in our last has continued; prices rising rapidly, and operations on the spot and for arrival very large. The market remains firm. We quote Banca, £134 to £135 per ton; Straits, £128 to £130 per ton.

JAPAN WAX.—Block quiet, and 78 boxes at auction retired. Saucers cheaper, and of 65 boxes at auction, about one-fourth sold at 74s. per cwt. for good. Sales advertised. Quotation, 62s. to 75 per cwt.

MISCELLANEOUS.—Rum: A quiet tone continues to pervade the market, though the business done is at steady rates, including 300 hhds. Tapioca: 108 barrels fair Bahia were disposed of in public sale at 1¾d. per lb. Cocoa: In auction 232 bags Surinam. Aloes: Soccotrine and hepatic, £3 to £15 per cwt.; nothing doing. Cardamoms: Malabar 5s. to 7s. per lb.; flat. Castor oil: 4¼d. to 4⅜d. per lb. Cocculus Indicus: 9s. to 12s. per cwt.; nothing doing. Galls: blue, 100s. to 110s. per cwt.; sorts, 70s. to 85s.; scarce; Japan and China, 45s. to 70s. Gum Ammonicum: drop 90s. to 130s. per cwt.; Block, 30s. to 70s. Animi: first size, £8 to £10. 10s.; second and third size, £5. 40s. to £7. 10s.; partially scraped £2 to £5. 10s. Arabic: picked, 32s. to 57s.; sorts, 25s. to 35s. Assafœtida: drop, 100s. to 120s.; block, 25s. to 90s. Kino £10 to £14. Myrrh: first quality, £9 to £11. 10s.; second quality, £4 to £8. Olibanum: white, 70s. to 80s.; reddish, 50s. to 65s.; pickings, 15s. to 40s.; operations in all these gums restricted. Madder roots 23s. to 25s. per cwt.; steady. Senna: 2½d. to 6d. per lb.; arrivals. Seed.—Linseed: 72s. to 74s. per qr.; market firm, and good demand. Rapeseed: 64s. to 70s. per qr.; flat. Guzerat: 78s. to 76s. per qr. Mother-o'-Pearl Shells: 25s. to 64s. per cwt. Elephants' Teeth: 70 lbs. and upwards, £33 to £39; 40 to 60 lbs., £31 to £38; 20 to 40 lbs., £27 to £33; scrivelloes, £12 to £32; ball, cut, £43 to £55; ball, uncut, £23 to £43; hollows, £13 to £30; points and tips, £14 to £34. Sea Horse: 4 lbs. and upwards, 4s. to 11s.; 3 lbs. and upwards, 2s. to 5s.; 1 to 2 lbs., 9d. to 2s. Nothing doing. Tortoise-shell: 6s. to 20s. per lb. Beeswax: White, £10 to £11; yellow, £7 to £8 per cwt.; sales advertised. Ebony Wood: £6 to £13 per ton; steady. Myrabolanes: 11s. to 14s. per cwt.; firm. Red Saunders Wood, £7 to £7 5s. per ton. Tumeric: 25s. to 30s. per cwt. Horns: Buffalo, 23s. to 45s. per cwt.; tips, 25s. to 35s.; deer, 27s. to 55s.; auctions limited; arrivals. Nux Vomica: 9s. to 12s. 6d. per cwt. firm. Safflower: Good to fine, £6 to £7 per cwt.; inferior to middling, £3. 10s. to £5; sells irregularly; averages former terms. Shellac: Orange, 160s. to 180s.; garnet, 140s. to 150s.; liver, 140s. to 160s.; block, 90s. to 150s. per cwt.; good business done at reduced rates. Blacklead: 6s. to 24s.; fine quality scarce and wanted. Camphor: China and Japan, £7 to £7. 5s.; more business done. Cassia Lignea: 1st, 2nd, and 3rd quality, 85s. to 92s.; dearer. Buds: 260s. to 280s. Cocoanut Oil: Cochin, £48 to 50; Ceylon, £45 to 48; Sydney, £43 to 45 per ton. Rates lower; fair business done. Cubebs: £5. 5s. to £5. 15s. per cwt. Quiet. Dragon's-blood: In reeds, £10 to 14; in lumps, £4 to £9 per cwt. Cheaper; arrivals and sales advertised. Galangal Root: 21s. to 24s. per cwt. Cheaper; arrivals and sales advertised. Gum Benjamin, Sumatra: 1st quality, £15 to 16; 2nd quality, £11 to 14; 3rd quality, £6 to 10; 4th quality, £1 to 5. Steady; sales at lower rates. Damer: 35s. to 52s. Gamboge: Picked, £8 to 10; in sorts, £4 to 7. Firm; business moderate. Gutta-percha: 1s. 4d. to 2s. 6d. per lb, Firm, with enquiry. India-rubber: 1s. 3d. to 1s. 6d. Mace: 1st quality, 1s. 8d. to 2s. 3d. per lb.; 2nd quality, 9d. to 1s. 2d. per lb. Dearer. Musk: 1st quality, 23s. to 28s. per ounce; lower qualities, 12s. to 21s. per ounce. Business extremely limited.

Digitized by Google

Oil of Anniseed: 5s. 10d. to 5s. 11d. per lb.; increased demand; prices advancing. Cajaputa: 1½d. to 2d. per oz.; cheaper. Cassia: 7s. 9d. to 7s. 10d. per lb.; fair business on previous terms. Rattans: 3s. to 10s. per 100; firm. Rhubarb: Dutch, trimmed, 4s. to 6s.; common, flat, 2s. to 4s. 9d.; round, 1s. 9d. to 4s. 6d. per lb.; 2d. per lb. lower. Sapan Wood: Bemah, £5 to £8; Siam, £8 to £11 per ton; steady. Soy: 2s. 5d. to 2s. 7d. per gallon; flat. Star Anniseeds: 100s. to 105s. per cwt.; scarce; much wanted. Sticklak: Siam, 60s. to 85s. per cwt.; brings fully former terms. Terra Japonica: Cutch, Pegue, 24s. to 26s. 6d. per cwt.; flat. Gambier, 20s. to 22s. per cwt.; cheaper.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 5s. to £6. 10s.; nail rods, £7 to £7. 5s.; hoops, £8. 5s. to £8 10s.; sheets, single, £9. 10s. to £9. 15s.; Staffordshire bars, £7. 10s. to £8; rails, £5. 10s. to £6.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and sheathing, £96 per ton; yellow metal, 8¼d. to 8½d. per lb.

TIN.—122s. for block; 123s. for bar. Tin plates, best charcoal, I.C. 28s. 6d. to 29s. 6d. per box.

LEAD, &c.—English pig, £20. 10s. to £20. 12s. 6d.; shot, patent, £23. 10s.; sheet, £21. 10s.; spelter, £17. 15s. to £17. 17s. 6d.; zinc, English sheet, £23. 5s.; quicksilver, £7 per bottle.

The following is from the circular of Messrs. French and Smith:—

IRON.—The makers have had a fair demand for English iron. Staffordshire, good brands have also been in demand. Rails are rather higher. In Scotch Pig the fluctuations in value have been unusually small.—In COPPER there has been nothing of importance to notice. Prices have been maintained with but a moderate business. TIN.—A very large business has been done in this article during the past month, especially in Banca and Straits. English has not been so much inquired for, but the advance in foreign has caused an advance in English of 3s. per cwt. on common, and 4s. per cwt. on refined; this advance was declared on the 25th ult. Straits began to move about three weeks ago, and the price has been steadily advancing, and is now firm at 127s. 6d. cash, 130s. three months prompt, at which business has been transacted. £132 was offered yesterday for a fine parcel afloat, but was refused. There are, however, small parcels still obtainable afloat at a little lower rate. The Dutch annual sale of Banca is announced for the 24th June next, and is to consist of 103,300, with liberty to add 20,000 slabs more should they arrive in time; it is not, however, probable that above 10,000 slabs will arrive in time, so that the annual sale will be smaller than for many years past, and in that case there is no doubt that the price will be high.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton during the present year by the P. and O. Company's mail steamers.

MANCHESTER MARKETS.

The Manchester yarn and cloth market has been dull and inactive throughout the week. There has been rather more inquiry during the last few days, with a less depressed feeling, but it does not lead to much business. There have been three causes of dulness and depression. One is the uncertainty created by the latest intelligence from America as to the fate of Vicksburg; another is the unfavourable advices from India and China, where the markets are represented by the last three mails as dull and declining; and the third is the large arrivals of cotton during the week, amounting to 80,769 bales, of which not less than 24,000 are American, Brazil, Egyptian, and West Indian—or a description most needed by spinners. These arrivals bring up the stock to 371,000, against 324,000 at the same time last year. In addition to this actual replenishment of stocks, and considerable quantities of cotton on the way from Bombay, there was news by the last mail from America of a probable considerable quantity of American cotton being liberated by the pending struggle on the Mississippi, and hence the disposition here to await news from the seat of war before entering into fresh engagements. There is some business doing for most markets, but it is of a retail character. The leading manufacturers and spinners are very firm in prices, holding heavy contracts and no stores, but there is a disposition among others to give way a fraction to effect sales. Practically, therefore, the market is slightly easier, but any resumption of business, even on a moderate scale, would probably restore firmness. There is evidently much timidity and lack of confidence among buyers, and especially among such of them as ship to India and China.

The circular of Sam Mendel quotes Grey Shirtings, 8 lbs., 17s 6d.; 9 lbs., 20s.; 10 lbs., 23s.; T-Cloths, 11s. 9d.; White Spot Shirtings, 18s.; White Brocades, 18s. 3d.; Damasks, 31s. 9d.; Maddapollams, 6s. 9d.; Cotton Yarn, 16-24, 2s. 2d.

FREIGHTS AND CHARTERS.

There is little animation in outward freights, and the market is fairly supplied with tonnage. Coal freights are without alteration, but a good demand exists at present rates for Galle and Hong Kong. In homeward freights little is doing, except for vessels to load next season at the rice ports, and from moderate sized ships from Manila, for both of which freights are firm.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 42s. 6d. meast. To Nagasaki: 65s. To Hankow: 65s. weight, 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. measurement. To Shanghai: 50s. weight, 30s. measurement. To Hong Kong: 40s. weight, 35s. measurement. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. to 35s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £41 and £2. For Shanghai: £51 and £2. 10s. For Manila: £1. 10s. For the Philippine Islands, Penay, or Zebu: £2. For Singapore: £26 and £1. 4s. For Penang: £24. For Galle: £27 and £1. 6s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have invited tenders for the conveyance of six tons of medical comforts to Singapore from the River Thames.

CASUALTIES.

The Robert Mills (barque), Barker, from Sourabaya for Falmouth, ran ashore on Blue Berg beach, Cape of Good Hope, April 16, but came off next tide with slight damage.

The Prins van Orange, Hensing, from Banjoewangie to Rotterdam, had put into Simon's Bay previous to March 28, very leaky, having experienced bad weather off Mauritius; she would have to discharge.

Bremerhaven, May 28.—The Johan Lange, Bremen ship, Lambe, from Batavia, which grounded on the bar at Brinkamas Hof, near this harbour on the 25th inst., got afloat and was towed in this harbour last evening.

Capetown, April 11.—The Willem de Zwyger (barque), of Rotterdam, V. Dries, from Pasaroeang to Amsterdam, was wrecked on Martha's Point, east of Stray's Bay, on the morning on March 30. Crew saved, cargo lost.

The Adelaide, from Cardiff from Shanghai, has arrived at Bahia, with loss of maintopmast.

The Dorcas Prince and Union Jack (American ships), both from New York to Shanghai, have been captured and destroyed by the Confederate steamer Alabama.

The Whampoa, Metz, from Tjilatjap to Rotterdam, which arrived at Helvoet 29th May, had been on shore on the South Pampus, but floated off again.

The Euterpe, Kuipers, which arrived off the Start June 1, from Sourabaya to Rotterdam, is reported as rather leaky.

The Polmaise, Gladstone, which arrived at London June 2, from Foo-chow-Foo, reports that on the 19th of May, in lat. 45 N., long. 20 W., she experienced a gale from N.E. veering to E., which lasted with great violence for three days.

The Jan de Witt, Dutch ship, Juyt, which sailed from Batavia on the 12th Oct. last for Holland, and was spoken on the 2nd Nov. in lat. 26 S., long. 59 E., has not since been heard of.

The Ann Powell, which arrived at Falmouth June 5 had taken on the 27th April twelve chests tea, all more or less damaged from the Oneida, from China to New York, which vessel had been burnt by the Confederate steamer Florida.

The City of Durham, from Foo-chow-Foo, which arrived in the Downs on the morning of June 6, came into collision with the Kate Kearney and damaged her quarter, and had to slip from an anchor and chain.

At MADEIRA.—May 6, Tien-tsin Chinese gunboat, from Falmouth, and left 9th for China.

At ST. HELENA.—April 13, Appelina, Weighill, from Shanghai; 12, Radnagore, from Shanghai for London; 14, Eunomia, Gronow, from Sourabaya, and sailed for Falmouth; Admiral de Ruyter, Mollinger, from Sourabaya, and Clio, Wynmelen, from Java, and both sailed 15 for Amsterdam; 15, Pollux, Cruys, from Java, and sailed for Amsterdam; Diedrich Pentzien, Voss, from Ceylon, and sailed 16 for London; 16, Johan, Melchior Kemper, Salm, from Banjoewangie, and sailed for Amsterdam; Maria Anna, V. Monnem, from Batavia, and sailed for Rotterdam; Amsterdam, Doeckizen, from Banjoewangie, and sailed 18 for Amsterdam; Trebizond, Pearson, from Shanghai, and sailed for Montreal; 23, Alpaca, Robinson, from Japan, and sailed 24 for London; 27, Geelong, Wallace, from Shanghai, and sailed 28 for Liverpool; 29, Willem Daniel, Zeylstra, from Banjoewangie, and sailed 30 for Amsterdam; 30, Oriental, Macey, from Shanghai, and sailed for Liverpool; May 1, Gorilla, Robertson, from Shanghai, and sailed for Liverpool; 3, Commodore, Baira, from Manila, and sailed 4 for London; 4, Patrician, Pain, from Foo-chow-Foo, and sailed for London; Fokien, str., Walker, from Clyde, and sailed for Cape, Singapore, and China; 7, Yaanstroon, Schaaf, from Batavia, and sailed for Amsterdam; Monitor, Almgren, from Batavia, and sailed 8 for Amsterdam; 8, H.M. str. Renard, from Singapore and Cape, and sailed for England; 9, Sharpshooter, Porter, from Ningpo, and sailed for Liverpool; Chaturanga Blyth, from Singapore, and sailed for London; 10, Lord Raglan, Gillespie, from Shanghai, and sailed 11th for London; 11, Drie Gebroeders, Kramer, from Sourabaya, and sailed 13th for Amsterdam, H.M. str. Sphynx, from China, &c, Medea Laurens, from Banjoewangie, and sailed 12th for Rotterdam; 12, Vision Fox, from Shanghai, and sailed 13th for London; 14, Southern Cross, Manly, from Shanghai; 10, Blackburn, from Shanghai.

At TABLE BAY, March 28.—Havering, Parker, from Shanghai, and sailed, 31, for Liverpool; Speedwell, Holdsworth, from Hong Kong, and sailed for London; Canaan, Wilson, from Manila, and sailed, 31, for London; Malabar, Ducasse, from Macao, and sailed, April 8, for Havana; 29, Dorothy, Williams, from Shanghai, and sailed, April 4, for London; 30, John Vanner, Moore, from Colombo, and sailed, April 1, for London; May 3, Versailles, sailed for Batavia.

At SIMON'S BAY, April 13.—H.M.'s Renard, from Singapore; 23, Vereinigung, from Batavia, put in in want of sails; May 4, Che Kiang (str.), from New York for Shanghai.

At NATAL, March 23.—Parsee, sailed for Singapore.

At MAURITIUS, April 24.—Foh Kien (str.), Johnson, from New York, and left, May 3, for Singapore and China; May 5, Jeune Adele, Derrian, arrived from Singapore; April 25, Falco, Martinson, sailed for Batavia.

TOZER'S BOOTS AND SHOES,

For Ladies, Gentlemen, and Children, are FIRST CLASS in QUALITY and STYLE, and most ECONOMICAL IN PRICE.

161, NORTH STREET, BRIGHTON,

AND 40, GRACECHURCH STREET, LONDON,

Patentee of the Improved Cork Sole Clumped Boots, for Ladies or Gentlemen, for lightness unequalled.

CHOLERA, DYSENTERY, DIARRHŒA, AGUE, FEVER, SPASMS, &c. The Safest and Best REMEDY is that marvellous remedy known as

CHLORODYNE,

which was discovered by Dr. J. Collis Browne, M.R.C.S.L. (ex-Army Medical Staff), and the SECRET OF HIS RECIPE CONFIDED ONLY to J. T. DAVENPORT, pharmaceutical chemist, 30, Great Russell-street, Bloomsbury-square, who is the sole manufacturer. Medical testimony furnished by the highest authorities in military, naval, and Civil practice, and numerous gratifying statements from the public generally, establishes this property as invaluable. It relieves pain, soothes the system, inducing refreshing and soothing sleep without producing or having any unpleasant effects like opium, and may be taken at any time in a few drop doses. Extracts from the General Board of Health, London, as to its efficacy in Cholera:—"Third Stage, or Collapse—In all cases restoring the pulse. So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases." From Dr. Andrew Smith, Director-General Army Medical Department:—"I have seen it used, and apparently with much advantage." From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an anti-spasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am perfectly satisfied with the results." From Dr. M. M'Millman, of New Galloway, Scotland:—"I consider it the most valuable medicine known." Dr. M'Grigor Croft, late Army Staff, says:—"It is a most invaluable medicine." Dr. Gibbon, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa." Dr. I. Baker, Bideford:—"It is without doubt the most valuable and certain anodyne we have."

Sold in bottles, 2s. 9d. and 4s. 6d., by the sole Agent and Manufacturer, T. DAVENPORT, 33, Great Russell-street, Bloomsbury-square, London; or sent carriage free on receipt of Stamps or Post-office Order, and with Professional Testimonials enclosed. None genuine without the words "Dr. J. Collis Browne's Chlorodyne" engraved on the Government stamp on each bottle.

*** Beware of counterfeits sold under the same name. Orders can be sent through any of the Agents of this Paper

Agents for *London and China Express* and *London and China Telegraph*.

HOLLOWAY'S OINTMENT and PILLS.—CHEST COMPLAINTS.—The propriety of disturbing the nervous and vascular system in pulmonary maladies by administering internal medicines was long questioned before Professor Holloway was enabled to prove the practicability of relieving over-gorged lungs and restoring their natural action by external means. His ointment thoroughly rubbed upon the walls of the chest twice a day gives the utmost security and comfort in influenza, acute and chronic coughs, bronchitis, pleurisy, stitches in the side, shortness of breath, and palpitation. The weakest may safely try this remedy, and will find that they have not staked their hopes on fruitless or injurious experiments. Moderate doses of Holloway's Pills are sometimes advisable.

NEW CHEAP MODELS.

No. 1A. Oak Case. Four Octaves. ... ... 5 Guineas.
„ 3A. „ Five „ Double Pedals ... 6 „
Superior to any other Instruments at the same price, both in tone and durability.

THE EXHIBITION MODEL,

No. 1.—In Oak Case, 13 Stops (with Tremolo) 4 rows of Vibrators, and Venetian Swell—Price **32** Guineas. Particularly adapted for Churches, &c.

No. 2.—In Handsome Rosewood Case, 14 Stops, Percussion Action, and Venetian Swell. This Instrument is of superior finish both as regards the case and the internal mechanism to any other Harmonium of this size, and also possesses a very sweet quality of tone, which may be increased in power by means of the swell, rendering it the most perfect Instrument yet made for the Drawing-room. Price **60** Guineas.

N.B.—This Model is particularly adapted for shipment, as the superior finish of the case and interior mechanism preserves it from the action of damp or heat

FULL LISTS, ETC., ON APPLICATION.

List of Passengers.

By this Mail, to Marseilles, per Massilia, arrived June 24.—From Shanghai: Mr. Dunlop, Mr. and Mrs. Evans and servant, Messrs Arangnan and Mann.—From Singapore: Mr. Brockman.—From Ceylon: Dr. Docker and servant.

To Southampton, per Ripon, expected to arrive July 1.—From Hong Kong: Captain Williamson, Dr. Leamon, Mr. J. Turner, R. Pullett, R. Battersby.—From Singapore: T. Barnwell, S. R. Wybrants.—From Ceylon: Mr. and Mrs. Murray, Master Murray, and child, Messrs. Peck and Lawson, Master Black.

PASSENGERS OUTWARD.

By this Mail, per Poonah, from Southampton, June 20.—To Shanghai: Mr. Cruickshank, E. Berger. To Hong Kong: Messrs. E. Norton, P. V. James, G. White, S. G. Sugden, C. Hirtzel, C. Watkins, J. C. Thomas, J. Callwell, W. M. Bell, and E. P. West.—To Singapore: Miss Elliott, Mrs. Browne.—To Calcutta: Lieut.-Col. and Mrs. Aplin and infant and native female servant, Mrs. Gastrell and child, H. Putz, E. Read, Jonathan Rick, George Glenday, William White, Mary Ann Piper, Jas. Appleyard, S. Rhodes, Mrs Wheeler's European female servant, Mr. Balfour's native female servant, Mrs. Greenfield's native female servant, Mrs Mackenzie, infant, and native female servant.—To Madras: Capt. and Mrs. Bourne, Lieut.-Col. and Mrs. S. J. Batten and infant, Miss Batten, child, and native female servant, Matilda Winn, J. Smith.—To Ceylon: Mrs. Wharten, infant, and child, Mr. McLachlan, Messrs. H. B. Smith and J. B. Bailey, Miss M. Kennedy and European female servant, W. Harvey.—To Alexandria: J. Inglis, J. J. Miller, Jane Ricketts, Mrs. Field and two children, Mr. G. Campbell.—From Marseilles, per Euxine, to leave June 28.—To Shanghai: Mr. Soutar, Dr. A. Meyer, Alfred Girard.—To Hong Kong: Messrs Loney, Skelton and Boland.—To Calcutta: Capt. Staples, Mr. D. Bolch, Mr. A. Davidson, Mr. Hutchison.—To Madras: Capt. Obbard.—To Ceylon: Messrs. P. S. M'Lagan and Driesberg.

Per P. and O. steamer Pera, from Southampton, July 4.—To Ceylon: Miss Rollings, Mr. S. Willoughby, Mr. Cameron, Mr. Brabazon.—To Shanghai: Mr. Corner.—To Hong Kong: Mr. A. L. Peardy.

Per P. and O. steamer Ripon, from Southampton, July 20.—To Hong Kong: Mr. Merry.—To Singapore: Mr. R. C. Forbes.—From Marseilles, July 28.—To Shanghai: Messrs. Schroers and Bovenschen.—To Hong Kong: Mr. C. M. Kerr.

Per Marquis of Argyle, sailed for Shanghai: Mrs. Priedeberg, Mrs. Andrews, Miss Davis, Mr. Weller, Mr. Pignatel.

Summary of News from the Far East.

JAPAN.

"Affairs are pretty much in *statu quo* in Japan at latest advices, the Japanese having earnestly besought H.M. *Charge d'Affaires* to extend the time allowed by his *ultimatum* to 11th May, fifteen days beyond the date first assigned.

The following is the text of a variety of consular naval and civil memoranda and resolutions adopted at Kanagawa between 17th and 25th April last, under which date H.M.'s Consul, Dr. Winchester, is ordered to lay them officially before the British residents in that district. We subjoin the correspondence in a slightly abridged form, from which it will be apparent that the very next mail may bring intelligence of serious disaster, it being apparently impossible for the official mind to comprehend that a guarantee for the safety of the British residents necessarily includes dependents as well as employers. Nothing can be more temperate than the language used by the residents, nor for that matter by Colonel Neale; but it seems a pity that the latter could not have notified the non-official community of what was impending over them till two days after the departure of H.M.S. *Ringdove* (15th April), which might have enabled orders to be transmitted to Shanghai for the chartering of vessels, not alas! to extend commerce, but to serve as a refuge in the event of war breaking out. A heavy responsibility will attach somewhere should hostilities have commenced ere there is sufficient tonnage to convoy out of reach those who have settled at a Treaty Port, relying on the the power of H.M.'s representative to enforce order and secure even-handed justice from the fears, if necessary, of the Japanese. The one gleam of comfort is to be found in Colonel Neale's conviction, which we entirely share, that the Japanese Government is not likely to take the initiative in aggression It has been called upon to make certain restitution for injury done, failing compliance with which it is our duty to enforce respect for our lawful demands. The following is the correspondence:—

Memorandum.—A meeting was held at the British Legation, this day, the 16th April, 1863, of the following authorities, videlicet:—Rear-Admiral Kuper, C.B.; Colonel Neale, Her Britannic Majesty's Charge d'Affaires; Captain Massot, commanding His Imperial Majesty's ship-of-war *Dupleix* (representing also His Excellency Monsieur Duchesne de Bellecourt, Minister Plenipotentiary of France absent from ill health); Captain de Casembroon, commanding His Netherland Majesty's forces in Japan; Captain Brine, Royal Engineers. The object of the meeting was stated and understood to be to elicit the opinions of the naval authorities respecting the degree of protection which could be afforded by the ships-of-war available to the foreign residents at Yokuhama, in event of the settlement being seriously threatened. After due deliberation and discussion, it was decided that there was not a sufficient force at present in Japan to guarantee perfect security to the foreign community in the event of an attack in force by the Japanese. British residents at Yokuhama are therefore individually advised to adopt such measures for their security as may be in their power before the 26th inst., so as to be prepared for the contingency of hostilities being decided on. Arrangements will be made by the officers commanding ships-of-war in the port, in conjunction with the Guards on shore, to render all possible assistance in case of alarm, and the details of which will be communicated in due course. A copy of this memorandum will be transmitted through Her Majesty's Consul to the Consuls of friendly States, for the information of the subjects of their respective nations, residing within this settlement.—(Signed) EDWARD ST. JOHN NEALE, H.B.M.'s Charge d'Affaires.

Minutes of a meeting of the British residents of Yokuhama held at the residence of Mr. Maine, April 18, 1863. Mr. Hooper in the chair. Proposed by Mr. Rickerby, and seconded by Mr. Fraser, "That this meeting remarks with alarm the discrepancy between the fifth paragraph of H. B. M. Consul's address to the community on 8th April, 1863, viz.:—'The Admiral proposes to concert with the chiefs of other foreign nations such arrangements as may best tend to secure the safety of the settlement"——introducing H. B. M. Charge d'Affaires despatch of 6th April, together with the seventh paragraph of said despatch, (see *London and China Telegraph* of June 12th), and the third and fourth paragraphs of H. B. M. Charge d'Affaires' memorandum of 16th April: (v. memorandum *supra*). Whereas in the former the community were led to expect that their personal security would be a matter of first consideration on the part of their

Digitized by Google

authorities, and in the latter, that this security could not be guaranteed. Proposed by Mr. Macpherson, and seconded by Mr. Macdonald, "That this meeting therefore respectfully suggests that the first duty of the Executive is to provide for the protection of the British residents in Japan before proceeding to any attack on the Japanese." Proposed by Mr. Bell, and seconded by Mr. Corns, "That if on further consideration the British authorities still continue in the opinion that, in case of hostilities, perfect security cannot be guaranteed, this meeting desires to know what amount of security they may reasonably expect." Proposed by Mr. Young, and seconded by Mr. Corns, "That, in the event of the authorities not being able to guarantee sufficient security, do they positively recommend the residents to vacate Yokuhama?" Proposed by Mr. Gower, and seconded by Mr. Willgoss, "That, in the event of its being considered necessary to vacate the settlement, this meeting begs to call the attention of the authorities to the absence of a sufficient number of merchant shipping at present in harbour to receive the residents, their families, and foreign servants, and would desire to know what means would be afforded for carrying out that object." The meeting was then adjourned until 2 P. M.

The meeting reassembled at 2 P.M., when the foregoing minutes were read and confirmed (having in the interim been transmitted to the Chargé d'Affaires and Consul), when the following resolution was unanimously carried: - "That as the foregoing resolutions embody the feelings of the community, the thanks of this meeting be given to Colonel Neale for the desire he has expressed to consult their interests, and to listen to any propositions emanating from them, and to Mr. Consul Winchester for the kind and cordial manner in which he received the deputation that waited on him with reference to this meeting." Proposed by Mr. Bell, and seconded by Mr. Hudson, "That there is a strong feeling in this community averse to abandoning the settlement, unless positive instructions are received from the authorities to that effect."

H. J. HOOPER, Chairman.

BRITISH CONSULATE, Kanagawa, April 20th, 1863.

GENTLEMEN,—I have been requested by Colonel Neale, H.B.M.'s Charge d'Affaires, to communicate to some of the British residents copy of a despatch dated yesterday, with reference to the proceedings of the meeting of British residents held at Mr. Maine's on the 18th inst., and beg you will, without delay, make known its contents to the other gentlemen who attended that meeting.—I have the honour,

To H. J. Hooper, Esq., and others. C. A. WINCHESTER.

YOKUHAMA, April 19, 1863.

SIR,—I have to acknowledge the receipt of your despatch No. 11, transmitting to me the minutes of a meeting of the British residents of Yokuhama held yesterday, the 18th instant. I have read with attention the various resolutions held at that meeting. Her Majesty's subjects can hardly expect that I should discuss and deal separately with the several resolutions as proposed by individual members and embracing a variety of subjects which might readily be multiplied without limit. A very principal resolution, however, proposed by Mr. Macpherson and seconded by Mr. Macdonald, to the effect that the first duty of the executive is to provide for the protection of the British residents before proceeding to any attack on the Japanese would appear to require, on my part, some explicit remarks. I have, in the first place, to observe that Her Majesty's Government, after due consideration of the circumstances attending the disastrous occurrence of the 14th September last, and respecting which such urgent agitation for immediate retribution and reprisal were set on foot by this community, having deliberately decided upon commanding specific reparations from the Japanese Government, has at the same time furnished me with specific instructions. Those instructions comprise the contingency of coercive operations in the event of the Japanese Government refusing or evading to comply with the demands. On the 6th instant those demands were communicated to the Japanese Ministers; and with due consideration for the embarrassment which the situation of affairs (though long expected and inevitable) might occasion to the Japanese Government on the one hand, and to British residents on the other, twenty days were allotted to the Japanese Ministers for a categorical reply, a period much exceeding that which is usually affixed under similar circumstances. *It is, to this date, utterly unknown what may be the reply of the Japanese Government.* It is not possible to foresee what amount of force might threaten this settlement; it is therefore equally impossible to declare beforehand what amount of protection may be required, or could be afforded to enable residents to remain in safety in an open settlement surrounded by commanding heights. British subjects were therefore warned of the possible contingency of their residence at Yokuhama becoming untenable. but though they must have for months looked forward to and expected a demand for reparation on the part of Her Majesty's Government, they could hardly have contemplated the arrival of an army to guarantee their safety without displacement. It may also reasonably be inferred that they took into account all the contingencies, such as stoppage of trade, blockades, and reprisals, which usually attend a non-compliance with just demands preferred by Her Majesty's Government. Under all the circumstances, however deplorable it is to contemplate the temporary interruption of commercial affairs accompanied with the personal discomfort to which the community of the open ports of Japan may be exposed, these considerations do not constitute sufficient reasons for the abandonment or indefinite postponement of the measures directed to be adopted by Her Majesty's Government to obtain reparation for past outrages, and with a view to the attainment of better security of British subjects in future. The instructions of Her Majesty's Government must necessarily be carried out.

The protection which Her Majesty's subjects have to expect from the forces now here, or likely to be here, in so open and exposed a situation as Yokuhama, where nationalities are intermingled and possibly entertaining opposite views and opinions, is, in my opinion, such as is calculated to guard them, as far as possible, against sudden attack by isolated hands or incendiaries, and to protect their embarkation, should the degree of danger which threatened render such embarkation an absolute necessity. I have to request you to communicate a copy of this despatch to some of the principal merchants. I have, &c.,

C. A. Winchester, Esq., &c. EDWARD ST. JOHN NEALE.

Reply of British Residents.

Yokuhama, 21st April, 1863.

SIR,—We have the honour to acknowledge receipt of your communication of the 20th inst., enclosing copy of despatch of the 19th idem, from H.B.M.'s Charge d'Affaires to yourself. We observe, with satisfaction, that the protection which our authorities are providing for us is, in the opinion of H.M.'s Charge d'Affaires, calculated to guard us against any sudden attack, and to protect our embarkation, should the degree of danger render such a step necessary. From their ignorance of the instructions received by H.M.'s Charge d'Affaires, the community are unable to suggest any practical measures for the safeguard of their persons and property. Yet they are prepared to make the utmost necessary commercial sacrifices, even to the temporary abandonment of the settlement, should their presence be deemed by the authorities as any impediment to the energetic carrying out of the instructions received from H.M.'s Government. The community, however, consider the abandonment of the settlement should be the last resource. Such a step, appears to them, as likely to encourage the Japanese to future aggression—certain to destroy the prestige which British commerce at present enjoys—and effectually to check the progress it has already made. This community, referring to resolution 5th of their meeting of 18th inst., beg again to call the attention of the authorities to the fact that there is not sufficient shipping in harbour to provide for the safety of themselves and their dependents (the number of whom H.M.'s Charge d'Affaires has apparently overlooked). Should coercive measures be adopted this community must necessarily look to their authorities for the means of carrying out the recommendations made to them. They are impelled to state this from the fact that H.M.'s Charge d'Affaires' first despatch (received on 8th instant) induced them to suppose that sufficient security would be afforded them by the executive—and also that they have been prevented from providing such security for themselves (even supposng that all were in a position so to do) by the the absence of advice that the place was untenable, until two days after the departure of H.M.'s ship *Ringdove* on 15th inst. - the last opportunity of communication with Shanghai. In conclusion, therefore, all that this community has to reply to H.M.'s Charge d'Affaires' despatch of the 19th inst. is to request that, if, in his opinion it is absolutely necessary for the residents to vacate this settlement (a course they earnestly deprecate) the executive should provide the means for carrying out such a step.—We have the honour, &c., H. J. HOOPER and others.

Charles A. Winchester, Esq., H.B.M.'s Consul, Kanagawa.

For the Information of British Residents generally.

British Consulate, Kanagawa, April 23rd, 1863.

GENTLEMEN,—I am directed by H.M.'s Charge d'Affaires to acknowledge receipt of your letter of the 21st instant, forwarding copy of the minutes of the meeting held at Mr. Maine's on the same date. With reference to the embarkations of H.M.'s subjects, while H.M.'s Charge d'Affaires agrees with the community in considering this event as one of last resort, the possibility of it becoming necessary to do so should be steadily kept in view. In respect to that portion of your letter under acknowledgment which adverts to your ignorance of the instructions which have been received from H.B.M.'s Government, I am to observe that everything contained in them, which could be useful to the community to be made aware of, has already been made public—viz.: that a demand for specific reparation of past outrages had been made on the Japanese Government, the refusal of which would be followed by coercive measures. The possibility of such measures creating disquietude and rendering the position of the residents at Yokuhama insecure, is the point to which the attention of British subjects is directed. In conclusion I am directed to state that whenever any reasonable ground shall arise for the belief that the measures above referred to can be avoided, H.M.'s Charge d'Affaires will take immediate steps for communicating the same to British residents.—I have the honour, &c., CHARLES A. WINCHESTER.

To H. J. Hooper, Esq., and others.

For the Information of British Residents.

YOKUHAMA, April 25th, 1863.

SIR,—Communications have been made to me in urgent terms by the Japanese Government, which have resulted in the accordance on my part of an additional period for the final and categorical answer to the demands I have made under instructions from H.M.'s Government. The extended term now allotted will terminate on the 11th May inclusive. At the expiration of that period, if no satisfactory settlement of the demands has been arrived at, the same contingency as to the commencement of coercive measures on the part of the squadron under the command of Rear-Admiral Kuper, and the same risk of danger to the foreign residents at the open ports in Japan will, in all probability, prevail as heretofore to Her Majesty's subjects. I have in the meanwhile informed the Japanese Ministers that should coercive measures be resorted to, it is not the intention of the Admiral to adopt any hostile measures on shore at the open ports, unless the safety of the foreign residents is imperilled by the menaces or acts of the Government or of hostile Daimios. It is, however, impossible to foresee or form an opinion as to the ultimate determination or conduct of the Tycoon's Government. With the extended period before them, in granting which their convenience was a strong element of my decision, Her Majesty's subjects are advised to adopt precautionary measures for the security of themselves and property as may now be better within their reach, bearing at the same time in view, that whenever coercive operations on the part of the Admiral may become necessary, the degree of protection which can be afforded to this settlement during the absence of the greater portions of the squadron cannot, as far as can at present be reckoned upon, exceed a ship-of-war with two gun-boats, exclusive of the guards on shore, and whatever foreign ships-of-war may at the period be present in port. I have to request you to communicate the purport of this despatch to Her Majesty's subjects, as well as to acquaint your colleagues the Consuls of foreign States, that a fresh period has been accorded to the Japanese Government extending to the 11th of May next for the final answer to the demands for reparation made to it by the British Government.—I have the honour to be, Sir, your most obedient humble servant,

(Signed) EDW. ST. JOHN NEALE.

A. Winchester, Esq., H.M.'s Consul, Kanagawa.

Digitized by Google

Of other intelligence there is little stirring. The Japanese Government was still continuing to purchase steamships, &c., the sale of one of Messrs. Dent's vessels, the *Lyee-moon*, being the latest transaction, in the course of which, by a very discreditable piece of chicanery on the part of the official representative of a certain foreign Power, Messrs. Dent were diddled—no other word so exactly expresses the *modus operandi* adopted—of $25,000, much to the disgust of even the native authorities, who, however, honourably fulfilled their engagement, even to the parties principally concerned.

The ships of war stationed at Kanagawa on 28th April, were H.M.S. *Euryalus* (flag), *Encounter*, *Pearl*, *Rattler*, *Centaur*, *Argus*, *Kestrel*, *Bouncer*, and *Havoc*; H.I.M.'s ship *Semiramis* (60), *Duplêix*, and *Dordogne*, and H.N.M. (Dutch ship) *Medusa*.

Mr. Consul Vyse, who had rather regained the confidence of the community at the time of Mr. Richardson's murder, had been transferred to Hakodadi, his place being supplied by Dr. Winchester, greatly to the satisfaction of the residents, whom his urbanity and devotion to public interests had greatly pleased.

According to previous arrangements the Tycoon was not to have taken his departure for Miako until some twelve days after the 28th April. Every preparation was, however, being made to push it on with all possible despatch, and it was looked upon as likely that he would leave in the course of the next few days. The intelligence that Satsuma's officers had taken possession of the Gotenyama is fully confirmed; and at all corners and conspicuous places his name with the words "Ong asukari-sho" ("Satsuma keeps this place") was posted. Disturbances of a more or less serious character between the retainers of the different Daimios were of nightly occurrence; indeed turbulence and disorder were prevalent to an extent long unknown.

The Japanese Government were making preparation on a grand scale for the forthcoming "Osetsu" at Miako, and at Hiogo a large building was in course of erection, to be in readiness in the anticipated event of a conference with the foreign plenipotentiaries being invited by the Emperor.

The *Japan Herald*, of March 21, states in its editorial column, that "we have reason to believe that the idea that the Tycoon had no right to represent the foreign policy of the country, was first propounded by the Japanese Government themselves, and since promulgated, if not by their desire, at least in the hopes of pleasuring them; and we are strengthened in this belief by the fact we lately heard, that since the publication in our columns of the Tycoon's circular, the Mikado's letter, and other documents, so clearly proving that what was done by the Tycoon he was authorised by the Mikado to do—they have said that, now this case has become known to foreigners all the excuses for the non-performance of the treaties can no longer be attempted."

A new small copper coinage was about to be issued. It was to be named Bunku-tsuho, and each coin is to be of the value of about 1-24th of a *tempo*.

We are glad to notice that the branch of the Mercantile Bank is now in working order at Yokuhama, and the convenience both to residents and constituents in this country is already much appreciated.

CHINA.

PEKING.

There is still absolutely nothing of importance to chronicle from the capital. Mr. Lay had gone thither to take up his permanent residence, in the hope, it is said, of being principal of the Board of Revenue for maritime customs.

TIEN-TSIN.

The rebels at latest dates were still ravaging, apparently unheeded of the Imperial Government, and trade in consequence was completely at a standstill. It was hoped, however, that the spring fairs, of which we may, perhaps, receive details by the next mail, would impart a little more activity. It was not supposed the marauding bands would attack Tien-tsin.

SHANGHAI.

There is no intelligence of importance from Shanghai. The land question still occupied public attention, and opinions were much divided, as was anticipated, as to the distinction between cession and concession.

A meeting of French residents had been held on April 30th, presided over by M. Mauboussin, Consul-General, at which a very satisfactory statement was made of the expenditure, and a resolution passed to raise the land-tax to the same level as that of the English settlement. Some alterations were also suggested in the construction of the council, and measures taken for raising and equipping an adequate police force. Near the close of the meeting, M. P. Loureiro mooted the question of the exact signification of the term "Concession," which, however, the Consul declared he would not answer till he had received a reply from his own Government, to which he had referred it.

The success of Major Gordon (who, on all occasions, strenuously declines the rank of General) had been followed up by an attack on the city of Tai-tsan, which had been taken after an obstinate resistance. The details are so interesting that we present them in an abridged form. The Imperialists, it would seem, had felt an earnest desire to possess themselves of the town, but before resorting to force, the Tautai, who is by virtue of his office, Chief Mandarin, opened negotiations for its purchase from the Taipings. The latter affected to receive these advances with cordiality, and the Tautai accordingly sent 500 undisciplined troops to take possession. It proved, however, that a trap had been laid, as a body of Taipings suddenly issued from an ambuscade, fell upon the party, and took them all prisoners, one half being immediately decapitated. (This, however, as the *Friend of China* remarks, is the mandarin version). But at all events, upon receipt of this intelligence, Major Gordon, at the request of the Tautai, changed his original intention of marching upon Foo-chow, and proceeded to attack Tai-tsan. He had with him about three thousand men, well found and equipped, and amply supplied with artillery. The Taiping garrison of Tai-tsan numbered about the same, but their equipment was, of course, greatly inferior, and they had no artillery. What occurred will open the eyes of the good people in England, not only to the difficulty of conquering the Taipings, but to the startling fact of what excellent soldiers the Chinese are capable of being made. On the 1st May Major Gordon arrived before Tai-tsan. He cautiously approached, artillery in front, flanked and protected by all his disposable force. He took several stockades, with his artillery, of course, and subsequently carried two bridges, which cross a canal situated at about six hundred yards from the walls. He had constructed heavy wooden shields for the guns, to protect the men from the musketry of the beseiged—a clear proof that the Taipings had no artillery. In this manner Major Gordon attained a position within one hundred yards from the walls. Of course, he soon made a very wide breech, which, being deemed practicable, was assaulted. Scarcely, however, was the storming party in motion to attack the breach, than the wall was suddenly manned, and a tremendous fire poured down upon the head of the column, as well as the bridge, which the rebels pelted with fireballs, thereby creating much confusion and causing the capture of a gunboat. Still the column went gallantly on, headed by Captain Bannon, and mounted the breach. Then the Taipings, headed by the foreigners in their service, boldly met them with the spear; and after a sharp and bloody conflict, in which Bannon lost his life, the stormers were compelled to retire. The pause in the assault, however, was but momentary; and Gordon's guns played on the breach for twenty minutes. During this time the Ningpo battalion were brought to the front, and the stormers once more swarmed up the breach, with better success than before; for though the assaulting column was gallantly withstood, and wavered for a moment, the energy of those in front, and the impetus of the men in the rear broke through all obstacles, and the breach was crowned. Then actual resistance ceased, and the city was captured. Immediately, the enemy fled in the utmost confusion in all directions, trampling each other to death in their eagerness to escape from the pursuing foe. As near as could be estimated, there were not less than ten thousand well-armed rebels in the city; a large proportion of whom succumbed to the valour of the disciplined Chinese, while they have suffered severely from the desperate resistance of the enemy, and their being so well equipped and supplied with munitions of war. What the rebel loss may be has not been ascertained; but we learn that the killed and wounded of the Soonkeong force is between eight and nine per cent. Besides poor Bannon, who was killed, there were two other officers of the force, Robertson and Morant, severely wounded, and Capt. Ludlam slightly. Lieutenant Wood, R.A., was struck by a spent shot without injury. There were in the city and defending the breach seven Europeans and four Sepoys. Of these, three of each were killed during the attack. One European was captured—we understand a deserter from the 31st Regiment—and three

Digitized by Google

Europeans and one Sepoy escaped. Two of the Europeans killed were Frenchmen.

Major Gordon, after leaving a strong garrison of the Tautai's troops at Tai-tsan, proceeded with Ward's contingent to a place called Quin-sang, a Taiping stronghold, which lies in the direction of Soochow. Latest accounts mention that Major Gordon had started on May 5th for Quin-sang, another rebel stronghold on the road to Soochow—and that Tai-tsan was governed by a strong force of Imperialists.

With reference to the foregoing the *Overland Trade Report* observes :—"Unprejudiced men must see that, under these deserters, the Taipings have greatly improved in the use of musketry, and that if they had, which they very soon will have, artillery and instructors in the use of it, the days of the Kungs and the Bruces, and the Lays, and the Wades in China are numbered."

The same paper, under date of May 12th, states, as a rumour, that the Tautai had refused to reinstate General Burgevine, who, accordingly, had returned to Peking. But accounts are very contradictory as to his movements, and there is every appearance that he is about to sink into obscurity again.

We reproduce in full the despatch of Earl Russell, of 19th February last, which was conveyed to the Shanghai Chamber of Commerce by order, and professes to be a reply to the memorial of that body of 20th of August, 1861, a reply to which had hitherto been delayed "through inadvertence!" Its publication had caused considerable excitement among all classes, but the general impression was that it was absolutely necessary for the success of future trade that the regulations laid down by the treaty of Tien-tsin should be observed. We must, however, await further advices, ere we can judge of the probable effect of this communication upon the trade of the Yang-tze-Kiang.

"Foreign Office, Feb. 19, 1863.

"GENTLEMEN,—I am directed by Earl Russell to acknowledge the receipt of your letter of the 4th of September, referring to your previous letter of 20th of August, 1861, and calling attention to the further restrictions which you state the Chinese Government seek to impose upon the treaty privileges of British subjects. I am to state to you in the first place that Lord Russell regrets, that through inadvertence, no direct answer was returned to your letter of 20th August. Nevertheless the matters to which you alluded therein were fully considered in communications with the Earl of Elgin, and the views of her Majesty's Government were conveyed to Mr. Bruce on the 26th February last. On that day, Mr. Bruce was informed that her Majesty's Government considered that he had satisfactorily explained the arrangements made by him in regard to the several matters in discussion between him and the Foreign Mercantile Community —arrangements which appeared on the whole to have met with the approval of that community, and as regards the distinction made by Mr. Bruce in favour of the conveyance of Chinese produce from port to port in China for native consumption, as distinguished from such conveyance for re-exportation, he had obtained from the Chinese Government as large a measure of concession as it was reasonable to expect.

"With respect to the wish expressed in your letter of the 20th of Aug., that disputes between foreign merchants and the Chinese Customs authorities should be referred to a Consular Court, instead of to a mixed tribunal as proposed by Mr. Bruce, Lord Russell stated to him, that on this point also Her Majesty's Government concurred in the view he had taken, for it seemed evident that the Chinese Government would not submit to, nor could they fairly be required to be bound in such cases by the decision of a Consular Court. As regards the specific grievances which form the subject of your letter of the 4th of September, I am directed by Lord Russell to make the following observations. These grievances are :—1st. Certain alleged alterations in the regulations of trade on the Yang-tse River. 2nd. The limitation of the right to resort to the interior of China for purposes of trade. On the first point you state that, when the navigation of the Yang-tse was opened to foreigners in April, 1861, the regulations provided that all duties, whether import or export, should be paid in Shanghai or Chin-kiang foo, and that above the latter port the whole of the river up to Hankow should be open to foreign trade, and you complain that the Chinese Government now dispute the right of foreigners to trade upon this river, excepting at the consular ports of Chin-kiang-foo, Kiu kiang, and Hankow, and further wish to establish Custom-houses at the two last-named places.

"On the second point you state that the British community at Kiu-kiang was informed in a circular issued in May last by Her Britannic Majesty's Consul there, that Her Majesty's Minister at Peking had decided that British subjects going into the interior for trading purposes could not open or rent hongs or buildings, or reside permanently in the place to which they resort, but must live in Chinese houses, inns, or boats. And you proceed to say that it might be supposed that the right to trade would include the right to do acts necessary to conduct such trade, and that, without extensive premises, it is manifestly impossible to carry on the business of a merchant, but that even if it were not so, the 12th article of the treaty of Tien-tsin expressly states that British merchants 'may purchase or rent lands or buildings' whether at the ports or other places.

"The Chamber, therefore, considers the prohibition of Her Majesty's Minister as directly opposed to this clause of the Treaty. Your letter concludes by urging that, 'in dealing with an Asiatic nation like the Chinese, any surrender of a right is attributed by them to any cause rather than forbearance on our part, and on that account, if for no other, such a surrender should never be made,' and you add your opinion 'that a firm and decided tone in demanding all privileges accorded to the British nation by the late Treaty of Tien-tsin, will best preserve that peace which all classes, and more especially merchants, are so anxious to maintain. With respect to the first of the above-mentioned subjects of complaint, viz., the withdrawal from foreigners of the general right of trading on the Yang-tsze river alleged to have been conceded, I am to observe that the 10th Article of the Treaty of Tien-tsin, which regulates this question, provides as follows :—

"X.—British merchant ships shall have authority to trade upon the Great River Yan-tse. The upper and lower valley of the river being, however, disturbed by outlaws, no port shall be for the present open to trade, with the exception of Chin-kiang, which shall be opened in a year from the date of the signing of this treaty. So soon as peace shall have been restored, British vessels shall also be admitted to trade at such ports as far as Hankow, not exceeding three in number, as the British Minister, after consultation with the Chinese Secretary of State, may determine shall be ports of entry and discharge. It is, therefore, clear that under the Treaty of Tien-tsin the Chinese Government are entitled to restrict all British trade to the one port of Chin-kiang, until peace shall have been restored. Mr. Bruce, however, has reported that in consequence of a representation which he addressed to the Prince of Kung in November, 1860, the Chinese Government agreed to concede more than they were by treaty bound to do, and to open two other ports on the river above Chin-kiang, but that they distinctly refused, from the first, to do more, or to agree to the regulations issued by Sir James Hope and Sir Harry Parkes, which were designed to permit trade on the whole river.

"Lord Russell, therefore, is quite unable to perceive on what ground the allegation rests that the Chinese Government have withdrawn a right which they previously conceded; on the contrary, it is evident that the Chinese Government have made a concession which Her Majesty's Government had no treaty right to require. The establishment of local Custom-houses at Hankow and Kiu-kiang (the two ports which have been open to foreign trade above Chin-kiang-foo) is a measure which Lord Russell is disposed to think, from reports received from Mr. Bruce, has been adopted on sufficient grounds. It might fairly be proposed to the Chinese authorities, if such is the desire of the British merchants concerned, that Customs duties should be levied only at Shanghai, on the understanding that for the purpose of protecting their revenue, the Chinese Custom-house might require the payment of 2½ per cent (commuted transit duty) at the same time; but as there appear to be other grave reasons which may materially indispose the Chinese Government to this course, Lord Russell does not think that it ought to be in any way insisted on or pressed.

"With regard to the second point, viz., the prohibition to open hongs or other buildings, and to reside permanently in the interior, I am to state that the 12th article of the Treaty of Tien-tsin, upon which the claim to these privileges rests, is to the following effect :—

"'ART. XII.—British subjects, whether at the ports or at other places, desiring to build, or open houses, warehouses, churches, hospitals, or burial-grounds, shall make their agreement for the land or building among the people, equitably and without exaction on either side.'"

"This article, even if taken by itself could hardly, as Lord Russell conceives, be construed so as to imply that British subjects had the right to build or open houses, warehouses, churches, hospitals, or burial grounds in any part or place, throughout the length and breadth of the Chinese Empire. If this had been its intention, these privileges would certainly have been conceded in more explicit terms, but considered as it must necessarily be in connection with the preceding article (XI) which expressly limits to particular cities, towns, and ports, the rights of British subjects in these respects, Lord Russell is of opinion that this claim is one which cannot be sustained. The limitation of foreign trade to particular places is moreover strictly in accordance with the law and practice of other nations under analogous circumstances. Lord Russell need only refer to the restrictions which the British and French Governments carefully enforce in the rivers of Western Africa, which are under their control. But it may be contended that abandoning the legal grounds on which these claims are rested, it might, nevertheless, be desirable in the interests of British trade with China, that Her Majesty's Government should renew the attempt to obtain further concessions from the Chinese Government, with respect to the trade of the Yang-tse.

"On the question of policy which might thus be raised, Lord Russell is quite unable to concur in the views expressed in your letter, as on the question of law, upon which I have already expressed his lordship's opinion. Lord Russell believes that so far as it is possible for Her Majesty's Government to regulate the intercourse of British subjects with the Chinese authorities and population in places beyond Consular control, the one great object which should be steadily kept in view, especially during the continuance of the present intestine disturbances, is to diminish by every means in their power the point of contract between them. The despatches received from Mr. Bruce contain ample evidence of the collisions and crimes which invariably follow such contact, and which tend more than anything else to prejudice and retard the growth of friendly relations and of sound commercial intercourse. Instead, therefore, of pressing the Chinese Government to relax regulations which they have felt it necessary for their own protection to adopt, Lord Russell considers that Her Majesty's Government should give them, on all occasions, their moral support, in resisting undue encroachments on their authority and administration, and in checking those forms of commercial enterprise which, however profitable to individual traders, are fatal to the permanent interests of trade. Lord Russell, therefore, desirous of holding the Chinese Government bound by the stipulations of treaties, cannot encourage British subjects in claiming, still less in resorting to force for the purpose of establishing privileges inconsistent with those treaties.—I am, &c., (Signed) "E. HAMMOND."

The Volunteer movement was progressing with great spirit. The races had gone off with considerable *éclat*, nothwithstanding wretched weather.

NINGPO.

Ningpo dates are to the 3rd May. The Taipings were on the move again, and it was said had taken a city called Tsin-kew,

Digitized by Google

near Tsian-tsau. The intelligence requires confirmation, although the rice market had become dull in consequence.

HANKOW.

Trade is reported a little better, large contracts having been made for shipment of new hemp to London.

The Nienfei marauders had retired a little distance; most probably they have been bought off. The steamers which arrived up reported that, from the city of Kechow up to Hwangchan, the people were moving their valuables under the apprehension of an incursion of the Nienfei. The steamer *Hu-quang*, after having been on shore for about six months, floated at the rising of the river. She proved uninjured, and was on her way to Shanghai, when on the 2nd inst., at one o'clock in the morning she came into collision with the steamer *Surprize*, bound to Hankow, and cut her down, receiving little injury herself. The *Surprize* was instantly beached to save her from sinking. No sooner was that effected than she caught fire and was entirely consumed. The captain (Osborne) was knocked overboard and was drowned. It would appear that he was crossing the river at the time of the collision in order to find an anchorage.

The celebrated clipper *Challenger* has been towed up to load new Congous for London.

KEWKIANG.

Dates come down to the 30th April. There was very little business doing owing to the movements of the Taipings, who were in great force on the Poyang lake. The Imperialists were besieged at a place called Taisow, which it was anticipated they would have to evacuate.

YANG-TSE AND NEWCHWANG.

Business had been considerably retarded at these ports by a series of very severe snow-storms, which had completely blocked up all internal communication. Trade had been wonderfully brisk, considering the short time the ports had been open, but was at last advices, 16th April, low.

FORMOSA.

In the island of Formosa there are now four ports open to trade, viz.:—Tamsuy with its dependency Keelong, and Taiwan with its dependency Takao. Provisional regulations for trade at all these ports have just been issued by Baron de Meritens, chief commissioner of Customs for Fuhchau and Formosa. Mr. W. Maxwell has been appointed acting commissioner at Tamsuy, and the irregular trade hitherto existing at some of these ports will be brought under rules, the object of traders having been rather to find a good market for sale and purchase than any desire to avoid payment of duties; this is a step in the right direction on the part of the Chinese Customs.

HONG KONG.

The war of words between Mr. Lay and the merchants of Hong Kong had assumed the form of a reproduction of that gentleman's Blue Book correspondence, with which cheerful reading the Hong Kong papers are choked. The thermometer stands at 85 deg.

Another question which was attracting considerable attention was the relaxed state of discipline in the gaol, concerning which a special meeting of the Legislative Council was to have been held on the 20th ult. Meanwhile, the guards and constables had been materially increased—not before wanted; as numerous instances are recorded of robbery with violence.

We subjoin a few local items gleaned from the *Overland China Mail*:—On Wednesday, April 29th, an adjourned meeting of the Ice Committee was held in the Court House, at which arrangements were completed for the supply of ice during the ensuing summer. The amateurs gave their fourth performance on the same evening; the house was crowded. A case of desertion by six men from the *Oasis* was reported, four of whom had met their death by the boat in which they escaped being upset by some Chinamen between this and Macao. An article appeared, in which it was urged that more attention should be paid to the advantages of making short excursions in different directions on the mainland of China, where the scenery is equal to some of the most picturesque portions of England. A correspondent offered his opinion that one month's imprisonment was too lenient a sentence on the deserters from the *Oasis*, seeing that they had been guilty of theft to a serious amount. It must be considered, in viewing the case, that the harbour master only punished the men for desertion, the more serious charge of theft belonging to the cognizance of the criminal authorities. A mutity on board the *James Marshall*, in which the captain was wounded, was reported; three of the mutineers have since been apprehended by the Hong Kong police.

The screw-steamer *Bahama*, Capt. Rowe, arrived at Hong Kong on the 9th May, seventy-five days from Holyhead. She is engaged to load at Foo-chow for London at £12.

The Chinese man-of-war steamer *Pluto* made lately her trial trip round Green Island and back to her anchorage, Mr. Logan has fitted her out with a new boiler, new propellor and funnel, and a general overhaul of the engines. Captain Sanger and chief engineer were highly satisfied with the vessel's speed. She will proceed to Shanghai immediately without further trial.

CANTON.

There is nothing of importance to notice by this mail. An unhappy accident had occurred to the fine new church which was just on the eve of completion, the tower of which fell down on the 6th May; whether from bad foundation or bad material in the building is not yet known. A review of Chinese troops, which had been undergoing drill from English officers, had lately taken place at Canton. It is described as having been of the most novel and interesting sort. The Chinese (artillery and infantry) went through all their evolutions well.

At Whampoa, a trial has been made at the dockyard of Messrs. Thomas Hunt and Co. of a centrifugal pump, made by W. D. Andrew, of New York. It is worked by two small oscillating engines, and the whole space occupied by the machine is not more than five square feet. This wonderful little machine makes six hundred revolutions in one minute, and pumps the largest dock out in less than four hours.

Launched from Messrs. Thomas Hunt and Co.'s dockyard the new steamer *Kien Shan*. This beautiful vessel glided off into her proper element most majestically; although the largest vessel ever built here, none never came off the blocks in such a style. It is just six weeks since her keel was laid. A number of gentlemen came from Canton and also from Hong Kong, though the latter came too late to witness the launch. They were afterwards entertained by Messrs. Thomas Hunt, and Co., with a splendid cold collation, and the steamer *Spark* waited to take them back to Canton.

MALACCA STRAITS.

PENANG.

Penang has not lagged behind Singapore, if we are to trust reports from the latter source, which speak of a murder or two having been committed since last mail. But we confess we have been unable to discover any foundation for the accusation.

DUTCH EAST INDIES.

We have nothing to report beyond the ordinary trade intelligence.

SINGAPORE.

There is little calling for remark by this mail. The weather had been better than had been known for some years. Crimes of a serious nature had been rife, three district murders having been committed since the departure of the preceding mail. Some little discussion was being indulged in with respect to the alleged rights of the Dutch over Sumatra, and the steps recently taken to assert these. We shall look forward with interest to the progress of this dispute, as there can be no doubt it is fraught with important consequences to the prosperity of of the Straits colonies. Dissatisfaction was expressed with the abrupt, scarcely courteous, dismissal by Sir Charles Wood of the deputation of Old Straits residents, who waited on him on the 27th March, with reference to the proposed transfer of the Straits Settlements.

The American steamer *Foh Kien*, Captain Johnson, from New York, &c., the 3rd March last, arrived here on the morning of the 16th May, and will proceed to Hong Kong on the 21st.

CEYLON.

The general meeting of the Planters' Association had been held at Kandy on the 28th May. We quote the following cheerful summary of the proceedings from the *Colombo Overland Observer*:—

"So far as the military expenditure question is concerned, the planters have ably and independently done their *devoir*, and the appointment of a committee of the association to draw up a memorial, embodying the sentiments expressed in the resolutions adopted at the meeting, will no doubt have its effect in high quarters. Our roads and labour supply, of course, attracted the usual attention from the Planters' Association. Captain Bird's motion, that an inquiry should be instituted regarding Chinese immigrants, is a prudent foresight; for, however much the Southern and Eastern coasts of Continental India may be able to supply us at present with all our requirements,

Digitized by Google

still an increasing demand for a limited supply is what is monthly and annually taking place before us. The time is rapidly approaching when, with India's unprecedentedly advancing revenue, that Government, together with private enterprise, may be expected to engross all the labour at their own doors; and it is right that we should in time take steps to be independent of this precarious resource. The first Chinese batch of our pioneers' reinforcement has arrived, and the five hundred Sikhs are distributed over the various divisions. We believe that Government will strike out on a different course and propose a radical change in the future management and extension of our roads. A few of the principal features of this proposal, we think, are pretty correctly stated as follows:—"For this purpose, a system of trusts has been considered the most feasible and best adapted, especially to the wants of the planting districts. But as regards the scenes of coffee planting operations, it is proposed that districts should be formed throughout, taking a certain out-turn of coffee as the required test for admission as a district; over which, trustees should be appointed to manage the existing, and form new roads *ad infinitum*, so long as necessity and good cause can be shown, the money to be got by raising money by debentures, guaranteed by the Government, but to be paid off by an assessment on the coffee estates—by which it is expected that, in a very few years, the hill country would be covered with a network of roads, encouraging planting enterprise to a prodigous extent and rendering the success of our railway a matter beyond doubt.

His Excellency the Governor and suite were in Kandy, where he held a levée in honour of the Queen's birthday, on Monday, the 25th May, followed by a ball in the evening. The south-west monsoon had set in very tamely, at least unaccompanied by any heavy thunder-storms, though it had maintained its wonted character for rough boisterous violence. The quantity of rain that has fallen during the month of May has not nearly equalled that in previous similar seasons, but then March and April were so unusually wet that we could scarcely have expected it to have been otherwise. At latest accounts the monsoon had blown with so much force that on one occasion most of the shipping in the roads dragged their anchors, though without any ill-consequences. In the interior the weather had been finer than in Colombo.

Colonel Hadden, R.E., had been reinstated by the Home authorities, but was to return to England to recruit his health. Mr. Lawson, C.S., and Mr. Murray, C.S., have both come home on sick leave; the former gentleman's place being supplied by J. Selby, Esq., C.S.

The railway contractor had about 3,000 labourers at work, but owing to the weather, much progress was not looked for. A commencement has been made both in tunnelling at Kadugannawa, and in bridging at the Kalany river. This latter wil be a heavy undertaking, owing to the necessity for providing against the heavy floods to which the river is liable during the monsoon rains. It is intended, in the first place, to erect a wooden piled bridge for the purpose of conveying stores and materials along the line, several miles of which will shortly be laid down. Eventually iron screw-piles will be employed for the permanent iron railway bridge which is, we believe, already on its way out.

Several sales of coffee estates had recently taken place, which speak well for the value of such property in Ceylon. One was that of the Wihara Galla Estate in Happootelle, containing 260 acres of coffee, mostly in full bearing, with 500 acres of excellent forest sold for £12,500. The Narveena Estate in Rakwane, Saffragam, containing 120 acres of coffee in full bearing, and 160 acres of forest, changed hands for £5,700—whilst the Applewattie estate, in the Gampola district, 140 acres of coffee and 100 acres of forest, realised £7,000.

The question of Chinese labour is to be mooted by Captain Bird, but there does not appear to be any strong desire to employ other than Tamil labourers. Planters are nevertheless looking about them to see where their hands for next season are to came from, since there is no longer any doubt as to the good grain harvest in the South of India.

The sudden death of Captain Lane, H.M.'s 50th Regiment, has excited great sorrow at Colombo, where the gallant officer appears to have been much esteemed. The weather had been intensely hot, and the cause of Captain Lane's death was an attack of fever, brought on by exposure to the sun.

The south-west monsoon had not yet set in, but several thunder-storms had occurred, and it was therefore expected. The health of the island was not good.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

CAMPBELL—On the 17th inst., at Woolwich, the wife of Lieut.-Colonel Sir Edward Fitzgerald Campbell, Bart., 60th Rifles, of twin sons.

CLARK—On May 20th, at Galle, the wife of T. Clark, Esq., of a son.

DE SOUZA—On May 9 h, at Singapore, Mrs. Thiophilus De Souza, of a son.

FLEMING—On May 27th, at Colombo, the wife of Capt. Fleming, of a daughter.

GOMES.—On May 24th, at Kandy, the wife of Mr. J. W. Gomes, of the Commissariat-office, of a son.

HALL—On May 20th, at Newera Ellia, the lady of W. G. Hall, Esq., A.C.R., of a daughter.

LIVINGSTON—On the 23rd inst., at 33, Cleveland-square, the wife of W. P. Livingston, Esq. of a daughter.

LYALL—On May 14th, at Tanglin, Singapore, the wife of James Lyall, Esq., of a daughter.

MILLARD—On May 28th, at Galle, the wife of James Millard, of a son.

PURCEL—On May 19th, at Kandy the wife of Denis Purcel, Esq., of a daughter.

MARRIAGES.

PEREIRA—ROSARIO—At St. Philip Neri's Church, Colombo, on the 25th May, by the Rev. E. Mahani, Mr. E. H. Pereira, eldest son of Mr. M. Pereira, of Messrs. Cargill and Co., to Miss Rosario.

PEREIRA—RODRIGUE—At the Wolfendahl Church, on the 25th May, by the Rev. A. Young, B.A., Colonial Chaplain, Mr. Charles Pereira, of the Government Agents' Office, Colombo, to Miss Peternella Rodrigue.

WHITE—WINKWORTH—On the 18th inst., at St. James's, Paddington, by the Rev. J. A. Dolan, Charles J. White, M.D., Peninsular and Oriental Company, to Marianna West, eldest daughter of Stephen Winkworth, Esq., late of Purlnook Lodge, Hants. No cards.

DEATHS.

ADAMS—On the 3rd May, at Shanghai, of typhoid fever, Captain W. F. Adams, Paymaster H.M.'s 31st Regiment.

BRUCE—On the 12 h inst., at Trinity College, Glenalmond, Perthshire, the Hon. Charles Bruce, third son of the Earl of Elgin and Kincardine, in the 11th year of his age.

DENT—On the 23rd April, at Shanghai, Emma Sabine Dent, wife of Henry Wm. Dent, Esq., firm of Messrs. Dent and Co., aged 24.

LYALL—On the 12th inst., at 9, Craven-hill, Harry Ernest, son of George Lyall, Esq., aged 10 months.

OSBORNE—On the 4th May, at Shanghai, Captain Osborne, of the S.S.N. Co.'s steamer *Surprise*.

SILVA—On the 20th May, at Colombo, the eldest daughter of John de Silva, aged 14 years.

VANGEYZEL—On the 29th May at Colombo, Mrs. E. H. Vangeyzel, widow, eldest daughter of Mr. J. C. Rafeil, aged 27 years.

VAN SCHERPENBERG—On the 9th ult., on his voyage to Java, between Aden and Ceylon, August Van Scherpenberg, Esq., of Driebergen, Holland.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—The new Congous have not come forward to Hankow and Foochow so early as was expected; the next mail, however, will probably take advices of some of the first ships having sailed. They seem plentiful in the districts contiguous to Hankow, there being a great demand for money to send into the country to purchase them; from which it may be inferred that no obstruction on the part of the marauders is anticipated.

MACAO.—Arrivals of new teas only amount to 2,400 half-chests of Tyshans prepared in Kysow style, and contracts have been entered into to the extent of 3,800 half-chests at 20 to 21 taels. Of old teas the stock remaining consists of 1,500 half-chests offering at 14 to 18 taels, which, however, continue neglected.

CANTON.—The market has been very quiet during the fortnight, next to nothing having been done in Congous. A fair amount of business has been transacted in Scented Capers, whilst in new Scented Orange Pekoes extensive settlements have taken place at extreme rates. The business in Greens, both country and Canton, has been small. The settlements of the fortnight are reported as under. Congous: 3 chops Oopack, one bought at 34 taels and 2 shipped on native account; 500 half-chests Tyshan at 22 to 27 taels. Scented Teas: "Caper," 1,500 boxes old at 13 to 14 taels for common, and 17 to 18 taels for middling to good; 3,400 boxes new at 24 to 27 taels for middling to good, and 29 to 32 taels for fine to finest Orange Pekoes; 20,000 boxes new at 25½ to 27 taels for good, 28 to 28½ for fine, and 35 to 37 for finest. Canton Greens: 2,600 boxes old Gunpowder, good, at 19 to 23 taels; 13,300 boxes new ditto at 22 to 26 taels; and 300 hf.-ch. new Imperial at 23 taels. Country Greens: 730 hf.-ch. equal to 2 chops at 32 to 32½ taels proportion. The stock remaining on the market is thus estimated:—Congous 14 chops, Country Greens 7,220 hf.-ch.; Oolongs, 2,500 hf.-ch. Of Scented Teas and Canton Greens the stock of old is believed to be large, whilst that of new is said to be small. The total settlements of Congou for the present season to date amount to 266 chops and 6 do. contract Tea.

SHANGHAI.—Black: No settlements have been made during the fortnight, and stocks are reduced to about 1,500 chests of common Hohow which do not tempt buyers to operate. Total shipments to date 236,912 chests against 216,094 chests same time last year. Stocks, 1,500 chests Congou and 800 chests Flowery Pekoe. Greens: The market has been exceedingly quiet throughout the whole fortnight, and the few settlements that have been made were at a reduction of about Tls. 1 to 2 on previous quotations. Teamen are now becoming very anxious to realise, and a considerable decline is expected in prices before buyers come forward. The stock is almost entirely composed of very common descriptions. Shipments and settlements for the fortnight, 5,200 half-chests, making a total to date of 331,480 against 312,224 half-chests same time last year; stock, 21,000 half chests.

FOO-CHOW-FOO.—The season is over. The only transaction of the fortnight is the settlement of 450 ch. Congou at 12 taels for common shipping quality. Stock, 600 chests. The new Congous are expected in ten days or a fortnight. The cost is said to be about 3 taels higher than last year, the quality being reported decidedly inferior.

AMOY.—In Old Teas nothing has been done; of the New Crop some musters of Orange Pekoe and Congou are at hand, the cost of which, in the country, is reported to be higher than last season. From the limited quantity of musters that have come down, it is impossible yet to form an opinion as to the quantity of the crop.

KEWKIANG.—Black: No transactions are reported, and only one chop of very common Hohow remains on the market unsold. Green: The fortnight's settlements amount to 3 chops of 2,000 packages in all, bought by one house at 22, 28, and 31 taels all round respectively, for common Silyuen to fair Moyune tea. Of the latter description their is now nothing

Digitized by Google

left on the market, and the small stock of common and medium teas amounting in all to about 14,000 packages, is very firmly held. As will be seen below, shipments to Shanghai on native account, induced by the low freights ruling and the absence of all demand at this port, have been made to some extent.

YOKUHAMA.—Sales to a small extent continue to be made at previous rates. The new crop will be in the market by the end of May, should political events not intervene.

RAW SILK,—SHANGHAI.—The operations of the fortnight have been very limited, amounting to little more than 1,000 bales. Prices are unchanged, and dealers remain firm, in consequence of the small stock, which is composed almost entirely of Tsatlee. There have been no arrivals from the interior. By last reports, the coming crop, which is expected to be early this season, was progressing favourably. About 900 bales have been received from Japan, and next advices are anxiously waited for in the hope that they will announce a satisfactory settlement of political difficulties with that country. The settlements of the fortnight amount to 1,000 bales, against 3,000 bales the corresponding fortnight of last, and 1,500 bales the season before. The unsold stock on the market is 600 bales only, and 2,000 bales same time last year, and 5,000 bales the season before. Tsatlees: No. 1, Tls. 470; 2, 450; 3, 430; Market, 3, 410 to 420 piculs; 4, 390 to 400; 5 and common, 360 to 375. Taysaams: No. 1, Tls. 400 to 410 piculs; 2, 380 to 390; 3, 350 to 360; 4, 5, and common, 300 to 335.

KANAGAWA.—Settlements of silk were considerable and amounted to about 1,000 bales during the last few days at a reduction of about $10 on former quotations. Advices of the expiration of the English Ultimatum and its results have not reached us yet, they are however hourly expected now.

DRUGS, &c.—The Canton market is thus reported on:—Cassia Lignea sales 500 pls. at $15.75 to $16. Stock 750 pls. Cassia Oil, no stock, no sales. Cassia Buds, a lot of 30 pls. is being offered at $47.50. Star Anniseed no stock, value $22.50 to $25 per picul. Gamboge and Rhubarb no stock. China Root is quoted $4.25 with a small stock. Galangal is quoted $4 to $4.25, stock 250 pls. Camphor.—Hong Kong.—The article is in small demand, and has declined $22 per picul.

COTTON.—SHANGHAI.—There is more inclination to ship to England han there was at date of last advices. No vessels have been dispatched hither during the fortnight, but the *Castle Howard* has been laid on. About 2,500 bales have been shipped to the Southern ports since last mail. The stock on the market is small, and supplies come tardily forward owing to heavy rains which have occurred recently. The only settlements reported during the fortnight consist of about 3,000 bales for shipment to England at 12¼ to 12½ taels.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Shanghai (per Tael.)	6 months sight.	6s. 6d. to 6s. 6¼d.	6s. 7½d.
At Foo-Chow-Foo (per dol.)	6 ditto	...	...

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cent and is divided into decimal parts of ten.

SHIPPING INTELLIGENCE.

ARRIVALS.

At SHANGHAI.—April 23, Clontarf, from Cardiff; Moldavian, from Swansea; May 1, Seawfel, from London; 3, Johanna, from Newcastle; 4, Runnymede, from Newcastle.

At HONG KONG. May 28, Alarm, from New York; Sea Lark, from New York; Sze Chuen (steamer), from New York and Singapore; Beatrice, from London; May 5, Voltigeur, from Newcastle; 6, Shakspeare, from Cardiff; 8, Superb, from Hamburg; 9, Bahama, from Liverpool.

At SINGAPORE.—May 10, Horatio, from New York; 16, Foh-Kien (steamer), from New York; Carl Auguste, from Cardiff; Neptune, from Hamburg; Zwey Gebroeder, from Newcastle; Bristow, from Liverpool.

At FOO-CHOW.—None.

At MANILA.—None.

DEPARTURES.

From SHANGHAI.—April 24, Benefactress, for New York.

From HONG KONG.—None.

From SINGAPORE.—May 8, Oscar, for London, Lady A. Duff, for London; 9, Benledi, for London, T. W. Sears, for New York, Benvenue, for London and Penang; 19, Finland, for Liverpool, G. H. Wappins, for Liverpool; 20, Snow Squall, for New York.

From FOO-CHOW.—April 24, Howqua, for New York.

From MANILA.—April 27, Indiamen, for Liverpool; 28, Agricola, for Falmouth.

LOADING.

At SHANGHAI for LONDON.—Antipodes, East Lothian, Guinevere, Seawfell, Castle Howard, and A. A. Elsidge. For United States: Castleton and Benefactress.

At CANTON for LONDON.—Notos, John Scott, and West Australian. For Liverpool: Aberna, Alfred Ray, and Storm King. For United States: Europa and Caudace.

At FOO-CHOW for LONDON.—(Waiting for new teas).—Flying Spur, Fiery Cross, Star of China, Min, Robin Hood, and Falcon.

At YOKUHAMA for LONDON.—Copernicus.

At HANKOW for LONDON.—Challenger and Annette (steamer).

At SINGAPORE.—Ystroom, for London; Mountain Ash, for London; Singapore, for Bordeaux.

PASSED STRAITS OF SUNDA.

From England and Continent to China: April 27, New Granada, Cardiff to Hong Kong; 30, Nupton, Hamburg to Singapore, Catharina, Hamburg to Anjer. May 1, Cesarewitch, Hamburg to Shanghai, Pegasus, London to Shanghai; 2, Sidon, Hamburg to Hong Kong, Zwey Gebroeders, Newcastle to Shanghai, Karl and Auguste, Cardiff to Singapore; 6, Assyrian, London to Shanghai; 7, Bristow, Liverpool to Singapore; 5, Humphrey Nelson, Cardiff to Shanghai. From United States to China: May 2, Parliament, New York to Shanghai. From China, &c., to England and Continent: May 9, Cecilia, Singapore to Bordeaux; 4, Voladora, Manila to Falmouth.

FREIGHTS AND CHARTERS.

HONG KONG.

Freights on the whole are much easier than they were at date of last report. The following are some of the settlements of the fortnight:—

ENGLAND.—Alfred Ray, (Brit. barq.), 190 tons, for Liverpool; cotton, at £4 per ton. Notos (Hamb brig), 406 tons, for London, at £4. 5s. per ton; West Australian (Brit. ship), on the berth for London, £4 to £4. 10s. per ton; Bahama (Brit. str.), from Foo-chow for London, at £12 to £12. 12s. per ton.

UNITED STATES, &c.

Caudace, Danish brig, 298 tons, for New York with tea, at $20 (silver coin) per ton of 40 feet. Trimountain, American ship, 1,032 tons, for San Francisco, with passengers at $24 per head. Granville, British brig, 700 tons, to San Francisco, for $12,000 in full.

AUSTRALIA.

Therese, Danish brig, 309 tons, to Sydney *via* Manila, with clayed and unclayed sugar, at £4. 5s. per ton.

SHANGHAI.

The following are the current rates of freight. To London £4 to £4. 5s.; to New York, $16; to Nagasaki, $4 per ton for meast., and 25 cents per picul dead weight; to Tien tsin, no vessel loading; to Hankow, 7 to 8 teals per ton meast.; to Hong Kong and Amoy, 50 cents per bale cotton; to Foo-chow, 3½ per ton meast., and 10 to 15 cents per picul dead weight.

MANILA.

The Governor-General, for London, at £3. 15s. for dry sugar, and £5 for hemp; the Flora, for Liverpool, at £4 wet sugar, and £4. 15s. for hemp.

SINGAPORE.

The Mountain Ash has been laid on for London at £3. 5s. tin and gambier, and £4. 10s. per ton light goods. Tin, £3. 5s. per 20 cwt.; sago, in boxes, £4; sago flour, £4; gambier, in bales, £3. 5s.; sugar, £4; black pepper, £4 per 16 cwt.; coffee, £4 per 18 cwt.; hides and horns, £4 per 16 cwt.; gutta percha, £4 per 20 cwt. Measurement goods—£4. 10s. per 50 cubic feet.

CASUALTIES.

HONG KONG.

The American brigantine James Marshall, Captain Burow, left Hong Kong on 28th April, bound to Bangkok—but came back into harbour yesterday afternoon in consequence of the Chinese crew having risen and tried to take possession of the vessel; failing in the attempt, however, they seized one of the boats hanging in the davits, and departed from her, leaving one of their number on board, wounded.

Digitized by Google

Captain Muller, of the Swedish brig Therese has furnished the following information:—"May 1st, at two P.M. left Hong Kong, continued on our passage for Ningpo, with the winds from the Eastward until the 5th when the wind increased from the N.E. Double reefed the topsails; same wind continued until the 7th. When off the Pescadores Islands the weather set in dark and gloomy with thunder and lightning; close reefed the topsails and stowed the courses, jibs, &c. At eight P.M. blew a perfect storm, continued all night and next day sea increasing to a fearful height on the 8th at six A.M. the mainsail blew away from the caskets and quickly tore to pieces. ship pitching and labouring so much as to wash the inner jib from the boom. and the ship leaking to a fearful extent, and always on the increase had to throw some of the cargo overboard to ease her by the head. had to attend to the pumps continually. At 8 A.M. sea decreasing. Bore away for Hong Kong, where we anchored Sunday, the 10th, at 11 A.M. During our run down the coast passed a barque with loss of fore topmast. There were no fishing boats to be seen outside at all, so heavy has been the gale, and there are vessels lying in almost all the bays near the port."

FOO-CHOW.

The Broadwater, bound to Shanghai, struck on the rock outside. She has just returned leaking badly.

AMOY.

The barque Vickery, which was attacked by pirates at Wanchew, put into Amoy to report the circumstance, and the Customs having discovered that she had not only been selling arms at Wanchew, but had some on board when she reached Amoy, immediately seized her. Since then the captain, who was principal owner of the vessel, has been permitted to purchase her for 500 taels.

COMMERCIAL POSTSCRIPT.

CITY, FRIDAY AFTERNOON.

The circular of Messrs. Waithman on silk says:—"The silk market has been flatter than ever during the past fortnight, and prices must be again quoted easier. The public sales took place yesterday and the day before, and passed off without the slightest animation. The deliveries, it will be seen, are very small—China, 2,737; Japan, 905: total, 3,642 bales. The quotations are—No. 1 Tsaltee, 23s. to 24s.; No. 1 Taysaam, 19s. 6d. to 20s."

ARRIVALS NOT INCLUDED IN THE TABLE.—June 24, at Falmouth from Rangoon, Equator. 25, from Ceylon, Polly; from Padang, Soleftea; from Bassien, Western Continent. 21, at Bremen from Akyab, Louis Henry. 26, at Deal from Ceylon, Herrington. 26, at Liverpool, from Singapore, Crescent City.

DEPARTURES.—June 23, from Deal for Galle, Lady Combermere. 22, from Cardiff for Shanghai, Magdalena. 23, for Singapore, Ferris; from Sunderland for Shanghai, Mercator. 10, from Santa Cruz for China, Keang-soo (Chinese war-steamer). 25, from Liverpool, for Singapore, Bonaventure.

SPOKEN.—Lord Raglan, Shanghai to London, June 10, 36 N., 42 W.; Cyclone (American), Manila to New York, April 27, 31 S., 10 E.; Concordia (Prussian brig), Sunderland to Shanghai, May 21, 3 S., 24 W.; Queen of Nations (ship), London to Shanghai, May 29, 4 N., 24 W.; Mirage, London to Shanghai, May 14, 4 N., 24 W.; Constance, London to Shanghai, 30 days out, 33 N., 22 W.

LAID ON.—At Liverpool, for Singapore, Hyacinth; at Glasgow, for Batavia and Singapore, Favourite.

THE COFFEE SALES IN HOLLAND.

IT is not at all improbable that during the forthcoming debates on the disposal of the surplus revenue derived from Netherlands India, the system of the Company's Coffee Sales will be again mooted. It cannot be denied that it gives great dissatisfaction, and though it has often been attacked and but feebly defended, it is not likely that the Dutch will let it rest in its present state for any long period. It is true that the Colonial Ministers, subsequent to Mr. ROCHUSSEN, have been fully alive to the existing abuse, but their term of official power was too short to allow them to propose any modification or reform in the system. It is also true that there is but little chance of any alteration being made in the present year, as the needful arrangements have already been made; but it may reasonably be expected from the antecedents of the new Colonial Minister, Mr. FRANSEN VAN DE PUTTE, who is known to be an enemy of all protection and monopolies, which are calculated to benefit the favoured few but are injurious to the multitude, and ruinous alike to the merchants and the Treasury, that he will not shut his eyes to what is generally considered in Holland as a crying and unwarrantable abuse.

Let us for a moment glance at the system that was in force previous to that of the present day. At that time the Netherlands Trading Company held two coffee sales in the spring, one at Amsterdam and the other at Rotterdam; and three sales in the autumn, one at Amsterdam, the second at Rotterdam, and the third at Middelburg, with only an interval of a few days between them, which of course caused the prices obtained to be virtually the same, with perhaps here and there an exceptional case. In reality, however, the fear of there being any large fluctuation between the prices obtained at the three sales, though following each other so rapidly, seems to have given rise to the combination of the coffee brokers, against which great complaints have been raised. If this combination had simply consisted in their mutually communicating to each other the maximum limits of their orders in order to get an insight into the probable result of the sales, the plan might have been plausibly defended; the more so, as the bids rising by half a cent, an unlimited competition would in most cases send up the prices and deprive their principals of what little profit they might otherwise obtain.

But instead of such a harmless and even beneficial result the combination of coffee brokers took quite a different turn, and became by degrees a commercial power of such strength and importance as at length perfectly to rule the market in such an inconsistent and overbearing manner that they terrorised both buyers and sellers, and made themselves extremely obnoxious to all. If any one not belonging to the association had the courage to bid at the sales, he was immediately outbid, and the prices needlessly run up, to the detriment of those principals who had given them unlimited orders to purchase. Besides the abuse of this combined phalanx of brokers there was another great cause of complaint, which appears to have originated with the company itself; this was the mixing different qualities of coffee together to make a large quantity supposed to be of uniform colour and berry, and represented by one single sample. Here again the principle was not bad, as it, simplified the sale; but in practice it led to the gravest abuses much to the advantage of the select and favoured few that were in the secret, but sadly to the detriment of the general run of purchasers who were bound to place confidence in the manipulations effected by the company's servants.

In this manner the sales were conducted till the autumn of the year 1857, when the system was altered; the immediate result of which was that at the first sale, which was held at Rotterdam, the prices obtained were pretty near to the valuations; but at the next sale, which was held at Amsterdam only three days subsequently, the demand appeared to be suddenly extinguished, and the company had only the alternative of withdrawing the coffee or selling it at ruinously low prices. They chose the former, and at the same time gave notice that the next sale, which was advertised to be held at Middelburg a week later, would not take place at all. Many people were inclined to ascribe this strange and unprecedented phenomenon to the impending financial crisis that subsequently broke out with devastating fury and raged through all the principal commercial emporiums of Europe. This might have been partly the cause, and the public thought it extremely cautious on the part of the company to suspend or postpone the sales in the face of the appalling financial difficulties that for the time prostrated all commercial enterprise; but nobody was prepared to find it used as a means of altering the whole system of the coffee sales in Holland. According to the new system, which is still in operation, there are two sales held annually (alternately at Amsterdam and Rotterdam) of all the coffee in warehouse at Amsterdam, Rotterdam, Dordrecht, Middelburg, and Schiedam. All the coffee of the same quality lying at the different above-named ports, are combined into one description of quality and package, and sold by one sample. The conditions of sale remain as before.

To a superficial observer it may appear that there was no great alteration here after all, indeed many people considered it an improvement and looked at it as a simplification of the former ponderous machinery, to say nothing of the favourable effect it produced abroad when it was known that what was formerly sold in two or three different ports on two or three different days was now disposed of in a few hours in one single locality. But on a closer examination it was found that all the faults to be charged against the former system were not only continued but greatly increased without affordingany adequate compensation. The system of mixing different sorts of coffee to make an average quality, which was formerly confined to each of the five ports separately, is now continued on a much larger scale, so that parcels of from fifty to eighty thousand bags are now frequently sold by one single sample. Those who imagine that the whole of the coffee is fairly represented by the sample exhibited, are woefully mistaken. It is true that as a general rule the bulk of the coffee is superior in quality to the samples, though it does not follow that this is always advantageous to the purchasers. For instance, we will say there is a sample officially described as "pale greenish" which is bought as suitable for the markets of Belgium and Germany. For the former country the paler the coffee is the better, whilst the Germans prefer it of a green colour. Now the broker who has the order to buy is quite ignorant whether the pale predominates over the green, or

Digitized by Google

the green over the pale, and is therefore liable to complaints and claims for compensation. This might be avoided if the public were permitted to examine the coffee in bulk, but this the company do not allow; why, has never been satisfactorily explained. The only answer is, "Because it is the custom." It is—to use a homely phrase—like buying a pig in a poke. But even supposing that the quality is really better than the sample, it follows that the revenue of the country must suffer for the deception, as the coffee would have sold for a higher price had it been fairly sampled. Thus buyers and sellers become the dupes of this system of mixing different parcels, and not less so from the above-mentioned combination of brokers; and what tends to make the latter quite insupportable is that they require the orders to be given them the day before the sale, and the merchants are left in uncertainty if their orders are executed or not till the day after.

That the revenue suffers from this system, as we remarked above, requires no proofs. In fixing the minimum price for the different qualities it is, of course, the interest of purchasers to buy at as low a figure as possible. But when the orders exceed the quantity offered the merchants only get a part of what they wished to purchase even if they gave the broker an unlimited order, which also gives rise to great inconvenience and loss. For instance, let us say that for one particular sample representing 50,000 bags there are orders given to purchase in the aggregate 60,000. Messrs. X. and Co. have given an unlimited order to buy 3,000 bags, but when the distribution is made, they find that only 2,400 bags are allotted to them, and as they must have the whole quantity, they are induced after the sale to make up the 3,000 bags by purchasing six hundred more at an advance of half a cent on the sale price. Then we read in the Prices Current and trade circulars, "All readily sold and half cent profit paid after the sale for favourite qualities." This sounds very well and makes a great sensation in the European markets, but it is remarkable that the Government seems to ignore the fact that with a better system of competition and free bidding in an open market, that additional half cent, and probably in most cases a great deal more, would flow into the coffers of the State.

Thus we have endeavoured to show that the two chief disadvantages arising from the present system are caused, first by the lumping of different qualities of coffee together and selling them by one single sample, and, secondly, the combination of brokers, who, to all intents and purposes, enjoy a monopoly of the trade, and the exclusive regulation of the prices. This very unsatisfactory state of things might be easily done away with by throwing open the biddings to the free competition of any merchant or broker at the sale, and altering the system of selling mixed parcels by one sample. A further improvement would also be found in not restricting the coffee sales to twice a-year, but to increase the number—say to every two months, as is the case with the company's sugar sales—and bring forward a smaller quantity at a time, according to the requirements of the trade. And, finally, we would suggest an alteration in the mode of making the quotations of prices and sale conditions. At present the bids rise half a cent at a time, which is too great a jump, and represents even under the present exceptional high value of coffee from ¾ to 1 per cent; whilst taking as a standard the average of former years—say the price of 25 cents per kilogramme—a rise of half a cent is equivalent to *a full two per cent.*, which all experience in commercial matters shows to be disadvantageous both to buyers and sellers. It would be a great benefit and facility to the trade if the prices of coffee were fixed at so many florins per 100 kilogrammes, and the bids allowed to increase by ¼ florin at a time.

Parliamentary Intelligence.

HOUSE OF LORDS.

THE INDIAN NAVY.

(18th.) The Earl of ELLENBOROUGH wished to know what arrangements had been made between the Admiralty and the Indian Government consequent upon the abolition of the Indian navy. He understood that all the war services formerly performed by the Indian navy were to be henceforth performed by ships of the Royal navy, but that the Indian Government was to retain certain vessels in its hands for the conveyance of troops and stores.—The Duke of SOMERSET said that there would be a small local navy for the transfer of troops and stores from one part of India to another; but for the general naval protection of India the Admiralty at home would provide.

OUR RELATIONS WITH BRAZIL.

(19th.) The Earl of MALMESBURY moved for the despatches explaining the ground on which the damage demanded from the Brazilian Government was assessed. That the envoy of a foreign country should be driven to leave us, like a swallow flying to a more genial clime at the end of the summer, is a matter of which we ought to take notice. We cannot allow a Minister to leave us, declaring that he has been unjustly treated, and that he cannot remain here consistently with the dignity of his country, without taking some notice of it. The noble Earl read a letter written on the 10th of last month by a person at the head of a rich and powerful English house in Brazil, which said: "As I foresaw, the English question has raised a most powerful opposition to the present Ministry, and at this moment there is little doubt that they will retire, and it may be that the Emperor will be compelled to dissolve the Chamber. I assure you the dispute with England is far more serious than you believe it at home." Where is that captain whose name is mentioned by Mr. Stephens as describing the details of a most horrible murder, and when an offer is made to the Foreign-office that he should attend and state all he knows we hear no more of that captain? Where is that man who knows all the circumstances? The noble Earl, in a long speech, demanded further evidence from the Government of the grounds on which it had acted.—Earl RUSSELL, in his reply, stated that Mr. Christie and Admiral Warren supported Mr. Vereker in his judgment that the Bazilians did not choose to produce the bodies for fear of the tale which those bodies would tell. That was the natural inference which Her Majesty's Government drew from the pretence as to not finding the bodies. Some time afterwards, when Mr Vereker was proceeding along the coast, he found that the inhabitants of all the houses denied that they had ever heard of any wreck, or that they knew what had become of the persons who were drowned.—Earl RUSSELL quoted international law to justify the reprisals made. Had the British fleet stood out to sea for reprisals, the commerce of Brazil would have been more seriously interfered with. Is the Brazilian Government to suppose that because she is a weak Power she is to be allowed to wink at the murder of British seamen and to conceal the fact that those four men and two women were actually murdered? Does Brazil think that, because she is weak, impunity for such acts can be allowed to her? With respect to all Powers, strong or weak, we must demand redress for such acts, and by doing so we shall nsure the protection of our commerce in all parts of the world.

HOUSE OF COMMONS.

THE SUEZ CANAL.

(12th.) Mr. D. GRIFFITH asked the First Lord of the Treasury whether a statement published by M. Lesseps had reached the Government, asserting that the Turkish despatch prohibiting forced labour on the Suez Canal, &c., was anterior to conventions of the 18th and 20th of March last, by which all the questions relating to the cutting of the canal were settled in conformity with the engagements of the Egyptian Government; and whether those latter expressions were to be considered to mean the continuance of forced labour; and, if so, whether the British Government would oppose any such transaction.—Lord PALMERSTON said Her Majesty's Government knew nothing of the letter of M. Lesseps to which the hon. member referred. The Sultan, exercising his sovereign rights, had extended to Egypt the law against forced labour, which had long prevailed in every other part of his empire, and Her Majesty's Government conceived that no foreigner, whether a person engaged in commercial speculations or representing a foreign Government, had any right to obstruct the Sultan in carrying into execution a law which was founded on a good consideration of the interests of his subjects. Of course Her Majesty's Government would give the Sultan every support in their power in carrying that law into effect.

INDIAN AMALGAMATION SCHEME.

(12th.) Mr. M'EVOY asked the Secretary of State for India whether the terms of the amalgamation of the medical departments of the Queen's and of the Indian army had yet been settled, and when they would be stated to the House.—Sir C. WOOD said that some objections were entertained at the War-office to the proposal made on the subject. He could not yet say what the result would be.

JAPAN.

(15th.) Mr. LIDDELL asked the Under-Secretary of State for Foreign Affairs what was the precise nature of the demands made by Her Majesty's Government upon the Government of Japan, in the shape of reparation for outrages committed upon British subjects in that country; and, whether there was any objection to state what instructions had been sent to the British Admiral on the station as to the steps to be taken in the event of the Tycoon's refusal to comply with those demands. As the matter was one of very great importance the hon. member wished also to ask whether Her Majesty's Government had any good grounds for supposing that the Tycoon had power, even supposing he had the will, to demand reparation from a powerful chief like the prince, by whose followers the crime had been perpetrated.—Mr. LAYARD said that some months ago a murderous attack had been made upon four British subjects who were riding on a highway near Jeddo which had been opened to foreigners by treaty. Mr. Richardson was killed, two other gentlemen were seriously wounded, and a lady escaped almost by a miracle. Her Majesty's Government had demanded from the Japanese an ample and formal apology for this outrage. They had also demanded that £100,000 should be paid by the Government of Japan as a penalty for this offence. His hon. friend had asked whether the Tycoon had power to enforce reparation from a powerful Daimio like the prince whose followers headed by his father had committed the offence. Her Majesty Government had demanded that punishment should be inflicted upon that chief, and that the persons implicated in the outrage should be taken, tried, and executed in the presence of one or more British officers. Further, they had demanded that a sum of £25,000 should be paid by the prince as compensation to the family of those who had suffered in the assault. Whether the Japanese Government had power to enforce these demands upon the prince he could not state, but he should know when the Government received intelligence from Japan. There was a still further demand upon the Tycoon. On the 26th June last two marines were murdered while on guard at the British embassy. For that Her Majesty's Government had demanded £10,000 as compensation for the families of the victims. He could not of course state what instructions had been given to our admiral, but he trusted that they would be of a nature to enforce the demands of Her Majesty's Government.

NAVAL PRIZE MONEY.

(16th.) Sir J. HAY, in moving the second reading of this Bill, explained the object of it to be to enable persons in the navy who were entitled to prize-money to appoint agents to prosecute their claims, and also to alter the law with regard to the remuneration of such agents. It was admitted that his Bill was a step in the right direction, and he hoped that, until the great promised consolidation measure made its appearance, the House would assent to this instalment.—Lord C. PAGET thought his hon. and gallant friend was as good a lawyer as he was a sea captain. He certainly should be willing to support the Bill, were it not that it proposed to deal with a part only of a great subject; and the result would be that a new Act of Parliament would be thrown on the top of a good many others, without its being distinctly understood how far it would affect them. —Mr. G. HARDY expressed himself not satisfied with the noble lord's remarks. The case of the *Kertch* prize-money was a gross instance of our mismanagement, and the delay on this question was discreditable to the country. This Bill was of the simplest form, and provided a very simple remedy.—Sir J. ELPHINSTONE said that the immediate advantages which would be derived from the passing of this measure were considerable. There were prospects of large sums of prize-money being soon acquired in the Borneo seas. He cited instances of cases where a young officer, with a few sailors, in charge of a prize, had, under the existing law, been thrown loose upon the streets of London without funds, and not being able to apply to an agent was without means of raising money to supply the wants of himself and his men. He asked further, of whom it would be possible for an officer in command of a prize abroad to borrow money on a bottomry bond without an agent? In 1860 the case of the *Kertch* prizemen occurred. He brought the matter forward, but found he could do nothing with it. However, it was found that an agent could be employed, and he recovered the money, and it was now in course of distribution. He did not think that Government had made out any case whatever for delay. He quite concurred with them in their desire to get rid of a number of statutes, and to bring them all under one. At the present moment it was impossible for a captain to know under what orders he was placed. He should, therefore, strongly recommend his hon. and gallant friend to persevere with the Bill.—Colonel DUNNE said both in the army and navy they had had for years complaints about the non-distribution of prize-money. He saw no difficulty in repealing all Acts affecting the distribution of prize-money, and bringing in a Bill that would consolidate the law. But what he principally rose for was to impress upon the Government the necessity of some change in the system for the distribution of prize-money in the army. The Burmah prize-money and the Deccan prize-money had not been distributed yet.—Lord C. PAGET said he did not like to go against the unanimous feeling of the House. He warned the House that it was taking upon itself the responsibility.—The Bill was then read a second time.

EMPLOYMENT OF ARTILLERY OFFICERS IN INDIA.

(19th.) Colonel SYKES asked the Secretary of State for India whether or not it be the fact that instructions have been issued by the Home authorities to those in India with the view of preventing officers of the Indian (now Royal) Artillery from being withdrawn from their regiments for staff, civil, or other detached employment, under the several local governments, for which, before being transferred under the authority of the Horse Guards, they were, by the regulations of the Indian service, equally eligible with officers of cavalry and infantry.—Sir C. WOOD said that there was no prohibition against such employment of artillery officers, but as there were but few artillery officers whose services were not required with their regiments, they would naturally be less employed than officers of cavalry and infantry.

CHINA.

(25th.) Lord NAAS gave notice of postponement of his motion relative to China, until the first Supply night.—Colonel SYKES asked the Secretary to the Treasury how it was intended to appropriate the balance of the first Chinese indemnity remaining in the Treasury, and whether any rejected claims would be reconsidered.—Mr. PEEL said it had been decided more than twenty years ago that claims which had been adjudicated upon should not be re-opened. He had been unable to discover what had become of the balance of half a million dollars remaining in the Treasury in 1846, but he imagined it was applied towards the expenses of the war.—In reply to Sir W. GALLWEY, who asked the Secretary to the Admiralty if directions had been sent to the Admiral in the Mediterranean to station a fast steamer between Benghazi and Alexandria, as the Malta and Alexandria cable had ceased working, Lord C. PAGET said that application had been made to him to station a steamer between those two points; but the answer was, that it would be highly inconvenient that a vessel should be appointed solely to carry telegrams between Alexandria and Benghazi, a distance of between 300 and 400 miles.—In Committee the following votes were agreed to:—£81,054 for services in China, Japan, and Siam; £6,830 for Labuan.

EAST INDIA COMPANY.—A general court of proprietors of the East India Company was held on the 10th inst., Colonel Sykes, M.P., in the chair. The secretary read the financial statement, showing that the state of the security fund on June 1, 1863, was as follows:—Invested in Three per Cent. Consols, £756,420. 2s. 3d.; ditto in Three per Cent. Reduced, £4,916,936. 18s. 7d.: total, £5,673,357. 0s. 7d. The general investments were, in the Three per Cents., £10,422. 17s. 9d.; in Exchequer Bills, 4,000. The chairman, in moving the reception of the accounts, congratulated the proprietors on the fact that, independent of the tender mercies of the Government, they had a security fund of over £5,500,000 for the safety of their position. He also announced that their next dividend would be due on the 6th July. On the motion of Mr. Beddome, a petition to both Houses of Parliament on the subject of the Indian Navy was adopted; that to the House of Lords to be presented by Lord Eilenborough, and that to the House of Commons by Colonel Sykes. A committee was appointed to consider the by-laws, and a vote of thanks to the chairman closed the proceedings. On the 18th inst. was issued the finance and revenue accounts of the Government of India for the year 1861-62 and an estimate of revenue, expenditure, and cash balances for 1862-63. The gross income of the revenue of India in the year ending April 30, 1862, was 43,829,472. The expenditure was £43,880,100, there being an excess of expenditure over income of £50,628. The total cash balance in India and at home on the 30th of April, 1862, was £23,621,990. The estimated income of the revenue of India in the year ending April 30, 1863, is £45,105,700. The expenditure is estimated at £43,825,104. There is thus an excess of income over expenditure to the amount of £1,280,596.

CHINESE ENAMELS.—Some magnificent enamels and the celebrated Greek vase, known in Italy by the name of *Il gran Vaso del Capo di Monte*, were, together with an assemblage of fine old oriental, Sevres, Dresden, and Vienna porcelain, disposed of at the rooms of Messrs. Christie, Manson, and Woods. Enamels from the Summer Palace at Peking:—209. A noble bowl and cover, with dolphin handles, enamelled with birds and bats, in colours in pale blue and turquoise ground, the cover surmounted by a chasing in copper, gilt, 24 inches high—170 guineas (Bourne). 210. A magnificent incense-burner of extraordinary size, the bowl supported on three elephants' heads of metal gilt, with pierced sides of copper gilt, very richly chased and enamelled, and surmounted by a chasing of dragons; 54 inches high; one of the largest pieces of Chinese enamel ever brought to England; used as a stove in the Emperor's library —205 guineas (ditto). 211. The celebrated Greek vase, known in Italy by the name of *Il gran Vaso del Capo di Monte*. It was deposited in that palace with other treasures of the Farnese family by the King of Naples. It was found at Polysthene, in Apulia, near Tarentum, in the year 1786, in a subterranean apartment of 40 feet in length, at 14 feet below the surface of the ground. The subject of the painting in front is the grand feature of Greek heroic history,—viz., the Battle of Theseus and Hippolyta, doubly represented, to show the issue of the contest. Above them, as in Olympus, are four deities—Apollo, with Diana, Minerva, and Hercules—corresponding to the account given by Pausanias of the ornaments on the throne of Jupiter Olympius (book v., cap. 2). On the neck of the vase is a representation of Victory, as a winged female, in a chariot drawn by four white horses, with a laurel upright, but preceded by a female bearing torches, with a laurel prostrate. Surmounting the vase is a deity seated in a temple, holding a pattera with an egg placed upon it. Without the temple are four figures of attendants, two of which also exhibit the egg in a pattera. The shape is of the most harmonious Greek outline. Its height is 3 feet 6 inches, and it is in the highest state of preservation. At the time of Napoleon's invasion of Italy a French agent had been commissioned by his Government to obtain this vase, which had been set down, among other works of art, to be secured and sent to the Louvre. The agent brought it, however, to London, and it was on hearing of its arrival from the late Mr. Charles Townley, the donor of the marbles to the British Museum, that it was seen and purchased by the late owner—300 guineas (Jones).

ROYAL HORTICULTURAL SOCIETY.—The second great flower and fruit show of this society took place at South Kensington. The total number of visitors present was about 7,000. Prizes were awarded for fifteen stove and greenhouse plants (open) to Mr. T. Whitebread, gardener to Mr. H. Colyer, Dartford, Kent, £20; to Mr. B. Peed, gardener to Mrs. Tredwell, Lower Norwood, £15; and to Mr. J. Green, gardener to Sir E. Antrobus, Lower Cheam. For twelve stove and greenhouse plants (nurserymen), to Mr. W. Cob, Worthington, Manchester, £10. For twenty orchids, exotic species (amateurs), to Mr. W. Milford, gardener to Mr. E. M'Morland, Haverstock-hill, £20; and to Mr. G. Baker, gardener to Mr. Basset, Stamford-hill, £15. For ten orchids, exotic species (amateurs), to Mr. Charles Penny, gardener to Mr. W. H. Gibbs, Regent's Park £10. For twelve roses in pots, distinct kinds (nurserymen), to Mr. Paul, Waltham-cross, £10. Prizes offered by Sir C. Wentworth Dilke for the three best groups of fruits and flowers for the dinner table were awarded to Lady M. Rokeby, Montague-house, Portman-square, £10; to Mrs. J. W. Bliss, Langton and Tunbridge-wells, £7; and to Mrs. Walter Fawcett, 11, Westbourne-square, Hyde Park, £3. The ladies who had undertaken the offices of jurors—the Marchioness of Waterford, the Countess of Bessborough, and Lady Dorothy Nevill—found the task by no means easy, so keen was the competition among the twenty-seven exhibitors; more especially was this the case with regard to the groups to which were given the first and second prizes.

GREAT TELEGRAPHIC FEAT.—A great telegraphic feat has been performed. A message which left San Francisco June 2, at 9.20 P.M., and which was transmitted on wires across the American continent to new York, in time to catch the mail steamer, was read in London, June 13, and immediately transmitted to St. Petersburg, having thus been conveyed from the Pacific shores to St. Petersburg on the Neva in 10½ days, 9¼ of which were consumed traversing the Atlantic by steamer. These messages demonstrate that when an Atlantic cable is successfully laid St. Petersburg and the great telegraphic system of Russia, reaching almost to the frontier of China, will be able to communicate with San Francisco and the British possessions on the Pacific within twenty-four hours.

DEATHS.—Adm. the Hon. Sir Geo. Elliot, K.C.B., died on the 23rd shortly after nine o'clock, at his residence at Prince's-terrace, Kensington. The gallant officer, who was the second son of Gilbert, first Earl of Minto, by Anne Maria, eldest daughter of Sir George Amyand, Bart., and consequently brother of the late and uncle of the present Earl of Minto, was born August 1, 1784, and married in May, 1810, Cecilia, youngest daughter of Mr. James Ness, of Osgoddie, Yorkshire, by whom, who died in May, 1848, he had a numerous family, his eldest son, George, having obtained his flag rank in the navy. The deceased entered the navy in 1794. He was engaged in the first China war with Captain Charles Elliot.

THE "GREAT EASTERN."—The *Great Eastern*, which left New York at 2 P.M. upon the 6th inst., arrived at Liverpool on the 17th. She brought 391 passengers. She will leave for New York on the 30th inst. A large number of passages have already been engaged, and it is to be hoped that she has entered upon a long career of success, which the perseverence of her owners deserve.

LINE OF STEAMERS FOR BRAZILS.—A new commercial line of steam ships to Brazil and the River Plate has been organised to sail from Liverpool, and will commence on the 7th of August next. The first vessel will be the *Sicilia*, a screw steamer of 1,125 tons, and 360-horse power. Her

Digitized by Google

ports will be Rio de Janeiro, Montevideo, and Buenos Ayres; and owing to the attention now directed to the countries of the River Plate by small capitalists, attracted by the profits of sheep farming and the character of the climate, who in ordinary times would have proceeded to the United States, it is believed that the enterprise has fair prospects of success. The charges both for freight and passengers are to be moderate, and it is stated hat the *Sicilia* can make the run, if necessary, to steam all the way, without having to call anywhere to coal, and that as her consumption of coal is small in proportion to her capacity, she may accomplish the passage in twenty days to Rio and twenty-four to the River Plate.

SUGAR STATISTICS.—A return made to Parliament, on the motion of Mr. Moffatt, gives the sugar statistics of 1862. The total quantity imported into the United Kingdom was rather more than 10,200,000 cwts., being a decrease of 436,000 cwts. as compared with 1861 but an increase of above 1,000,000 over 1860. The decrease in 1862 is in sugar from the Mauritius, India, and Java, and the Philippine Islands. The produce of the Mauritius probably finds a better market in Australia than in England. The supplies from India have decreased 50 per cent. since 1860. Those from the slave-owning countries have greatly increased. From Brazil we took above 1,250,000 cwts. last year, being more than in 1860 and 1861 added together. The West Indies and British Guiana are progressing favourably; in 1860 they sent us 3,375,610 cwts.; in 1861, 3,690,297 cwts.; in 1862, 3,864,771 cwts. The quantity of sugar entered for home consumption in the United Kingdom last year, was 9,379,819 cwts., yielding to the revenue the large sum of £6,215,346 net, an increase both in quantity and in money over 1861.

LETTERS FOR EGYPT SENT VIA MARSEILLES.—On the 1st of July next, and thenceforward, the combined British and French postage (provided such postage be paid in advance) upon all letters addressed to Egypt, forwarded *via* Marseilles, whether conveyed between that port and Alexandria by British or by French packet, will be sixpence for a letter not exceeding a quarter of an ounce in weight; one shilling for a letter above a quarter and under half an ounce, and so on; sixpence being added for each additional quarter of an ounce. Letters for Alexandria, Cairo, or Suez, posted unpaid, will be chargeable at the rate of ninepence per quarter of an ounce, but no unpaid letters can be forwarded to any other place in Egypt.

OUR RELATIONS WITH BRAZIL.—In the instructions given by the British Government to her Majesty's Chargé d'Affaires in Brazil, respecting the suspension of diplomatic relations with Great Britain, it is stated that the Brazilian Government has completely misunderstood its motives. The sole object of her Majesty's Government has been to obtain some security for the lives and properties of her Majesty's subjects who may have the misfortune to be shipwrecked on the coast of Brazil, and to insure due respect to the persons of her Majesty's naval officers on Brazilian territory. The despatch continues:—"You are directed to ask for passports for yourself and the gentlemen attached to her Majesty's mission, and to leave Brazil. You will place the archives in the care of her Majesty's Consul, Mr. Westwood."

MR. CARGILL (ORIENTAL BANK) AS M.P.—Mr. William Walter Cargill, of 4, Connaught-place West, Hyde-park, a director of the Oriental Bank, London, has offered himself as a candidate for the representation of Berwick-upon-Tweed. In his address to the electors he states that he has always been a consistent Conservative; that he believes the opinions he professes to have become more popular since the American war; that if returned he will give earnest attention to local affairs, and that while he will not factiously oppose the Government, he will support none of their measures having a tendency to injure the existing institutions of the country. Mr. Cargill addressed the principal Conservatives in the King's Arms on Thursday, Mr. W. H. Logan, of the Scotch Border Bank, occupying the chair, and afterwards proceeded in his canvass. As before stated, Mr. William Mitchell, of Great Stanhope-street, London, is the Liberal candidate.

DU CHAILLU'S COLLECTION.—A great number of naturalists and curators of museums were attracted to the auction-rooms of Mr. Stevens, of Covent-garden, to witness and take part in the purchase of the natural history collection formed by M. Du Chaillu during his travels in West Equatorial Africa. The trustees of the British Musuem had previously obtained the first selection, to the extent, it is stated, of £500. Subjoined are a few of the principal lots sold yesterday, viz.:—Lot 93, described as a magnificent series of gorillas—male, female, and young, in fine condition, the two adults beautifully prepared by Mr. Wilson, the eminent taxidirmist, the skeleton of the male nearly complete, that of the female quite so, and also the skeleton of a young male. The stuffed specimens in this lot were very familiar to the public, from long exhibition in the window of the office of the *Field*, and created a spirited competition. It was finally knocked down to Dr. Edward Crisp for the sum of £110, a sum much below that at which it was valued by the owner. Lot 94. The skin and skeleton of an adult female gorilla, purchased at an expense of £20 for the Oxford University Museum. Lot 96. A complete adult skeleton of a male gorilla, quite perfect and articulated; a spirited contest also ensued for this, which was knocked down to Professor Clark for the Museum of the University of Cambridge. Mr. Flower, the Conservator of the Museum of the Royal College of Surgeons, became the purchaser of lot 95, being the skin and skeleton of a young gorilla, for £10; also of lots S and U, the skin and skeleton of a bald-headed chimpanzee, for £10; and the young of the same, for £4. 10s. Lot 97. A complete adult skeleton of the female gorilla, £18. And lot 99, a magnificent chimpanzee, described as the largest in Europe, but in reality smaller than that in the Hunterian collection; it is believed that this lot was bought in at £18. The prices realised by the sale of birds were too insignificant to notice.

THE CRY AGAINST CALCUTTA.—"Our Eastern Empire," says *The Times*, "is actually constituted of an assemblage of nations speaking different languages, enjoying different climates, and characterised by different institutions, manners, and opinions. We may certainly call this aggregate by the name of India, if we please to do so, just as the ancients applied the term to still more extensive regions, and included under that designation the present territories of Burmah and Siam. But the real name of the country in which Calcutta is situated is Bengal, and Bengal is about the last province in which the seat of Government would be established if we had to enter upon the administration of the whole empire for the first time at this moment. The province of Bengal is populous and productive, and its capital stands as it were on the sea, and is therefore easily accessible. But though these conditions represent so many advantages in English eyes, the truth is that Bengal never, in all the long annals of Indian history, was selected for the seat of power. There is no province or State in the whole empire which has had so little connection with Royalty or dominion. India was always governed, as far as it was governed at all, from some point in the North-West. In the earliest times the law went forth from Oude; afterwards from Agra, Lahore, or Delhi. There were famous kingdoms in Central India, and in the South also, but there were no such monarchies in Bengal. When we first set foot in those parts Bengal was governed like an outlying dependency by an officer of the Sovereign, and within the memory almost of living men the actual residence of that Sovereign was regarded by the inhabitants of Fort William—now Calcutta—as 'an object of remote inquiry.' If we had been as little aggressive as the Portuguese of Goa, the Mogul reigning at Delhi need have troubled himself very little about the foreign merchants established in Bengal. Our footing was obtained in a corner of the empire as completely dissociated from its capital as Canton from Peking, and the proceedings, indeed, which have led to our present condition might be illustrated from the case of China, by imagining that, after gradually advancing from Canton and absorbing the whole Celestial Empire, we had still kept the seat of Government at Canton itself, and had attempted to rule the whole population up to the Great Wall from that point."

EXTRAORDINARY CRUELTY IN AN INDIAN REGIMENT.—We noticed in our last the extraordinary cruelty practised in an Indian regiment, and which resulted in the death of Sergeant-Major Lilley, at a time he was under arrest, because he was known to be an adverse witness on a question affecting the conduct of his commanding officer. The public have heard with satisfaction that Colonel Crawley, of the Enniskillen Dragoons, is to be brought before a court-martial to answer the circumstances attending the death of Sergeant-Major Lilley. Up to this time the case has been left in a state with which no one could possibly be content. A brave and honest soldier, with the best of characters, earned by twenty years of irreproachable service, was ordered into close arrest in a climate where such confinement implies the worst of torture, and thus detained for twenty-seven dreadful days. At the expiration of that time he perished miserably, and his sick wife, who had shared his incarceration, followed him to the grave a few days afterwards. The proceedings which ended so fatally were altogether disgraceful. A fine cavalry regiment had become demoralised, mainly from the accession of Colonel Crawley to its command; and the death of the sergeant is but a *finale* to a series of disreputable squabbles. Colonel Crawley's superiors had sanctioned the confinement—the illegal confinement—of Sergeant-Major Lilley, but not his cruel confinement. "It was stated," said Lord Hartington, "and he believed truly, that Sergeant-Major Lilley was confined in a manner which was not only severe, but cruel." That cruelty, which was most certainly inflicted, the colonel declares he never ordered. He throws the blame on a subaltern, who in turn makes "a distinctly opposite allegation." Great dissatisfaction is expressed that the court-martial of Colonel Crawley will not take place in England, as some of the chief witnesses are now resident here. The discussion that has taken place in Parliament indicates a determination to search closely into those regulations which have permitted this sad result.

FUNDS AND PENSIONERS OF GREENWICH HOSPITAL.—Too many officials are found to be feathering their nests at this noble institution to the injury of others. Secretaries, clerks, cashiers, and stewards are getting in pay, houses, coals, and fees, an equivalent of more than £700 a year, and there is an army of managers to be provided for. It is in this ignoble manner that the revenues of the wives and widows and children of the pensioners are consumed. It is in this grasping and unfeeling spirit that the managers of the hospital extrude from the building the proper objects of the charity, and, in words that we will remember, "devour the widows' houses." There is a surplus now, because the pensioners are so few. But the Admiralty cannot impose upon the hospital a permanent charge for women and children without in proportion curtailing the number of the pensioners, or docking the establishment of officers. The Admiralty, by their Bill of 1861, have already sentenced to abolition military offices now absorbing £5,000 a year, two out of three civil commissionerships, and a host of useless offices besides. In 1863 they asked one of the commissioners to retire on full pay, and appointed a fourth commissioner, in reckless disregard of the claims on the hospital funds. It is rumoured now that they are about to offer a sop to public opinion, by announcing with a flourish of trumpets the distribution among the pensioners' wives of a sum of about £2,000 a year, and a recognition of the pensioners widows to the extent of giving them a bonus to remove to other parishes. It is not by niggardly concessions such as these, given while they are keeping up the salaries of the officers, that they can arrest the public indignation, which is only slumbering.

APPOINTMENTS AND TITLES.—The Queen has been graciously pleased to give orders for the appointment of Rear-Admiral the Hon. Edward Alfred John Harris, Her Majesty's Minister Plenipotentiary to the Swiss Confederation, and Horatio Nelson Lay, Esq., employed with the special mission of the Earl of Elgin to China, in the years 1857 and 1858, to be Ordinary Members of the Civil Division of the Third Class, or Companions of the Most Honourable Order of the Bath. The Queen has been pleased to approve of Mr. Ludwig Wiese as Consul at Victoria, Hong Kong, for His Majesty the King of Sweden and Norway. The Queen has also been pleased to approve of Mr. Walter Graham as Consul at Capetown for the United States of America.

ATLANTIC TELEGRAPHS.—Mr. Cyrus W. Field is now arranging for a telegraph across the North Atlantic, *via* Queenstown and Newfoundland. Signor Arturo de Marcoartu, chief engineer of the Spanish corps, is now in New York preparing to undertake to lay a telegraphic cable across the Southern Atlantic, from Cape St. Vincent to Cape St. Roque.

AN experimental depot has been formed in the park at Vincennes for a Japanese species of silkworm, which does not require the mulberry for food, being satisfied to nibble oak leaves.

THE Bishop of Capetown has recommended to the Crown the appointment of the Rev. Dr. Ellis, the chief of the London Missionary Society's agents in Madagascar, as the first bishop of the proposed new mission.

LONDON, FRIDAY, JUNE 26, 1863.

WAR WITH JAPAN.

THE anticipated evil is on the point of being realised. We have sent in our ultimatum to the Japanese Government. Even while we write the dogs of war may be let loose, and English sailors may be employed in the destruction of Yokuhama. Our intercourse with Japan ever since the Consular flag was hoisted at Kaangawa has been tending to this end, and everybody has anticipated and deplored the probability of a rupture. It seems as though this were destined to be the inevitable effect of Anglo-Saxon advancement—as though by some stern law, which we are powerless to resist, civilisation and commerce required in the first place a sterner advocate than the missionary, a more stalwart pioneer than the merchant. Yet it is a sign of weakness, if not of superstition, to discern in a result which our own conduct has to some extent precipitated, the token of an irresistible decree. Doubtless there is a Divinity that shapes our ends to wise uses, "rough hew them how we will;" but not the less are we responsible for the unsightly workmanship that requires thus to be moulded. If, on the whole, our conduct in Japan has been worthy of Christians and Englishmen, there can be no doubt that in several instances we have disgraced our character in both respects. But let that pass. The fear Earl RUSSELL expressed a few years ago that we should be drawn into a war with Japan, as we had been with every other Eastern nation with which we had been brought into contact, is too nearly being realised to make it worth while at this moment to moralise on the past. Let us rather look our present position in the face. It is one which may well cause serious disquietude.

In the House of Commons, on the 15th inst., Mr. LAYARD, in replying t Mr. LIDDELL, said he had no objection to state the demands made by Her Majesty's Government upon the Government of Japan, and he then went on to say that an ample apology was required for the murder of Mr. RICHARDSON, together with the payment of £100,000 as the penalty for that offence; that the Government demanded the execution of the persons implicated, and also the further sum of £25,000 from the Prince SATSUMA as compensation to Mr. RICHARDSON'S family. No doubt the Under-Secretary of State considered that he was extremely frank in making these statements, which he could the more easily do as they were all perfectly well known before; but with regard to the orders sent to Admiral KUPER, in the very probable event of our demands being refused, the oracle was unfortunately dumb. This was the only point upon which the country required information, but we are told it would not be "in accordance with precedent" to afford it. We must wait, in fact, until the Admiral has carried out his instructions, and when a full account of his actions arrives from the Far East, the House, which, like Miss DARTLE, "only asks for information," will no doubt be duly supplied with that article in the stereotyped official form. But in the meanwhile we must judge for ourselves of the coercive measures which would, in all likelihood, be adopted if an unfavourable reply was received from the TYCOON. With a considerable fleet lying in the harbour of Yokuhama, it will not be much trouble to bombard and destroy that city, and we think it probable that the *China Mail* is correct in supposing that this will be our first aggressive act. The fact that two French and two Dutch men-of-war were present with the English fleet when the demands were made shows that they were considered equitable by France and Holland, and that the course we may adopt will have the sanction of those Powers. It is certainly well that in this anticipated conflict we should have the moral if not the material aid of our European neighbours. America, who, by the way, is said to be supplying Japan with arms and ammunition, will probably continue the line of policy she has adopted hitherto, and either stand aloof from the contest altogether, or throw her weight, such as it is, into the adverse scale, not by actively opposing us, but by tacitly encouraging the Government of the TYCOON. In another column our Amsterdam correspondent furnishes a list of twenty-six vessels, lately purchased by the nobles and princes, and there can be little doubt but that these purchases have been made for the purpose of defence, when the time should arrive to resist our demands.

A high-spirited, brave, and warlike people are not likely to yield to any demands after the destruction of one of their cities, which they refused to allow before. Indeed, if we laid waste half-a-dozen Japanese towns it is doubtful if we should gain anything by the achievement, and it is certain that we should lose, what we at present possess, the goodwill of the common people. But is there not a wiser plan to be adopted? It will be remembered that, immediately after the murder of Mr. RICHARDSON, it was suggested that we should take the punishment of SATSUMA into our own hands by attacking him in his own territory; and we are now told that the Mayor of Kanagawa has himself suggested that we could gain all the satisfaction we require by the seizure of the Loo Choo Islands. Such an act would be one of direct retribution, and so far from necessarily involving a war with Japan, might prove a material assistance to the Japanese Government. It is not improbable that that Government may grant to us the pecuniary indemnity we require, but it is beyond the bounds of probability to expect that it will comply with our demands by the punishment of SHIMADZOO SABARO. Such an act, done upon compulsion, would degrade the Government in the eyes of the people, and if it had the will to comply, the power is probably wanting. By undertaking the punishment of this Prince ourselves we should vindicate our national honour, without inflicting an irreparable injury on Japan.

If the Japanese empire were within a few hundred miles of our own shores the interest caused by the warlike position of affairs would be intense. The peace party would sound an alarm; the just demands of Great Britain, or her unrighteous claims, would be asserted or denounced in every metropolitan or provincial newspaper; public meetings would be held; deputations would wait upon Lord PALMERSTON to receive, perhaps, a polite and witty rebuff for their trouble, and the current of political life would be stirred to its very depth. But the distance which separates us from Japan enables us to view the probability of a war with a powerful, if semi-civilised nation, with singular equanimity. The Englishman who reads *The Times* at breakfast with as much regularity as he partakes of that meal, learns that foreigners are embarking their goods in expectation of the breaking out of hostilities, but he scarcely pauses to think how much is implied in those few significant words. Those, however, and we suspect that they are comparatively few in number, who know something more of Japan than has been conveyed to them by travellers' stories, and who are alive to the value of our political and commercial relations with that wonderful land, will pause with intense interest over the intelligence thus briefly conveyed. The hope they might have entertained for the advancement of Christianity in that country is summarily arrested. They will deplore the injury inflicted on our commerce —an injury which in many instances will prove irreparable—and they will lament the expense of life and treasure which a war will entail on Great Britain together with the sufferings we must inflict on the Japanese before we can attain our end; and they will, perhaps, consider it possible that we shall lose more than we shall gain in a conflict which may be politically expedient but can neither add glory to our arms nor give stability to our commerce.

THE OPENING OF WESTERN CHINA.

WE are glad to observe that the Manchester Chamber of Commerce are again moving in the matter of Captain SPRYE'S project. Almost all the Chambers of this country have now brought their influence to bear on the question, and, with any other man in the place of Sir CHARLES WOOD, we believe the project would have ere this been properly encouraged. Captain SPRYE does not ask Government to accept his statements as all gospel, but he craves "fair investigation of his plans, which "have received the approval of the English officials in Burmah."

Digitized by Google

Sir CHARLES WOOD, like all officials high in office, turns a deaf ear to progress in trade, and no doubt adds, "Bother this fellow, "he must wait." The following is from the *Manchester Guardian*:—"The Manchester Chamber of Commerce decided "on Wednesday, the 17th inst., to forward a memorial to Lord "PALMERSTON urging upon his Lordship's attention the long- "neglected scheme of Captain SPRYE for opening up Western "China to British enterprise. It is sometimes difficult in this "active and pushing age to distinguish accurately which of the "vast number of schemes that are being constantly put forward "are mere personal and utopian hobbies, and which are propo- "sals directed to a really practicable and beneficial end. We "are so much accustomed in these days to 'promoters' and "their golden predictions that it is not easy, as a general rule, "to bring the plain practical English mind to take an absorbing "interest in anything which does not appear to offer immediate "and palpable advantages. This form of scepticism is not "without its value, but it is evident that in its wide prevalence "it must often consign to the same doom projects as opposite "in character as an excursion to the moon and the enterprise "which our Chamber of Commerce has commended to the "favourable consideration of Her Majesty's Government. "Captain SPRYE has certainly great reason to complain of the "official obstinacy and non-official indifference he has encoun- "tered in his efforts to do what we believe to be a great public "service to his country."

NEW STEAMERS FOR CHINA.

The China and Japan Steam Company are despatching another steamer to China. The screw steamer *Mona* was built at Stockton in the present year. Her tonnage is put down at 900 tons, and her engines of 150-horse power. She has been built under inspection, and fitted expressly for the local trade in Chinese waters. She is now loading for the Cape and Singapore, and will sail in about a fortnight.

A paddle-wheel steamer, to be commanded by Captain Rowe late of the *Philippine*, of about 900 tons, is building by Messrs Samuda, on Thames, for Messrs. George Barnet and Co., of Shanghai; and a large screw is also building on Thames, under the superintendence of Captain Jones, late of the *Ballarat*, for the direct tea trade. A large screw for the direct tea trade, and double screw is building on the Clyde for despatch to China, in addition to the two building by Messrs. Denny, noticed in our last.

Literature.

The Rival Races, Eugene Sue's magnificent romance, published in English by the celebrated house of Trubner and Co., to which we are indebted for the re-issue of the most valuable of continental literature, has made a decided sensation. It presents in one continuous story the contest through several centuries, in church and camp, in love and war, between aliens of the soil and dwellers in Frankish land.—Vol. II. of a most attractive magazine, entitled, *The Rose, the Shamrock, and the Thistle*, printed by women, and published by Miss M. A. Thompson, at the Caledonian Press, Edinburgh, appears in elegant form. The contents are original, varied, and attractive, including a most delightful story, "Miriam's Sorrow," and brief but excellent contributions from some of our first writers. Amidst the articles is "A Day at Hong Kong" by a resident, communicated by Admiral Hercules Robinson, and which affords a vivid picture of its scenic appearance, and the social and business life of its people.—The first number of the *Chinese and Japanese Repository*, under the editorship of Professor Summers and others, will appear on the 1st July. One of the leading and most attractive publications of the season is from the celebrated house of Messrs. Edmonston and Douglas, Edinburgh, entitled *Life in Normandy*, being sketches of French fishing, farming, cooking, choice sketches of natural history, with so much of politics as mingles in the current thoughts and sentiments of the people. It is beautifully illustrated by tinted lithographs, and opens up most amusing scenes portrayed by one thoroughly intent on seeing what the people of Normandy are doing all their lives, and how they gather from land and sea the means of existence. This is no ordinary book; the author looks on the economy of the kitchen as a science to be studied, and writes in a racy and healthful tone.—Mr. T. Cautley Newby has, amidst other engaging novels, issued one by Mrs. Octavius F. Owen, entitled *Snowed Up*, in which modern fashionable life and its artificialities, the conventional life of the "old school" and its peculiarities are treated with that unrestricted freedom of action which may be termed naturalness, and embodied in a number of individuals, whose intermingling affords striking contrasts and some rich effects, in a story in which the emotions of love flow onward, intertwining with varied occurrences and events. Mrs. Owen has drunk deeply of poetical inspiration, and displays, with philosophical insight into character, great dramatic power. Messrs. Adam and Charles Black, of Edinburgh, have published the third edition of *Chemical Lectures on the Principles and Practice of Medicine*, by Dr. John Hughes Bennett, Professor of the Institute of Medicine in the University of Edinburgh. The work is enriched with five hundred engravings, and is a vast *repertoire* of learning, which may be considered as representing the sum of existing science. The study of this work is a medical education in itself, and no student employing it can be at a loss either as to the character of the appearances presented by disease, or the proper treatment of complaints at their several stages.—Messrs. Edward Moxon and Co., an exquisite dissertation, metaphysical in its character, on *Hamlet*, by Dr. Conolly. The enquiry pursued is as to whether the madness was real or feigned, and here the skill and learning and analytical experience of the physician, joined to the varied accomplishments of the scholar, are brought to bear upon the point. Wonderful and startling is the light thus thrown even on passages with which all are familiar. A further insight is given into the workings of Shakspeare's own mind—possibly of his experience. The delicate boundary between excited feeling which yet maintains its reasoning purpose, and madness temporary or permanent, is drawn with masterly skill. The style is singularly pure and elegant.—Of useful and practical publications one of the most serviceable is undoubtedly the edition published by Messrs. Ward and Lock, and edited by C. A. Goodrick, D.D., of *Noah Webster's New Universal Pronouncing and Defining Dictionary of the English Language*. A work remarkable for the logical arrangement, clearness, and precision of its definitions; it will last as long as the English language is spoken, and may be relied on as an authoritative exposition both of the origin, pronounciation, and literal and figurative rendering of words.

FRANCE IN THE FAR EAST.

(THE TIMES.)

It is insisted that we ought to know a great deal more about the French settlements so lately placed between Singapore and Hong Kong. We are told that a greater fortress than Sebastopol is being raised up in these Indian waters; that an impregnable fortress and an immense naval station are just interposed in the very track of our trade. These French settlements occupy or command the delta of a mighty river, open at all times to vessels of the deepest draught and protected by an island which is itself rich in anchorages. The immediate possessions are backed by hilly provinces of great fertility, abounding in cattle, and offering at once facilities and temptations to further conquests. The swampy sunderbunds which proved deadly to the early invaders have been made habitable by drainage and good barracks. The French soldiers die so patiently! A succession of wasted armies has made the Metidja wholesome, and has made the Tierra Caliente traversable. At the same fisacrice and perseverance Saigon may yet become a healthy station. We are told that the fortifications are already very strong, and that old, worn-out ships of war are continually landing their guns, and taking up their position as hospitals or factories. Four thousand coolies are constantly employed in strengthening the place. New lines of earthworks are thrown up far beyond the bounds of the old Annamite city; roads are being formed in all directions. There are the Commissariat stores, the artillery ground, the dockyard, the coal stores, with a nucleus of 20,000 tons, and we may be sure that the Admiral's house, and the house of the Chief of the Staff, and the Observatory, and the electric telegraph have not been forgotten. Four thousand European soldiers and an auxiliary corps of drilled natives occupy military stations commanding a wide region reticulated by rivers; and while a ship of the line and three or four frigates lie in the lower waters, twelve small screw gunboats are kept constantly employed running about the narrow waters and visiting the different stations. Everything is done on an Imperial scale. An army of coolies is digging a wide canal, in order at the same time to drain the European quarter and to enable the gunboats to protect it; large streets, and even boulevards, are marked out on the margin of this long canal, and warehouses and "godowns" are rising to tempt the commerce which still hesitates to settle. If lavish expenditure of courage and life and skill and treasure can make Saigon at once a Sebastopol and a Singapore, that result will be accomplished. It is but a part, say the warning voices among us, of a great scheme. Saigon, in the event of a French war, would be like a robber's den on our path to China, and poor peaceful and defenceless Singapore and Hong Kong would be its unresisting victims. So we are expected to do a thousand things, whereof the fortification of the Bay of Islands and batteries upon the two entrances to Hong Kong harbour are but the smallest items. We have no fear of France as a coloniser. There is too much of the clank of the sabre in every city she builds, and too much of the ring of the rifle in every market she opens. We have not heard much yet of the commercial doings of Saigon, nor are we informed that our Singapore Chinamen are thinking of transferring their business

Digitized by Google

to those well-prepared quarters. If Saigon does not pay as a commercial port, we may depend upon it that it will not pay as a war port, and if it should pay as a commercial port, we shall find our best account in dealing with it. Our Government will, of course, in their general view of this great Empire, "take a note" of the existence of Saigon; but we cannot conscientiously return the compliment paid us by our French friends in respect of that Red Sea rock by the expression of any very serious alarm about their new Sebastopol in the Eastern seas.

THE WEEKLY SERVICE TO BOMBAY.

We believe the following notice in the *Bombay Gazette* to be premature. The question is still in abeyance, the offers made for the service being too expensive to entertain :—

"The question of a weekly mail between England and Bombay is now settled, and the contract for carrying it out has been, as might have been expected, given to the Peninsular and Oriental Company, the only company at present organised with resources adequate to the service that will be required of it. Though it is said the P. and O. Company will commence the weekly mail service as soon as they have placed a requisite number of steamers at Bombay, to enable them to conduct it with efficiency, we believe there is very little probability of a commencement being made before January next."

THE CHINA STEAMER "BOMBAY CASTLE."

The screw-steamer *Bombay Castle*, Captain Wadge, belonging to the China Merchant Steam Navigation Company, met with a most unfortunate accident on the morning of the 21st May, by being capsized and laid upon her starboard beam in the dry dock.

The *Bombay Castle* has been lying in the graving dock off the Fort for upwards of two months, undergoing a thorough overhaul, including new boilers, &c. Her repairs having been completed, it was determined to move her into the harbour. For this purpose preparations were made in the usual manner, and everything proceeded satisfactorily until the vessel was afloat. No sooner was she clean off the ground than she gave first a list on the starboard side, and then heeled right over on the same side. The scene that ensued it would be impossible to describe. The utmost consternation prevailed and the most extraordinary reports were current as to the number of killed and wounded. But only twenty or thirty lascars and coolies are found to be hurt, two or three seriously. Fears were entertained that some coolies engaged in the hold at the time were crushed by the falling ballast and machinery, but an examination of the lower deck and hold has proved that no lives have been lost.

As already stated, the vessel has completely turned over on her side, her decks being almost perpendicular. Her bulwarks are smashed, her masts are sprung and splintered, her rigging is destroyed, and her engines are broken up. The ballast and debris are being rapidly removed, after which there will be little difficulty in righting her.

Various reports are current as to the cause of the disaster. Some say that the weight on deck caused her to list, and thus produced the catastrophe; but the precaution had been taken of putting into her some forty tons of extra ballast. Others assert that she was not properly afloat when the shores gave way. However this may be, it is providential that the accident occurred where it did. Had she gained the open harbour, and capsized there the loss of the vessel would have been certain, and of life fearful. The pecuniary loss to the company is estimated to be about £5,000.

The *Bombay Castle* has hitherto done more for the success of the company to which she belongs than any other vessel they own. She has been commanded by Captain Wadge—one of the company's oldest and most trusted servants, and one of the most experienced seamen that ever sailed out of Bombay—ever since she was bought by her present owners. We hope that the hull will be found to have sustained no serious damage, and that Captain Wadge will again have the pleasure of sailing in her at no distant date. We may remark that he was not in the dock when the accident happened.

OVATION TO CAPTAINS SPEKE AND GRANT.—These illustrious travellers, who have just returned from Egypt after their successful labour in discovering the source of the Nile, were entertained at the Royal Geographical Society on the 22nd inst. Sir Roderick Murchison introduced them with several compliments, and called on Captain Speke to read his paper. Captain Speke commenced his paper, "The Nile and its Tributaries Compared," by describing the Lake Nyanza, the principal head of the Nile. This lake is situated in lat. 3 deg. S., and from that point to its debouchure, in the Mediterranean, in lat. 31 deg. N., the Nile traverses a distance of over 3,000 geographical miles, or nearly one-tenth of the circumference of the earth. It is to the west and north of Karagwe that the great lake receives its largest supply of terrestrial water, through the medium of the Kitangule river, which drains off the Luerolo-Urigi and many minor lakes. These lakes are all mere puddles compared to the Nyanza; but the Kitangule is a noble river, sunk low in the earth, like a huge canal, and measuring 80 yards across. The question now arises, what forms these lakes without number? The mountains of the moon, from whence they derive their water, are in the middle of the rainy zone, where he observed, in 1862, that no less than 233 days out of the year were more or less wet days. The first place from which he obtained a view of Lake Nyanza during the second expedition was from the town of Mashonde, in the Uddu portion of the country of Uganda, on the western side of the lake. Pursuing his way northward along the shore to the valley of Katonga, which is situated on the Equator, the land above the lake becomes very beautiful, being composed of low sandstone hills deeply scored and seamed by the heavy rains, covered with gigantic grass of unsurpassed verdure, and by dells of trees as tall and straight as the blue gums of Australia. Travelling, however, is most irksome in this part of the country, for, owing to the gradual subsidence of all the streams, the moorlands surrounding them are mere networks of rushes covering unfathomable soft bogs. Crossing the Equator he reached the Mworango, a stream of moderate size, and said to flow out of the lake. It runs north, and joins the Nile in the kingdom of Unyoro, when its name is changed to Kafu. Further on the Luajerri follows its example, and still further on, at the centre of the Northern coast of the lake, issues the parent stream of the Nile, falling over rocks of an ingenious character, and forming falls 12 ft. high, which he had christened by the name of the "Ripon Falls," in honour of the President of the Geographical Society at the time of the starting of the expedition. The escape of the Nyanza's waters, twenty miles north of the Equator, was the only outlet examined, owing to the barbarous restrictions placed on travellers by the king of the country. They, however, saw the junction of the Nile with the Kafu and Asua rivers, and crossed the Luajerri half-way between its escape from the lake and its junction with the parent stream. Proceeding down the Nile from the Ripon Falls, they first passed through a row of sandstone hills, after which the river rushes down due north with the beauty of a mountain torrent, running off at last into long flats, more like a lake than a river. In Unyoro it is increased by the contributions of the Cafu and Luajerri, and continues navigable as far as the Karuma Falls, where it rushes on with boisterous liveliness. They could not continue their passage beyond this point, owing to a war that was raging in the country. They next met the old river in the Madi country, where it still bears the unmistakable character of the Nile—long flats and long rapids. Here it is that another great feeder from the Nyanza lake, the Asua river, joins it on the eastern side. On the other side a long flat extends far into the country—as far, Captain Speke believes, as the little Luta Nziga lake. With the rest of the Nile we ought to be well acquainted, but little is really known about it, owing to the fact of no one having yet taken the trouble to place nilometers at proper spots. Proceeding onwards, the next great affluent is the Bahr-el-Ghazal, which joins the Nile with hardly any visible stream, having more the appearance of a lake than a river. The second is the Geraffee river, which may be said to be only one-third of the Nile in size at its point of junction. Its source has yet to be discovered. Its character suggests the possibility of its coming from Lake Nyanza. The third affluent is the Southern Sobat river, also full and navigable. The Northern Sobat they passed without knowing it.

THE CHINESE IN AUSTRALIA.—The (London) *Australian and New Zealand Gazette* writes on this subject:—"We ventured to point out on several occasions the impolicy of this course of conduct. What was required for the colony was abundance of labour; there were vast stores of wealth to be extracted, and the labours of the Orientals could but result in addition to the aggregate wealth of the colony. The enriching of the Chinese by their own labours would by no means impoverish the colonists, and, though many might return with the produce of their labour to their own country, there would still be a large majority who would settle in the country and become useful members of society. The accounts, too, which they would give to their countrymen would be the means of diffusing more accurate knowledge throughout China respecting those who are regarded as the outer barbarians. We are glad to find that our views on this subject have been proved to be correct. The Chinese, who had never previously emigrated in numbers from their own flowery land, could not resist the attractions of the gold fields of California, and the experience which they there obtained served but to whet their appetite for similar enterprise in Australia; and not even the restrictions placed by the laws of China upon emigration were sufficient to restrain the people. Certainly these adventurous Chinese were badly treated. They were not permitted by the laws of their own country to leave their native land, and they were not permitted to set foot upon the country which had so many attractions for them. Laws, however, proved, as they will ever prove to be, ineffectual when they seek to impose uncalled-for restrictions upon a people. It was soon found that the Chinese who went up to the gold fields were a most industrious, hard-working, and frugal set of men. They were, as a rule inoffensive, and were satisfied with a rate of remuneration and a mode of life to which the European would have many objections to offer."

MESSRS. KNOWLES AND FOSTER have paid into the Lord Mayor's Committee fifty pounds for the Lancashire operatives from Baron de Cercal, of Macao.

Naval and Military.

The gunboat Renard, Commander Charles J. Rowley, arrived at Plymouth on the 20th inst. She left Hong Kong November 30, 1862; Labuan, February 9, 1863; Singapore on the 20th, Finlingo Islands March 7; the Cape of Good Hope, April 25; St. Helena, May 8; and Ascension on the 14th of the same month. The Renard has been in commission three years and nine months, during which period she was employed in the operations in the north of China, then at Nanking, in the Yang-tse, afterwards in Japan, and on the coast of Borneo. During her passage to England she has experienced unusually fine weather. She has lost a considerable number of men and officers by sickness. Her machinery is in tolerable condition, but her hull is said to be unequal to the rotation of the engines. She was commissioned at Sheerness in 1859, and her crew will be paid off there.

His Imperial Russian Majesty's screw steam-corvette, Posadnick, 10, Capt. Berilef, and the screw steam gunboats Nayesdnick, 3, Commander Kanargezvski, and Kasboynick, Commander Papof, arrived in the Sound. They left Singapore January 22, Batavia, February 3, and the Cape of Good Hope, April 13.

Notices were issued throughout the departments at Woolwich, announcing that a close holiday will be observed on Monday, the 29th inst., the anniversary of Her Majesty's coronation, so that the establishments will be closed from Saturday midday until Tuesday morning.

In consequence of the service companies of the 102nd (Royal Madras Fusiliers) Regiment, now in India, being considerably below their proper strength, the Duke of Cambridge has issued orders for volunteering to be opened for that corps from the other regiments now in England. Up to the present time volunteering has been attended with considerable success, nearly 100 men having arrived at Chatham garrison from various regiments to join the depot of the 102nd. In accordance with directions received at

Digitized by Google

the garrison volunteering is to remain open until the whole of the required number of 300 men have been obtained.

The system hitherto adopted of placing the infantry troops at Chatham under canvas for the summer months has not been resorted to during the present season, in consequence of there being ample barrack accommodation for the whole of the officers and men quartered within the garrison; and from the disadvantages attending the encamping of numerous bodies of men in close proximity to a large town, it seems probable that the military authorities will not place any portion of the troops at Chatham under canvas during the present summer.

Orders have been received at the camp at Colchester for about 300 men to hold themselves in readiness to proceed to India to join the service companies of various regiments. The officers who will accompany the draught will be Major Brown and Ensign Wickham, 88th Regiment; Major Margeson and Ensign La Motte, 56th Regiment; Captain Torrens, 66th Regiment; Captain Pugett, 34th Regiment; Captain Irby and Ensign Treacher, 90th Regiment; Captain Knott and Lieutenant Hall, 1st battalion 1st Royals; and Ensign Bain, 44th Regiment. The draught will comprise men from each of these regiments, the 90th contributing the largest proportion (119).

Mr. G. Tyrrell, of Yarmouth, has contracted for £70,000 to erect Hurst Castle Fort, in Hampshire, with casement batteries, new lighthouses, &c. Mr. Tyrrell is at present erecting extensive forts for the Government in the Isle of Wight.

The case for the prosecution in the great militia trial closed on the 22nd by the examination of the tradesmen who supplied the articles for the mess, the shorthand-writers who took notes for Colonel Dickson at the court of inquiry, and several military officers, who gave evidence as to the internal economy of regimental messes, &c. The case for the defendants may be expected to last for several days to come.

The Prince of Wales visited Woolwich on the 22nd inst., when the garrison assembled on the Common for a review and sham fight. His Royal Highness, Prince Arthur, and the Duke of Cambridge, arrived on the Common soon after ten o'clock in the forenoon, and were received with a salute along the whole line. The troops then marched past in slow and quick time, and afterwards the evolutions of a sham fight were gone through. The weather was most favourable, and there was an immense assemblage to witness the proceedings.

Obituary.

THE HON. C. BRUCE, SON OF LORD ELGIN.—On the 12th inst. the hon. Master Charles Bruce, third son of the Earl and Countess of Elgin, died at Methven Castle, Perthshire, in his 11th year, from inflammation of the brain. The deceased was the third son of the Earl of Elgin. The attack lasted three days, on the second of which consciousness returned, and hopes were entertained of his recovery.

CAPTAIN C. W. GORDON, M.P.—We regret to announce the death of Captain Gordon, M.P., in his 45th year. He was formerly a captain in the Madras Light Cavalry. He was a Conservative, and a supporter of Lord Derby.

MR. OSWALD SMITH THE BANKER.—On the 20th inst. information was received by Mr. C. J. Carttar, one of the coroners for West Kent, of the sudden death of Mr. Oswald Smith, of the firm of Smith, Payne and Co., bankers, Lombard-street. It appears that the deceased, who was about fifty years of age, was walking in his garden, when he was observed to fall, and almost immediately afterwards expired.

Continental Intelligence

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, June 22.

It is with considerable anxiety that the public look forward to the approaching debates on the Colonial Budget in the First Chamber of the States-General. In the meantime the reactionary organs are not idle in their endeavours to keep up and increase the excitement. They maintain that the Senate, in order to act with consistency, ought to throw overboard Mr. Fransen van de Putte's budget as they did that of Mr. Uhlenbeck.

In the Second Chamber the commission charged with the preliminary examination of the Bill for the construction of a railroad between Samarang and the Regencies has presented its report, which has called forth a reply from the Colonial Minister. The debates will now shortly be commenced, but I have not heard that a day has been fixed for it. During the whole of the fortnight, since the departure of the last mail, the Chamber has been engaged in settling the absorbing principle of the railways at home, which were mostly constructed with public money. But they have now just passed a Bill with an overwhelming majority—59 votes to 11—authorising the Government to lease the railroads to private companies.

The following is a translation of the text of an address of thanks to the King for confirming the concession for the railroad in Java:—

"To H.M. the King of the Netherlands, Grand Duke of Luxemburg, &c.

"The undersigned, all of them former residents of, or deeply interested in the welfare of Netherlands India, humbly beg to offer the sincere expression of their heartfelt gratitude for the striking proof of attention your Majesty has given to the progress and development of the East India Colonies by confirming the concession granted by the Governor-General of Nertherlands India for the construction of a railroad between Samarang and the Regencies.

"As a most important fact which opens the door to the speedy fulfilment of what has for many years been considered the great requirement for Java, your Majesty's confirmation of the concession has caused the most lively rejoicing and given general satisfaction in this country, and will not fail to be received with the greatest demonstration of joy in Java, and tend to strengthen the intimate bonds happily subsisting between that flourishing colony and the mother country.

"The inhabitants of Java justly expect from the execution of this measure, which will so largely facilitate the means of conveyance between the interior and the coast, an improvement in their general welfare, a development of the hitherto unemployed valuable sources of their trade and industry, and a favourable change in the position of the native population, whose indefatigable energy has contributed so much to promote the welfare of the mother country.

"The undersigned duly appreciate this new proof of your Majesty's benevolent intentions for the welfare of the Dutch colonies, and your Majesty's subjects in those distant parts. In the hope of shortly witnessing the accomplishment of their most ardent wishes, they cannot refrain from expressing their most lively gratitude at your Majesty's so promptly giving the Royal assent to the concession."

A new commercial undertaking has been brought out under the auspices of the Association for Trade and Industry with every chance of brilliant success. It is called the Indo-Dutch Commercial Bank (*Nederlandsch Indische Handels Bank*), with a capital of twelve millions of florins, of which only half will be required for the present. The bye-laws have been confirmed.

In my last letter I mentioned the exhibition of Japanese objects of art and industry collected by the indefatigable Colonel von Siebold during his residence and travels in Japan. The exhibition continues to attract a large number of visitors daily, and is both amusing and instructive. The proceeds of the receipts Colonel von Siebold has devoted as a contribution to the establishment of a Dutch school in Japan, in further aid of which a book is placed on the table to collect voluntary support from benevolent persons inclined to patronise such a useful institution, extending the knowledge of the Dutch language to the "uttermost parts of the globe."

The following fleet of vessels, acquired by the Japanese during the past few years, will be of interest at the present juncture of politics with England:—

1	Steamship		Soembing	of 8 guns,			a present from H.M. the King of the Netherlands to the Tycoon.
2	Screw Yacht		Empero	4	„		a present from H.M. Queen Victoria to the Tycoon.
3	Screw Corvette		Nagasaki	12	„		built in Holland, belonging to the Prince of Fizen.
4	Do.	do.	Jedo	12	„	Do. do.	belonging to the Tycoon.
5	Do.	do.	Japan	12	„	Do. do.	do. do.
6	British steamer		England	750	tons,		bought at Nagasaki for 120,000 Mex.dol. by the Prince of Satsuma.
7	Dutch	Do.	Fenna	192	„	„	Kanagawa for 16,000 Mex.dol. by the Prince of Sendai.
8	British	Do.	Fiery Cross	1,000*	„	„	Do. for 125,000 Mex.dol. by the Prince of Satsuma.
9	Do.	do.	Lancefield	1,000	„	„	Do. for 125,000 Mex.dol. by the Prince of Nagats.
10	Do.	do.	Junkee	405	„	„	Do. for 150,000 Mex.dol. by the Tycoon.
11	Do.	do.	Nankin	80	„	„	Do. for 42,500 Mex.dol. by the Tycoon.
12	Do.	do.	Columbia	777	„	„	Nagasaki for 85,000 Mex.dol. by the Prince of Idsum.
13	American	do.	St. Louis	1,700	„	„	Kanagawa for 85,000 Mex.dol. by the Prince of Awa.
14	Do.	schooner	Wanderer	175	„	„	Do. for 10,000 Mex.dol. by the Prince of Owari.
15	Do.	do.	Gov. Wallace	180	„	„	Do. for 12,000 Mex.dol. by the Prince of Suwo.
16	Do.	barque	Daniel Webster	273	„	„	Do. for 16,000 Mex.dol. by the Tycoon.
17	Do.	do.	Althea	378	„	„	Hakodade for 22,000 Mex.dol. by the Tycoon.
18	British	steamer	City of Hankow	241	„	„	Kanagawa for 100,000 Mex dol. by the Prince of Kaga.
19	American	do.	Taoutai	167	„	„	Nagasaki for 74,000 Mex.dol. by the Prince of Satsuma.
20	Do.	do.	Gazelle	346	„	„	Do. for 96,000 Mex.dol. by the Prince of Fizen.
21	British	brig	Lanrick	283	„	„	Kanagawa for 35,000 Mex.dol. by the Prince o Nagato.
22	Do.	steamer	Sir George Grey	492	„	„	Nagasaki for 110,000 Mex.dol. by the Prince of Satsuma.
23	Do.	barque	Armistice	358	„	„	Do. for 22,000 Mex.dol. by the Prince of Satsuma.
24	Do.	steamer	Sir Chas. Forbes	138	„	„	Do. for 50,000 Mex.dol. by the Prince of Satsuma.
25	Do.	do.	Victoria	94	„	„	Do. for 50,000 Mex.dol. by the Prince of Satsuma.
26	Do.	do.	Lyeem on	1,000	„	„	Kanaguwa for 280,000 Mex.dol. by the Tycoon.

* Lost in the Inland Sea.

The Netherlands Trading Company have chartered another batch of vessels to load cargoes of produce in Java for Holland:—Argo, Hendrine, Juno, Quartet, Celebes, Pekin, Jan van Schaffelaer, Holland, Cornelia Hendrika, Robertus Hendrikus, Eugenie, Graafstroom, Emilie, Isaac de Costa, Pantalon, Constantia, Doelwyk, Java, Paul Johan.

The following vessels have been chartered by the Nether lands Trading Company to convey cargoes of coal from Newcastle-on-Tyne to ports in Java:—Edward and Marie, Bellatrix Willem and Carel, Eerstelling, Maria Diederika, Capella. The freight stipulated ranges from 25 fl. to 29 fl. 80 cents.

Digitized by Google

The Netherlands Trading Company have declared a dividend of 116 fl. per share of 1,000 fl. (equal to 11¾ per cent.), for the book year 1862, payable at the Bank of Holland. The shares of the company are quoted at 48½ per cent. premium.

A letter from Vlissingen states that about a dozen of the most intelligent of the ship carpenters in the Royal dockyard at that port have been engaged, through the instrumentality of the Netherlands Trading Company, to go out to Japan for service in the Government shipbuilding yards in that country.

The Colonial-office gives notice that Dutch subjects proceeding to Netherlands India, and wishing to be furnished with a passport, must send in their request to the department written on stamped paper, accompanied by certificates of unimpeachably good moral conduct, and particulars of age, employment, and having fulfilled their military duties at home.

P.S. The Second Chamber has refused to ratify the Treaty of Commerce with Switzerland by 34 to 17 votes on the ground that the Swiss Jews are excluded from the benefits arising from the stipulations contained in it.

PERSONAL.—Mr. E. C. Wermuth has been recognised as Consul at Samarang for the Free and Hanseatic city of Bremen.

Mr. O. Van Polanen-Petel, resident of Bantam, has received the Royal permission to accept and wear the insignia of Knight of the Second Class of the Order of the Crown, conferred on him by H.M. the King of Prussia.

Professor C. H. Buys Ballot, of Utrecht, has been appointed Rector Magnificus of that university for the academical year 1863-1864.

First Lieutenant-Quartermaster W. Van Baasbank, of the East India army, now in this country on leave of absence, has been permitted to retire from the service with a pension.

Major E. A. Haitink, of the engineers and sappers of the East India army, now in this country on furlough, has retired from the service with the brevet rank of lieutenant-colonel and a pension for life.

Lieutenant J. Schneither and Lieutenant Beukman, of the East India artillery, have received orders to embark for Java on return to duty.

Captain C. P. de Brauw, R.N., has succeeded Captain H. Camp as captain of the guardship at Nieuwe Deep, and director of the naval arsenal and dockyard at that port.

The King has been pleased to permit Mr. L. A. Gallé, officer of the E. I. Civil Service, and lately assistant resident of Soerakarty, now on leave of absence in this country, to retire from the service with a pension.

Mr. N. Bonthuis, medical officer of the East India army, has sailed from this country to Java.

First Lieutenant J. Gevelaer, of the 7th regiment of infantry, entrusted last year with the command of a detachment of supplementary troops from this country to Java, per *Vier Gezusters*, has returned to his regiment at Harderwyk, after the successful performance of his mission.

Mr. J. H. Heffener, late director of the powder manufactory at Banjoe-Boroe (Samarang), now on leave of absence to this country, has been permitted to retire from the service with a pension.

Mr. J. C. Staal, first-class Inspector of Public Works in Netherlands India, now in this country on leave of absence, has been permitted to retire from the service with a pension.

Mr. J. J. A. Schill, born at Batavia, after publicly reading his academical essay "on the Press in Netherlands India," has been invested with the diploma of a doctor of laws by the Senate of the University of Leyden.

Mr. H. W. de Roock, lately principal teacher at the Government school at Weltevreden, now in this country on leave of absence, has been permitted to retire from the service with a pension.

A letter from Stuttgart of the 15th inst., states that the King of Wurtemberg has appointed Mr. J. M. Jacobson, senior partner of the firm of Messrs. Jacobson and Co., at Samarang, to be H.M. Consul for the Dutch colonies in the Islands of Java, Sumatra, and Macassar.

COMMERCIAL.

COFFEE.—Since last mail the state of the market has undergone no alteration. There is, however, a little more demand both for home consumption and export. Prices are well supported, and 46 cents. is readily paid for Company's good ord. Java. 900 bags of private trade Java, ex *Eugenie*, were sold at 45½ to 46c., and 350 bags do., ex *Doelwyk*, realised 45c.

TEA maintains its value, but there is no great demand, as buyers prefer to wait for the sale of the cargo lately arrived from China per *Marco Polo*, which, for the most part, consists of teas of superior quality.

SUGAR.—The raw article being somewhat cheaper, purchasers were attracted, and several parcels of Java changed hands; among others 417 kranjangs of Samarang, No. 16, fine quality, ex *Juno*, at 34¾ fl.; 600 kr. do., ex *Java*, and 1,058 kr. Sourabaya, ex *Joan Melchior Kemper*, No. 12, at 2½ fl. under last May sale prices, as well as 410 kr. Sourabaya, No. 13, ex *Hendrina*, at about same prices. Refined sugars also command more attention, especially for forward delivery, and 1,500 tons have been taken for July, August, and September.

RICE.—Some sales of rough grain have been made at higher prices. Cleaned descriptions continue to command an easy sale in parcels of moderate extent both for home consumption and for shipment. Cleaned Java is worth to-day 10 fl.; bold grained do., 11 to 12 fl.; and fine table rice, 20 fl.

SPICES.—No animation in the market, and prices drooping. Cloves may be bought at 24½ to 25 cents, and nutmegs, No. 1, at 61c. Java cinnamon, No. 3, is in rather better demand, and sales have been made at 38c., at which figure there are more sellers than buyers. Java vanille is in fair request at full prices.

TOBACCO.—Some considerable arrivals of Java have come to hand since last mail, and created some animation in the market. Among them are 883 bales KAWI, 664 D, 1,270 PK, all per *Aeolus*; 500 bales KL, per *Holland*; 175 bales Δ with an L in it, 152 bales WJG, 129 bales VS, 276 bales KB, and 128 Tanah-Wangie-Malang, all per *Arcadia*. Among the sales by private contract reported are 611 bales of Java D, 221 bales Kawi, 145 bales same mark, 257 bales D, ex *Gebroeders*; 274 bales, ex *India*; and 80 bales, ex *Atlantic*. Some sales by auction are advertised for the end of the month. The present stock of Java has increased to 9,477 bales.

HIDES are firm, and several sales have been made to speculators, among others 1,100 Java ox, 966 buffalo, and other parcels. Among the late arrivals are 1,500 buffalo, ex *Pollux*, from Banjoewangie, and 3,123 ox, per *Juliu*, from Batavia.

RATTANS in lively demand, with extensive sales, including 1,114 bundles, ex *H. Ido Ambacht*, and 820, ex *Capella*. On the whole the sales by importers amounted to 13,627 bundles since last mail, and in several cases higher prices were obtained.

TIN.—Banca is not quite so firm as a fortnight ago, and the demand has not been so good. Some parcels were let go at 79½ fl., after which an improvement took place, and now purchases cannot be made under 79¾ fl.

INDIGO has had a steady sale all through the fortnight, and prices are well sustained.

FRANCE.

Admiral Bonnard's report of his mission to the Annamite Court is published in the *Moniteur* at great length. The anxiety of arranging and carrying out the ceremony of exchanging the treaties cost Annam one of its best statesmen, by name "Lam," who died of cholera, brought on by overwork, in a few hours. 20,000 men were under arms, and all the elephants of Hué-fo drawn up round the palace, on the occasion of the interview of that ambassador with "Tu-Duc." The Europeans were, by special permission, allowed to approach His Majesty like men, that is, "with head erect, and looking to the sky," instead of "à la mode des quadrupèdes," and were also permitted to wear their arms. After the ceremony, His Majesty Tu-Duc sent an autograph letter in verse to Admiral Bonnard to be delivered into the hands of the Emperor of the French. In the interests of European literature it is to be hoped that these Royal verses will be given to the public. In the meantime we give a specimen of the prose of His Annamite Majesty:—"The ambassadors who have supported all the fatigues of a journey here have given a striking proof of their merits. For this reason the Emperor of Annam praises them, and congratulates them on their mission. When the ambassadors have returned to their own sovereigns they will say that, peace having been to-day concluded, in future all things should be treated pacifically, and then the most sincere friendship will exist for ever for the happiness of the nations. Let the ambassadors engrave these words on their memories; it is for that that Tu-Duc pronounces them."

Legal.

EXTRAORDINARY MATRIMONIAL CASE.—RAMSAY V. STEWART.

This was a very peculiar action for libel. The defendant pleaded not guilty, and a justification. The circumstances connected, and which appeared in evidence, were as follows:—The plaintiff, Captain Alexander Ramsay, of Morne-park, near Newry, had formerly been in the 42nd Highlanders, and he brought this action to vindicate his character. The libels charged that plaintiff's conduct was that of a coward, a violator of the usages of society, and unbecoming the character of a man of honour and a gentleman, and that, if necessary, defendant would denounce and brand it. Lieutenant Stewart and his wife resided formerly at St. Helena. The lady was about to give her husband the most interesting of the pledges of matrimonial affection, and in the absorbing interest begot of the forthcoming event it was decided that a voyage to England and an accouchement with the aid of chloroform and the best medical advice were indispensable. Lieutenant Stewart, who had handsomely increased his wife's allowance of a hundred a year by docking sixty pounds a-year from his own, does not seem to have been able to sustain those pains of absence his wife depicted so eloquently, and though the lady had left St. Helena at at the end of 1860, the husband managed to effect an arrival on English soil as early as June, 1861. But the vanity of human wishes never witnessed a more instructive elucidation. He did see his wife, and did see his child, but not precisely under the circumstances in which his fancy had been painting them during his homeward voyage. He saw his wife after spending more than a year in looking her up, and then only by forcibly introducing himself to her presence; and if he saw his child earlier it was only through the kindness of Sir Cresswell Cresswell, before whom he had been formally summoned to answer for the happiness of the model matrimony he had been enjoying at St. Helena as so much model tyranny exercised by a brutal husband. Defendant in the course of his evidence deposed: "My wife was very intimate with the family of Archbishop Whately. I consider the Whatelys were the cause of our losing our passage from St. Helena, and the estrangement on her part. An attempt was made by them to establish a secret correspondence between themselves and my wife, and Miss Blanche Whately wrote to her in French, villifying me for opening her letters with a view to prevent it. In one of the letters I opened there was a proposition that Mrs. Stewart should assist the clergyman at St. Helena in Christianising all the inhabitants. I wrote to the Whatelys an indignant letter complaining of their conduct. It was owing to the captain of the vessel they were about to leave in, who handed me a letter just before sailing that he had received from the palace, Dublin, asking him to give it to Mrs. Stewart, but which as a married man he declined to do, and handed it to me. The letter contained a proposition that the correspondence should be kept up through a Christian serjeant of my regiment, who distributed the *Gospel Trumpet* to the inhabitants of St. Helena." Lieutenant Stewart, on finding out the spot on Irish ground where his wife had taken refuge, did not hesitate, under the advice of a Dublin attorney, to attempt to recover her by the characteristic process of an abduction. Attorney and client hid themselves in a shrubbery adjoining the house, and on her return home from a promenade, the wife suddenly found her-

Digitized by Google

self in the arms of her husband, with the attorney at his side, ready, and, no doubt, willing to inform him to a hair's-breadth the extent of the marital rights which he was entitled under such circumstances to exercise. The lady resisted; the servants raised an outcry; some neighbours, in the absence of the relative with whom she was staying, came in to interpose; but the husband, threatening great dangers from pistols — affirming, says an Irish witness, "that if killed he would still go on with his object"— managed at last to effect an arrangement by which he was to stay with his wife in the house till Major-General Chesney, its owner, should send further instructions. We are not shown on satisfactory evidence whether a marital reconciliation did or did not take place as the result of this enforced meeting. The husband swears that the pair slept in the same bed; the wife as solemnly affirms that they used different beds in the same room. But about the ultimate result the testimony must have been as satisfactory to the husband as was that of a certain victim of tenderness which had been demonstrated by kicking him down stairs. On the fourth or fifth morning of his stay the uxorious lieutenant found himself surrounded by a number of policemen, county magistrates, and household tenants, and being politely shown into the bedroom which he had been occupying, found there, as he tells us, the principal object inviting his attention in his own carpet bag. The hint seems to have sufficed. There was practically no defence to the action, the husband was clearly not justified for attempting to acquire forcible possession of her person at a moment when, as a suitor of the Court of Divorce, she was under its protection. The interference of Captain Ramsay was not shown to amount to anything more than would have been done by any gentleman placed in the like circumstances. His Lordship summed up. After referring to the painful character of the case, and deeply regretting that they should have been called upon to investigate the family differences of Captain and Mrs. Stewart, he left it to the jury to say whether declining to fight a duel when challenged was a justification for calling a man a poltroon and a coward. The degree of provocation was an element for consideration in assessing the damages. The jury returned a verdict for the plaintiff— Damages, £350.

APPLICATION TO SET ASIDE AN AWARD.—GURDEN V. CURTIS.

This was an application to set aside an award on the ground that the arbitrator had refused to adjourn the further hearing of the case to hear a witness then absent in China. Mr. Charles Pollock showed cause against the rule, and Mr. Watkin Williams appeared in support of it. The Chief Justice was of opinion that the rule ought to be discharged. The arbitrator had considerable discretion intrusted to him. From August to October there was an adjournment proposed, in order that a witness might return from China. The arbitrator was informed that there was a legal obligation on him to wait for the return of a witness from China, whose return was uncertain. The arbitrator might be of opinion that the interests of justice would be sacrificed by an interminable delay. The arbitrator had exercised his discretion in the manner which he thought right, and under the circumstances he was of opinion that the award was valid. The other learned Judges concurred.—Rule discharged.

Monetary and Commercial.

CITY, THURSDAY, JUNE 25.

The directors of the Chartered Mercantile Bank of India, London, and China, have declared a dividend of five per cent. (free of income-tax) for the current half-year, payable to the shareholders on the London register on and after Wednesday, the 1st July; and to the shareholders on the Bombay register three days after receipt of the outward mail of the 3rd July.

The Bank of Hindustan, China, and Japan have announced that a meeting of shareholders will be held on the 6th July, when a report and statement of proceedings will be presented by the directors. The business was believed to have been of a satisfactory nature, and the shares have improved 1 per cent. in anticipation of the report. This Bank has appointed the London and Hamburgh Exchange Bank its agents for the Continent, and the last named establishment has appointed the former its agents in India and China.

Mr. J. Reid Mackenzie, for many years general manager of the Bank of Ceylon, has been appointed manager of the New Zealand Banking Corporation.

Mauritius Government Six per Cent. Debentures for £400,000 —one half in bonds having ten years to run, and the other half in bonds having fifteen years to run—were offered to public competition by the agents-general for Crown Colonies. The minimum declared at the opening for the former was 105, and for the latter 106½ per cent. The applications for the ten years' bonds amounted altogether to £122,400, of which £107,800, ranging from 105 to 108½, was allotted, leaving £92,200 undisposed of. The applications for the fifteen years' bonds reached £299,200, of which £285,700 were at and above the minimum, and the whole £200,000 was disposed of at prices ranging from £107. 3s. 6d. to £113. 2s. 6d. The Crown agents intimated their willingness to treat the highest of the rejected tenders for the fifteen years' bonds as applications for the balance of the ten years' bonds if the persons interested and accepted the same.

The Bank of Egypt have elected Mr. Patrick F. Robertson deputy-chairman, in place of Mr. Philip Anstruther, deceased.

The biddings for 30,00,000 rupees (£300,000) in bills on India took place at the Bank of England. The proportions allotted were—To Calcutta, 16,00,000 rupees; to Bombay, 12,00,000 rupees; and to Madras, 2,00,000 rupees. The declared minimum price was as before, viz., 1s. 11½d. per rupee on Calcutta, and 1s. 11¾d. on Bombay and Madras. The applications within the limits were for about 120 lacs (£1,200,000). Tenders on Calcutta at 1s. 11½d. will receive about 4 per cent.; on Bombay at 1s. 11⅞d., about 6 per cent.; on Madras at 1s. 11¾d., about 27 per cent.; and all above these prices in full.

The International Financial Society have made arrangements for the purchase of the entire property and rights of the Hudson's Bay Company, giving the price of £300 for every £100 stock of that company. Its total capital is £500,000, and the amount of the purchase will therefore be £1,500,000. A deposit of £100,000 has already been paid, and the remainder is to be met on the 1st of July next, or interest thereon is to be allowed to the Hudson's Bay proprietors at the rate of 5 per cent. Some considerable time back the price of Hudson's Bay stock was 250, but during the last five years it has been about 200. The transaction has been negotiated by parties connected with Canadian interests, and there is a circular addressed to the Hudson's Bay stockholders, inviting their acquiescence in it, and to which an affirmative response seems, for the most part, to have been promptly accorded. The number of proprietors of Hudson's Bay stock is 285.

Mr. Jules Danvers, in his annual sketch of the position of Indian railways, of which he is Government Director, reports that 2,528 miles are now open for passengers and goods. The great triangular railway connecting Madras with Bombay, Bombay with Delhi, and Delhi with Calcutta, will be complete in about twelve months more. The amount already raised for these works is forty-eight millions and a quarter, which large sum is in the hands of only 31,400 persons, an average of £1,500 each. The shares are evidently used for permanen investments almost exclusively.

In addition to the vessels named in our last, Government have chartered the steamer *Charente* to assist in laying the submarine cable in the Persian Gulf.

The 27th general meeting of the Northern Assurance Company was held at Aberdeen. In the Fire department the net premiums received in the year amounted to £127,946, while the losses, including commission and charges of management, were £95,688, leaving a surplus of £32,257. The directors call attention to the fact that, notwithstanding a further loss of revenue through the discontinuance of the American business, amounting to upwards of £10,000, the premiums for 1862 show a considerable increase over those of the preceding year. It is a remarkable fact that the company's fire revenue is now nearly thirteen times the amount at which it stood ten years ago. The reserve fund stands now at £55,784, being the highest amount reached at any time since the establishment of the company. In the Life department 555 new policies have been issued during the year, assuring the sum of £300,090, and yielding in annual premiums £10,404. In this department the year's surplus in the non-participation branch is £11,874, and in the participation branch £29,570, which sums have been carried to the accumulated fund, raising it to £467,982. The claims by death have been considerably less than was provided for in the calculations of the office. Altogether the results of the year exceed those of any of its predecessors The total assets of the company are stated at £625,692. The directors have accordingly recommended the payment of an increased dividend at the rate of ten per cent. on the paid-up capital; and this having been confirmed by the meeting, will become payable on the 20th instant, free of income-tax.

The following financial and other undertakings have been announced since our last issue :—

The Great Indian Peninsula Extension Railway Company, capital £1,000,000, in £20 shares, to provide a branch 96 miles in length, as a feeder to the Great Peninsula Railway, from Asserghur to Indore.

The Egyptian, Commercial, and Trading Company, under the auspices of the International Financial Association, and with the promised assistance of the Egyptian Viceroy, to complete telegraphic communication between Alexandria and all the principal stations selected by it for the purposes of trade; to make advances to cultivators and traders, and generally to encourage all enterprises which will tend to provide means of rapid transport, and to promote the cultivation of cotton in Upper Egypt; capital £2,000,000, in £20 shares.

The Adelaide (North Arm) Port and Railway Extension and Land Company, capital, £400,000 in £20 shares, for affording increased ca-

Digitized by Google

commodation to the shipping and trade of South Australia by the construction of extensive wharves, warehouses, &c., at the North Arm, near Adelaide

The General Petroleum Company, capital £200,000, in £10 shares, for extending an experimental establishment of oil refining and paraffin candle manufacturing; the factories to be erected are planned for working up more than 200 tons of material weekly.

The Mauritius Gas Company, capital £100,000 in £5 shares, for establishing and working gas works at St. Louis.

The London and Hamburg Exchange Bank, capital, £1,000,000 in £100 shares, for the purchase and transfer of a long-established banking business in Hamburg.

The Medoc Railway with a capital of £400,000 in shares of £20. This line will form the continuation of the Chemin de Fer du Midi, which runs from Marseilles and Cette to Bordeaux, thus uniting the Atlantic with the Mediterranean.

The Bank of Westminster, capital £1000,000. It is pointed out that though the City of London possesses ten joint-stock banks, several of which have established branches westwards, there is not a single local institution of the sort in Westminster, and in the western districts of London generally.

The Continental Gas and Water Company. This project is formed for the purpose of taking up concessions, already offered to the company, for lighting several towns on the continent. The capital proposed is £100,000, in 10,000 shares of £10 each.

The Newport Dry Dock and Building Company, capital £100,000, in 50,000 shares of £20 each.

The Staffordshire Rolling Stock Company, capital £50,000, in 5,000 shares of £10.

The bar silver brought by the last West India packet has been disposed of for shipment to the Continent (there not being at present any demand for India) at 61⅛d. Mexican dollars have been sold at 5s. 2¼d.

The course of exchange at New York on London for bills at 60 days' sight is 155⅓ to 156½ per cent., and the premium on gold is about 42½ per cent. At these rates there is a profit on the importation of gold from the United States.

Four monster steamers are building in New York for the California trade, to be called the *Retribution*, *Retaliation*, *Restitution*, and *Revenge*. The first named has just been launched. They are each to be upwards of 300 feet long and 3,000 tons burden.

The amount of bullion by the P. and O. Company's steamer *Poonah*, from Southampton on the 20th of June, was—In gold: to Aden, £500; to Ceylon, £52,000; to Madras, £2,443; to Calcutta, £1,560; to Penang, £500. In silver: to Hong Kong, £22,853; to Foo-chow-Foo, £1,000; to Shanghai, £59,723. Total—in gold, £57,003; in silver, £83,286.

ARTICLES OF IMPORT.

TEA.—Our market continues without any improvement. The demand from the trade and exporters has been unusually limited, and as importers have in some cases been desirous of selling, prices for Medium Congous show a further decline, whilst quotations in many instances must be considered nominal, owing to the very limited inquiry. Low and dusty kinds of Congou, as also fair common Congous, have been saleable to some extent, but prices have have ruled in favour of the buyers. Good Common has receded to 1s. 1d. to 1s. 1½d. per lb. Fair Flavoury kinds up to 1s. 7d. per lb. have sold at a decline of 1d. to 1½d. per lb., but latterly there has been some demand at these prices. Fair to good Ho Hows and Ning Chows, also second class Honans, Monings, and Wopaks, have been difficult of sale at about 1d. per lb. decline. Good to fine Congous, both Kaisow kinds, and Moning and Wopak kinds, have only sold in very small quantities, and quotations are somewhat nominal. Twankays have ruled ½d. to 1d. per lb. lower. Fair to good Oolongs have sold about 1d. per lb. lower; fine have been rather wanted. Souchongs and Flowery Pekoes continue neglected. Scented Capers show no material alteration. Fair to good Orange Pekoes, both Canton and Foo-chow make, have sold 1d. per lb. lower; fine have been better supported. Uncoloured Japans have sold as before. Assam and Indian teas sold at very high prices at the public sales of the 9th instant. In Green teas there has been a moderate amount of business, but with the exception of Young Hysons, for which there has been some demand for export and speculation, prices have ruled in favour of the buyers. Hysons, owing to fuller supplies, have given way 1d. per lb., whilst Gunpowders of all kinds show a decline of fully 1d. per lb. Canton-made Gunpowders have sold rather lower, and young Hysons remain difficult of sale. The public sales have comprised 22,940 packages, of which 3,274 packages were Indian Teas. Of these 13,280 packages were sold, including 3,149 packages Indian Tea, and 5,517 packages offered without reserve.

SILK.—The prices are nominally about 6d. to 1s. lower than our last quotations, with a very languid demand.

SUGAR.—Home deliveries show improvement; but stock has increased and the market has a flat appearance; in the limited sales effected, prices have been with difficulty sustained. Public sales have gone off heavily, and are rather under former quotations; these sales were almost entirely confined to Muscovade. We quote Penang, grey and white, 23s. 6d. to 25s. 6d.; brown and yellow, 15s. 6d. to 23s. Siam and China, 22s. 6d. to 26s. 6d.; brown and yellow, 14s. 6d. to 22s. Manila, clayed, 18s. to 19s. 6d.; muscovade, 15s. to 16s. Java, grey and white, 23s. 6d. to 27s.; brown and yellow, 15s. to 23s.

COFFEE.—Less disposition to purchase, and easier prices accepted. Ceylon: 252 casks, 210 barrels and bags Plantation, at public sale, were disposed of at rather lower rates; fine fine ordinary to low middling, 82s. 6d. to 86s. 6d.; middling, 88s. to 90s. Only 291 bags Native have been offered, which sold at 71s. 6d. to 72s. for common good ordinary; and, privately, the business is unimportant.

RICE.—Demand improved, and business done at stiffer prices. Ordinary Arracan has sold at 8s. 3d. to 8s. 4½d.; fair Nakrenzee, 5s. 6d. We quote Java at 10s. to 21s.; Arracan, Rangoon, &c., 10s. to 11s.

SAGO.—1,666 boxes sold at auction, small pearl fetching good prices, namely, good fair 19s. 6d., also a few lots 20s.; fair to good large medium grain 17s. 6d. to 18s. Sago Flour: 223 bags withdrawn at 13s. 6d. to 14s.

SPICES.—Pepper: No Black offered, and private transactions unimportant. White at public sale disposed of at average of 5¾d., being ¼d. per lb. cheaper. Pimento: No sales. Cinnamon: Fair request; 200 bales Ceylon realised previous rates. Cassia Lignea: 842 packages at auction, chiefly low middling to good middling, realised 86s. to 90s. Cloves: Steady; firm business at firm rates. Ginger: Cheaper: £3. 5s. to £7 per cwt. Nutmegs: A few lots sold at 11d. to 1s. 3d. Mace: Steady: 1st quality 1s. 8d. to 2s. 3d.; second quality 9d. to 1s. 2d.

COTTON.—Surat: 1s. 1d. to 1s. 7d. per lb.; market dull, little business, and prices irregular.

HEMP.—Manila: Current quotation £23 to £26; fair amount of private business at £24. 15s. to £26 per ton for fair to very good roping; at auction 3,708 bales were quitted at £22. 15s. to £24. 10s.; market quiet. Sunn: £15 to £30 per ton.

TIN.—This market has been very quiet since our last; business small, and confined to Straits, which have declined to 127s. per ton cash. The sale of Banca at Amsterdam went much lower than was anticipated, the price being equal to 130s. here; and at this figure about 10,000 slabs have been sold since the result of the Dutch sale was known. Banca is quoted £130 to £131 per ton.

JAPAN WAX.—Dull; little present demand; a few boxes block sold at 70s., and saucers 61s. to 65s., subsequently re-selling at 70s. per cwt.

MISCELLANEOUS.—Rum: Quiet: limited parcels sold at previous value. Aloes: Steady at £3 to £15 per cwt. Cardamons: Quiet; 5s. to 7s. per lb. Castor Oil: 4¼d. to 4¾d. per lb. ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 5s. to £6. 10s.; nail rods, £7 to £7. 5s.; hoops, £8. 5s. to £8 10s.; sheets, single, £9. 10s. to £9. 15s.; Staffordshire bars, £7. 10s. to £8; rails, £5. 10s. to £5. 17s 6d.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and sheathing, £96 per ton; yellow metal, 8½d. to 8⅝d. per lb.

TIN.—122s. for block; 123s. for bar. Tin plates, best charcoal, I.C. 28s. 6d. to 29s. 6d. per box.

LEAD, &c.—English pig, £20. 10s. to £20. 12s. 6d.; shot, patent, £23. 10s.; sheet, £21. 10s.; spelter, £17. 10s. to £17. 12s. 6d.; zinc, English sheet, £23 5s.; quicksilver, £7 per bottle.

The following is from the circular of Messrs. French and Smith:—The metal market continues active, and prices generally very firm. Iron: There has been a good demand for Scotch Pig, and higher prices are now quoted. For Welsh and Staffordshire iron there has been a fair demand at our last quotations. Copper: The market has been active, particularly in manufactured, and higher prices are asked for fine foreign. Tin: There is more demand for English. Foreign is without alteration, buyers looking for the result of the sale, to take place on the 24th inst., in Holland. Tin Plates: Manufacturers are asking higher prices. Lead is quiet. Spelter quite inactive.

GOLD AND SILVER.

Bar Gold (per ounce)	£3 17 9		
Spanish Doubloons	3 16 0	to 3 17 0	
United States Gold Coin	3 16 3		
Silver in Bars	0 5 1¼		
Mexican Dollars	0 5 2¼		

MANCHESTER MARKETS.

Messrs. John Slagg and Co. report of the cloth-market:—"There is no change to report in the market since Tuesday last. Although the accounts to hand by telegraph from Calcutta are more encouraging, there is as yet no renewal of demand for that quarter, and the prices asked for India goods are rather irregular, but on the whole lower than on this day week. The uncertainty with regard to American affairs continues to affect the market; buyers hold back as much as possible, and the business done is trifling in amount, but as a rule holders are firm at last week's rates."

The circular of Sam Mendel quotes Grey Shirtings, 8 lbs., 16s. 6d. to 17s.; 9 lbs, 19s. 6d.; 10 lbs., 22s.; T.-Cloths, 11s. 6d. to 11s. 9d.; White Spot Shirtings 18s.; White Brocades, 18s. 3d.; Damasks, 31s. 9d.; Maddapollams, 6s. 6d.; Cotton Yarn, 16·24, 2s. 1½d.

FREIGHTS AND CHARTERS.

Outward freights remain unaltered. Ships are in request for Shanghai. Coal freights are firm, and a fair demand exists for vessels. In homeward freights there is nothing new to report.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 42s. 6d. meast. To Nagasaki: 65s. To Hankow: 65s. weight, 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. measurement. To Shanghai: 50s. weight, 30s. measurement. To Hong Kong: 40s. weight, 35s. measurement. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. to 35s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £41 and £. 17s. 6d. For Shanghai: £50 and £2. 7s. 6d. For Manila: £1. 10s. For the Philippine Islands, Penay, or Zebu: £2. For Singapore: £26 and £1. 4s. 6d. For Penang: £24. For Galle: £27. 10s. and £1. 6s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have invited tenders for the conveyance of 49 tons of Barrack Furniture (Government stores), from the River Thames to Shanghai.

CASUALTIES.

The Zeemeano, Dutch barque, Kayser, from Shields for Sourabaya, struck on Whitby Rock June 11. She went on shore during a thick fog, remaining about five and a-half hours, when she had assistance from the shore, and was got off, after throwing part of her cargo (about two reels coals) overboard; she has since been towed back to Shields, and will probably have to discharge to ascertain the damages.

The Anna and Elise de Roever, from Shields to Batavia, which was stranded near the former port May 19, has been condemned.

Antigua, May 27.—The Perseverant (brig), of Bordeaux, Doucet, from Macao for Havana, with Chinese emigrants, ran on the N.E. side of Barbuda May 16, and soon after bilged.

The Biltern (barque), Taylorson, from Shanghai for Montreal, was stranded near Green Island, at the mouth of Louisburg Harbour, during a dense fog, June 2. About 1,000 chests of tea (dry, and in good order), and all the ship's materials had been landed up to June 5.

Capetown, May 21.—The cargo ex Prins van Orange, Hensing, from Banjoewangie for Rotterdam, which put into Simon's Bay previous to March 28 very leaky, will be forwarded to its destination by the Bride of the Seas, barque, Donald, which has been chartered for that purpose.

The vessel reported from Bahia as having been burnt by the Confederate steamer Georgia, is understood to be the Dictator, for Hong Kong, which sailed from Liverpool 6th of April last with 1,618 tons coals.

Off ASCENSION.—Egean Duncan, from Shanghai for London (for medical assistance); May 9, Clansman, barque, from Ceylon for London; 20, Omega Ballingate, from Manila for London; 21, Lady Head Kirk, from Manila for Liverpool.

At ST. HELENA.—May 14, Lily, Warden, from Shanghai, and sailed for New York; Carl Auguste, Meermants, from Banjoewangie, and sailed, 15, for Schiedam; 16, Caprera, Henderson, from Manila, and sailed for Falmouth; Susanna, Vonck, from Padang, and sailed, 18, for Amsterdam; 17, Ocean Gem, Cubbins, from Japan, and sailed, 18, for London; 18, Cervantes, Aguire, from Manila, and sailed, 19, for Cadiz; 19, Menzies, Teesdale, from Ceylon, and sailed for London.

At TABLE BAY.—April 28, Fanny, sailed for Batavia; 29, Singapore, sailed for Manila; May 14, Persia (str.), Greig, from Hartlepool, and left, 16, for Galle; Chekiang, Wadsworth, sailed for Shanghai; 17, Hedda Fredrika, Larsson, sailed for Batavia.

At ALGOA BAY.—April 18, Norma, sailed for Singapore; 25, La Plata, sailed for Singapore.

At SIMON'S BAY.—May 14, Hjalmar, Norberg, from Padang for Amsterdam for medical aid.

CHOLERA, DYSENTERY, DIARRHŒA, AGUE, FEVER, SPASMS, &c. The Safes and Best REMEDY is that marvellous remedy known a

CHLORODYNE,

which was discovered by Dr. J. Collis Browne, M.R.C.S.L. (ex-Army Medical Staff), and the SECRET OF HIS RECIPE CONFIDED ONLY to J. T. DAVENPORT, pharmaceutical chemist, 30, Great Russell-street, Bloomsbury-square, who is the sole manufacturer. Medical testimony furnished by the highest authorities in military, naval, and Civil practice, and numerous gratifying statements from the public generally, establishes this property as invaluable. It relieves pain, soothes the system, inducing refreshing and soothing sleep without producing or having any unpleasant effects like opium, and may be taken at any time in a few drop doses. Extracts from the General Board of Health, London, as to its efficacy in Cholera:—"Third Stage, or Collapse—In all cases restoring the pulse. So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases." From Dr. Andrew Smith, Director-General Army Medical Department:—"I have seen it used, and apparently with much advantage." From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an anti-spasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am perfectly satisfied with the results." From Dr. M. M'Millman, of New Galloway, Scotland:—"I consider it the most valuable medicine known." Dr. M'Grigor Croft, late Army Staff, says:—"It is a most invaluable medicine." Dr. Gibbon, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa." Dr. I. Baker, Bideford:—"It is without doubt the most valuable and certain anodyne we have."

Sold in bottles, 2s. 9d. and 4s. 6d., by the sole Agent and Manufacturer, T. DAVENPORT, 33, Great Russell-street, Bloomsbury square, London; or sent carriage free on receipt of Stamps or Post-office Order, and with Professional Testimonials enclosed. None genuine without the words "Dr. J. Collis Browne's Chlorodyne" engraved on the Government stamp on each bottle.

*** Beware of counterfeits sold under the same name. Orders can be sent through any of the Agents of this Paper.

HOLLOWAY'S PILLS AND OINTMENT.—Established Household Remedies.—No medicines are more efficient or more safe, under any circumstances, than Holloway's well known preparations, and none are, therefore, so well adapted for family use. They possess the active and essential therapeutical powers presented by the vegetable kingdom for expelling the causes of disease from the human system. Both Holloway's Pills and Ointment are alike devoid of all mineral and vegetable poisons. They may be used with equal safety to the infant as to the adult, being simple but efficacious in their operation. No household should be without a supply of Holloway's Pills and Ointment, as they will be found always useful in restoring from accidental injuries, constitutional complaints, or obstructed function.

TO THE NERVOUS AND DEBILITATED.

Dr. Curtis on Marriage, Nervous Debility, Spermatorrhœa &c., with Plates. Post free by the Author, 12 stamps; sealed ends, 20.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour; being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excess: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Invaluable Lotion, the result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albermarle-street, Piccadilly, London.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 29, 1858.

The book concludes with numerous, varied, and interesting cases, to which is added the Author's Receipt for a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

The work may be obtained of Mr. HINNAM, Queens-road, Hong Kong.

W. F. THOMAS AND CO.'S SEWING MACHINE.

COLONIAL RESIDENTS, to whom the possession of a reliable and efficient SEWING MACHINE, not likely to get out of order or require repairs, is invaluable, are informed that THOMAS'S SEWING MACHINES are now in use in all parts of the world and that from the established reputation of their firm (obtained after fifteen years' extensive business), every reliance may be placed on obtaining from them an efficient Machine certain to give satisfaction.

Numerous counterfeits are offered on sale, and therefore application should be made direct to the Patentees at their only depots, 66, Newgate-street, and Regent-circus, Oxford-Street, London.

T. MORSON AND SON

(JUROR OF THE INTERNATIONAL EXHIBITION, 1862),

MANUFACTURERS OF

CHEMICAL AND PHARMACEUTICAL PREPARATIONS,

AND WHOLESALE AND EXPORT DEALERS IN

DRUGS, MEDICINES, AND PHOTOGRAPHIC CHEMICALS,

BEG to inform their friends and connections abroad that the Preparations made and supplied by them, including the Alkaloids and their Salts, Pepsine and its Preparations, the Scaled Compounds of Iron, Granulated Medicines, and, in fact, all the more important compounds employed in medicine, photography, and for scientific research or experiment, bear their Trade Mark on the containing vessels, and they cannot be responsible for the quality of any preparation purporting to come from them to which their mark is not affixed.

MORSON'S PEPSINE WINE,

PREPARED FROM THE GASTRIC JUICE OF THE CALF'S STOMACH.

Since the discovery of Pepsine as the active and most important constituent of the Gastric Juice several processes have been suggested for separating this peculiar digestive principle from the stomachs of healthy animals, and preparing it in a suitable state for use in Medicine. One of the most efficient forms for administering Pepsine is that of Pepsine Wine. The process for this preparation is founded upon the observations of Dr. Ellis and others, that good white wine is an excellent menstruum for Pepsine. Instead, however, of digesting the calf's stomach in the wine, as recommended by Dr. Ellis, the Pepsine is eliminated, and then, in the pure state, dissolved in the menstruum. Thus prepared, it is an agreeable slightly acidulous wine, which retains its activity unimpaired, and a teaspoonful of which contains a dose of Pepsine in a form that will be palatable to the most delicate stomach. The "Medicinal Pepsine," or "Poudre Nutrimentative," in which the Pepsine, mixed with starch, is reduced to the dry state, as introduced by Dr. Corvissart, of Paris, is still prepared according to the original process, its administration in this form being sometimes found advantageous. Sold in bottles, 3s., 6s., and 10s.

MORSON'S PATENT GELATINE.

A PURE AND ECONOMICAL SUBSTITUTE FOR RUSSIAN ISINGLASS, FORMING A COLOURLESS JELLY, WHICH POSSESSES THE NUTRITIOUS AND RESTORATIVE PROPERTIES OF THE BEST CALVES' FEET JELLY.

This preparation, which is made from perfectly fresh and well-purified calves' feet, possesses a high degree of gelatinizing power, and affords a ready means of producing a nutritious restorative and agreeable jelly, well suited from those who suffer from weak digestion or general debility, as well as for the purposes to which gelatine is usually applied.

WHOLESALE AND RETAIL DEPARTMENTS,

19 AND 46, SOUTHAMPTON-ROW, RUSSELL-SQUARE, LONDON.

CHARTERED MERCANTILE BANK OF INDIA, LONDON, and CHINA.—A DIVIDEND of 5 per Cent. (free of income-tax) for the current half-year will be PAID to the Proprietors on the London Register on or after the 1st July next.

Hong Kong	Johnson and Co.
Shanghai	Johnson and Co.

JOHN SCOTT, Secretary.

JOHN GOSNELL AND CO.'S PERFUMERY, PATRONISED BY HER MAJESTY and the ROYAL FAMILY.

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon II., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s LA NOBLESSE PERFUME—a most delicate perfume of exquisite fragrance.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s CHERRY TOOTH PASTE is greatly superior to any Tooth Powder, gives the Teeth a pearl-like whiteness, protects the enamel from decay and imparts a pleasing fragrance to the breath

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON is adapted for universal use, and the most serviceable and convenient Hair Brush ever invented. Letters Patent Granted Nov. 6, 1852.

JOHN GOSNELL and Co.'s PATENT PERFUME SPRINKLER, which, for convenience and simplicity of application, far exceeds anything of the kind hitherto produced.

Merchants and Shippers supplied on liberal terms.

12, THREE KINGS COURT, LOMBARD-STREET LONDON.

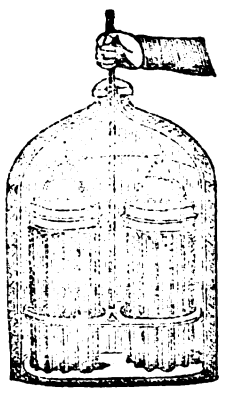
IMPORTANT
TO PERSONS RESIDING IN HOT CLIMATES.



ASH'S PATENT "PISTON" FREEZING MACHINE AND WINE COOLER
is the FIRST REALLY EFFECTIVE APPARATUS for TROPICAL CLIMATES

It will produce PURE BLOCK ICE, FREEZE and MOULD DESSERT ICES, and ICE WINES in any temperature. It is remarkably simple, will not corrode or get out of order, and can be worked by the most ignorant servant. The Freezing Salts employed are indigenous to the Indian Empire, easily and cheaply obtained. A *bonâ fide* Receipt for preparing them given with each Machine. It is not too much to say that the "Piston" Freezing Machine will rapidly become indispensable to all European residents in India.

PRICES:—For 1 Bottle, 1 Block of Ice, 1 Dessert Ice £4 0 0
For 2 Bottles, 2 Blocks of Ice, 2 Dessert Ices 6 10 0
For 4 Bottles, 4 Blocks of Ice, 4 Dessert Ices 11 5 0

If without fittings (merely as Wine Coolers):

For 1 Bottle £2 0 0
For 2 Bottles 3 0 0
For 4 Bottles 4 5 0

When Dessert Ices are never required, these Wine Coolers can be fitted with BLOCK ICE MOULDS, at 30s. for each Mould so fitted.

SIXTIETH THOUSAND.
Just Published, crown 8vo., cloth, Price 3s. 6d.,

HEAVEN OUR HOME.

"We have no Saviour but Jesus, and no home but Heaven."

"THIS volume, to which the author has not thought proper to attach his name, must be welcomed with especial gratification by those who look forward to that heavenly home which he so wondrously and delightfully portrays. . . . . It proves in a manner as beautiful as it is convincing, the doctrine of THE RECOGNITION OF FRIENDS IN HEAVEN. . . . . It demonstrates THE INTEREST WHICH THOSE IN HEAVEN FEEL IN EARTH, and proves, with remarkable clearness, that such an interest exists, not only with the Almighty, and among the angels, but also among the spirits of departed friends."—*Glasgow Herald*—"We are not in the least surprised at so many thousands of copies of this anonymous writer's book being bought up. We seem to be listening to a voice and language which we never heard before. Matters come at command; words flow with unstudied ease; the pages are full of life, light, and force; and the result is a stirring volume, which, while the Christian critic pronounces it free from affectation, even the man of taste, averse to evangelical religion, would admit to be exempt from 'cant.'"—*London Patriot*.—"This work gives POSITIVE AND SOCIAL VIEWS OF HEAVEN, as a counteraction to the negative and unsocial aspects in which the subject is so commonly presented."—*English Churchman*.—"The name of the author of this work is strangely enough withheld. . . . . A social Heaven, in which there will be the most PERFECT RECOGNITION, INTERCOURSE, FELLOWSHIP, and BLISS, is the leading idea of the book and it is discussed in a fine genial spirit."—*Caledonian Mercury*.

Also, by the same author, just published, price 3s. 6d. each, 15th 1,000; LIFE IN HEAVEN. 23rd 1,000, MEET FOR HEAVEN.

*** The above popular books have already attained (in this country alone) the large sale of 98,000 copies.

Edinburgh: WILLIAM P. NIMMO; London: SIMPKIN, MARSHALL, and Co.; and HOULSTON and WRIGHT. Sold by all Booksellers.

G. W WHEATLEY and Co. (late Wagnern), 150, Leadenhall-street, E.C.; CHAPLAIN s, Regent-circus, W., and 23. Regent-street, S.W.

INDIA and CHINA.—New Overland Steam Communication.—French Mail Steam Ships.—Services Maritimes des Messageries Impériales.—On the 19th of every month, a FRENCH MAIL STEAMER will be despatched from Marseilles, at 2 P.M., for ALEXANDRIA, corresponding with another steamer from Suez to India and China. Passengers will be booked and cargo received for conveyance to the following ports:—Messina, Alexandria, Aden, Point de Galle (Ceylon), Pondicherry, Madras, Calcutta, Singapore, Saigon, and Hong Kong. In addition to the foregoing, the November steamer will receive passengers and cargo for Shanghai.

For Passage, Freight, and general information, apply to B. W. and H. HORNE, 4, Moorgate-street, London; G. H. FLETCHER and Co., 11, Covent-garden, Liverpool; and at No. 28, Rue Notre Dame des Victoires, Paris; 7, Place des Terreaux, Lyons; 1, Place Royale, Marseilles; 36, Quai de Bacalan, Bordeaux; or to Messrs. SMITH and Co., Rotterdam.

STEAM to the CAPE of GOOD HOPE and SINGAPORE.—The powerful new screw steamship MONA, A 1 nine years, 900 tons, 150-horse power, F. BOURN, Commander, belonging to the China and Japan Steam Navigation Company, will load in the London Docks, and sail on the 12th July.

For Freight or Passage, apply to JAMES I. BENNETT and WAKE, 77, Cornhill, E.C.

To follow the Prince Llewelin.

Has the greater portion of her Cargo engaged, and will meet with very quick dispatch.

DIRECT for COLOMBO, the beautiful clipper JULIA AUGUSTA, A 1, 418 tons register, W. B. HOPPER, Commander, lying in the West India Docks. This splendid vessel presents a most favourable opportunity to shippers of season goods, having invariably delivered her cargoes in perfect order.

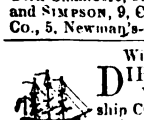
For terms of Freight, apply to TOULMIN, LIVINGSTON, and Co., 31, Great St. Helen's, Bishopsgate-street, E.C.

With Quick Despatch.

FOR SINGAPORE and PENANG, the splendid clipper ship, FREDERICA, A 1 twelve years, 384 tons register, J. BLYTH, Commander, West India Docks. This well-known, and favourite vessel, is strongly recommended to shippers requiring despatch.

For Freight or Passage, apply to JOHN WILLIAMSON, York Chambers, 55, King street, Manchester; to SUART and SIMPSON, 9, Clement's-lane; or to ROBERTSON and Co., 5, Newman's-court, Cornhill, E.C., London.

With immediate despatch.



DIRECT for HONG KONG and WHAMPOA, the splendid clipper-built ship CONFLICT, A 1 nine years, 373 tons register, J. M. WAIT, Commander, loading in the East India Docks. This fast-sailing ship, presents a favourable opportunity to shippers of fine goods.

For Freight or Passage, apply to DEVITT and MOORE, 9, Billiter-street; or to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

Regular line of packet ship.

FOR HONG KONG AND WHAMPOA, the splendid British-built clipper PATRICIAN, A 1, 13 years, 1,139 tons register, owned by George Marshall, Esq., THOMAS PAIN, Commander, lying in the London Docks. This ship has a large and spacious poop, with cabins fitted for the Indian trade, and presents an opportunity for the conveyance of passengers to China rarely offered.

For Freight or passage, apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings E.C.

To follow the "Regia." With despatch.

FOR COLOMBO DIRECT, the fast-sailing clipper barque, SKIMMER OF THE WAVES, A 1 eleven years, 396 tons per register, WILLIAM HAMMOND Commander. Loading in the London Docks. This beautiful Clipper is nearly new, and being known for her great speed, is an excellent opportunity for shippers of fine goods. Has good accommodation for cabin passengers.

For Freight or Passage apply to JOHN WILLIAMSON, York Chambers, 55, King-street, Manchester; to ROBERTSON and Co., 5, Newman's-court, Cornhill; or to SUART and SIMPSON, 9, Clement's-lane, Lombard-street, London, E.C.

To follow the 'Troas."

FOR HONG KONG and WHAMPOA, the well known China ship QUEEN'S OWN. A 1, 10 years, 457 tons register, M. FLANAGAN, Commander, East India Docks.

For Freight or Passage apply to KILLICK, MARTIN, and Co., 29. Nicholas-lane. Lombard street, E.C.

With immediate dispatch.

FOR SINGAPORE, the fine, fast-sailing barque ELIZA THORNTON, A 1, 13 years, 471 tons per register. Coppered and copper fastened throughout. THOMAS MAXWELL, Commander; lying in the St. Katharine Dock. Has superior accommodation for passengers.

For freight or passage apply to the owners. Messrs. THORNTON and WEBB, Old Swan Wharf; or to RANGEL, WOOLLETT and Co., 1, Lime-street-square.

With quick dispatch.—Having a large portion of her Cargo engaged.

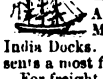
FOR HONG KONG and WHAMPOA, the well-known clipper ship ALCHYMIST, A 1 ten years, 539 tons register, T. DENNETT, Commander, loading in the London Docks. This ship has excellent accommodation for first and second cabin passengers.

ELLIS, WILLIS, and FICKLING, 132, Leadenhall-street, E.C.

FOR SHANG HAI, the well-known clipper ship POLMAISE, A 1 fourteen years, 887 tons register, lying in the St. Katharine Docks. This ship has a full poop, with superior accommodation for passengers.

For Freight or Passage, apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange Buildings, E.C.

With immediate despatch.



DIRECT FOR SHANGHAI, the splendid clipper-built ship, VICTORY, A 1, 13 years, 595 tons register, LEONARD MOON, Commander, Loading in the East India Docks. This fast-sailing and well-known ship presents a most favourable opportunity for shippers.

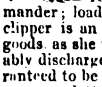
For freight or passage, apply to DEVITT and MOORE, 9, Billiter-street; or to GELLATLY, HANKEY and SEWELL, 27, Leadenhall-street, E.C.

With quick despatch

FOR AMOY AND FOO CHOW-FOO, the fine clipper, SEA BELLE, A 1, 10 years, 307 tons register, WM. McCREDIE, Commander, West India Docks.

For Freight or Passage, apply to KILLICK, MARTIN, and Co., 29, Nicholas-lane, Lombard-street, E.C.

To follow the "Skimmer of the Waves," with despatch.



FOR COLOMBO Direct, the fast sailing clipper barque CORSAIR'S BRIDE, A 1 thirteen years, 323 tons per register; THOMAS ISAAC BROWN, Commander; loading the West India Docks. This well-known clipper is an excellent opportunity for shippers of fine goods as she will carry no creosoted timber, and invariably discharges her cargo in perfect order. She is guaranteed to be continued A 1 for four years, and has good accommodation for cabin passengers.

For Freight or Passage apply to JOHN WILLIAMSON, York-chambers, 55, King-street, Manchester; to ROBERTSON and Co., 5, Newman's-court, Cornhill; or to SUART and SIMPSON, 9, Clement's-lane, Lombard-street, London, E.C.

FOR HONG KONG AND WHAMPOA, with despatch, the well-known Aberdeen clipper-ship RUBENS, A 1, 403 tons register, A. LEVIE, Commander, loading in the London Docks. Has a poop, with superior accommodation for passengers.

For Freight or Passage, apply to ESCOMBE, BROTHERS, 22, Eastcheap; or to T. and C. NICHOLS, 150, Leadenhall-street.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

List of Passengers.

By this mail, to Marseilles, per Euxine, arrived 14th July.—From Hong Kong: Mr. Turner, Mr. Harrison, Mr. Bruyn, Mr. Hunter, Mr. Perriquet. From Singapore: Mr. Torrence, Mr. Thompson. From Penang: Col. and Mrs. Mann, and two children. From Ceylon: Messrs. Hyde, Claude, and Hay. To Southampton, per Poonah, expected to arrive 21st July.—From Hong Kong: Mr. D. Gow, Mr. Maurilyan, Mr. J. D. Tobnolz. From Singapore: Mrs. Bush, three children, and servant, Mr. D. Butt, Mr. Carpenter, Mr. Saunders. From Ceylon: Messrs. Hadden, Jeffries, and Johnson.

PASSENGERS OUTWARD.

By last Mail, per Pera, from Southampton, July 4.—To Shanghai: Mr. Corner. To Hong Kong: Mr. A. L. Pearcey, Capt. King's groom, Anne McDonald, Mr. P. E. Barnes. To Singapore: Mrs. Wells and infant and four children, Mary Doe, George Williams, Mr. Greenshield's native servant, Mrs. M. Davidson's ayah. To Calcutta: Messrs. J. Monro, J. Hector, D. McDonald, and Dick, Mr. Dick, jun., Capt. Lambert, Mr. W. Ashworth, D. and R. Neville, T. Clayton, Wm. Cooper, Bandmaster Sergeant Cook, Mr. M. Walker, J. Goodard, Mrs. Skinner's ayah, Mr. K. Brecham, D. C. J. Jackson's groom, Mr. C. Cleworth, Capt. Gethin. To Madras: Capt. D. Arey's ayah, Lieut. A. Mears Capt. and Mrs Ryves, Mr. Wm. Griffiths, Capt. Tronson's native female servant, Mrs. Bugden. To Ceylon: Miss Davey, Mr. E. Astley, Mr. Henry, Mr. Brabazon, Miss Rollings, Wm Allan, Mr. S. Willoughby, Mr. Cameron, Geo. Wighton, Miss Vanderspar. To Alexandria and back: Rev. Mr. Ransom, Capt. Engledues, two sons, and tutor, Capt. Jamieson's son.

From Marseilles, per Massilia, to leave 12th July.—To Shanghai: Mr. J. Mackellar. —To Ceylon: Mr. H. E. Bury, Mr. J. O. Driebe gh —To Calcutta: Mr. Sandeman, Lieut. F. A. Bertie, Capt. G. A. Prendergast.—To Madras: Mrs. R. P. Campbell.

Per P. and O. steamer Ripon, 20th July, from Southampton.—To Shanghai: Mrs. Beal, Mr. Woodward, Mr. A. Annesley.—To Hong Kong: Mr. Merry, Mr. J. C. Thomas, Mr. Wm. Anderson, Mr. Grady.—To Singapore: Mr. R. C. Forbes, Mr. E. C. Cooke,—From Marseilles, 28th July.—To Singapore: Mr. and Mrs. R. C. Woods and two sons.—To Hong Kong: Mr. C. M. Kerr.—To Shanghai: Mr. Schroers, Mr. Bovenschen.—To Ceylon: Mr. Jas. Russell.

Per P. and O. steamer, 4th Aug., from Southampton.—To Shanghai: Mr. F. P. Morris, Mr. J. Maitland.—From Marseilles, 12th Aug.—To Ceylon: Mr. W. Pollock, jun.

Per P. and O. steamer, 20th Aug., from Southampton.—To Hong Hong: Mrs. Marston and infant.

Per P. and O. steamer, 27th Aug., from Southampton.—To Hong Kong, *via* Bombay: Mr. and Mrs. G. Tyser.

Per P. and O. steamer, 4th Sept., from Southampton.—From Suez to Shanghai: Mr. Probst and friend, Mr. J. Bolsted and friend.

Per P. and O. steamer, 20th Sept., from Southampton.—To Ceylon: Mr. H. Kinderslay, Mr. and Mrs. B. L. Ronald.—From Suez.—To Hong Kong: Mr. W. Wilson.

Per French steamer Peluse, from Marseilles, 19th June.—Messrs. Walah and Smith, to Shanghai.

Summary of News from the Far East.

JAPAN.

By H.M.S. *Racehorse*, dates from Yokuhama have been received up to May 14th. Admiral Kuper had applied to General Brown, commander of forces at Shanghai, to send up 1,000 troops, but the General hesitated. These troops were on the point of embarking for home, and the transports engaged were discharged on payment of the penalty. There was much excitement and apprehension among the foreign community, the native merchants and domestics of foreigners were leaving, and an attack on the settlement by the anti-foreign Daimios was dreaded. The rumour ran that they had collected a strong force in the vicinity, and that the Tycoon's Government had raised a force to oppose them. The conduct of the American Minister was looked upon with suspicion as unfavourable to the interests of the French and English. H.M.S *Pearl*, at Yokuhama, had 26 men down with the small-pox. The news from Yokuhama is scanty, and a statement without any support is made that the British Admiral had granted a further respite of ten days, viz., from the 11th to the 21st, while, via San Francisco, we have news that a period of fifteen days had been allowed which would expire on the 26th May.

Another account says:—"At Yokuhama affairs are in a most unsatisfactory state. There seems to be an impression there that the additional time granted by Admiral Kuper indicates an expectation on his part that the Japanese will come to terms, but we have reason to believe that the Admiral is procrastinating for the purpose of allowing time for the instructions of the British Government to come to hand, in relation to the burning of the Legation. These he should receive by the next mail at latest. It was well understood that a further extension of time beyond the 21st would be granted, because the Tycoon was not expected from Miako until the 22nd May. Indeed we see it stated in one letter that the time had been already extended to the 28th. Otherwise the concession of the extension of time is inexplicable, for so far from having obtained an equivalent, the authorities have been actually behaving aggressively. The Governor of Kanagawa had ordered all native merchants and domestics of foreigners to leave, and he issued instructions relative to the stoppage of food. These orders were being carried out pretty strictly, when a strong remonstrance from the treaty Powers other than British, induced a suspension of thirty days. From the 6th to the 8th there was great excitement among the lower orders, and many foreigners, especially American, were maltreated by carpenters and bricklayers, whom they had employed to build business premises. One or more attempts were made to set fire to some wooden buildings, but they were thwarted by due vigilance. Some of the servants had come back, and so had many of the merchants, but all viewed matters as being very critical. The Japanese silk dealers were hurrying their stock to market with all speed, and some foreigners had made fair bargains. Money was scarce, Exchange on London was quoted 5s. 3d. to 5s. 3½d."

At Nagasaki the correspondent of the *North China Herald* writes:—"Great excitement prevailed, all foreigners shipping off their books and valuables, the Germans and Dutch even sending off their furniture, on the morning of our departure. Consequent on advices received from the Governor of Nagasaki, H.B.M. Consul issued a circular recommending the foreign community to hold themselves in readiness to quit the port at

Digitized by Google

a moment's notice, and to sleep on board ship at night, as a sudden attact might be made, for although the Governor had promised to give timely notice of a declaration of war, he at the same time stated he could not control or be responsible for the acts of the Princes or their followers, who were assembling large forces in the town and neighbourhood. In consequence of the above, a meeting of the community was called, to consider what should be done under the existing circumstances. At the meeting it was stated that the Consul intended sleeping on board one of H.B.M. ships of war that night, as the senior officer, acting under the Admiral's instructions, had refused to lend a guard either for the consulate or the settlement, but had promised to keep a guard-boat during the night off one of the jetties; whereupon it was unanimously resolved that they were not justified in abandoning the property of themselves and their constituents until an actual attack was made on life or property. It was further proposed for their better safety, that the whole of the community should assemble at one or two of the adjoining houses on the Bund, some of their number keeping guard, and to patrol the street by night. At this stage of the meeting our informant was obliged to leave, as the steamer was on the point of starting. A noticeable change had taken place in the bearing of the Japanese towards foreigners, the former jostling the latter in the street and showing other symptoms of disrespect. In one instance a two-sworded man was known to enter the house of a resident, and on being told to quit by one of the servants he took up a piece of bamboo and cut it in two, signifying he would serve him (the servant) the same if he interfered with him; thereby showing that foreigners are becoming more distasteful to the natives every day, and that they have every reason to expect an outbreak at any moment."

The following passengers left for Shanghai:—Messrs. Garratt, A. J. Whalley, J. M. Ringer, C. J. Skeggs, H. E. Amoore, Sam Maltby, A. Joost, E. Bohlens, Lieut. Vasitition (Russian Navy), Capt. Moller, Capt. G. Keppel, Mrs. Thos. Keppel and son, Mrs. Green and two daughters, Mrs. Schut and two daughters, Mrs. Wicks and son, Mr. and Mrs. Verbeck and three children, Mrs. St. Aulaire and two children, J. Tolman, P. Bindale, and sixteen steerage passengers; also Messrs. Keik and Buttsehall. Men-of-war in port at Nagasaki:—H.M.S. Ringdove, Rattler, and Coramandel, H.I.M.S. Duplex and Duchesse, H.I.R.M.S. America and Mandgour, and Dutch corvette Vice Admiral Koopman. Merchant vessels: Martha Theresa, William, Eggerts, Delaware, Fleda, Tycoon, Ashmore, Alma, S.S. Hellespont, St. Louis, S.S. William IV., S.S. Kum-Sing, and an American schooner going in (S S. Stork also in port).

The native holders of silk at Japan, seeing that war was imminent, hurried their stock to market, and becoming eager sellers, prices fell. About 2,800 bales were settled during the month. Latterly, however, supplies had fallen off and rates stiffened. The total settlements of the season reach 25,000 bales, against 9,500 same time last year. This appeared to be the only business doing.

The following is from the *China Mail*:—

"H.M. transport *Vulcan*, which left Hong Kong to convey the 31st from Shanghai to this port, will now, it is understood, carry them to Yokuhama, where the foreign concession will be held during any hostilities that may ensue. Admiral Kuper has informed the Japanese authorities that no hostilities are intended by him in the neighbourhood of the open ports, unless it should be necessary as a defensive measure. The Tycoon's Government have notified to the Admiral that proper warning will be given in the event of war being determined upon, so that foreign residents on shore may have time to withdraw should they desire it; this act of courtesy, however, is somewhat seriously qualified by a statement annexed, to the effect that Prince Satsuma is sending his retainers into Yokuhama disguised as peaceful natives, and that they are to arrive in groups of three or four at a time so as not to excite suspicion. The Tycoon has very plausibly assured the Admiral that he was in the position of being compelled to feign dislike and hostility to foreigners, although his real feelings were friendly. Notwithstanding that the period for receiving the reply of the Japanese Government has been twice extended, it is rumoured that, to oblige the Japanese, further grace will be accorded to them if they desire it. It cannot be doubted but that the nobles will require time to discuss a question involving a change in the country's constitution; and they, doubtless, feel that the discussion of this matter cannot very well be delayed. On our side delay is likewise wanted, in order to allow time for the arrival of troops from India, which have been sent for. if report speaks correctly. The only operation which the Admiral could proceed with would be to attack Prince Satsuma's castle at Kagosima, which is down on the charts near Cape Chikakoff, and opposite Pistol Island. He might also impound this Prince's revenues at the Loo-kiu (Loochoo) Islands. At the present time the prospects of a peaceful settlement to the Japan difficulty are very small. The *Illustrated London News'* artist arrived here, *en route* for Japan, last mail, so that in the event of hostilities the public at home will be kept well informed as to the details and incidents of the war."

CHINA.

PEKING.

No intelligence had been received of the arrival of Mr. Lay, the Inspector-General of Foreign Customs, who, as stated in our last issue, had gone to the capital to report himself on his return from England. No doubt important changes will result from this visit—changes which will be organised by Mr. Lay in concert with Her Majesty's Ambassador and the Imperial Government. It appears that the Chinese Government is not indisposed to open new ports of entry in the interests of trade, and of its own accord.

The subject of Chinese jurisdiction over British property, affirmed by Mr. Lay and acquiesced in by Sir F. Bruce, would not probably be long allowed to remain in its present dangerous and disreputable position.

SHANGHAI.

The following was General Gordon's order after the capture of Tait-san:—

"TAIT-SAN, 3rd May, 1863.

"The Officer Commanding thanks the Artillery and Infantry for their gallant exertions during the late operations.

"In spite of a most determined and desperate resistance, they carried this city, which had a garrison of five times their numbers, and have done what could not have been surpassed by any troops in the world.

"The Commanding Officer assures the officers and men that he has never seen such a determined fight, lasting as it did, hand to hand, for nearly a quarter of an hour.

"He regrets the untimely death of the gallant Captain Bannon, and the wounds received by the other officers, and will hope to see the latter well cared for, and capable of again joining their regiments, and taking the field.

"The force has now claims which will be pushed to the uttermost, and it may rest assured the officer commanding will leave nothing undone to have everything placed upon a satisfactory and proper footing. He canno too deeply express his appreciation of the gallant conduct of the force."

Major Gordon was at Soon kiong with the whole of Ward's force, and it did not appear as if any aggressive movement were contemplated by him for the present. It was said that the Chung-wong was at Quin-san, with a large force. This is the city which Major Gordon menaced after taking Tai-tsan, but which he declined attacking after a couple of days' reconnoitre, either because of the disorganisation of his force, or from the want of the necessary munitions of war. A Russian corvette and a gun-boat have gone up the Yang-tse. One of H.M. gunboats has been detached to keep an eye on them.

The following on steam building is from the *North China Herald*:—"In addition to the improved capabilities of this port for the repair of steam machinery, great progress having been made in the manufacture of steam-engines and boilers, enterprising merchants were encouraging shipbuilders to construct large steamers for trading on the Yang-tse. As the class of vessels best suited for that description of navigation are of large carrying capacity with small draught of water, and built after the American model, they are not so suitable for a long sea voyage from New York or Liverpool; although the *Hu-Quang* and the fine fleet of steamers belonging to the Shanghai Steam Navigation Company have arrived safely in China from America. The idea, however, occurred to Captain Dearborn, in Messrs. Dent and Co.'s employ, that any risk on this head might be obviated by having the hull of the vessel built here, but importing the engines and their frame-work. Accordingly the keel of a vessel 300 feet long was laid on the stocks some months ago, by Messrs. Collyer and Lambert, on the east shore of the Wongpoo, opposite the settlement. As there is no available timber in this part of China for a hull of such large dimensions, it had been built entirely of teak, Siam wood, and Oregon pine. The work had been done entirely by Chinese shipwrights from Ningpo, under the superintendence of Messrs. Collyer and Lambert. She is 300 feet in length; 37 feet breadth of hull; over guards 64 feet; depth of hold 22 feet 1 inch; lower hold 11 feet 7 inches, and between decks 10 feet 6 inches. Her accommodation for passengers on the promenade deck is very spacious. The engines are from the Neptune Ironworks, New York, and fitted up in Shanghai by Mr. James A. Smith. She is in all respects a first-class steamer for the Yang-tse river service, and is estimated to carry from 1,800 to 2,000 tons of cargo. It is reported that Captain McQueen, now in the *Cosmopolite*, and late of the *Governor General*, is to command her. This, we understand, is the largest foreign vessel ever built in China. A large assemblage of people came together to see her launched, among whom was the Taoutai of Shanghai. As she moved down the ways, Pedro Loureiro, Esq., of Dent and Co.'s, christened her in champagne as the *Fusi-Yama*.

Digitized by Google

We (*Daily List*) understand that during the last few days the Taotai has, by the Futai's order, issued a proclamation announcing his intention of commencing to-day the levying of a house tax on Chinese residing within the limits of the settlement. In it he refers to his urgent want of funds, to the enormous expense of maintaining the Chinese armies, as well as the Soon-kiong establishment, and to the certain increase in the expenditure which will take place on the arrival of Captain Osborn's flotilla. He explains the necessity which thus exists for his availing himself of what he considers to be a strictly legal resource, of collecting a tax, similar to that paid by Chinese dwelling in the city and suburbs; from Chinese subjects occupying houses which, although they may belong to foreigners, are still built on Chinese soil; and quotes joint communications made by Sir F. Bruce and Mr. Burlinghame to Prince Kung, to the effect "that the so-called foreign settlement of Shanghai is Chinese territory, and that the fact of Chinese occupying houses which are the property of foreigners does not in any way entitle such foreigners to interfere with the levying of taxes by the local officials. He also alludes to the recognition of the right of the Chinese Government to levy taxes within the limits of the foreign settlement contained in Sir F. Bruce's various despatches to Mr. Medhurst. In conclusion, he intimates that, owing to his apprehensions that some of the disreputable Chinese residents in the settlement will hire foreigners of bad character to assist them in fraudulent evasion, he has been compelled to employ foreigners to aid in the collection of taxes.

The following is from the *Friend of China*:—"A bullion changing case is under investigation at the British Consulate, we hear. A party residing here had a letter from his brother in England by the last mail, saying that, with some £380 sterling, he had purchased Mexican dollars at 5s. 3½d. through Messrs. Pixley, Abell, and Langley, who would transmit him the bill of lading. No bill of lading came, but on exhibition of the above-named brokers' receipt for commission, &c., the agent of the P. and O. Company here at once ordered delivery of the boxes. One of these on being opened proved to contain imitation coin, base as base can be. Before opening the second box the 'victim' thought it best to take legal advice. The bullion dealers named are people of high standing; so we expect the fraud has been perpetrated by some of the people connected with their establishment."

The residents had been disgusted by the discovery which had been made of certain dead bodies lying in one of the creeks in rear of the *Friend of China* printing-office. The case was the more glaring as the residents had previously subscribed a considerable sum of money for Mr. Medhurst's well-intended scheme for removing surface soil dead bodies in the neighbourhood of foreign habitations. Some of these corpses (and there were half-a-dozen groups of half-a-dozen in each, within a small area, presented a touching appearance. One, green as seaweed, lifted up its swollen hand to passers-by, moving with the seaward tide. Dogs and rats were finding a rich harvest.

The business of Messrs. Moncreiff, Grove, and Co., has been transferred to Messrs. George Barnet and Co., Mr. Moncreiff joining the firm, and Mr. W. G. Howell leaving on the 31st March last.

A rifle match had come off, at which the shooting was far in advance of previous occasions.

Some Chinamen having been arrested by the police in the French Concession, Mr. Gamble, an English missionary, interfered somewhat warmly on their behalf, to an extent which the French authorities claim was only justifiable had Mr. Gamble held from the Chinese authorities the mission of protecting their countrymen. In fact, he interrupted the police in the performance of their duty, by arousing local opposition. Mr. Gamble accordingly was not very tenderly dealt with by the French authorities, and was subjected to what is affirmed to have been a most unjustifiable outrage. Some sharp private correspondence had sprung out of the affair. The secretary and treasurer to the Council of Municipal Administration had denied that Mr. Gamble was recognised by the policemen, or that he was made the object of insult or ridicule (*moqueries*) during his detention, which did not last more than a quarter of an hour, the Commissary of Police having let him go. Assurance was next day given Mr. Gamble that the guilty parties in the miscellaneous crowd who had insulted him should be punished, and he was offered pecuniary reparation.

The Chinese printing establishment in Shanghai has issued upwards of fifty publications, consisting of treaties on geography, history, botany, zoology, astronomy, and others specially appertaining to the religious works of the mission. Of Japanese publications fewer have been issued; but the establishment has just finished an elaborately printed volume in octavo, with upwards of 250 pages, by the Rev. S. R. Brown, on "Colloquial Japanese," which is the most useful book on the language hitherto published.

The following is on the Anglo-Chinese force:—"Under its present energetic leadership, the Soon-kiong force bids fair to quickly regain the reputation for constant activity and unvarying success which it had merited under the conduct of Ward, but which since his death had become somewhat dimmed by a considerable period of inactivity, followed by the disastrous defeat of Tai-tsan, and the several successive repulses in the attempted relief of Chiang zu. Both these blots have now been wiped from its standards. The latter city has been relieved, and the country cleared for twenty-five miles inland from the Yang-tse, and Tai-tsan taken after a resolute defence, which heightens the credit due to the victors for the achievement. These distinguished successes have been attained within less than a month, and a third—the capture of Quin-san—might probably have been added to their number within the same brief period, had not circumstances rendered an attack undesirable at the time the troops appeared before the city. It has, however, only been temporarily checked; and though the delay is unfortunate, because the appearance of the troops before the walls will have taught the rebels where to expect the next blow, and probably induced them to strengthen their defences, by awakening them to a sense of their danger, we have confidence that fortune will again favour the Imperialist arms. We have been led thus to recapitulate the recent movements of the Soon-kiong force, by perusal of a passage in the highly laudatory General Order issued after Tai-tsan was in possession of the disciplined Chinese. Major Gordon says with justice:—'The force has now claims which will be pushed to the uttermost; and it may rest assured that the officer commanding will leave nothing undone to have everything placed on a satisfactory and proper footing.'"

The following is from the *Friend of China*:—"Another series of dreadful murders have been perpetrated by those brutal Imperialists on the Yang-tse; and if Commodore Sherard Osborn restricts the labours of his squadron to simply doing good in the way of checking piraty, and leaving the rebels alone, he will have quite enough work with Imperial harpies and assasins under the same 'honoured' flag which decorates his gaff. It is high time something were done on the Yang-tse and coast, for although Mr. Consul Adkins and Chinkeang took up the case of the lorcha *Fox* with all the warmth of a generous disposition, he found, on investigation and reflection, that he was powerless to act, the victims being Americans."

"Following is some correspondence which passed on the subject; the party who wrote to the Consul tells us that of all the horrid sights he ever saw, the spectacle of the murdered woman was the most awful. The particulars are too harrowing to place in print:—

"'Sir,—I take the liberty of giving you some further information respecting the murders committed on board the American lorcha *Fox*. While passing Eching with the steamer, my boy came on board to me and told me that the crew of the lorcha, upon the night the murders were committed, sent one of their number to the Canton Lorcha and four small gunboats (spoken of by Captain Harris yesterday), who then got under weigh and went alongside the *Fox*. Immediately upon this the crew made their attack upon the late Mr. Mellen; his wife ran on deck with a pistol, which she fired at the boats; she then went below to try and protect her husband, but was followed by the Chinese soldiers and by them killed; this will coincide with the spear wounds upon her body, all inflicted with the Chinese spears, of which I know there were none on board, hers being broad-bladed English boarding spikes.

"'Half the *Fox's* crew are reported to be on board the *Canton*, or four small gun-boats, the other half having been to Eching, where it appears they had some understanding with the Mandarins previously; it being stated to me that they knew beforehand of the intended attack, were aware of a considerable sum of money being on board the *Fox*, but had been told by her crew that the late Mr. Mellen was a Malay, and they need not fear the consequences.

"'Trusting that in the event of any official visit being undertaken to Eching in this affair, this will be useful, by showing that the Mandarins here have had something to do with it,—I am, &c.

"'To H.B.M.'s Consul, Chinkiang.'"

The *North China Herald*, we understand, utters the opinions of most residents in China and Japan in the following article:—

"England's hostile attitude in Japanese waters is a demonstration of invincible power and paternal government, that must send a thrill of pride and satisfaction through the nerves of every loyal Englishman. The signal of retribution, hoisted at the peak of the flag ship of the gallant squadron in Yedo Bay, proclaims to the subtle rulers of that semi-barbarous nation that British citizens and soldiers cannot be insulted or injured with impunity, and woe betide those who shed innocent blood."

HANKOW.

Business was so dull that several steamers had left for Shanghai without any cargo. Rebels who were lately in this vicinity seem to have withdrawn themselves, and native traders are resuming their ordinary pursuits.

It is affirmed that the rebel force in the vicinity owes its existence to the unbearable exactions of the Chinese mandarins These rebels, or rioters, have endangered much foreign property, and occasioned the departure of many well-to-do inhabitants.

Much trouble had been occasioned by Shanghai houses forgetting to send what is called "Indemnity Certificates" for duties paid. This fault was attributed to the Shanghai. Customs, the regulations of which are so often changed that the clerks in the Customs cannot keep up to the changes themselves. Wherever the fault lies, there is no doubt that many vessels at Hankow have had to pay double duty for want of those documents. It was believed by some that the extra duty charged will be recovered, but this had not yet been the case, nor was there much ground for hoping that the sums thus pocketed would be disgorged.

From the anxiety of foreign residents to complete their dwellings and warehouses, the price of bricks had risen from nine cash a-piece to fifteen cash. The great brick fields are about five miles up the river. The Taoutai requiring bricks to build Custom-houses had appropriated all the bricks, paying all the poor makers only nine cash a-piece. The boats, too, which were sent for brick carrying were seized, and handed over to the braves. This, of course, put an effectual stop to the supply.

Two cases arising out of Custom-house transactions have excited some attention. A merchant having occasion to apply for a transit certificate for forty bales of shirting to Siang-Tan, which, according to treaty, the Customs are bound to grant, he was told that the application must be made through H.B.M. Consul. Having made the application through H.B.M. Consul, he received a letter from the Consulate stating that that functionary did "not recognise the Taoutai's regulations, and that the papers ought to be issued to persons upon their own application to the Customs, and that the Tariff rules do not impose on us this part of the Customs' work." As speed was of the utmost importance, the shirtings were sent up the river without a transit certificate. The writer was ultimately informed that the Taoutai had resolved to dispense with the consular application now with regard to imports—a result attributable to the judicious firmness of the Consul, thus preventing the Taoutai from breaking the treaty. In the other case, the comprador of one of the leading firms sent some boats laden with copper cash into the country to buy tea, the boats flying the flags of the firm. All dues on the route had so far been paid, when at one Custom-house the boats were stopped for flying the distinguishing flag.

The representative of the foreign firm wished, for the benefit of his comprador, some explanation of the matter; but the Commissioner of Customs refused this as it was a matter between a Chinaman and his own authorities, but hinted that a fine paid by the Chinaman would set the matter right. Accordingly the Chinaman paid not a fine into the bank, but a "sumshaw" to the Taoutai himself—amount not known—very likely two shoes of Sycee. This case cannot come under the cognisance of Sir F. Bruce, but if the matter was known at Peking, the dishonest Taoutai would hear about it.

KIUKIANG.

The departure of the rebels had again allowed the native trade, so long in check by their incursions and attacks, to be resumed.

NINGPO.

Matters were in an unsatisfactory state at this port. Lawless characters of all nations are said to pursue a course of depredation in the neighbouring country and up the river.

Trade was flagging. The Manilla men whom the Imperialists hired and with whom the French quarrelled over loot, appear to have broken loose again, and have robbed some of the boats which were returning from the country with treasure, being the proceeds of rice. This circumstance had naturally checked the market for that article at Ningpo, where unfortunately the stock was large and heavy supplies known to be on the way.

AMOY.

A rumour existed here that the American ship *Ringleader*, which left Hong Kong for San Francisco with a large number of Chinese emigrants on board, had been lost on the Island of Formosa. The rumour was from Chinese sources, and required to be authenticated.

A letter from Amoy says:—We are so far progressing in civilisation here (at Amoy) as to have three new importations of late, viz., a Church of England clergyman, a printing press, a soda-watar manufactory—nay, a fourth, "an hotel and billiard room," even a fifth, a club, "Amoy Club," with reading-room, billiard-room, bowling-alley (and going to have) tennis-court, all on Kulangsen Island. Again, a sixth, "a photographic establishment."

SWATOW.

The question of a site for the Consulate had been made to take a different turn, that of Kailut having been abandoned. This result is said to be a lucrative one to a private individual. The change would possibly be the subject of inquiry.

HONG KONG.

An article had appeared in the local journals drawing attention to the French Cathedral at Canton, and to the future prospects of French influence and French Catholicism in China. It was offered for consideration whether the great interests of commerce were not valuably advanced by the enterprise of individuals who sought for and found important markets at places not open to trade by treaty, which the Chinese Government, acting by the advice of their foreign employés, specially found it for their interest to throw open to foreign commerce. This step, in the case of Keelung and Takao, in Formosa, leads to the hope that, without the aid of treaties or diplomacy, the entire sea-coast of China may gradually be opened to trade, to the decided advantage of native and foreign mercantile interests. A letter from "An English merchant" had appeared, in which the writer addressed himself to the general question raised by the publication of Mr. Lay's memorandum. It was stated that Mr. Lay's "examples" of Customs' evasions were soon to be submitted to scrutiny, and were likely in many examined cases to assume a different colour from that imparted to them by Mr. Lay. The Supreme Court continued its sittings. The Ice ship *Hamlet* had arrived with the dead body of the captain on board; he had been stabbed by a refractory seaman while assisting the mate to put him in irons.

The prisoners Driscles, Bailey, and Hardy, who had been previously placed at the bar of the Supreme Court on the grave charge of murder, but had been acquitted, were again brought up and charged with piracy; they pleaded guilty, and were sentenced to four years' imprisonment. A new gaol ordinance had been introduced in the Legislative Council, and carefully discussed by the members. A Bill for regulating the charges and conduct of chair coolies was likewise under consideration. The appointment of Mr. Charles Ryall to be Acting-Superintendent of Victoria Gaol had been duly notified.

The murderers of the chief officer of the ship *Beatrice*—a murder committed in February last on the high seas, were on trial, and some terrible facts were elicited; one of the men was found guilty, but strongly recommended to mercy on account of the gross mismanagement and neglect with which the ship's officers were chargeable, and which had led, in a great measure, if not entirely, to the sad occurrences which had taken place.

CANTON.

The latest accounts of the body of troops who left Canton some time ago under command of the Provincial Judge, for the purpose of chastising the Hakka insurgents at Kwanghai, were that insurgents still continued in possesion of the city, and had not been attacked by the Imperial force sent against them. These troops had been previously well practised in artillery.

The Prussian Consul had issued the following official notification:—

After due ratification of the Treaty, which Prussia concluded at Tientsin, on the 2nd September, 1861, with the Empire of China for herself and all the other German States, it becomes necessary, under the exterritoriality clause, that all Germans, residing in China, and claiming protection under the Treaty in question, be duly registered at their respective Consulates.—Notice is therefore given, that all Germans residing in the Circuit of Canton (except subjects of the Hanseatic towns, who, according to a separate article in the Treaty in question, depend on their own Consulate) have to present themselves at this Consulate with their passports and other papers, for due registry on or before the 15th of June next, otherwise they will be excluded from the benefit the Treaty warrants them.

R. VON CARLOWITZ,
His Prussian Majesty's Consul.

1m. Canton, 15th May, 1863.

MACAO.

This place was resuming its importance as a summer residence for the foreign residents of the colony.

Digitized by Google

Great excitement had been created by an act of the authorities, alleged to be an infringement of individual rights. His Excellency Major Bernardino de Senna Fernandez, Commandant of Police (our Brigandino), without warrant, process, or authority, arrested a Portuguese subject, and without caring to ascertain whether he was guilty or innocent, or without affording him the opportunity of obtaining bail, incarcerated him under circumstances involving both cruelty and indignity. The act was appealed against, but the authorities sustained it. A petition, numerously signed, was thereupon presented to the local Government, and has been referred to Lisbon. Its reception there will test the point as to whether the corruption which is known to exist in high places in that capital is sufficiently potent to stifle the voice of liberty at a distance.

COCHIN CHINA.

SAIGON.

From the circular of Messrs. Behre and Co. of the 23rd May, it appears that trade is steadily increasing. Prices of rice have advanced, chiefly owing to the continuance of scanty supplies arriving from the interior, where stocks are said to be held for higher prices. We quote to-day: $2 per picul, at which rate considerable quantities are in the market ready for immediate delivery. Gold Leaf: Market bare, we quote: Onsing $23.50 to 24; and Saesing, $24.50 to 25 per tael. Exchange: Dollars scarce, and Zinkcash eagerly changed at 3,420 to 3,480 cash per Mexican dollar. The Commissariat is drawing thirty days' sight Bills on the Treasury of Paris at frs. 6.20 per Mexican dollar. Freights: French *Emmanuel*, 7,000 piculs capacity, was taken at $3,700 in full, thence to Amoy with twenty-five days for loading and discharging. French *Salazes*, 9,000 piculs, and *Duc de Malakoff*, 11,000 to 12,000 piculs, are open for charter, but refuse current rates to Shanghai. *Confiance* is under Government charter, from Shanghai and back with timber.

JAVA.

BATAVIA.

The news from Java is unimportant.

The Governor-General on May 20th set out on a tour through Middle Java. A new expedition was in preparation against Nias.

MALACCA STRAITS.

SINGAPORE.

A meeting of the Chamber of Commerce had been held, and a committee had conferred with the Government on the subject of stamp duties on foreign bills of Exchange. His Excellency stated he was prepared to afford his support to any application for a modification of the Stamp Act, with the view of its better adaptation to the local currency. The Governor had been requested by the Chamber to use his influence in favour of the adoption of a dollar coinage for the Straits Settlement. The Governor, in his reply, explained that the decision of the Supreme Government in the matter merely applies to the relative value of the dollar as fixed with regard to the currency of England, and other European and Asiatic countries, and not as respects the rupee currency of India; the value of that currency itself must be subject to change according to the fluctuations of the money market, and the same objection would equally apply to a dollar currency, were it introduced.

A boat which Messrs. Paterson, Simons and Co. had sent to Kwantan in Pahang, for the purpose of trying to recover some of their property there, had been fired at from the shore during the night time, although the boat on her arrival the previous afternoon had been flying the British flag. The Government was about to investigate the affair.

The Chamber of Commerce had addressed a letter to the Government suggesting the great advantage to British commerce in these seas were occasional visits made by men-of-war to the ports on the coast of Sumatra and other native States with which Singapore held commercial intercourse.

Attention had been called to the desirability of the Netherland Government giving sufficient guarantees that in bringing the ports on the East Coast of Sumatra under its direct control, it will not interfere in any way to restrict the intercourse of British subjects with these ports, or of the natives of these ports with the British settlements; that the existing rates of duties will not be altered with a view of making them more heavy on British commerce; and that no monopoly or forced delivery of the pepper or other produce will be established; we have no doubt all objections to its proceedings will be withdrawn. If the Netherland Government was prepared to do this, it was hoped the British Government would take effectual means for supporting the rights of its subjects which are now threatened with such serious injury.

Her Majesty's Straits steamer *Pluto*, Captain Eales, sailed for Malacca and Penang at noon, on the 3rd June, conveying his Honour the Governor of the Straits Settlements. The usual salute was fired from Fort Fullerton.

PENANG.

The *Penang Argus* gives an abstract of the Board of Trade returns for the past year. The entire trade of the island may be put down at five million sterling. A fresh valuation of rateable property had been made. A more perfect drainage of extensive tracts of land in different parts of the province was taking place and new roads indispensably required were being formed.

CEYLON.

The following is from the *Colombo Observer:*—"Our planting reports afford a fair idea of the weather in the interior, generally, and its effect on the coming coffee crop. The prospects of this are, on the whole, considered to be such as to warrant the expectation of a fair average out-turn; but, while on low-lying estates the appearances are fully as good as were those of the past season, there is little doubt that the very rainy and unseasonable weather experienced during April and May has proved so highly detrimental, that a great deficiency may be looked for on estates situated at a higher elevation, and in the more exposed districts. In Maturatta, in Hewahette, and in some parts of Kaduganava, however, we learn that the coffee-bushes have never shown a better appearance as regards crop. Again, we have a large start in the exports of our staple for this season. Some 41,000 cwts. of both kinds, cleared within the fortnight, making up a total of 594,273 cwts. exported to June 15, is certainly satisfactory; being almost 100,000 in advance of what was shipped to the same date in 1860, the year of our largest crop yet, viz., 635,062 cwts. Calculating that we may continue sending forward to the end of this season (October 10), at the rate of 40,000 cwts. per month —which we are inclined to think a high estimate—our total out-turn would then be, for the season 1862-63, between 740,000 and 750,000 cwts."

The French company appears to be stealing a march on the Peninsular and Oriental Company. Their last steamer from China brought over forty passengers, while the P. and O. steamer only brought thirteen. We hear from Galle that the passengers generally speak well of the victualling of the Messageries' ships (although the provisions on board the *Alphee* were not approved of, it is said, by the passengers), and as the officers get accustomed to their passengers, the inconveniences which have been complained of will be remedied. We are told that one of the seamen of the *Erymanthe* fell overboard the night that steamer sighted Galle, and the promptitude with which he was rescued, though the ship was going her ten knots an hour at the time, was admired by all on board. Rumour says that the P. and O. Company are about to lower their fares. For the sake of those journeying home, we hope the rumour is correct; and as the *Nemesis* lately went to Suez almost empty, and the last steamer was but ill-supplied with passengers, we should not think such a course unlikely. The regularity with which the French steamers arrive and depart is remarkable, and we hope that the arrangements will soon be perfected which will secure the forwarding a "regular mail" from England by them.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

FRANKS—On the 12th inst., Upper Norwood, the wife of Walter James Franks, of a daughter.

GRAY—On the 9th inst., at Helensburgh, Mrs. Sam Gray, of a son, stillborn.

GRAHAM—On the 15th of June, at Kandy, the wife of Mr. A. A. Graham, of a son.

IEVERS—On the 9th of June, at Colombo, the wife of H. R. Ievers, Esq., R.A., of a son.

MURROW—On the 17th May, at Hong Kong, the wife of Y. J. Murrow, of a son.

MACLEOD—On the 10th inst., at Park-crescent, Worthing, Sussex, the wife of Malcolm Anderson Macleod, Esq., of Hong Kong, of a daughter.

PUSTAU—On the 3rd inst., at Palmaille Altona, near Hamburg, Mrs. Wm. Pustau, of a son.

PARK—On the 8th of June, at Colombo, the wife of H. C. Park, Esq., C.C.S., of a daughter.

SAMUELS—On the 5th inst., at The Park, Didsbury, near Manchester, the wife of William Samuels, Esq., of a daughter.

UNDERDOWN—On the 1st inst., at Kersall, Manchester, the wife of R. G. Underdown, Esq., of a daughter.

MARRIAGES.

BOURBUCHAKI—PATERSON.—On the 25th ult., at St. George's, Hanover-square, by the Rev. D. J. Paterson, of Chelford, Cheshire, brother of the bride, Monsieur Jean Nicolaides Bourbuchaki, Doctor to the Suez Canal Company, to Georgiana Frances, daughter of the late James Paterson, Esq., formerly of the Hon. E.I.C.S.

Digitized by Google

NEWMAN—ELLIOT—On the 1st inst., at St. Edmund's Church, Kingsbridge, by the Revs. T. H. R. Luney and W. Newman, Augustus Newman, M.A. and M.B. Oxon, M.R.C.S., L.S.A., and L.M. Eng, Dartmouth, to Margaret Elizabeth, second daughter of John Elliot, Esq., Tresillian, and granddaughter of the late John Lus. comb Luscombe, Esq., Combe Royal, Deputy-Lieutenant of the county of Devon.

ROWE—KELTY. On the 7th inst., at Christ Church, Tynemouth, Northumberland, by the Rev. R. Rudd, Captain G. H. Rowe, late of the barque Philippine, to Annie Maria, only daughter of the late Captain J. Kelty, of Tynemouth.

DEATHS.

ARMITAGE—On the 1st June, at East Delta, Pusilava, Ceylon, Mrs. J. E. Armitage, aged 36 years.

BARETTO—On the 10th May, at Shanghai, Joao Baretto, aged 58 years.

DENT—On the 8th inst, at the residence of her father, 14, Leinster-terrace, Hyde-park, Emily Jane Dent, relict of the late Captain W. Dent.

GRAY—On the 10th inst., at Helensburgh, Annie Scott, the wife of Sam Gray, Esq., late of the Oriental Bank.

GREGORY—At Agra, Brother Gregory, formerly the Director of the Christian Schools at Singapore.

MEESON—On the 28th April, at Hong Kong, by accidental drowning from H.M.S. Leopard, H. A. C. Meeson, R.N., of H.M.S. Furyalus, aged 17.

MITCHELL—On the 2nd May, at sea, on board the British ship Chrysolite, from Liverpool to Hong Kong, John Brown Mitchell, master of the said vessel. His body, preserved in spirits, was brought on to Hong Kong for interment.

PARKER—On the 3rd June, at Colombo, Adelaide Marie, the wife of W. Parker, in the 42nd year of her age.

POWER—On the 8th inst., at Blackheath, aged 50, Margaret Martha Power, the devoted and affectionate wife of Julius C. Power, of H.M.'s Civil Service, Hong Kong, and daughter of the late Capt. Bath, 78th Highlanders, deeply lamented by her sorrowing relations and friends.

PLUMP At Sindang Laya, near Batavia, Janet Elizabeth, only child of R. Plump, Esq. of Batavia, aged 5 months.

ROGERS—On the 22nd May, at the Government Civil Hospital, Hong Kong, Captain Rogers, late of the barque Patna.

SCOTT—On the 17th May, at the Central Police Station, Hong Kong, Joseph Scott, Governor of the Hong Kong gaol, aged 42 years.

TOMAS—On the 18th May, Henry Tomas, carpenter's mate, H.M.S. Leopard, drowned in Hong Kong harbour.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—Canton: Congous were neglected until after the arrival, on the 17th inst., of the London mails of 10th April with telegraphic news to the 17th idem, containing intelligence of the reduction of duty in tea. Then the trifling business reported below was transacted. In scented teas a fair business was transacted, Capers being a little easier, and Pekoes slightly dearer. For Canton Gunpowder there has been a good demand, and prices have advanced about 2 taels. The market for country greens has been cleared for shipment to the United States.

SHANGHAI.—In the absence of supplies from Hankow and Kiukiang, the market has remained very quiet, and the only settlement to report is of one small chop of Hohow at tls. 17 per picul. The continuous rains in the tea districts have very much delayed the picking of the new crop, and fears are entertained lest the quality should suffer. The new teas are not expected in Hankow before the 25th settlements and re-shipments for the fortnight 1,200 chests, making a total to date of 288,112 chests against 307,532 chests same time last year. Stock 1,500 chests Congou and 500 chests Flowery Pekoe.

GREEN.—Teamen finding they were unable to quit their stocks unless at a decline on previous rates submitted to a reduction of about two taels, and a very large business has been done in common country teas; the stocks are now considerably reduced and prices have closed rather firmer. Settlements and shipments for the fortnight 25,000½ chests making a total to date of 356,480 chests against 330,102½ chests same time last year. Stocks are estimated at 11,500½ chests.

FOO-CHOW-FOO.—The market for new Congous opened on the 22nd inst. 9,000 chests were immediately settled at 35 to 36 taels for inferior to good Sueykuts. It is clear that these settlements were accelerated by parties having telegraphic advices of the reduction of duty in England, for it is confidently stated that the same teas could have been bought a day or two previously at 2 to 3 taels lower. Only 5,000 chests are actually in Foochow, as the river has continued too high to allow of teas passing through the bridges. The arrivals at the upper bridges (ten miles away), and of which samples have been shown are 40,000 chests; but the teas from the upper Kaisow and Sinchune districts have not yet come down, so that it will be some days before the finest parcels of the season can be reported on. Judging from what has already arrived, the teas are generally very well flavoured, but slightly deficient in strength; they are also generally light in the hand. A great many of them are slightly "tarry" (as usual in wet seasons), but this will probably go off. The colour is very dull, owing to the cloudy damp weather which obtained in April. The leaf is wanting in "fatness," but would generally be handsome had it not been spoilt by hasty manufacture, which gives it a more mixed appearance than usual. The arrivals to date are:—Market teas, 28,700 chests; contract, 11,500; 40,200 chests Congou against 9,000 chests last year.

KEWKIANG.—Advices from this port state that the rebels who were disturbing the neighbouring districts have retired from the immediate vicinity of the Poyang-lake and the Moyune country; though they are still threatening Fychow, and in occupation of the district around the city of Taiping, situated lower down the river not tar from Nanking. The accounts which have reached Kew-kiang from the tea districts, report that the new crop is expected to be more abundant in yield than was the case last year; although the continuous heavy rains will have probably injured the quality to some extent, and rendered the production of fine teas smaller than the mild winter led the growers originally to anticipate. The recent hoar frosts are also said to have destroyed much young leaf. New leaf is expected to open nearly five taels above the price paid in the country last season; but as yet very little has been settled. Altogether, unless the recent expulsion of the rebels from the Pingsui districts leads to a large yield in that quarter, there is reason to expect that the crop for the season 1863-64 will be under the average. Black: One chop of common Ho-how has alone been on offer, and this is unsold. Green: No settlements are reported and no arrivals have taken place. 7,500 packages have gone forward on native account to increase the stock in Shanghai, and it is probable that the remainder of the small stock here of 7,000 packages will be gradually disposed of in the same manner. No quotations can therefore be given. The tea export this season to date is as follows:—55,275 chests black, 270,828 half-chests green, and 4,772 pls. leaf.

HANKOW.—The market is said to hence open high in the Oopack country. A few small musters had arrived down. Some teas were expected on the 25th inst. The weather had been very wet which had retarded the manipulation of the tea. The clipper *Challenger* is loading at Hankow for London.

RAW SILK.—Shanghai: There has again been a trifling business transacted during the fortnight, barely amounting to 300 bales, which have been settled without any alteration in prices, leaving but a small stock, the refuse of the season. We continue to receive favourable reports of the new crop from the interior, and it is expected that musters will be shown in this market before the departure of next mail. The dealers anticipate no difficulty in the transit, the rebels having arranged a duty with which they are satisfied. The arrivals from Japan have been considerable, say 700 bales, but future supplies will depend on the issue of our present political difficulties. The transactions of the fortnight are reported at 1,600 bales, against the same quantity both the corresponding fortnight of last season and that of the season before. The total settlements of the present season to date amount to 67,500 bales, against 72,000 bales corresponding period last season, and 82,000 bales the season before. The remaining stock at present is 200 to 300 bales, against 1,000 to 1,500 bales same time last year, and 3,000 to 4,000 bales the season before. The following are the latest nominal quotations:—Tsatlees, No. 1, 470 taels, No. 2, 450 taels, No. 3, 430 taels per picul; market, No. 3, 410 to 420 taels, No. 4, 390 to 400 taels, No. 5 and common, 360 to 375 taels per picul; Taysaams, No. 1, 400 to 410 taels, No. 2, 380 to 390 taels, No. 3, 350 to 360 taels, Nos. 4, 5, and common, 300 to 335 taels per picul. Large contracts of the new silk are reported at the following quotations:—No. 3, Tsakee, 390 to 440 taels; No. 1, Kahing Taysaum, 360 to 370 taels, No. 2, 330 to 340 taels, No. 3, 300 to 315 taels.

CANTON.—The market for new silk has not opened, and the quotations in the absence of stock are purely nominal.

YOKUHAMA.—The only business of any note transacted at Yokuhama during this unsettled state of affairs has been in silk. As things assumed a warlike aspect, the native merchants brought largely into market, and an active business was doing. For several weeks this continued steadily, with average quotations. Latterly, as war appeared imminent, prices fell rapidly; and, at last advices, there had been quite a panic amongst the dealers—supplies were suddenly stopped, while the market was cleared in two days. Since then up to the 12th instant, the quantity brought in was limited, which met with a ready sale at improved prices. About 2,700 bales have been settled for during the month, making a total of 24,800 bales for the season, against 9,500 bales last year at same date. In consequence of the variety of sales, no steady quotation of price can be given, but we may quote good parcels of Mybash at from $500 to $520, and Hatchoga at $365. The export to the 12th was—Shanghai, 15,333; London, 6,295; Hong Kong, 1,145; total 22,773 bales.

DRUGS, &c.—The following is the report on the Canton market:—Cassia Lignea: sales 100 piculs at $16, stock, 1,000 pls. Cassia Oil: no sale, no stock. Cassia Buds: a lot of 30 pls. is on the market, which may be had at $47½. Anisced: no sale, no stock. Rhubarb: a few pls. which were on the market have been bought up at $50. Gamboge: no stock. China Root can be had at $3.75 to 4.25. Galangal is quoted $4 to $4.40. Of Galls, 100 pls. are on the market, for which $18 are asked. Camphor.—Hong Kong: Sales are reported at $21. Supplies have lately arrived, and the stocks is estimated at 1,800 pls. The probable suspension of trade in Japan may affect the market.

COTTON.—Shanghai: There have been no shipments to England since the date of last advices, and stocks are small in native hands. The rate for good quality declined soon after the departure of the last mail to 12*d* to 12*d* 5*m*, but subsequent advices from England imparted a firmer tone to the market, and purchases have since been made for shipment both to Liverpool and New York at 12*d* 5*m* to 12*d* 8*m* for good quality. Four vessels have been laid on for Liverpool, so that it is probable some contracts have been made. The last quotation is $18.75 per bale of 120 catties.

CHINA IMPORTS.

HONG KONG.

COTTON YARN.—There has been somewhat more inquiry for this article in Hong Kong during the past fortnight, resulting in sales of 184 bales, at prices which show a slight advance upon previous quotations In Canton, where the value remains without change, forty-five bales have been purchased.

GREY SHIRTINGS have met with moderate request amongst the native dealers, the sales being estimated at 10,200 pieces. The demand for India and Singapore is still maintained, and about 33.000 pieces have been purchased for exportation on foreign account, prices showing some slight improvement. In Canton, the transactions have been limited to 700 pieces at previous rates.

WHITE SHIRTINGS have not recently met with so much inquiry, but prices continue very firm, and the stocks of these goods in first hands must be now becoming much reduced. The sales in Hong Kong are estimated at 1,500 pieces. Nothing doing in Canton.

T-CLOTHS.—The sales to the native dealers during the fortnight are estimated at about 4,000 pieces, and the value of these goods has advanced slightly. The demand on the part of foreign buyers has also fallen off, the settlements being estimated at 7,000 pieces, taken for export. About 2,500 pieces of damaged goods have been moved off by public sale.

METALS.—Iron, Flat, &c., continue dull of sale in this colony, with increasing stocks, and the only transactions reported consist of about 1,800 piculs. Nail Rod and Round Iron sold at the annexed quotation. In Canton, Square and Flat Bar have been taken to the extent of 1,300 piculs. Hoop has advanced 15 to 20 cents., at which 475 piculs have been sold. Wire also shows some improvement in value, but there are no transactions to notice. Lead has slightly improved in value in Canton, from whence sales of 900 piculs are reported. In this colony prices remain as before, with sales of 1,580 piculs. Tin has been in very moderate request, and settlements are confined to 90 slabs. Tin Plates: 305 boxes sold in Hong Kong, and 200 boxes placed in Canton, constitute the transactions of the past fortnight. Steel: There have not been any sales effected in Hong Kong, but in Canton 300 tubs have found purchasers.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cent and is divided into decimal parts of ten.

SHIPPING INTELLIGENCE.

ARRIVALS.

At JAPAN.—None.

At SHANGHAI.—May 9, Glen Aros, from London.

At HONG KONG.—May 13, Banian, from London; 18, Eastern Chief, from London; 20, Valdivia, from Liverpool; 21, Hamlet, from Boston; 22, Chrysolite, from London; 25, Melchers, from Hamburg; 25, Queen of the Age, from Sunderland; 26, Foh Kien, steamer, from New York; 28, Kelso, from London; 28, New Granada, from Cardiff.

At MANILA.—None.

At BANGKOK.—None.

At SINGAPORE.—May, 27, H. Puddemsey, from Liverpool; North Wind, from Cardiff; 31, Gazelle (Prussian brig).

At PENANG.—None.

DEPARTURES.

From JAPAN.—None.

From SHANGHAI.—May 7, Antipodes for London; 13, Castleton, for New York.

From FOO-CHOW.—None.

From AMOY.—None.

From HONG KONG.—May 13, Bahama (str.), for Foo-chow and London; 16, West Australian, for London; 20, Storm King, for Liverpool; 29, Alfred Ray, for Liverpool.

From CANTON.—None.

From MACAO.—None.

From MANILA.—May 20, Tricolor, for Liverpool; 20, Areta, for Liverpool.

From BANGKOK.—May 9, Pomone, for Bordeaux.

From CANTON.—May 17, Europa, for New York; Abeona, for Liverpool; Notos, for New York.

From SINGAPORE.—June 2, Ystroom, for Liverpool.

From PENANG.—May 11, Wandrahm, for New York; 30, Golconda, for London.

LOADING.

At JAPAN.—None.

At HANKOW.—For London: Challanger and str. Annette.

At SHANGHAI.—For London: None. For Liverpool: Ophir, Oxus, West Derby, Onangundy, Grenadier. For New York: Mary and Louisa. For Montreal: Dunnikier.

At FOO-CHOW.—For London: Flying Spur, Fiery Cross, Star of China, Min, Robin Hood, Falcon, Bahama (str.), Highflyer, Ellen Rodger, and City of Aberdeen. For Liverpool: Ziba.

At AMOY.—None.

At HONG KONG.—None.

At CANTON.—For London: Beatrice, and Jorgen Bruhn. For Liverpool: Jura, Flatworth, and Yuca. For United States: Panama and Candace.

At MACAO.—None.

At MANILA.—For London: G. General, John Banks, Carribeau, Thruvang. For Liverpool: Flora. For Cork: Duiveland. For Falmouth: Hermelin. For New York: Nabob.

At BANKOK.—None

At SINGAPORE.—For London: Ellenborough, Mountain Ash.

At PENANG.—For London: Benvenue. For United States: Snow Squall.

FREIGHTS AND CHARTERS.

SHANGHAI.

The following are the current rates of freight:—To London, favourite clippers, £6 and £7; other first-class ships, £4 and £4. 10s. Tea—for Liverpool, £4; cotton for Liverpool, £4. 10s. To New York, $17½, for tea; to Tien-tsin, 5 and 7 taels per ton, per steamer; to Newchwang, $4 per ton, and 25 cents per picul; to Hankow, 7 and 8 taels per ton, 4 *m* and 5 *m* per picul; to Foo-chow, $4 per ton, 15 cents per picul. To Amoy, cotton, 50 cents per bale—dead weight, 10 and 12½ cents per picul. To Hong Kong, $3 and $3.50 per ton measurement; cotton, 50 cents per bale measurement.

HONG KONG.

The following are some of the settlements of the fortnight:—

ENGLAND.—Jura (Brit. barque), 790 tons, for Liverpool; cotton at £4 per ton. Beatrice (Brit. barque), 417 tons, for London; cotton and tea, £4. Yuka (Brit. barque), 482 tons, for Liverpool; £4. Jorgen Bruhn (Danish-ship), for London; at £4. For UNITED STATES.—Panama (American ship), 1,139 tons, at Whampoa, for New York at $16 to 20 for tea, and $30 for silk. Antonia Terry (Peruvian ship), 965 tons Hong Kong, and for New York at £3. 2s. 6d. for hemp and sugar per ton of 40 feet instead of 80 as is usual. Queen of England (Brit. ship), 1,196 tons, for San Francisco, $24 per head, for passengers, and $7 per ton cargo.

MANILA.

The John Banks, for London, at £3. 15s. per ton for clayed sugar; the Thrudvany (Norwegian), at £4 per ton for unclayed sugar; and the Carribeau, at £3. 12s. 6d. per ton for clayed sugar; the Charlotte (Swedish), from Seral to Shanghai, with rice at 65 cents per picul; the Nabob (American), for New York, at $11 per four bales hemp.

SINGAPORE.

The Ellenborough, 1,200 tons, is loading for London, and has a full cargo engaged at £3. 5s. and £4. 10s. per ton. Rates of freight.—Tin, £3. 5s. per 20 cwt.; Sago in boxes, £4; Sago Flour, £4; Gambier in bales, £3. 5s.; Sugar, £4; Black Pepper, £4 per 16 cwt.; Coffee, £4 per 18 cwt.; Hides and Horns, £4 per 16 cwt.; Gutta Percha, £4 per 20 cwt. Measurement goods, £4. 10s. per 50 cubic feet.

BATAVIA.

To Hamburg or Bremen.—Rice, £3. 12s. 6d. per ton; light freight, £4. 2s. 6d.; Arrack, £4. 7s. 6d.; 5s. extra if to United Kingdom, Belgium, France, or Holland.

PASSED STRAITS OF SUNDA.

FROM ENGLAND AND CONTINENT TO CHINA, &c.—May 11, Philomela, London to Foo-chow; 16, Ocean Mail, London for Shanghai; 19, North Wind, Cardiff to Singapore; Bangkok Bordeaux, to Singapore; 20, Jubilee, London to Shanghai; 22, Thomas Dryden, Newcastle to Shanghai; Golden Fleece, London to Shanghai; Osborne, Cardiff to Shanghai; Uncowah, Shields to Hong Kong; Veronica, Liverpool to Hong Kong. From United States to China.—May 17, Contest, New York to Hong Kong; 22, Asa Eldridge, New York to Shanghai.—From China, &c., to England and Continent.—May 17, Cashay, Singapore to Falmouth; 18, Albuera, Foo-chow to London; 22, Truro, Shanghai to Liverpool.

COMMERCIAL POSTSCRIPT.

CITY, THURSDAY AFTERNOON.

According to a circular of Messrs. Arles-Dufour and Co., of Lyons, the result of the silk crop in Europe, which is now drawing to a close, is found to exhibit, with the exception only of Spain and Syria, a decided improvement in comparison with the last as regards quantity as well as the yield of cocoons. From the issue of next year's crop it will be ascertained whether this improvement may be ascribed to the decline of the disease or merely to exceptionally fine weather. Everywhere in France and Italy the price of cocoons has been moderate, enabling the throwsters to make contracts for raw silk at rates about ten per cent. below the corresponding period of last year. Contracts for thrown silk have been very limited, the stock of old silk being still rather heavy, and manufacturers being disposed to operate with the greatest caution so long as the American trade shall remain without recovery.

Still no improvement in the silk market. Perhaps there is rather more business doing, but at drooping prices. Much anxiety is felt for further news from Japan. Should war eventuate, prices no doubt would be firmer. Deliveries, 30th to 9th inclusive—China, 1,400; Japan, 447; total: 1,847 bales.

ARRIVALS NOT INCLUDED IN THE TABLE.—June 26, at New York from Shanghai, Lily; 10, at Deal from Colombo, Star of the Teign.

DEPARTURES.—July 6, from Off Dover for Batavia, Cornelia Hendrika; from Off Dungeness for Singapore and Shanghai, Sophie; from Cardiff for Hong Kong, Adriana Petronella; 8, from Liverpool for Manila, Jalawar; 7, from Waterford Passage for Shanghai, Jeddo (str.); 9, from Glasgow for Hong Kong, Bonanza.

SPOKEN.—Telegraph, Amsterdam to Batavia, July 4. 47 N., 9 W.; Wild Pigeon, New York to Shanghai, May 5, 21 N., 28 W.; Spring (?) London to China, May 29, 3 S., 24 W.; Queen of Commerce, Liverpool to Colombo, June 24, 44 N., 12 W.

LAID ON.—At London, for Hong Kong and Canton, Her Majesty; at Glasgow, for Batavia, Samarang, and Sourabaya, Lucie; for Manila, Perfecta; for Singapore and Penang, Scotland.

THE DESTITUTE FAMILY OF CAPTAIN CARTER, LOST AT FORMOSA.—Our readers in China will no doubt be glad to contribute to the relief of the late Captain Carter's family, who was lost in the *Martha and Emily*, on the coast of Formosa. Captain Carter, who was known to residents at the Cape, took command of the ill-fated ship in 1858. He became part owner, and all his savings were invested in the ship and cargo, therefore the same calamity that deprived him of life, robbed him of his property. At the date of his death he was forty-three years old; a widower with three children, having lost his wife in 1861. These children are left entirely destitute, having no relatives capable of maintaining them. Captain Carter spent twenty-eight years in the merchant service, and was much respected in the ship-owning world. In September, 1852, when in command of the brig *Equator*, he went to the aid of the barque *Titania* when in distress and saved the crew. In acknowledgment of this service he received a silver salver from the owners, Messrs. Collart, of Liverpool. In 1854, by great skill and courage, he brought the *Flying Dragon* safe ashore with the greater part of her cargo, she having caught fire 800 miles out at sea. His children, aged respectively eleven, nine, and six years, are now thrown on the world, both parents being dead. An aunt, who has no means of her own, now takes care of them. Nominations to schools or aid in money would be thankfully received by the Rev. G. Blunt, rector of Chelsea. Donations will also be received by Messrs. Biddulph, Cocks and Co., bankers, 43, Charing-cross; Messrs. Anderson, Saxon and Co., Capetown; and by the Agra Bank at Hong Kong and Shanghai.

THE CHINA CONTRIBUTION TO THE LIFE-BOAT SERVICE.—At a meeting of the National Life-Boat Institution, a letter was read from Messrs. Gilman and Co., of Hong Kong, of the 31st Dec., forwarding a bill for £251. 15s., being amounts collected at Hong Kong and Shanghai for the National Life-Boat Institution by W. H. Harton, Esq., a member of the committee of management of this society, during his temporary sojourn in China. He was assisted by Messrs. Gilman and Co. and other firms. The committee passed a vote of thanks to the donors. The committee also decided that a new life-boat be built with the amount—that she be called *The China*, and that the boat be stationed at Teignmouth.

POSTAGE BY THE FRENCH MAIL TO INDIA AND CHINA.—It has been announced by the Post-office authorities that, from and after the 1st August next, correspondence by the French Mail Packets from Marseilles will be forwarded at the rate of 10d. per half-ounce to ports in India and Ceylon, and 1s. 4d. to Singapore, China, and other ports of the Far East.

Mr. R. SWINHOE has communicated to the Ethnological Society a synopsis of the birds of China, to which was added a comparative table of the species met with in China, Amoorland, Japan and Formosa, principally deduced from his own observations.

WE regret to announce that Sir George Bonham, late Governor of Hong Kong, is seriously ill.

THE TRADE WITH JAPAN.

The following tables of trade with Japan appeared in *The Times*, forwarded by Messrs. S. A. Cramer and Co., of this city:—

Return showing the amount of trade carried on by Nationalities at the Port of Kanagawa during the year ending the 31st of Dec., 1862:—

IMPORTS.

In 121 vessels—

By British merchants (including two German firms)	$1,575,734
By French merchants (including one German firm)	20,783
By American merchants	122.836
By Dutch merchants (including two German firms)	857,577
Total	$2,576,930
	At 4s. 2d., £536,860

EXPORTS.

By British merchants	$4.707,384
By French merchants	337,271
By American merchants	314.627
By Dutch merchants	945,846
Total	$6,305,128
	At 4s. 2d., £1,313,568

Table giving a comparative view of the import trade at the Port of Kanagawa during the three years from the 1st of January, 1860, to the 31st of Dec., 1862:—

EARL GREY AND MR. MOSS.

Earl GREY said that since the discussion on our relations with Japan he had received a letter from Mr. Moss, the gentleman who was accused of having shot a policeman in that country, enclosing a pamphlet and a statement of the case, which entirely exculpated him, and showed that he was very much ill-used. He could only say that he took the statement which he made from the work of Sir R. Alcock, and he was not aware that it had ever been contradicted. He could, of course, give no opinion as to which statement was the more correct. Mr. Moss stated that a most unprovoked attack was made upon him by a party of armed men, and that the gun had been for some time out of his hands before it went off. He also complained of a grievous denial of justice on the part of Sir R. Alcock.

Earl Russell said that the fact was that Mr. Moss complained very much that Sir R. Alcock was too favourable to the Japanese.

THE LORDS' DEBATE ON CHINA.

(THE TIMES.)

The chief part, and, we may add, the more important part, of this debate was of much more general application than to the matter of chastising an assassin chief and exacting reparation for some of the victims. Lord Carnarvon and Lord Grey assert that the hands of England are not clean in this matter, and that if we have suffered wrong that wrong has not been without provocation on our part. Lord Carnarvon relates the intolerable misconduct of certain persons who, to the disgrace of some wealthy commercial houses, were sent to represent them when the country was first opened. It was suddenly discovered that in the currency of Japan gold bore a much lower value in relation to silver than in Europe. The greedy and brutal adventurers who found themselves in the newly opened country no sooner learnt this than they bought up all the gold they could obtain, and, in language which was often too filthy to repeat, made the most impudent demands upon the Japanese officials for fabulous amounts of gold at the same rate. Of ccurse the Japanese found that they had been cheated, and their officials saw that they were being grossly insulted. Sir Rutherford Alcock complained of this scandal at the time, and we brought the matter before the public. Nothing, however, was done, and Sir Rutherford Alcock was found by the Japanese to be as powerless over these British Daimios as the Tycoon is said to be over the Japanese Daimios. Soon after this a very flagrant act of insolent violence occurred, which still more strongly illustrated the impotence of English Plenipotentiaries and Consuls over their own Daimios. There is a portion of the domain of the Tycoon to which access is forbidden, and where the birds have a sort of sacred character. An English merchant went forth to shoot in this forbidden spot, and, having shot a wild fowl, was bringing it away. A Japanese policeman interfered and stopped the sportsman's native servant; the European interfered, cocked his gun, and threatened to shoot the policeman. He did shoot the policeman, whether deliberately or in the scuffle is not fully ascertained, and the man was grievously wounded. The sequel is, however, the most instructive part of this matter. Sir R. Alcock sentenced this man to three months' imprisonment, and to banishment from Japan; but he appealed to the Supreme Court at Hong Kong, and not only got his sentence annulled, but actually recovered damages against Sir Rutherford Alcock. Well may Lord Grey, commenting upon this case, say "You have no right to protect British subjects unless you at the same time control them." Lord Grey's proposed remedy is to give up the ex-territorial stipulation, and make British subjects amenable to Japanese Courts. To introduce the system of "Happy Despatch" into a British community is not a seductive proposition. A much simpler plan would be to strengthen the powers of the Consular Courts and to abolish the jurisdiction of the Supreme Court of Hong Kong, except within the island of Hong Kong, and as to such cases as may be remitted to it by the Consuls.

The Supreme Court of Hong Kong is the greatest nuisance in the East. Any Consul or Custom-house officer who dares to take any measure against any of "the scum of Europe" found running goods, or levying blackmail, or shooting natives in China or Japan is immediately sued in the Supreme Court. The Consul or official is there tried by the very class which it is his duty to keep in order. The result is uniform. As in the case of Sir R. Alcock, the judge is always mulcted in damages and the

Digitized by Google

criminal is let loose. The verdicts given in that Hong Kong Supreme Court have sometimes been so whimsically unjust that they are fitter for a jest-book than a grave discussion. So long as such a jurisdiction exists we have no right to talk either to the Chinese or Japanese of civilisation or courts of equal justice. If, however, we were to confine the jurisdiction of the Hong Kong Court as we have suggested, and if we gave an appeal direct from the Consular Courts to the Privy Council, we do not think we should be driven to Lord Grey's extreme remedy, or that we need have recourse to the Chinese or the Japanese criminal code.

The English public will be glad to see a generous but not a truckling policy pursued towards this weak Japanese Government. There certainly is no desire here at home to push the *Civis Romanus* principle to the extent of protecting every rowdy adventurer in his fraud and violence; nor to spend ten or twelve millions in repressing a feeling of national hatred which he, and men like him, have engendered in the minds of a half savage race. After this exposition in the House of Lords the Home Government must be held responsible for the offences of the English adventurers in China and Japan, for it is shown that the most simple and natural means of repression and punishment are not provided. It must, however, not be forgotten that the assassinations of which we now complain were committed long after these provocations, and upon persons who had no connexion with them and against whom no complaint could be made. The circumstances dwelt upon by Lord Carnarvon and Lord Grey should make us ashamed of the past and more careful for the future, but they need not make us renounce our treaty rights, or hinder us from pursuing with swift vengeance the assassins of our guiltless fellow-countrymen.

THE DEBATES ON CHINA.

(THE TIMES.)

Many have been the Chinese debates in the British Parliament, and many more may we foresee in the years that are to come, each resembling that which has gone before it in the scope of its arguments. "Justice," "humanity" "economy," one party will exclaim, as they urge a rigid abstinence from all political intermeddling; "necessity" the other will answer, as they proceed to show that without arms in our hands, and the will to use them, we can neither trade, nor travel, nor even live within the borders of the Chinese Empire. When the evil time shall pass away none can dare to predict, but at present it seems as if weakness and anarchy and the call for European interference were not likely soon to cease out of the land. The hour of doom has sounded for the old fabric of Chinese Government and society. The cloud which in the early days of this generation began to form has become blacker, until now it covers with a thick darkness that ancient civilisation. Weakness begets violence, violence provokes the enmity of foreigners, whose chastisements in turn tend to raise up rebels and pretenders against the humiliated Government. The blows struck by England twenty years ago, by breaking the spell of Imperial invincibility, had not a little to do with the rise of the Taipings, who since 1850 have been constantly busy at their work of destruction in the Empire. The natural insolence and cruelty of the Chinese nature, increased by civil wars, has broken out again and again within the last few years, leading to fresh hostilities with the Christian nations, and further weakening the influence of a Government already beset by a gigantic rebellion. Our own opinion is that these arguments, whether philosophical, or economical, or political, in favour of doing nothing and of seeing a vast wealth-producing region ruined by marauding savages, are founded in error. As to Captain Sherard Osborn and his companions, we are not under the necessity of defending them. It has always been held that foreigners may enter the service of a legitimate Government, and, leaving aside the question whether periodical Chinese revolutions are necessary, there is no service more praiseworthy than that of protecting the most flourishing cities of Eastern Asia and the banks of its greatest rivers from the attacks of insurgent armies which destroy wherever they come. The British Government, however, is quite independent of these officers, and not responsible for their acts, although it has authorised them to enter the service of a friendly State. All that this country is doing now is to carry out honourably and cordially the principles on which the last reconciliation with China was effected. We have been placed by the Chinese Government—thanks to the courage of our soldiers and sailors—in the same position that Russia so long occupied alone. We have a Minister at Peking, we have the opportunity of representing our views and wishes, and it is stated that the Chinese Ruler is ready to attend to our advice. It may be that it is impossible to prevent the decay of Chinese society, but still it is possible, and for the benefit of both native and European, that peace and order should prevail, and that the industry of the people should resume its wonted course. The Government of Peking asks our assistance in effecting this; and those who know the country think that much may be done by the support of a Power like England, and the use of a small naval force. Considering the magnitude of the British interests involved, it is impossible, as it seems to us, for the Government to hesitate Unbounded resources, untold wealth, exist in a region traversed by bands of robbers, to whom the brigands of Naples are saintly and gentle. To those regions we are freely admitted by treaty, and only the state of the country prevents our reaping the full advantages of former exertions. We are now called upon to guide the destinies of that mighty population, and, in conjunction with other European nations, to take care that the collapse of its ancient systems may do as little harm as possible to them and to us.

(DAILY NEWS.)

The revolution in our policy which has unhappily taken place during the short space of three years may be explained in a few words. At the close of the last Chinese war, in the autumn of 1860, our policy was formally decided to be one of strict neutrality and non-intervention. A civil war distracted the Empire, but we had nothing to do with the struggle, and wisely decided not to interfere in any shape. The domestic politics and internal conflicts of the country were no concern of ours. We were there simply as traders, and so long as our commerce was not interrupted or our trade stipulations violated we had no ground of complaint against either party in the civil conflict. We traded with both, and both were equally anxious to keep up a good understanding with us. Two of the most important silk and tea districts were in the hands of the Taipings, but our imports from those districts, instead of diminishing, largely increased every year. Shanghai was in the possession of the Imperialists, and Ningpo in the hands of their opponents; but our trade with both parties went on without interruption or disturbance. Our position now is completely changed. We have openly abandoned the policy of neutrality, and taken part in the most active and decided manner with the Imperialists. The proofs of this were rapidly multiplied during the last year, and are now sufficiently abundant, in fact altogether overwhelming. We attacked the Taipings at Ningpo without provocation, and drove them out of the place at the point of the sword, without even a decent pretext for interference. The handing over of this port to the Imperialists inaugurated a policy of aggressive intervention that has since been actively pursued. We have organised a considerable military and naval force intended to co-operate with the Imperialists against the Taipings, and these forces have already been actively engaged in this hostile service. On land there is the Anglo-Chinese Contingent, commanded by British officers, and at sea the Anglo-Chinese fleet under the command of Captain Sherard Osborn; and these combined forces are, it is said, to be speedily employed in a much larger enterprise than any yet attempted. They are to be directed against the city of Nanking, the stronghold and head quarters of the Taipings. We are intervening, however, not only as allies of the Imperialists in the civil conflict which divides the country, but as a department of the executive in the government of the Empire. Mr. Lay is inspector-general of Chinese customs, and a revenue amounting to nearly four millions is collected at the Chinese ports by foreign functionaries superintended by a British inspector. In other words, we are gradually taking an active part in the civil and military affairs of the Chinese Empire, assuming as it were unconsciously most serious responsibility in connection with its wars and government, instituting in fact a British protectorate over the population of that vast territory. The course we have recently embarked in is one where success or failure would be about equally disastrous. Our true wisdom is to return as speedily as possible to our position as traders, and resume our old policy of neutrality and non-intervention.

THE LAY-OSBORN REIGN.

(ECONOMIST.)

The following, which appeared on the 20th June, was omitted for want of space in our last issue:—

The principle to be laid down appears to us evident and simple. All action should be the action of individuals: the Government as Government, the nation as nation, should abstain from all interference and participation as completely and as long as possible. As a rule, Englishmen succeed and manage well: as a rule, the English Government usually blunders and often fails. The reason is plain enough:—individuals undertake enterprises and enter on careers because their hearts are in the cause or because they feel some special aptitude or calling for the work; when the Government acts, on the contrary it looks out for agents, and partly from the inveterate habits and partly from the incurable necessities of a Parliamentary system, it selects and nominates these agents, not for their peculiar fitness for the place, but from altogether domestic and irrelevant considerations. Persons of influence and connection who want employment and salary, persons who are wanted out of the way, persons who have a claim from past real or fancied services, are chosen and sent out to do work for which special qualifications are required and for which yet they have no special qualifications whatever. They blunder, they fail—and the nation has to rectify the failures, to endorse the mistakes, and to bear the discredit and the cost of both. But if individuals like Rajah Brooke, or Mr. Lay, or Capt. Sherard Osborn, or others that might be named, choose to go out on their own account, and to place their organising and governing capacity at the service of Oriental people, either as recognised *employes* of the Government, or as private adventurers, keeping within the legitimate bounds of morality and justice, we would allow them to do so without let or hindrance; establishing at the same time the strict rule that, while giving them every moral sustainment and encouragement so long as their enterprises and functions are worthy and beneficent, our Government entirely declines to interfere for their protection against the laws of the country in which they may settle, or the decrees and proceedings of the Government with which they may have taken service. If Sir James Brooke had been murdered by the Dyaks, there would have been no call on the English authorities to demand punishment or indemnity. If the Chinese Government should find or should believe Mr. Lay to be guilty of peculation, and Capt. Osborn to be corrupt or treacherous, and should direct their decapitation, we *ought not* to interfere with the course of justice, or what the Chinese Government they serve deem to be such. Nor, we apprehend, should we think of interfering, had not the case been complicated by the sort of governmental or national participation in the enterprise of these gentlemen which the order in Council authorising their proceedings appears to indicate and imply.

Such appears to us the clear principle which should guide and control English intervention in the internal affairs and the practical administration of Asiatic countries. Government *qua* Government—Great Britain *qua* Great Britain—should in no way participate, direct, sanction, or be mixed up in it. The real difficulty will be in persuading the nation to act up to this rule in all instances. This difficulty will arise from three causes. The first is the invariable disposition of Englishmen to lay all their acquisitions, whether of territory or of influence, at the feet of their country. When Brooke becomes supreme Ruler of Sarawak, instead of glorifying himself with the notion of independent sovereignty, he immediately wishes to become the mere Governor of a British settlement. When Osborn and Lay have rehabilitated the navy and finances of China, they will think only of how far their high position may be made conducive to English interests and English reputation. England is thus constantly tempted by her loyal and patriotic sons. The second cause is this: that if any flagrant act of cruelty or injustice were to be perpetrated by the Oriental Government against the English officials who had served it,—if they were brutally punished though clearly innocent, or treacherously and in breach of engagements dismissed or made away with by some new Ministry which was jealous of their influence, or which fancied that the country had got enough out of them, and might safely indulge in the proverbial ingratitude of Eastern Potentates,—then it would be by no means

Digitized by Google

easy for our rulers to resist the clamour which would arise both among the people and in Parliament for vengeance against the Government which had *treated Englishmen ill*. The third difficulty is of a different sort. As long as the Foreign Enlistment Act, with more or less distinctness and more or less comprehensiveness, forbids Englishmen "to enlist or engage in the service of any Foreign Power without leave first had and obtained from Her Majesty,"—the granting of this leave (which has thus become a necessary proceeding) is a distinct and virtual governmental sanction of the enterprise, and will be held and felt to imply certain obligations of protection,—the very point we desire to avoid.

This is one of the greatest objections to the Order in Council just published. It rescinds a *general* prohibition in favour of a particular Power and in reference to specified individuals; and it is therefore difficult to argue that the enterprise both with reference to China and to Messrs. Lay and Osborn has not assumed something of a national and governmental character, and does not involve certain indefinite and inferential obligations. The other objection to the Order in Council—namely, the permission to officers actually belonging to our own army and navy to take service with the Emperor of China and fight *his* pirates and *his* rebels—appears graver still.

THE POSITION IN JAPAN.

(THE TIMES.)

What are we to do with Japan? We never produced any effect upon the Chinese Empire until we captured Canton and went to Peking. So long as we only killed multitudes of the Chinese people and destroyed the cities on their coasts, we obtained nothing but treaties that were never intended to be observed, and concessions that were withdrawn so soon as our ships were out of sight. Asiatic despots are not much moved by misfortunes which fall only upon distant provinces; but when at last we reached the rulers the whole aspect of the contest changed. The great moral Wall of China has now ceased to exist. The Tartar Government have become our best friends. They look to us and to our commerce as their surest source of revenue. They are guided by our counsels, and they trust in us to restore peace and security to the Empire. We are, with their full favour and concurrence, spreading ourselves throughout their mighty country, raising vast marts of European commerce in places which six years ago were only vaguely known by the reports of Jesuit missionaries; and we are opening a great commercial career with golden results for its immediate reward, and with prospects which seem to have no bounds. All this we have done, directly we found out the right way of setting about it, with very small cost of treasure and of human life either to the Chinese or to ourselves. The disintegration of an exclusive system which shut out about one-third of the human race from religion and civilisation has cost less to humanity than the occupation of some swamp in Tennessee, or any one of half-a-dozen abortive assaults upon a Mississippi fortress. Japan is the Chinese problem over again, stated more simply, and applied to a much smaller subject. Here also we have a simple, ingenious, and traffic-loving people; hospitable to strangers, and curious as to the events that are happening beyond their own islands; emulative of foreign arts, and capable not only of imitating, but also of comprehending the wonders of Western civilisation; and here also we have jealous and barbarian and cruel rulers, who think it their interest to shut out every influence but their own. All the phenomena that commonly arise from this state of things are naturally reproducing themselves. The Japanese suddenly found themselves invited by the Americans to come to terms of amity and intercourse; and, as there was strong probability that, if persuasion should fail, force would be put into action, the Americans were amused by a treaty. Then Lord Elgin, fresh from his Chinese achievements, appeared in their capital, and again everything was politeness and concession. The Japanese difficulty at that time was Jeddo. The town residences of the barons of Japan lay under the guns of the Western ships of war. Nothing could be refused to ambassadors who had it in their power to capture at one cast of their net all the feudal lords of the Empire. So everything was promised at a time as far distant as possible. Trading ports were assigned with sufficient liberality, and the only difficulty interposed was the date of the execution of the stipulations. As soon as time had been gained, the next thing to be done was to take advantage of the interval. Gradually it was discovered that the great city of Jeddo was disappearing. The palaces of the nobles were chiefly valuable for what they contained, and the shells could be abandoned without too painful a sacrifice. Probably, if we were to go to Jeddo now, the Government would not be greatly intimidated even if we threatened to burn it down. In the same manner, as we are informed, preparations have been made to fortify the towns which, according to the terms of the treaty, are to be opened to commerce; proclamations have been issued instructing the leaders of the different bands how they are to act in unison when the foreigners come; and we have now before us a terrific catalogue of fifty-one "Daimios," each of which has credit for a very considerable army and very large revenues, all duly tabulated, and amounting in the aggregate to more than a million of men. To these chieftains, so formidable upon paper, has been confided the charge of keeping sacred from the presence of the foreigner those ports which have been designated by the treaty. It is the old story of Elliot getting by treaty a right for Europeans to enter Canton, and Yeh levying "braves" to keep them out. It is, no doubt, upon the strength of these preparations that the Japanese have committed those acts of treachery and cruelty upon our countrymen which have created so painful an interest in this country, and which have preremptorily challenged some strong measures on our part. In the early days of our intercourse we fear there may have been instances of very objectionable conduct on the part of some of the representatives of the commercial houses, and the Japanese had good reason to complain that they were treated with insolence and dishonesty. These practices were recorded by Sir Rutherford Alcock at the time, and received their full comment here both from the press and in Parliament. But these provocations, such as they were, had nothing whatever to do with the system of assassination deliberately adopted by the Japanese nobles. The names of Europeans who have been savagely murdered within the last two years would make a long list. The attack upon the British Embassy, in which Mr. Oliphant suffered so severely, was without a cause to explain it or a circumstance to palliate it; and now the murder of Mr. Richardson and the attempt to murder the rest of the party can be accounted for by no other supposition than a foregone resolve to murder every European who may fall in the way of a Japanese chief. Of course this cannot be allowed, and we must do something. There will be the usual number of wiseacres in England who will tell us that if the English men and women go abroad and get murdered it is their business, and not ours; but, as this wise talk never had, and never will have, any influence upon our national action, we may take that part of the discussion as begun and finished, and come to the practical part of the question—what had we better do? What we are doing is to drift into a war with all the usual forms. Colonel Neale, the British Charge-d'Affaires, has sent an *ultimatum* to Jeddo, which, however, the British residents complain has not been delivered with proper ceremony or by a sufficient force. Mr. Consul Winchester has issued a circular recommending all British subjects to take care of themselves, for that England and Japan will probably in a few days be at war. The French and English commanders upon the station are acting in concert, and there is little doubt that by this time the representatives of England and France and Holland have solemnly declared war against the Tycoon of Japan. A Tycoon of Japan has probably rather less power than a Doge of Venice. If there be any truth in the little we suppose we know of the Government and society of Japan, the Tycoon is but a puppet in the hands of the armed chieftains who have their strongholds, their retainers, and their territorial possessions. These are the men who have adopted a policy of assassination, and this is the class which is guilty of the murder of our countrymen. Some of these "Daimios," no doubt, having their dwellings upon the small islands, are approachable by our ships; and it has been said, we know not upon what authority, that such is the case of the "Daimio" who is accused of being the actual instigator of the Richardson murder. If this should be so, the opportunity of punishing a murderer should, of course, not be let slip; but the only way of dealing with a Government of this nature is to convince every chieftain in the Empire that he is not secure from a visit from us if he give us the least cause of offence. We cannot well blockade a country where the hostile rulers desire nothing more anxiously than to have all communication cut off. We should not do much towards the correction of some inland "Daimio" if we were to burn down a few seaport towns. It would be as if a gipsy should burn a house at Brighton to spite a Derbyshire Squire who had sent him to gaol for poaching in his woods. If we are to have a war with Japan—and everyone has seen for some time that it must come to a war—the only humane and economical course is to make it short and decisive. Far be it from us to pretend to say by what method such a war is to be made short and decisive. We hope we have some public servants out there who are able to form an opinion upon this subject; and with an immense Indian army to draw upon, and with a large fleet in these seas, an operation equal to the necessity would seem to be neither difficult nor very costly. If, however, we are about to repeat our old Chinese mistakes of demonstrations on the coast, we are committed to a very long and a very expensive business.

BANK OF HINDUSTAN, CHINA, AND JAPAN.

The first general meeting of this company was held at the London Tavern on the 6th inst.; Mr. DANIELL in the chair.

The report stated that "the articles of association require that the first ordinary meeting shall be held within twelve months from the date of registration of the company; the directors have therefore convened the present meeting. It is not possible at this early stage of the operations of the bank to present any complete account; with the view, however, of rendering such an account at the earliest possible period, the directors propose to anticipate the next annual meeting, and to hold it as soon after the 31st December next as the accounts received from the several branches to that date will admit. The directors further propose, in order to assimilate their proceedings to those of other colonial banks, that subsequent annual meetings shall also be held as soon after the close of each year as practicable. Two branches have been opened for business; the one at Calcutta, under the management of Mr. W. H. Fuller, commenced operations on the 15th December last; the other at Bombay, under the management of Mr. R. W. E. Baker, on the 1st January; the progress of both these branches has been highly satisfactory. Arrangements are now being made for the establishment of branches at Hong Kong and Shanghai. From statements of accounts and advices received from India to 30th April, the liabilities of the bank on sums due to the public on current accounts, deposits, bills payable, &c., amounted to over £450,000; since then there has been a marked improvement in the general business of the bank. The directors have much satisfaction in stating that they have succeeded in purchasing the premises 16, Cornhill, now occupied by the bank, for the sum of £9,000. This effects a saving of about £200 per annum upon the rent, if the premises had been rented, and the directors are advised that they could easily be sold at a considerable premium."

The CHAIRMAN, in moving the adoption of the report, said it would have been much more satisfactory to the directors and the shareholders had the company's organisation rendered it practicable to have presented a statement of accounts for any time which would have been at all an index to the transactions of the company. As it would have been impracticable, however, from the distant seat of their operations, for them to render a statement of later date than three months previous to the meeting, it had been deemed desirable to defer their publication for the present; but, at the same time, it was considered that it would suit the shareholders better if, instead of waiting until that time twelve months, they anticipated the usual period of presenting the accounts, and rendered them as soon after the 31st of December as they were received from the various presidencies where a branch of the bank was established. By that means there would be a clear twelve months' accounts to place before the shareholders. With the nature of their transactions, and the amount of business carried on hitherto, they had every reason to be well satisfied. Their business stood on as good ground as that of any of the older banks in India, and their exchange operations were equally satisfactory. They had likewise, ever since the period specified in the report, had considerable deposits at the banks, both in London and Calcutta. In short, there appeared to be as

Digitized by Google

much credit placed in the bank as could by any reason be expected of a bank not only as recently formed as theirs, but even of longer date. Of course at the time of their commencement a feeling would exist among the older establishments that they were, to a certain extent, intruders; but if they looked at what was going on in India, especially upon its western side, they would be convinced that there was ample room both for this bank and those already in operation there. That the business transacted in that country was to an enormous amount was evidenced by what they themselves had carried on. Not only with the past, but with the prospect of the future, they had every reason to be well satisfied, and he did not doubt that their bank would stand as high as any in India. They had been fortunate in the choice of their managers, who were men well known both on the western and eastern side of the country, and who had distinguished themselves by their energy and their great discretion. It was to be regretted that they had not established branches earlier in Hong Kong and Shanghai. Taken *per se*, this of course lost them a great deal of business; but it had affected them more intimately by restricting their operations at Calcutta. As stated in the report, arrangements were now being made for opening branches at both those places, and it was anticipated that at Shanghai a gentleman of property, and well known in trade, would be induced to become their manager. He hoped that before they met again next year the shareholders would see a very visible effect from the extension of their operations in those quarters.

Mr. SPOONER seconded the adoption of the report, and the motion was agreed to.

Resolutions to the effect that Messrs. Daniell, Spooner, Baring, Cotterell, De Castro, Fletcher, Harrison, Hoare, and Young, be re-elected directors, and Messrs. Goodson and F. W. Spooner auditors, were next adopted.

Mr. DOBIE thought the sum of £6,000 proposed by the articles of association to be divided among the directors was rather large, and wished to know how the sum of £4,000 proposed to be paid to the promoters of the company had been paid, or whether its payment was to spread over a series of years.

The CHAIRMAN said the promoters of all such associations incurred considerable expense in getting up the company, and had to defray all charges up to the time of the allotment of shares. £4,000 as remuneration in the present case was hardly a sum to be taken exception to. It had already been paid to the promoter, but its payment by the company would spread over a period of ten years. As to the payment to the directors, it had been deemed expedient that the remuneration should be graduated according to the profits realised by the company; and they (the directors) had not the remotest idea of its going up to any sum such as that mentioned. If at any time the shareholders thought their remuneration too high, they should always be ready to meet their wishes.

In answer to another shareholder, the Chairman said the whole of the shares were placed with the exception of 283.

The meeting was then made special for the purpose of striking out clause 19, sec 5, of the articles of association, which is to the following effect:—"The board may from time to time, out of any funds of the company, purchase shares in the company from persons willing to sell them, and may from time to time sell or re-issue all or any of such shares to such persons and upon such terms as they may think fit; provided always that until such shares are sold or re-issued as aforesaid they shall not be reckoned as shares in respect of which any dividend or bonus shall be payable or receivable."

The alteration was agreed to, though it was explained that and the meeting would be required to ratify the motion.

Continental Intelligence

—o—

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, July 6.

The most important intelligence from this country since the departure of the last mail is that the First Chamber of the States-General, after three days' debating, have passed the Colonial Budget definitively by a majority of six votes, the division showing twenty-two ayes to sixteen noes. It is justly considered a great triumph of the Liberal party, and its settlement a fortunate event for the tranquillity of the country, as during nearly a whole year public excitement on the subject has been very great indeed, and it is high time that the question be set at rest, the more so as the rejection of the Colonial Budget would have involved the resignation of Mr. Fransen Van de Putte, and even jeopardised the whole of the Thorbecke Cabinet. And we have had so many ministerial changes within the last few years that it is devoutly to be hoped we shall have no more for a long time to come. During the debates the principal speakers against the budget were Mr. Hartsen, Baron Schimmelpennink Van der Aye, Mr. Van Nispen, and Mr. Van Andringa, whilst the measure was defended by Messrs. Quintus, Van Rhemen, and Van Beek, as well as by the Colonial Minister himself, who made a brilliant speech.

Immediately after the division, the Bill for the disposal of the East India surplus revenue for the year 1860 was passed without much discussion, and unanimously.

The First Chamber has further passed, without a division, the Bill for the free importation of the raw materials of manufacture and industry in Netherlands India without any payment of duties.

In the meantime the Second Chamber has not been idle, but, after some days spent in debates, passed the Bill for confirming the concession for the construction of a railroad between Samarang and the Regencies by an overwhelming majority of fifty-four to thirteen votes. An attempt was made by Mr. Groen Van Prinsterer to postpone the subject till another session, but his amendment was rejected. The King having already on his part confirmed the concession, it now only remains to obtain the consent of the First Chamber.

In a letter from Yokuhama, published in the *Utrecht Dagblad*, attention is drawn to the encroachments of Russia in the Far East. Among other statements the writer says:—"For many years past Russia has been trying to obtain possession of a harbour or island both in China and Japan as a winter station for their ships of war in those waters. Of late their attention has been turned to Tsu-Sima, a couple of small islands with a commodious harbour, situated in the middle of the Straits of Corea, which might be easily fortified so as to rival the defences of Sebastopol. As soon as England had occupied the Loo-Choo Islands, the Russians took possession of Tsu-Sima. A glance at the map will show the importance of the station, commanding as it does both the Japanese Islands and the Peninsular of Corea."

The Netherlands Trading Company give notice that, on the 28th inst., they will sell by auction 300,000 kilogr. of copper in tough cake, melted down from East India old copper coins put out of circulation.

A letter from the Cape of Good Hope of the 20th of May to the Association of Insurers at Rotterdam, announces that the ship *Prince of Orange*, Capt. Hensing, from Banjoewangie to this country, had put in there with damage, and after undergoing the usual surveys had been condemned as unseaworthy and was to be sold by auction, as the expense of repairing her would amount to three-fourths of the value of the vessel. Of the damaged part of the cargo, 157 bags of coffee and 255 kranjangs of sugar, had been sold. The British ship *Bride of the Seas*, of 500 tons, Capt. Donald, had been chartered at £3. 15s. per ton, with 15 per cent. primage, to convey a part of the sound portion of the cargo to Rotterdam, and tonnage for the rest was being looked for.

P.S.—The First Chamber of the States-General has just passed without a discussion, and unanimously, the Bill for conferring the concession for the railroad between Samarang and the Regencies, so the question is now definitively settled.

COMMERCIAL.

COFFEE.—More animation prevails in this market, and several sales of private trade Java have been made by private contract, amounting to 10,000 bags, at 44½ to 46 cents. Prices are well supported.

SUGAR.—Though there is no improvement in the values of the raw article, a better tone was perceptible. Among the sales were 1,406 kranjangs of Passaroeang, No. 15¾, at 34½ fl.; 1,085 kr. of Sourabaya, No. 15¼, at 34 fl.; and 560 kr. of ditto, No. 17, at 35½ fl. The company have advertised for public sale on the 15th inst. 66,000 kranjangs of Java sugar, against only 37,700 kr. in July last year. Refined goods continue in a depressed condition.

TEA.—The cargo of the *Marco Polo*, from China, brought to the hammer on the 1st inst. at Rotterdam, was all sold, the Congou at from 91 to 136 cents, and the Souchong from 145 to 151 cents. Some Java Congou, marked "Vryhandel," was also sold at 33 to 72 cents, whilst the Souchong realised 92 to 96 cents.

TIN, which had been rising for some time past, has experienced a great fall. The Company's sale of 103,300 blocks of Banca could not obtain more than 76 fl., though since the sale the price has become firmer.

TOBACCO.—There have been some sales by auction of Java, which sold as follows:—1,315 bales KL/HBvH and 757 bales SS went at 17½ to 23½, averaging 21 cents; 261 bales, from 22 to 25½, average for BA 24½, MS 22½, and W 23 cents; 853 bales Malang sold at from 15 to 80½, averaging 39⅛ cents for 539 bales of old crop, and 30 cents for 314 bales of new.

SPICES.—Cloves are less in demand. Other articles neglected, and prices nearly nominal.

RATTANS command a lively sale. Importers have disposed of 1,000 bundles ex Odin, 395 b. ex Celebes, 3,947 b. ex Holland, and 276 b. ex Pollux. The Company have advertised for public sale in this city on the 28th inst. 172,400 bundles (circa 10,000 piculs), against 155,000 bundles (7,000 piculs) at the July sale last year.

P.S.—Banca Tin was improving, 77½ fl. having been paid, at which figure there are sellers. Indigo firm. Cochineal in demand. Of Rattans 10,000 bundles sold at stiff prices.

ITALY.

The Italian Government intends very shortly to send out a diplomatic mission to China, Japan, and Siam. Signor Christoforo Negri, who was a short time ago despatched to Paris and London to endeavour to obtain the support of France and England to the object in view, has returned to Turin with the most liberal promises from those Governments, and will most likely be placed at the head of the expedition, which will go out in an Italian frigate. It is stated that orders have been given at the Royal dockyard, at Genoa, to fit out a suitable one for this special service.

The London & China Telegraph.

LONDON, THURSDAY, JULY 16, 1863.

OUR DIFFICULTIES IN JAPAN.

THE British merchants at Yokuhama have met the difficulties in which they are involved in a manner worthy of Englishmen. In the near prospect of hostilities they betray no craven fear; in the expectation that their trade may be destroyed, or at least suspended for an indefinite period, they declare their willingness to make "the utmost necessary commercial sacrifices;" and so far from being eager to quit the settlement which may any day become too hot for them, they consider that such a step would but encourage the future aggression of the Japanese, and should only be resorted to in the last extremity. At the same time the possibility of being forced to make a sudden and hasty exit from Yokuhama led them very naturally to inquire what steps Her MAJESTY'S Minister had taken for their protection, and to complain that neither was sufficient security afforded, nor sufficient time given, to enable them to provide it for themselves. This assuredly was the prime duty of the authorities, and its non-fulfilment in the first instance is not palliated by the fact that an additional space of time was afterwards allotted. The period allowed to the Japanese for a consideration of their ultimatum was extended by our Chargé d'Affaires, at their earnest desire, from the 26th April to the 11th of May, and Colonel NEALE states that the convenience of Her MAJESTY'S subjects was a strong element in his decision.* Thus he evidently acknowledges that an extended period was necessary, but it was only by a chance that he was able to afford it. If the Japanese Government had made no request of the kind, the position of Europeans in Yokuhama would have been perilous in the extreme since the protection promised by the authorities is comparatively insignificant.

We await further news from Japan with intense interest. The crisis has come at last, and it remains to be seen whether those entrusted with the management of our affairs are fully able to meet it. Men are sometimes formed by emergencies, and therefore we may hope that Colonel NEALE will be equal to the enormous responsibility of his position. Admiral KUPER is an able and experienced commander, and we sincerely trust that he too will be equal to the crisis, for it is easy to see that the successful issue of the war—if war there must be—will depend very much on the wisdom with which its first operations are conducted. Our real enemies are the Daimios, and, unfortunately, they have it in their power to escape us altogether by withdrawing into the interior of the country. Thither we cannot follow them without a risk and an expenditure which we should scarcely be justified in incurring. The Japanese, half-civilised though they be, will prove no despicable foe. They will not make a show of fight and then run away like JOHN CHINAMAN, but measuring their strength with our own, they will be likely to avoid any open engagement and to keep up an irritating guerilla warfare, if we are rash enough to venture beyond the shelter of our ships. That British valour would ultimately triumph at Japan, as it has always triumphed the world over, we do not doubt for a moment, but just as little can we question—looking at the daring and warlike character of the Japanese—that we should have a heavy penalty to pay for our prowess. We have all along maintained that there is but one course open to us, namely, as we recently stated, to take the punishment of SATSUMA into our own hands, instead of demanding it from the Government of the TYCOON. This at any rate should be the first step, supposing that an unfavourable reply is given to our demands, and we are glad to see that *The Times* has now arrived at the same conclusion, and that that journal points out the folly of attempting to punish the Daimios, our real opponents, whose property is safely housed inland, by burning down a few seaport towns. Our position in Japan, although it has not received the attention it deserves, has, since we last wrote, been brought before both Houses. On the 9th inst., Mr. COCHRANE endeavoured to obtain some information from Government, but Mr. LAYARD avoided replying to his question in the most transparent manner. On the 10th, Earl CARNARVON, in a speech characterised by strong good sense, reviewed our relations with Japan. His lordship's speech was undoubtedly one-sided, but it brought out very prominently several important facts which deserve to be kept in view by the Government while shaping our future policy in Japan, and it elicited the important statement from Earl RUSSELL, that provided redress was not obtained, the first thing done would be to make Prince SATSUMA responsible for the murder of Mr. RICHARDSON.

* We now learn that a further delay has been granted.

THE CHINA DEBATES.

ANOTHER wordy war has taken place in the House of Commons on China, which occupies an undue portion of our present number, besides a Supplement. Beyond a ventilation, for which we are generally thankful, the debate will be bootless, and it is almost a pity that Lord NAAS did not confine his speech to something which could be kept in sight, and replied to with more precision by the Government. Lord NAAS repeated not only what others have said on the subject, but what he "himself hath said." From the reply of the PRIME MINISTER and the UNDER-SECRETARY for FOREIGN AFFAIRS, it is quite evident that the matter was too unwieldy to dissect, and it was got through with more badinage than argument.

LORD NAAS AND THE CHINA MERCHANTS.

THE following letter appeared in *The Times* of the 13th instant:—

TO THE EDITOR OF "THE TIMES."

SIR,—In your article on China, in yesterday's impression, you state "my teachers have not been first rate," and that "I fell into bad hands." My information on the subject of the state of feeling among mercantile men connected with China was obtained in the following manner:—

About a month ago Mr. J. Dent, leading partner in the firm of Dent and Co. (a house second to none in China), and Mr. Walkinshaw, of the firm of Turner and Co., one of the oldest and most respectable houses in the trade, called upon me and informed me that I was at liberty to state, on their authority, that the China merchants as a body were opposed to the new policy of the Government; and further, that the classes in China most favourable to the present state of things are "the lawless adventurers" referred to in your article, and described by me as the pests of the Eastern Seas.

Your obedient servant,

8, Queen-street, St. James's, July 10. NAAS.

There are more volunteer diplomats in the world than Messrs. ROEBUCK and LINDSAY, whose powers to "fetch and carry" have been so wofully tried. There are other people to go to than Emperors, out of whose opinions, whether rightly or wrongly rendered, with or without any apparent breach of confidence, political and other personal capital may be made. Representative men of different interests in the city of London are being continually approached, in the same way as the Emperor at Fontainebleau, by members of the Houses of Lords and Commons who want their opinions, less for the opinions than the value their names may carry. In this case, too, the promptings of their own minds, like the leading questions of counsel to a witness, may pervert the reply; but the main object generally is to generalise the opinion of some one eminent merchant as that of all affected by the interests he represents. Thus it comes that Lord NAAS has, we conceive, unwarrantably assumed, from certain phrases he extracted from Messrs. DENT and WALKINSHAW, that the China merchants were opposed to the new policy of the Government, and that the present state of things was regarded with most favour by "lawless adventurers," a class which Lord NAAS graphically described as "the pests of the Eastern seas." Has not Lord NAAS, in this attempt to render *a la Roebuck* words that may have fallen from these merchants' lips, confounded the China residents as a body with certain individuals obnoxious to the present state of things, unimportant in position, and in a minority as to numbers, to whom Mr. DENT doubtless referred? We join issue with Lord NAAS on both the assertions made by him "on authority." So far back as the 29th of November, 1855, some of the Shanghai merchants addressed Sir JOHN BOWRING approving of the Foreign Board of Customs. That communication was signed by ALEXANDER PERCEVAL, (JARDINE, MATHESON, and Co.,) MONCRIEF GROVE, and Co., SMITH, KENNEDY, and Co., WATSON and Co., GEO. BARNET and Co., DALLAS and Co., REISS and Co., GIBB, LIVINGSTON, and Co., BLENKIN, RAWSON, and Co., and Mr. W. S. FITZWILLIAM, agent of the Commercial Bank.

Digitized by Google

The object of memorials since forwarded by Shanghai residents to their Consul, has been for the provision of means for an extension of trade under existing regulations; and although their demands with reference to the right of establishing posts of trade in the interior have not been granted, they have experienced the benefit of the more regular and organised system introduced, and which is being gradually perfected. It is not the fair trader who flourishes on disorganisation, depending for profit on irregular, not to say illicit transactions. There are pests in all business—mosquitoes to be whipped off; but in adventuring on the Eastern seas Lord NAAS has mistaken their genus, and, looking through his official eye-glass, magnified their number.

NEW STEAMERS FOR CHINA.

SEVERAL vessels were noticed under this heading in our last. We have now to record the despatch of the *Vedo*, a screw boat of 356 tons gross register, under the command of Capt. Howard Clark. This vessel was built on the Clyde, and despatched on the 5th inst., for Shanghai, to the address of Messrs. W. R. Adamson and Co. Her length is 171 feet, breadth 24, and depth 12. Her engines are of 85-horse power nominal. She is intended for the trade of the Yang-tse. We hear of contracts being made by Capt. Blow (who lately commanded the steamer *Shunlee* on her voyage out to China) for a steamer of about 1,000 tons, and one of 500 tons. The screw building on the Clyde, of about 1,000 tons, under the superintendence of Messrs. Robertson and Co., will, we understand, be ready to launch in August. She will come round to London and load out for Shanghai to the address of Messrs. Chapman, King, and Co.; Captain Pinel, late of the *Tiptree*, is, we believe, appointed to the command.

Several clipper ships, of about 700 tons to 1,000 tons, are also building for the China tea trade, including one for Messrs. Charles Shaw and Co., one for Messrs. Phillips, Shaw, and Lowther, and Captain Maxton (iron), one for Captain Findlay, late of the *Foam*, one for Captain Rogers, owner of the *Min* and other vessels, one for Mr. MacDermott, of Liverpool, and two for Captain Dallas, late of the *Fiery Cross*, one of which will be iron.

Literature.

WE have already mentioned Lieutenant Pim's valuable work *The Gate of the Pacific* (Lovell, Reeve and Co.), but it is one of those suggestive books to which a reader interested in the subject will recur again and again to refresh his memory. We mention it now to point out—which we omitted to do in our former notice—that Lieutenant Pym marshals together a significant array of facts which prove that, for the sake of peace with America—and apparently from the fear of irritating the Yankees—we have again and again sacrificed British interests in Central America; and have done this without reaping any advantage whatever from our ill-judged generosity. It is imperative, especially at the present time, when the feeling against us in the United States is anything but friendly, that we should not suffer ourselves to be driven altogether from the Pacific by American intrigue, and allow the only transit route from the Pacific to the Atlantic to be in the hands of American capitalists. Lieutenant Pym writes strongly, but assuredly not too strongly, on this subject. We have committed egregious blunders hitherto, but it is not too late now to avert the danger so graphically described in *The Gate of the Pacific*, and by establishing a transit across Nicaragua to place British interests on a secure and honourable basis. It is inexpedient that those interests should be committed, as otherwise they will be, to the disposition of Americans. The first number of *The Chinese and Japanese Repository*, edited by JAMES SUMMERS, Esq., Professor of Chinese in King's College, and published by W. H. Allen and Co., has made its appearance. In an able introductory essay, the history and progress of our commercial connection with China and Japan, with the results to be anticipated from our influence, are adverted to; the extent to which British science, literature, and art have an interest in obtaining a further knowledge of the former country, and the object and scope of this periodical which undertakes to supply that want, is set forth. The contents include articles on the present state of science, literature, and literary criticism on China, the future of that country, a sketch of the Israelites who have there established themselves, and an article quite *àpropos* to the present time, entitled "The Visions of Hung-Sui-tshuen and Origin of Kwngsi-Insurection," by Theodore Hamberg.

Naval and Military.

PRIZE MONEY FOR CHINA.

Notice is given that the distribution of the proceeds of certain piratical junks, captured on the 20th of April, 1858, by Her Majesty's ships Hesper, Firm, Bustard, Staunch, and Opossum, commenced on Monday, the 13th inst., in the prize branch of the department of the Accountant-General of the Navy, Admiralty, Somerset-house. The following are the shares due to an individual in the several classes:—Lieutenant and Master Commanding, each, £6. 2s. 4d.; third class, £4. 8s. 11d.; fourth class, £2. 17s. 3d.; fifth class, £1. 11s. 10d.; sixth class, £1. 8s. 7d.; seventh class, 19s. 1d.; eighth class, 9s. 6d.; ninth class, 6s. 4d.; tenth class, 3s. 2d.

PRIZE MONEY FOR CRIMEA.

The ships acknowledged to be entitled to a share are the Algiers, the Agamemnon, the Ardent, the Arrow, the Banshee, the Beagle, the Curlew, the Caradoc, the Furious, the Gladiator, the Hannibal, the Highflyer, the Leopard, the Lynx, the Miranda, the Medina, the Princess Royal, the Royal Albert, the Recruit, the St. Jean d'Acre, the Sidon, the Simoon the Sphinx, the Spitfire, the Swallow, the Stromboli, the Snake, the Tribune, the Terrible, the Valorous, the Vesuvius, the Viper, and the Wrangler.

An important target trial took place at Shoeburyness. Hitherto the targets have been constructed on the principle that the backing must be elastic, but the trial of yesterday was to determine the value of the opposite or rigid theory. Up to the test furnished by the old-fashioned and still favourite 68-pounder, the rigid theory was sustained; but a 150 lb. steel shot passed through the target and its supports, and a 300 lb. shell penetrated the target and set the filling of the cells on fire. One of the Armstrong guns used at the trial burst, that is to say the outer ring of the gun gave way. There was no one injured.

The Sphinx, 6, paddle, Commander Jones, arrived at Spithead on the 1st inst. from China with the crew of the despatch vessel Beagle (recently condemned in China) on board, and a few naval and military invalids. She sailed from St. Helena on the 11th of May, and called in at Fayal on the 24th of June. Before she could let go her anchor the Sphinx was signalled to proceed round to the south side of the Isle of Wight to the assistance of a small passenger steamer on shore there.

Parliamentary Intelligence.

HOUSE OF LORDS.

JAPAN.

(July 10th.) Lord CARNARVON, in moving for copies of instructions to Her Majesty's diplomatic servants in Japan, or to the officers in command of Her Majesty's land or naval forces, to make demands upon the Government of Japan, with the alternative of immediate hostilities on the rejection of such demands, commented on the ignorance of the House of the reasons which had led the Government to instruct Admiral Kuper to address an ultimatum to the Government of Japan. Having sketched the political system of Japan, which made the Tycoon practically powerless against his nobles, however willing he might be to carry out the treaties and to make reparations for outrages, he warned the Government against the dangers and cost of a war with Japan, either separately or with other Powers, and contended that strict retribution, if possible, should be exacted from the guilty parties, but the country ought not to be committed to a great war. He wished to know the reasons by which the policy of Her Majesty's Government had been guided.—Lord RUSSELL said he considered it his duty to see that the treaties of commerce concluded between Japan and this country were carried into effect, and that the lives of British subjects were protected. He detailed the various outrages which had been committed by the Japanese, particularly instancing the attacks on the British Legation and on Mr. Richardson. As these outrages proceeded from a settled plan to defeat the treaty, he had demanded explanations. He denied that war had been declared at once, and explained the steps which had been taken to obtain reparation. As it was just possible that redress might be refused, certain instructions had been given to our forces, but which, as at present no answer had been received, he declined to produce to the House. Disclaiming the projects of prolonged war and annexation attributed to the Government by Lord Carnarvon, he stated that our only object was to obtain reparation for the murders which had been committed, and to uphold the trade of our merchants. As soon as the answers of the Japanese Government arrived he would produce the papers.—Lord GREY considered it highly objectionable that the old custom of consulting Parliament before the declaration of war was abandoned by the Government. Although he entirely agreed in the propriety of exacting reparation for outrages on British subjects, it ought in the present case to be remembered that the treaties with Japan had been extorted by fear and intimidation. The principal causes of our present unsatisfactory relations with Japan were, in his opinion, the exorbitant demands of some of our traders on the Japanese Government for gold in exchange for silver, and the presuming and arrogant conduct of certain English residents in Japan. The papers laid on the table, however, concealed many of these facts, and while blackening the people of Japan suppressed the bad actions of our own countrymen. It was unfair to hold the Japanese Government responsible for these outrages. They had done their best to find out the offenders, but, owing to the exasperated state of public feeling against foreigners, failed, just as this country had done in bringing the perpetrators of the outrage on General Haynau to justice. He considered war with Japan would cost us much blood and money, would introduce into Japan the same anarchy as was now seen in China, and was unjust and impolitic in itself.—The Duke of SOMERSET contended that as the treaties concluded with Japan had been accepted by successive Governments it was the duty of Her Majesty's Government to uphold them. The Japanese Government had not been harshly treated, for modifications had been made in the treaties at their request. He did not think that it would be so difficult to obtain reparation as had been anticipated.—After a few words from Lord WODEHOUSE and from Lord CARNARVON in reply, the subject dropped.

HOUSE OF COMMONS.

OUR RELATIONS WITH CHINA.

THE REBELS AND OUR NEUTRALITY.

(July 6th.) Lord NAAS called the attention of the House to the state of affairs in China, and said that the somewhat unexpected manner in which the discussion on the motion of his hon. friend the member for Northumberland (Mr. Liddell) had terminated on a recent occasion, induced him to think he was doing nothing unusual in endeavouring again to direct the attention of the House to this most important question, and to elicit from the Government some explanation on the subject of our relations with the Emperor of China. He was the more encouraged to do so because he believed that of late years our relations with the Emperor of China had been of a totally novel kind. He believed that the policy which we had adopted originally in our dealings with China had been abandoned, and that we were now entering on an entirely new state of things. It would be needless for him to remind the House how the Empire of China differed from every other country in the habitable world. For ages that empire had been ruled by absolute despotism. Slavery never existed in any shape within its bounds, but the despotism which had prevailed there was of a most peculiar character, for it had never been upheld by a large standing army. The public service in China was also of a peculiar kind. For ages, both in the civil branch and the military, admittance had been by competitive examination. Merit alone had been supposed to be the means by which a man could rise in China. It was still more extraordinary that in an empire so governed there was to be found among the people a smaller amount of patriotism than was to be found among the natives of any other country. Neither had the Chinese much of what we called "religious sentiment." Resistance to authority and revolution were the only means by which grievances were redressed and wrongs remedied in China. The right and practice of rebellion had existed as far back as the history of the Chinese Empire. The right of rebellion had always been recognised by all great Chinese writers; and it must be owned that the people had been very consistent in reducing the doctrine to practice. Dr. Legge, in his remarkable book on China, quoted an extract on that point from the great Chinese philosopher, which, though written 3,000 years ago, might be taken for the production of an English Whig of 1688. In that extract, which was supported by writings of other Chinese philosophers, it was laid down that the moment an Emperor ceased to rule according to right principles he forfeited all title to his throne. It was a curious thing that, though the rebellions had been numerous, no particular dynasty in China had ever been overthrown without several years of rebellion. The Sing dynasty, which now ruled the empire, had not been established till after twenty-eight or thirty years of rebellion against that which had preceded it; and, as the House were aware, there was an extensive rebellion going on in China up to the present moment. The whole of this enormous empire was in a state of convulsion from one end to the other. The movement, however, with which we had more particularly to deal was the Taiping movement, which had commenced in 1849 or 1850, and which was one of the most extraordinary movements that had ever taken place in any country in the world. There was not the least doubt that our constant interference with and hostility to the Government of China had contributed greatly to this movement. Those who had considered the subject thoroughly agreed in assigning the movement to three causes—our hostility towards the Government, the opium question, and the circumstance that for the last three reigns China had been ruled over by princes of weak character and little influence. By a series of acts of hostility we had weakened the Government and made it contemptible in the eyes of the people. In Mr. Meadow's book was to be found the following curious memorial from a Manchou general:—"The troops do not attend to orders, regard retreat on the eve of battle as an old custom, and the abandonment of places they should hold as an ordinary affair. . . . The number of robbers and criminal associations in Kwantung and Kwangsi is very great, and they assemble without the least hesitation to create disturbances, all which arises from the circumstances of the army at the time the barbarian affairs were being transacted. Formerly they feared the troops as tigers; of late they look on them as sheep." Our attempts to compel the introduction of opium into the country had much to do with the movement. For the last thirty years, ever since the monopoly of the East India Company was abolished, and when the Chinese Government made up its mind forcibly to resist the introduction of opium, our attitude towards the Chinese Government had been one of unceasing hostility. We had three or four wars, which had been carried on at times in a most peculiar manner. The noble lord at the head of the Government told the House that we were not at war with China at the very time that we were burning the suburbs of Canton and bombarding the forts. Our relations with that country had got into this anomalous position, that we were actually at the same time supporting the Chinese Viceroy in Canton, collecting a portion of the Imperial revenue at Shanghai, bombarding the Taku forts, seizing Peking, and burning down the Emperor's palace. Since the taking of Peking our policy had altogether changed, for at that time a policy of entire neutrality had been laid down. He should be sorry to be understood as an advocate of the Taipings. At first considerable sympathy was manifested for them, as there was a belief that their religion was closely allied to Christianity. Further inquiries, however, showed that though with the aid of some books procured in Canton they might have manufactured a spurious sort of Christianity, yet their religion was an imposture, and the assumption of divine attributes by their leaders was so disgusting that it was now allowed that no sympathy ought to be felt for them on the ground of religion. They had been in possession of a large portion of the country for fifteen years, but nowhere had they succeeded in establishing anything like an organised Government. But their cruelty and their inability to organise a Government, reflected all the more strongly on the Government of Peking, for with all the resources of the empire at their command they had never been able to make head against the Taipings. At the treaty of Peking, a policy of neutrality was laid down and acted on for a considerable time. Sir F. Bruce, in making arrangements for the protection of the treaty ports, distinctly laid it down that the British were to be entirely neutral as between the Taipings and the Chinese Government. Lord Russell, on the 8th of August, 1861, wrote to Sir F. Bruce to express the desire of the Government to maintain neutrality between the contending parties, but that if English subjects were taken the consuls would do their utmost to procure their liberation. The noble lord in his place in that House was equally explicit in the declaration of his wish for the maintenance of neutrality. On the 12th of March, 1861, Lord Russell laid down the principle that the Government would resort to armed interference only in defence of our treaty ports and the settlements occupied by Her Majesty's subjects. It happened, however, that step by step the policy of neutrality had been abandoned, and that we were now interfering in almost every possible way in the internal affairs of China. The first step was at Shanghai, one of the treaty ports, where an attempt was made to carry out what was called the 30-mile radius. Admiral Hope, in 1861, went up the country to the Taipings, and obtained from them an assurance that they would respect the port of Shanghai, but only for one year. The Taipings kept their word, but towards the close of 1861 there were evidences that they intended to advance to Shanghai, and steps were taken to defend the town. Instead, however, of defending the settlement itself, it was, as he thought, very unfortunately determined to seize and hold all the country for thirty miles round. Military operations began at the end of April, 1862, when a few British and French troops, some drilled Chinese, and the Imperial "braves" marched out from Shanghai, and took two large towns in the neighbourhood. They went across the river with the intention of seizing the right bank of the Woosung river. The general, however, in command of these forces heard that the Imperialists had been routed and destroyed at a neighbouring city, and that the rebels were marching upon Shanghai. It therefore became necessary to withdraw his troops; the towns he had held were occupied by the rebels, and there was an end of the thirty-mile radius. These operations involved the whole district in very serious troubles and misery. The rebels, when they took the towns near Shanghai, killed a great number of men. They ordered others to let their hair grow to show they were rebels. We took the towns, and handed them over to the Imperialists, who beheaded some of these unfortunate creatures because they had long hair. A few days afterwards the Imperial troops were withdrawn, and then the rebels came in again, and cut off the heads of those who had in the interim shaved their heads. The atrocities and carnage that took place in this civil war were horrible to contemplate. One side was as bad as the other, and there was nothing to choose between them. It was alleged that the rebels had laid waste the country for thirty miles round Shanghai. Great atrocities were, no doubt, committed on both sides, but he denied that the country had been devastated. The despatches spoke of the troops as marching through cornfields, and there was reason to believe that the atrocities of the Taipings were confined to the towns which they seized. He would now advert to what had happened at Ningpo, which illustrated in an instructive manner how gradually we had been led to interfere in Chinese affairs. Ningpo was a very large city, with a quarter of a million of inhabitants. It was menaced by the rebels. English officers gave the Chinese authorities every advice and assistance, and instructed them how to fortify the city against the enemy. The rebels, however, attacked the city and drove out the Imperial troops in a few hours. The English gunboats did not interfere, and the rebels took possession of Ningpo, which they held for five months. Matters went on quietly during this occupation. He would not assert that the rebels were successful in attracting a large portion of the inhabitants back to the city, but the English authorities were in constant negotiation with the rebels, and our Consul had no reason to complain of any breach of faith. Almost immediately after the rebels took possession of the city, Consul Harvey thought it a favourable moment to arrange the question of what was called the foreign settlement. Ningpo was situated at the confluence of two rivers, and a piece of ground surrounded by the two rivers was much coveted by the consuls as being admirably adapted for purposes of defence. Accordingly they endeavoured to obtain the cession of this piece of ground. The American, French, and English consuls and the captain of Her Majesty's gunboat *Scout* met one day and passed a resolution that this large piece of ground should form the foreign settlement and be devoted to the purposes of these foreign nations. At that time the city of Ningpo and the country around were in the possession of the Taiping chiefs. They did not make much objection, the consuls took possession, and some commodious residences were built on the land in question. Things went on in that way for about a month, when one day, on the firing of a salute in honour of the arrival of one of the Taiping chiefs, some bullets struck the settlement. Some idle persons also wandering near the walls fired a few shots, which went near the boats. These were the only acts complained of by the British authorities, and they were amply apologised for by the Taiping chiefs. Captain Dew, of the *Encounter*, was sent down by Sir James Hope to obtain reparation and apology, and any gentleman who should read the instructions of Sir J. Hope would find there was nothing in them to authorise Captain Dew to make any attack upon the city. The answer to the remonstrance made by Captain Dew was so satisfactory that Captain Dew, on the 27th of April, 1862, wrote to the Taiping chiefs to inform them that he would not insist upon the demolition of the battery, but only that the guns opposite the settlement and ships should be removed. This battery was erected at the confluence of the two rivers, in order to defend the town from any attack that might be made by the Imperial forces. What Captain Dew therefore required was an ample apology, the removal of the guns from the battery opposite the settlement and ships, and that means should be taken to prevent anybody going on the walls opposite to the ships. With reference to the first point Captain Dew said he was perfectly satisfied, and with respect to the two other points, General Hwang wrote to say that, though the guns were for the protection of the fort, yet, under the peculiar circumstances, and to manifest the desire of the Taipings for a lasting amity, the port-holes of the guns

Digitized by Google

bearing on the settlement should be stopped up, and no one be allowed to go upon the walls except the workmen who might be required to make repairs. In fact, everything demanded by Captain Dew was granted and the latter concluded in this way:—"We are desirous of remaining on good terms with you, and this is our reason for this distinct statement." After the receipt of that letter Captain Dew paid a visit to a large Imperial force, which was curiously constituted. The Imperial Government having but a small naval force at their command, made a convention with a notorious pirate for the employment in the Imperial service of himself and eighty junks, which for a number of years had been engaged in piracy. Well, Captain Dew went down the river and communicated with this man. There was every reason to believe that Captain Dew was cognizant of what this man was going to do, and it appeared rather a curious thing that a British captain should enter into communication with one whom if he caught outside the bar at Shanghai he should feel bound to hang. This band advanced to the attack. Captain Dew and several gunboats were then in the river, and shortly before he wrote to the Taiping chiefs thus:—

"We now inform you that we maintain a perfect neutrality, but if you fire the guns or muskets from the battery or walls opposite the settlement on the advancing Imperialists, thereby endangering the lives of our men and people in the foreign settlement, we shall then feel it our duty to return the fire and bombard the city."

So that having received an ample apology, Captain Dew gave up the three points, and then told the Taipings that if they defended themselves he would join in the attack and bombard the town. The junks having advanced between the gunboats and the town some shots were fired from the battery, and then, at ten o'clock, Captain Dew opened fire, bombarded the town up to two o'clock, then went to dinner; at three o'clock he landed his men, drove out the rebels, and handed over the town as a present to the Toutae. That story showed how our officers conducted affairs in China. There were professions of neutrality up to the last moment, and then the rebels, who had given us no provocation, were driven out, and the city handed over to the Imperialists. But this policy of pretended neutrality and real interference culminated in an attack which was made by Captain Dew and the French contingent upon the town of Shoon-shing in February of this year. After the taking of Ningpo Captain Dew remained in the city for some time, and a certain portion of Ward's force and the French contingent were occupied in garrisoning the place. No attempt was made to establish the thirty miles' radius. It appeared that in February last Captain Dew and a large number of boats accompanied a force of about 500 men to the attack of a walled town situated 110 miles from Ningpo. That force was called the French contingent, and was a very curious one. It was commanded by a French officer. He (Lord Naas) could not make out whether that officer was originally a military man; he rather thought he was a clerk in the French civil service. The first night was spent in plundering an Imperialist village—it must have been Imperialist, because it was only fifteen miles from Ningpo. The next day they advanced up a canal to the attack of Shoon-shing. Captain Dew accompanied the expedition, he said, in the character of a spectator, but really to advise the commander. A breach having been made the French were ordered to the assault, but they were ignominiously driven back, the French commander was killed, and Lieutenant Tinling so badly wounded that he afterwards died. It was impossible for Captain Dew to say that he was not in actual command of this force, for, in a letter in answer to a vote of thanks from some merchants at Ningpo, Captain Dew glorified himself considerably on the part he took. With regard to Lieutenant Tinling, it had been said that that gallant officer was an amateur, but that was not a fair representation of the case. Lieutenant Tinling was on the spot with the desire and consent of his commanding officer, and was as much discharging his duty as if he had been on board his own ship.

THE CUSTOMS AND FOREIGN INSPECTORS.

Leaving this part of the subject, we would now refer to two institutions which had grown up in China, and which were becoming to all intents and purposes British institutions. The first of these was the Foreign Inspectorship of Customs. This was introduced in China in 1854; but, as it was not found to work, in 1856 the Chinese Government placed the entire control of the Chinese Customs in the hands of Mr. Lay, who became head of the Customs, and under him there were British, French, Germans, and Americans, who acted as inspectors at the eight ports. Those gentlemen levied an enormous amount of revenue. The Customs' duties at Shanghai were supposed to amount annually to very nearly £1,000,000; and, including all the ports, it was reasonable to suppose that the customs' duties equalled £4,000,000. The position of these inspectors was entirely irresponsible. Their nomination was sanctioned by the Chinese Government, but it did not appear to have been originally made by the Chinese Government. In addition to the revenue collected by those gentlemen, the mandarins were obliged to collect a little revenue of their own, and he found constant complaint in the blue-books from merchants, who, after paying Customs' duties to the inspectors, were forced to pay "squeezes" to the mandarins, for everything seemed to be done by a system of "squeezing" in China. The result was, that repeated conflicts, accompanied with violence, took place under this new system. There was a considerable number of armed men at Shanghai under Imperial authority; the Inspectorship of Customs had also a large amount of armed men under their authority; the French Contingent was 1,500, and the Anglo-Chinese Contingent was 1,000 men. There were armed forces at Shanghai, composed not often of the best characters, and collisions and aggressions must be expected to occur under such a state of things as he had described. Lately, however, the forces at the disposal of the foreign inspectors had received an important augmentation.

THE LAY-OSBORN FLEET.

Mr. Lay and Captain Sherard Osborn, a most distinguished officer, who knew China well, came to this country last autumn to organise an armed European force. These gentlemen undertook this mission, doubtless with the sanction of Sir F. Bruce, but he could not discover that they brought with them a single scrap of paper giving them the authority of the Imperial Government. At first Her Majesty's Government proposed to issue licences enabling a certain number of British officers to take service in the new force, but it was felt, on reflection, that that course would be very inconvenient. At the end of August an Order in Council was issued authorising Captain Osborn and Mr. Lay to enlist troops for the service of the Chinese Empire, and to fit out ships of war. The force was to be paid, it appeared, out of the Customs' revenues under foreign inspection. But a considerable part of the funds which these two gentlemen brought over with them was raised by loan. Only three British gunboats were available, and when these had been fitted out for this expedition three other vessels were ordered to be built. The stores, guns, and other equipment were furnished from our arsenals. A code of laws was drawn up for the regulation of the force, a new scale of pay and rations was fixed, pensions for wounds were settled, a special book of signals was arranged, and last, not least, a new flag, green with yellow stripes, was improvised under which these troops were to fight—in the service, not of the Emperor, but of Mr. Lay and the Anglo-Chinese inspectors. It was rather difficult to ascertain the precise object of the force, as the Government officials did not seem quite clear about it. Mr. Lay himself said it was to be employed in re-establishing the Imperial authority on the Yang-tse-Kiang, and commercial security on the inner waters, and in suppressing piracy. The latter undertaking might, however, be dismissed from view, as any ship might destroy a pirate at sea if she caught one. Mr. Hammond, writing to the Secretary of the Admiralty to ask the approval of the First Lord, stated that the European force was intended to re-establish order throughout the Chinese empire. As the force numbered only 400 men, while the population of China numbered about 400,000,000, the enterprise on which they were to be despatched was certainly rather formidable. The Secretary to the Admiralty, however, accepted the statement of the Foreign-office, and replied that he saw no objection to the scheme. Now, he wished to point out to the House what would, in all probability, be the first exploit of the new force. In any attempt to restore order on the banks of the Yang-tse-Kiang, they must begin with the capture of Nanking. As the House knew, Nanking was a city of enormous size—the second in the Empire, in fact—and since 1854 it had been in the hands of the Taipings, the Imperialists never having made any serious effort to dislodge them. The prospect of the English taking Nanking, and driving the Taipings out of it and the tea districts adjoining, was regarded by a number of eminent authorities with just apprehension. That he was justified in assuming that this was one of the points against which the newly-raised force would be directed would be seen from the following passage in a despatch written by Earl Russell on the 7th of July, 1861:—"Ningpo ought to be recovered by the Imperialists, and, when they have force sufficient for the purpose, they should undertake vigorous operations against Nanking." Sir F. Bruce, however, on the 16th of January, 1861, said he did not see that the fall of Nanking would dissolve the bands which desolated the country, and gave this warning:—

"Should the capture of Nanking merely drive the rebels from the positions they occupy on the river, and the Imperialists be unable to follow them up with vigour and disperse them, they would assail other points not assailable by us, and, feeling secure from chastisement by our naval force, they would be less amenable to reason. We should be liable at the ports to sudden and unexpected attacks unless we had force sufficient stationed at each for its defence."

Again, on the 11th of July, 1861, Admiral Hope wrote:—

"I should consider the capture of Nanking as the most impolitic act which could be committed. There is not the slightest ground for the supposition that the loss of that town would have any material effect in the suppression of the insurrection, or any other, indeed, than that of the Taiping seat of government to some city in the interior out of our reach, and the creation of a feeling of inveterate hostility against us."

Even Earl Russell himself, in September, 1861, concurred with Admiral Hope in condemning the capture of Nanking, which a year later he recommended so strongly. Colonel Meadows stated that a Yang-tse campaign against the Taipings would require a large fleet and a considerable body of troops. He thought he had shown that this foreign inspectorate of Customs, having the command of an armed force, was one of the most dangerous institutions which had ever been sanctioned by the British Government, and the same view was taken of the matter by the editor of a Chinese newspaper, who pointed out that, though now under the control of a British officer, it might pass into the hands of a Frenchman or an American, and might be used to the detriment of English interests; and also that complications might arise from the want of any clearly defined understanding as to the position of foreigners in the Chinese service, and the amount of protection that would be extended to them.

COLONEL WARD'S FORCE.

He would now give a short history of the Anglo-Chinese contingent, a force with which Mr. Lay had nothing to do, and which was quite separate from Captain Sherard Osborn's force. In the year 1860 Colonel Ward, whose origin was rather doubtful, and whose nationality was also somewhat obscure, but who, he believed, was a member of General Walker's filibustering expedition, arrived at Shanghai, and being a man of courage and capacity, proposed to form a foreign legion, consisting of Manila men, Europeans, negroes, and, indeed, any one whom he could catch, for the service of the Emperor. There was plenty of material for the formation of such a force, for the ports of the eastern seas swarm with adventurers, filibusters, and scoundrels who had been unable to live elsewhere, who had collected in that part of the world with no object but rapine and plunder, and whose doings had extended south to some of our own settlements, and were about to be brought before the House by his hon. and gallant friend the member for Wakefield. Colonel Ward collected his regiment, but the Taipings formed a similar force, and on one occasion it was found necessary to send a man-of-war to Nanking to recover 26 British subjects who were in their service, and among whom were seven seamen of the British navy. This scheme, therefore, was given up, and, greatly to Mr. Bruce's satisfaction, the foreign contingent was disbanded. Colonel Ward then turned his attention to drilling Chinese, and in a few months he raised a considerable force, which on different occasions rendered pretty good service, although it was almost as often unsuccessful, and which took part in all the military operations which were undertaken to clear the 30 mile radius.

GENERAL BURGEVINE.

Unfortunately, on the 20th of September, 1862, Colonel Ward was killed in the attack upon a small town, and General Burgevine, whose nationality also was somewhat doubtful, was appointed to the command of the force. The General was a man of large promises, which, however, he was seldom able to perform, and for some months he succeeded in persuading the Chinese authorities that he was always on the point of moving up the river and attacking Nanking. At last a day was appointed for his departure, but, owing to an account written by Consul Medhurst to Mr. Bruce, the General delayed the march, the line of transports accumulating, and 200,000 taels had been squandered without result. At this juncture the pay of General Burgevine's forces fell into arrear, his men mutinied, and he undertook to go to Shanghai to get the money due to them, amounting to about £40,000. Thither he proceeded with 150 armed men, but on his arrival the mandarin whose business it was to make the payment told him that he should have the money when he started for Nanking. General Burgevine struck him, and then his followers ransacked the house, and finding in it a large sum of money, helped themselves. Some of this money it was said was afterwards paid to the troops. This high-handed proceeding incensed the mandarins, who determined to dismiss General Burgevine and cut off his head. The General took refuge with General Staveley, and afterwards proceeded to Peking to lay his complaint at the foot of the throne; and Captain Holland, an officer of the Royal Marines, was appointed to command the force. General Burgevine obtained from the Emperor an order that he should be allowed to resume his command; but he could not secure obedience to this order at Shanghai, and he had returned to Peking to endeavour to obtain the command of at least a portion of the troops.

CAPTAIN HOLLAND.

This terminated the connection of the foreign officers with the force, which then passed under the command of Captain, or, as he was then called, General, Holland. He was appointed by the British Commander-in-Chief at Shanghai, and retained the command until the 10th of February, when he marched to attack Tait-shan. Captain Holland had with him a force of 2,500 men with twenty-two pieces of cannon, including two 32-pounders belonging to the British army. He attacked the town, but the rebels fought admirably, and the attack was repulsed. No fewer than 500 men were killed, and the two 32-pounders were captured by the rebels. Captain Holland shortly afterwards withdrew from the command, but before he retired an extraordinary occurrence took place at the head-quarters of the contingent, showing how impossible it was to carry on such a system in China without coming into constant collision with the native authorities. Four or five men had been punished for the offence of selling their arms and ammunition to the rebels. During the night the mandarins, who thought the soldiers had not been dealt with severely enough, dragged them from prison, and cut off their heads on the parade-ground. Next day there was a row; the men broke from their ranks and rushed to the residence of the mandarins, with the view of serving them as they had served the prisoners the night before. What added to their excitement and exasperation was that a boat, containing sixteen stand of arms, had just been seized on the river, and it was said to belong to one of the mandarins, who was suspected of trading with the rebels. The soldiers believed, indeed, that the mandarins had put their comrades to death in order that their own treason might not be discovered. Nothing further was needed to show the utter hopelessness of dealing with these people at all.

MAJOR GORDON.

Captain Holland was succeeded by Major Gordon, and the documents clearly proved that both were appointed by no other person than General Staveley himself. Major Gordon was one of the most distinguished young officers in the British army, having served in the Crimea and elsewhere; and he could not but regret to see such a man taking service with a barbarous and foreign Power. According to a notice in the *Gazette* of last Tuesday, Major Gordon had withdrawn altogether from the service of Her Majesty. It was quite evident that the contingent in China was intended to be a permanent force, and that officers accepting appointments in it were prepared to sacrifice their prospects in the British army. He did not wish to say a single word against them. The fault lay with the Government at home, for everybody knew that if British officers were allowed to fight they would do so whenever they could, without being very particular as to whom they fought with. He could not think, however, that it was right or proper to hold out inducements to British officers to leave their own flag.

THE PAY OF CAPT. OSBORN AND MAJOR GORDON.

Captain Osborn would be more highly paid than our Admiral in the China Seas, while Major Gordon would draw nearly as much pay as the General commanding the British forces in China. Nor could it be said that they were engaged in the service of the Emperor of China, and that we had nothing to do with the matter. Captain Osborn and his men, as well as the Anglo-Chinese contingent, would be looked upon both by the Imperialists and the rebels as servants of Her Majesty, obeying the orders of the British Government.

PRINCE KUNG AND SIR F. BRUCE.

Already, indeed, Prince Kung had conveyed to Mr. Bruce a formal expression of thanks for the valuable aid rendered to the Emperor by the British, French, and Russian Governments. He wondered it never occurred to those who inaugurated the policy to which he was adverting how dangerous was the example which they set the Taipings. The latest advices showed that European officers and men took part in almost all the miserable conflicts which took place between them and the Imperial troops, and although we had endeavoured as far as we could to prevent the importation of arms into the rebel districts, yet all the regulations and proclamations which had been issued on the subject had totally failed in precluding the rebels from supplying themselves with as good arms as were to be found in the hands of the Imperialists. He thought he had said enough to show that we were interfering in Chinese affairs in a financial, political, and military point of view, and that Sir F. Bruce was in reality the Prime Minister of China. It was quite impossible, owing to the policy pursued by the Government, that he could help placing himself in that position, and that policy would, he was afraid, go on weakening instead of strengthening the Government it was intended to support. Such a system as that which we now adopted in China of doing everything we could for the Chinese and receiving pay in return could not be continued without compromising that Empire. If, indeed, China was to be governed on European principles it must be ruled by Europeans, and the further we proceeded in the present direction the greater would be the probability that we should find ourselves embarked in a Chinese war. That policy, he should remind the House, bad as it was, depended on the life of the Emperor. Prince Kung was now Prime Minister and had obtained his high position in a very curious way, for a conspiracy having been formed for the purpose of placing him in power, he had the heads of three of his leading opponents cut off. Inasmuch, however, as those men had left behind them a party which was still very considerable at Peking, it might happen that he would find himself treated in the same way as he had dealt with his political opponents, and should the other party come into power the position of Sir F. Bruce would be somewhat difficult and awkward. But, if he wanted any further authority in support of the view which he entertained as to the policy of the Government in China, he need only refer to Sir F. Bruce himself, who, in writing to Earl Russell on the 10th of June, 1860, said:—

"There is, indeed, another alternative open to the people—namely, that of placing themselves under the protection of a foreign Power, in whose justice and force they have confidence, to preserve them from pillage and massacre. From the language held by some of the more influential native merchants, I think it not unlikely that, sooner or later, some such proposal will be made to foreign Powers, at the suggestion of commercial or religious influences, should anarchy increase, and should the decision of such questions be left practically to the people and the authorities of the provinces, in consequence of our being debarred from treating directly at Peking on matters involving Imperial interest and considerations of general policy of such vast magnitude. I am further inclined to believe that foreign support thus given would render the re-establishment of the Imperial authority very difficult hereafter. In the meantime, however, the task of supplying the place of the foreign force would become every day more difficult. The Imperial authority would be entirely discredited in the eyes of the people. The Chinese officials, pressed for money, and relying on foreign support, would become more than ever cruel, corrupt, and oppressive; and the Chinese, deprived of popular insurrection, their rude but efficacious remedy against local oppressors, would with justice throw on the foreigner the odium of excesses which his presence alone would render possible. The consequence would be popular hostility, reprisals, and that train of events which would render it necessary to appropriate permanently the province occupied, or to retire from it, leaving behind a bitter ill-will among the people. No course could be so well calculated to lower our national reputation as to lend our material support to a Government, the corruption of whose authorities is only checked by its weakness."

DR. LEGGE.

That which Sir F. Bruce anticipated was, he thought, not unlikely to occur; but he should wish to refer also to another authority—that of Dr. Legge, a man who had mixed little in politics, but who knew China well, who had spent the greater part of his life there, who was one of the first Chinese scholars of the day, and who was content to pursue his missionary labours at Hong Kong, never engaging in trade, but living on a small stipend, and who had every reason to be in favour of the present system, inasmuch as he was nearly related to the originator of Anglo-Chinese inspectors of Customs and the armed force placed at their disposal. Dr. Legge said—

"It behoves the British Parliament—the British people—to look to this new complication of affairs in China, to look it fairly in the face. If we are to pacify the empire we shall require 50,000 troops, and may then find again that we have undertaken more than we equal to. But I ask in whose interest we are to put down the rebellion? Hitherto Admiral Hope has been acting in the interest of the Imperial Government. Of course, if we fight its battles it must pay all expenses. The British people cannot be expected to sacrifice the lives of its sons, and its treasure, to establish the Manchou rule, and all gratuitously. Now I protest against our putting down the rebellion on behalf of the Imperial Government, however that may pay us for it, on two grounds. The first is the ground of its cruelty. I have read harrowing accounts of the devastations of the rebels—how the country is blasted by their march. The accounts are no doubt true. But I have seen also the ways of the Imperial braves, and kept company with them for hours together. Their march over the country was like the progress of locusts and caterpillars. Their thirst for blood was quenchless; their outrages on the young and old were indescribable. On the score of cruelty the case must be about even, inclining to the Imperialist side, if we may judge on the principle that the more cowardly are the more cruel. But the question is not about the masses, but about the officers of Government. And to know what will be the consequence if we put down the rebels on behalf of the Imperial Government, we have only to think of Yeh and his doings in Canton, when in almost twelve months he beheaded 70,000. I have heard Sir John Bowring, when other arguments for the *Arrow* war were exhausted, enlarge graphically on Yeh's barbarities. If we put down the Taipings, we shall kill our thousands on the battle-field, and the governors of provinces will kill their tens of thousands in the execution areas. We shall be installing so many Yehs Our high officers will be the ministers to so many butchers of human beings."

Such was the opinion of a man who knew China better almost than any other Englishman, and who was a perfectly unbiassed witness. The policy which we had unfortunately adopted in China, therefore, was open to grave objection, and if we failed in our efforts to restore order there, we should inflict a great stain on the British name and undergo the risk of so infuriating the rebels that hostilities would be indefinitely prolonged, and the solution of the Chinese difficulty delayed, which seemed to lie in the appearance on the stage of some native of the country with sufficient powers of mind to raise himself to a position of high authority, and to influence his countrymen in the right direction. If we succeeded in our policy we should establish in the Chinese empire one of the most intolerant tyrannies which the world ever saw. Every kind of cruelty would be committed in our name, deeds would be done which would cause a blush to rise to the cheek of every Englishman, until at last we should be forced to put an end to the very Power which we had been attempting to galvanize

Digitized by Google

into a temporary existence. What we were now doing in China had been done in India over and over again. In India our course had been first to make war against some native Prince, then having beaten him we destroyed his army and weakened his authority in the eyes of his people; next, we placed a resident at his court, then we undertook to protect him from external and internal danger, and also to collect his revenue. Thus, we gradually insinuated ourselves into every part of his Government until he had nothing left but his great fortune, which he spent in riot and debauchery, and at last we were obliged, for very shame, to put an entire end to his power. What had happened repeateuly in India was just as likely to happen in China. Now, what was the great object of all these proceedings? Why, to maintain our trade and increase our commercial supremacy in the China seas. But had it never occurred to those who were carrying out this policy that they were not really assisting, but rather pursuing a course calculated seriously to injure our trade? It was a remarkable fact that almost all our silk and a great portion of our tea came from the very provinces which had for years past been in the hands of the rebels. Yet what was the result? In 1848 we imported from China 20,000 bales of silk and 65,000,000lb. of tea, the total value of both being seven millions sterling. In 1862 the exports to this country from China had risen to 90 000 bales of silk and 110,000,000lb. of tea, the total value of both amounting to 17 millions sterling. Free access was afforded to our traders in the districts occupied by the Taipings, and no obstruction was offered to the transit of commodities. On this point General Staveley, writing on the 3rd of July, 1862, said:—

"Europeans continue to visit the rebel country for purposes of trade, and are treated with civility; large quantities of silk have been brought nto Shanghai during the last fortnight, and trade seems in a thriving state."

THE MERCHANTS' OPINIONS.

Many of our merchants thought that our interference, by driving the rebels from the walled towns into the silk and tea districts, would create further ruin and devastation. They also said there was a probability that the Taipings would become so infuriated by our hostilities against them that they would impede our trade by shutting up the rivers and preventing our agents from buying or selling. This they had never done yet, but when they saw British officers embarked in regular organised campaigns against them they were not unlikely to take steps for thwarting our great commercial objects. He had had an opportunity of consulting many London commercial houses engaged in the trade with China, and he found that they were to a man opposed to Captain Sherard Osborn's expedition, and against an interference calculated, as they believed, seriously to damage our commercial interests.

RUSSIAN PROGRESS IN CHINA.

There was only one other point of view in which he wished to regard this question, viz., its probable effect upon our relations with foreign Powers, and especially with Russia and France. Russia had an interest in those seas which was increasing every day. Until quite lately the Amoor formed the boundary between the Russian and Chinese empires, and the Russians had their southernmost settlement at the mouth of that river. In May, 1858, however, Russia concluded at Peking a treaty of boundary, as well as of commerce, with China, by which the territories situated between the river Ousouri and the sea should be possessed in common between the Emperor of China and the Emperor of Russia. Those territories comprised 900 miles of coast. The new line of demarcation between China and Russia was obtained by taking the river Ousouri from its point of confluence with the Amoor, and up to its head waters, then drawing a line from its head waters to the sea. That gave a long strip of coast, 900 miles in extent, possessing numerous valuable harbours. At the most southern portion of this district was situated a fine harbour, called Victoria Bay. There the Russians had already begun to establish themselves, to build ships, and to create something like a trade. That place was situated within only three days' sail of Shanghai. Schemes were, he believed, under constant consideration at St. Petersburg for uniting this port at Victoria Bay with Europe by telegraph; and it was not at all impossible that before long this new town in the Pacific Ocean would be thus connected with Moscow. The restoration of tranquillity to the Russian Empire would, no doubt, be quickly followed by the execution of this project, for which the surveys had been made. That indicated the great interests and objects which Russia had in these countries. Russia had also shown a desire to assist the Chinese Government in the suppression of the Taiping rebellion, so that our interference in China was likely to be followed by the interference of that great Power also.

FRANCE IN CHINA AND COCHIN CHINA.

But France likewise was in a very curious position in relation to those regions. She had expended large sums of money in the settlement of Cochin China, and her efforts, he was afraid, had to some extent been a failure. Yet if France succeeded in restoring confidence to those districts a considerable trade would spring up there and in Camboja. But France had other objects in view in China besides those of a commercial nature. At the present moment her commercial interests in China were very small —indeed, almost absolutely null. But the French had several depôts in China, and a very large force at Ningpo, commanded by French officers. The rank and file were drawn from the scum of the Chinese, and some of the officers came from that class of Europeans which had made the name of foreigner infamous in China. It was also stated by the same authority upon which he based this statement, that our Chinese contingent were deserting to the French contingent, attracted by the superior advantages of pay and plunder which were offered them. The objects of the French were purely ecclesiastical. For centuries the French Church had taken an active interest in Chinese missions. At the end of the seventeenth century the Jesuit missionaries spread all over the country. They established schools; they educated those who aspired to the higher offices of State, and for some years, under the name of tutors to the Emperor, they exercised really the functions of Prime Ministers. In 1726 great persecution arose. Numbers of the native Christians were killed, and whilst many of the Jesuits gave up their lives in the defence of their faith—others were glad to leave the country. But even since that time, there had always been a number of ecclesiastics in China. The Jesuits had returned. The exertions of Roman Catholic missionaries were increasing, and they were laying claim to many sites in different parts, which were occupied by French ecclesiastics centuries ago, and not only laying claim but actually obtaining possession of them. It was for these objects that the French wished to extend their influence, and we could scarcely say to them, "You shall not do in the interest of religion that which we are doing in the interest of trade." He might be asked, what practical steps should be taken? He knew the enormous difficulty of receding from the course upon which they had entered and turning back to the old line of neutrality.

RESCINDMENT OF THE ORDER IN COUNCIL.

But the Order in Council was only for two years, and Her Majesty's Government might intimate to the Chinese Government that at the end of two, three, or four years our officers must return to their duties, and there must be an end to our interference and assistance. He was fairly convinced that the further we pursued the course in which we had embarked, the deeper we should get into the mire, and that public opinion would ultimately force the Government to retrace their steps. He had shown to the House, as well as his ability served, what was the present state of things in China. With interests so diverse and so important, it could be only a sketch, and he wished that sketch had been made by some abler man. But he was perfectly convinced that our present policy, which was as novel as it was dangerous, was one from which we ought to recede as soon as possible. Our old attitude to the Chinese Government was hostility. It passed to neutrality, and it had now proceeded to active interference in the affairs of that nation. He believed he had shown that the course which we were taking might seriously imperil the character of the British name, might injure our commercial interests in the Eastern seas, might involve us in responsibilities and liabilities, the end of which it was impossible to foresee, and above all might produce serious embarrassment in our relations with foreign Powers. With all these considerations weighing upon his mind, he awaited with anxiety the explanations which were about to be given on the part of Her Majesty's Government.

Mr. H. VERNEY did not at all agree with the noble lord in the expression of his regret that this subject had not fallen into abler hands; for a more able and interesting statement he had seldom heard in that House, or one which commended itself more generally to their sympathies. He regretted, however, that the noble lord had thought it necessary to illustrate his view of our conduct in China by throwing anything like discredit on our conduct in India; because although there might have been occasions to which his observations would apply, still, generally speaking, the conduct pursued by the British authorities in India in circumstances similar to those referred to had been such as to bring great blessings on the country, and diminish the evils under which different parts of India laboured. About thirty-three years ago the district of Hyderabad was one of the worst in India. It was utterly disorganised, and altogether in a most disgraceful condition. The Governor-General of that day sent an officer with very high powers into that district, and the consequence was that the last thirty years there had not been a more quiet or well-ordered district in India. Our object in China had been to raise the character of the Chinese authorities, and gradually, by good example and the conduct we should urge upon them, to fit them to govern their own country, and to maintain peace there, which was far more important to our interests than any authority we could exercise ourselves. As the Order in Council was only to last two years, it was manifestly the intention and desire of the Government that the Chinese authorities should within that period be able to conduct their own affairs. Having followed with much attention the proceedings of our authorities in China, he had learnt that they had interfered merely for the purpose of protecting British interests and the lives and property of our fellow-countrymen. The great increase that had taken place within the last six years in the value of property at Shanghai showed how beneficial our action had been, and he could not but think that the thirty miles' radius round that city was a very proper arrangement. He thought that justice was not done to Colonel Ward, who had been remarkably successful in drilling the native troops. As long as we exercised our influence in China only for the improvement and benefit of China, together with the fair interests of our countrymen engaged in commerce there, we had a reasonable hope of being able before long to withdraw our troops from that country, and he had no doubt but that such was the desire of Her Majesty's Government.

REPLY OF GOVERNMENT.

Mr. LAYARD could assure the House that he had no misgivings upon the policy of Her Majesty's Government in China. It would appear, from some observations which fell from the noble lord, that when the question had been raised some time ago he had abstained from saying anything upon the subject because he did not dare to face the question. He thought he had before explained the reasons why he did not rise upon that occasion to reply to the hon. gentleman opposite. It had been said that the question was one of the gravest interest, but when he looked at the state of the House then, and remembered what it had been on a former occasion, he could not understand the vast interest of a question which was so neglected by the House of Commons. He had said that he had no misgivings as to the policy of the Government, which agreed entirely with the views he had entertained as long as he sat in that House. He was not surprised that the noble lord—who had brought forward the question in a speech of great length and of considerable ability—should find fault with the Government. It was the duty of the noble lord to find fault with the Government, and to censure everything they did. And so nothing that had been done in China had escaped the noble lord's censure —the policy of the Government in relation to that country was fraught with mischief and danger. If all that the noble lord had said was true, the Government deserved the strongest censure; but he was surprised the hon. member for Rochdale, who cheered the noble lord, should be of the same opinion, and should unite with him in condemning the Government. He should have thought the hon. member for Rochdale and his friends would have supported the Government in a policy which, when he had the honour of sitting among them below the gangway, was the very policy they had suggested. But it was the duty of the Government to deal with China and other Eastern nations as with civilised nations, upon a footing of complete justice, and not to ride rough-shod over them—not to treat them as

Monetary and Commercial.

CITY, WEDNESDAY, JULY 15.

The first annual meeting of the Bank of Hindustan, China, and Japan, was held on the 6th inst., and a report of the proceedings will be found in another column.

A call of £5 is to be paid on the shares in the Bank of Hindustan, China, and Japan (Limited), by the 10th August.

Two ships belonging to the late Mr. Duncan Dunbar were sold at Lloyd's. The *Nile* realised £3,250, and the *Bayswater* £4,775.

At the sixth annual meeting of the Manchester Cotton Supply Association, the satisfactory and promising character of the samples of this staple received from China was specially adverted to.

The shipping firm of Messrs. W. S. Lindsay and Co. will henceforth be carried on under the style of Stringer, Pembroke, and Co. Mr. Lindsay retires from that branch of business, although he will still continue his connexion with the city so far as regards any general mercantile transactions.

The biddings for 40,00,000 rupees (£400,000) in bills on India took place at the Bank of England. The proportions allotted were:—To Calcutta, 22,00,000 rupees; to Bombay, 16,00,000 rupees; and to Madras, 2,00,000 rupees. The declared minimum price was as before, viz., 1s. 11½d. per rupee on Calcutta, and 1s. 11¾d. on Bombay and Madras. The applications within the limits amounted to 107 lacs (£1,070,000). Tenders on Calcutta at 1s. 11½d. will receive about 32 per cent.; on Bombay, at 1s. 11¾d., about 21 per cent.; on Madras, at 1s. 11¾d., about 45 per cent., and all above these prices in full.

The next meeting of the China and Japan Steam Company will be held on the 21st inst. The steamer *Mona*, belonging to this company, will be despatched for China in a few days, calling at Singapore.

Mr. Morgan, of the firm of Morgan Brothers, has joined the firm of Saunders and Otley, which will be conducted in future under the style of Saunders Otley, and Morgan, 9, Waterloo-place, Pall Mall.

THE AGRA BANK AND THE CLEARING COMMITTEE.

A question of importance has lately been agitated in consequence of the exclusive spirit practised by the Committee of the Bankers' Clearing House. The committee is composed of members of the old private banking firms, and this explains to some extent their exclusiveness. The Agra Bank has now for nearly six years carried on the business of London bankers in addition to their India and China operations, and on this ground they applied to the committee for permission to clear on their own account. Hitherto they have effected the clearance of all their cheques through the London and Westminster Bank, but having now attained a *status* as London bankers, they very naturally wished to perform their own business, it being a *desideratum* to their customers in point of time and general convenience. The committee, however, decided against their application on the ground that the Agra must be considered as an Indian and not a London bank. No doubt these private banking firms look upon the London establishments of originally Indian banks as an encroachment on their preserves. This may be only natural, and may be compared with the spirit of opposition evinced by the private underwriters at Lloyds, when joint-stock insurance companies were first introduced; but the "clearing committee," like the private underwriters, will find that they must ere long give in to the interlopers. The committee are supported by the *Economist*, much to the surprise of most commercial men, seeing that the *prestige* of that journal was made by the support of "Free-trade," and not exclusive principles. The *Daily News* of the 29th June exposes most ably the fallacy of the reasoning in the *Economist*. *The Times* says:—

> At a meeting of the Agra and United Service Bank, in reply to a question from a shareholder whether the Committee of Bankers had consented to admit the Agra Bank to the clearing-house, a correspondence was read which embraced a curt refusal on the part of the committee. A subsequent letter from the Agra Bank to the committee, suggesting that some reason should be assigned for this decision, has been allowed to remain unanswered for two months. It is consequently to be presumed that there is no sufficient reasen to be given, and that the act is one either of narrow policy or mere caprice.

The following financial and other undertakings have been announced since our last issue:—

The Hudson's Bay Company, as reconstructed under the auspices of the International Financial Society, capital £2,000,000, in £20 stock, for purposes of trade, colonisation, sale of mining rights, and construction of telegraphic and travelling route, and establishment of postal communication from Canada to British Columbia.

The Life Association of England, to carry out an entire reconstruction of the system of life assurance on a plan devised by their consulting referee. Capital £500,000.

The Brazilian and Portuguese Bank, capital £1,000,000, in 50,000 shares of £20 each, to develop, by financial aid, the trade of Brazil and Portugal.

The Richmond Hill Hotel Company, for the construction of a first-class hotel, capital £100,000, in shares of £10 each.

The Anglo-Brazilian Gold Company, capital £100,000, in £1 shares, for the purchase and development of a Brazilian gold mine.

The Portugal Iron and Coal Company, in 10,000 shares of £10 each, for working a Portuguese mineral district, rich in iron and coal.

The London and African Trading Company, capital £500,000, in £25 shares, for conducting trade with the West Coast of Africa. A rival to this has also been established, called the African Merchants' Company.

BOARD OF TRADE RETURNS.

The Board of Trade Returns for the month ending May 31st have made their appearance. The following were the exportations to the Far East in that period:—

To CHINA.—Cotton Yarn: 121,520 lbs., of the value of £11,762, against 556,084 lbs., of the value of £31,005, in May, 1862, and 765,720 lbs., of the value of £34,243 in May, 1861. The total export in the first five months of this year was 382,790 lbs., of the value of £37,027, against 2,267,113 lbs., of the value of £128,931 in the previous year. Woollen and Worsted Manufactures: 202,435 yards, of the value of £40,343 in May last, against 323,624 yards, of the value of £40,453 in May, 1862, and 430,304 yards, of the value of £53,788 in May, 1861. The total export for the first five months of this year was 825,512 yards, of the value of £142,660, against 1,022,048 yards, of the value of £127,756 in the same period last year. Worsted Stuffs: 1,023,188 yards, of the value of £75,579, against 1,159,318 yards, of the value of £57,391 in May, 1862, and 436,100 yards, of the value of £33,609 in May, 1861. The total export for the first five months of this year was 3,212,261 yards, of the value of £229,807, against 3,125,948 yards, of the value of £154,370 in the corresponding period of last year. Lead: 1,798 tons, of the value of £38,307, against 1,628 tons, of the value of £33,804 in May, 1862, and 607 tons, of the value of £13,310 in May, 1861. Total export for the first five months of this year was 6,990 tons, of the value of £150,838, against 3,529 tons, of the value of £75,957 in the corresponding period of last year.

To PHILIPPINE ISLANDS.—Cotton Goods: No exports in May; quantity exported up to that period in 1863 reached 3,201,355 yards, of the value of £77,242.

To JAVA.—Cotton Goods: Export for last May, 2,808,053 yards, o the value of £68,504, against 6,862,495 yards, of the value of £117,631 in May, 1861. The quantity exported in the first five months of this year was 4,129,649 yards, of the value of £100,948, against 16,980,693 yards, of the value of £305,699, in the corresponding period of 1862.

To CEYLON.—Cotton Yarn: Export in May last 45,000 lbs., of the value of £5,200, against 24,000 lbs. in May, 1863, of the value of £2,150. The total export for the first five months of this year was 163,000 lbs., of the value of £18,800, against 161,750 lbs., of the value of £12,010 in the corresponding period of 1862.

The exports, as per Sam Mendel's Circular, are, from London, Liverpool, and the Clyde, from June 17th to July 1st, as follows:—

To SHANGHAI.—Plain cottons, 1,124,230 yards; coloured cottons, 940,815 yards; printed cottons, 8,400 yards.

To HONG KONG.—Plain cottons, 1,787,053 yards; coloured cottons, 232,786 yards; printed cottons, 27,385 yards; twist, 407,214 lbs.

To SINGAPORE.—Plain cottons, 1,993,939 yards; coloured cottons, 66,670 yards; printed cottons, 103,374 yards; twist, 89,600 lbs.

To BATAVIA.—Plain cottons, 698,607 yards; coloured cottons, 324,359 yards; printed cottons, 209,395 yards; twist, 127,800 lbs.

To MANILA.—Plain cottons, 820,320 yards; coloured cottons, 1,128,863 yards; printed cottons, 37,000 yards; twist, 3,600 lbs.

The amount of bullion by the P. and O. Company's str. *Pera*, from Southampton, on the 4th inst., was:—In gold: To Madras, £895. In silver: To Penang, £2,000; to Hong Kong, £19,913; to Foo-chow-Foo, £1,040; to Shanghai, £76,895. Total in gold, £895; in silver, £99,848.

ARTICLES OF IMPORT.

TEA.—There has been no revival of demand in our market during the past month, either for export or home consumption, and as the arrivals have been fully equal to the deliveries, and as there has been a disposition on the part of many importers to realise, there has been a general decline in prices, and even at this decline there seems but little inclination on the part of the trade to buy, although within the past two months quotations for some of the medium kinds of Congou have given way from 2d. to 3d. per lb., and they may now be considered relatively cheap, looking especially at the duty now being only 1s. per lb. There has been a moderate inquiry for the low and dusty kinds of Congou, as also for the fair common kinds with leaf, but these must be quoted fully ½d. per lb. lower. Good common has only been in limited demand, and is now quoted at 1s. 1d. to 1s. 1½d. per lb. Fair to good Sinchune Kais, and fair to good Kaisow kinds, have been freely offered, and the sales made show a decline of 1d. to 1½d. per lb., but at this reduction there has been a slight demand. Common to fair Ho-hows and Ning-chows have been difficult of sale, and prices have given way to the extent of 1d. to 1½d. per lb., but as yet there is not much inquiry for them. Good Ning-chows and second class Honams, Monings, and Wopaks, have been sold fully 1d. per lb. lower. Fine Kaisows, and Monings, and Wopaks

Digitized by Google

have been neglected; but for the few export orders that have come to hand full prices have been paid for superior quality. Tayshans have sold ½d. to 1d. per lb. lower. Fair to good Oolongs have sold 1d. per lb. lower; fine remain much as before. In Souchongs and Flowery Pekoes business has been very limited, and prices for the former, for good to fine qualities, must be quoted 2d. per lb. lower. Scented Capers show no material alteration; and the common fair sorts remain difficult of sale, with a partial inquiry for good to fine. Fair to good Orange Pekoes, both of Foo-chow and Canton-make, have only been in moderate request, and prices have given way about 1d. per lb. Fine have been rather better supported. Uncoloured Japans have sold to a fair extent, under 1s. 6d. per lb. Indian Teas, both the Assam Company's and those of private growth commanded very high prices at the Public Sales of the 9th instant. Further sales are declared for the 14th instant. In Green Teas there has been a moderate amount of business, chiefly however in Young Hysons, the low prices ruling for these having induced purchases partly for speculation and partly for shipment, and prices show a slight improvement for nearly all grades, including Japan kinds, which have hitherto been nearly unsaleable. Twankays and Hyson Skins show no alteration. Hysons, owing to larger supplies on offer have declined about 1d. per lb. Imperials have maintained former rates, but Gunpowders of all kinds show a reduction of fully 1d. per lb. from the recent extreme rates. Canton Gunpowders have sold rather lower, and Young Hysons remain without improvement. The public sales have comprised 58,976 packages, of which 15,107 packages were printed "without reserve," and 3,274 packages were Indian teas. Of these 41,447 packages have passed auction, and 21,674 packages were sold, including 12,240 packages "without reserve," and 3,149 packages Indian teas. The sales will conclude the day after to-morrow.

SILK.—Another month of extreme quiet and limited transactions in Silk—perhaps almost the usual fluctuations in feeling but no business—prices however are without material change. Various circumstances tend to this effect. The smallness of the arrivals, the result of the European crop now generally looked upon as in aggregate little in excess of last year—an opinion backed to some extent by considerable speculative purchases in those districts of Italy where prices were relatively the lowest—the uncertainty and doubt as to the course of events in Japan, and lastly, faint, although it may be, always more or less a latent hope of the modification of American difficulties. All these causes have in their degree rendered importers and holders comparatively indifferent as to selling, the more so perhaps as our prices show considerable loss upon the last quotations from the places of import, while on the other hand on the part of large operators there is continual watchfulness with an evident desire to get into stock, should anything occur to lead to the belief that prices have reached their lowest point. The long-continued abstention from purchases has, of course, very much exhausted the stocks in the hands of consumers, so that they are all more or less in a position to act when the fitting moment may be thought to have arrived. Japan Silks, perhaps, of all classes shows the greatest susceptibility both from its comparatively moderate prices and its general adaptability to the present requirements of consumption. Trade unfortunately continues bad, and the deliveries are upon the smallest possible scale. At New York the quotations are:—Re-reeled Canton Cumchook, Nos. 1 and 2, $8.25 to $8.50; Long Reel Canton, No. 3, $5; Japan, $8 to $10; Tsatlees, Nos. 1 and 2, $10 to $10.50; do., Hong, $9 to $9.50; Taysams, Usual Reel, Nos. 1 and 2, $8.25 to $9; do., do., Nos. 3 and 4, $7 to $7.75; do., do., Re-reeled, A 1, none.

Chinese Thrown	722	1,036	844	1,861	923	1,824

SUGAR.—Large landings and heavier stock than at any previous period. This augmentation caused the improved demand noticed in our last issue to subside. With the extreme languor existing, sales have been effected at declining rates. 14,000 bags Clayed Manila were taken by private contract at a relatively full price, but 22,183 bags at auction, met few offers, and being held firmly, were withdrawn. Unclayed has been neglected. In Java nothing has been reported. Our quotations are:—Siam and China, white, 22s. to 26s. per cwt.; brown and yellow, 14s. to 21s. 6d.; Manilla, clayed, 18s. to 19s.; Muscovade, 15s. to 16s.; Java, grey and white, 23s. to 26s. 6d.; brown and yellow, 15s. to 23s.

COFFEE.—Ceylon: Abundant arrivals have had a depressing influence; public sales of plantation of considerable amount have goneo ff irregularly, mostly at drooping rates, palish and grey qualities only 1s. to 1s. 6d. per cwt. below our last quotations, but the bright coloury sorts have been of more ready sale at comparatively full prices. Native Ceylon, of which the supply by auction has also been liberal, has, in common with the inferior kinds of Plantation, been with some difficulty disposed of at a similar reduction. Mocha has been in only partial request, and holders showing firmness, very little has been done. Ceylon, native, good ordinary to fine, 70s. 6d. to 74s. 6d. per cwt.; ordinary, 67s. to 70s.; Plantation, ordinary to fine ordinary, 72s. to 81s.; fine ordinary to middling, 81s. to 87s.; good middling to fine, 88s. to 102s.; Java, 67s. to 93s.; Singapore, 60s. to 75s.; Sumatra and Padang, 59s. to 74s.

RICE.—The demand has improved, and transactions have taken place at somewhat stiffer rates. There have been low Nakrenzie, 7s. to 7s. 6d. (cash), low middling to fair, 8s. 3d. to 9s. 6d.; ordinary to middling Moulmein, 7s. 6d. to 8s. 6d.; good fair Bassein, 9s. 9d., and fine Rangoon, 10s. 9d.; also to arrive, 150 tons cargo Bengal at 8s. 1½d. to ship, and 100 tons white at 13s. 6d.

SAGO.—Goes slowly off, with exception of good small pearl, at barely previous rates; we quote small pearl, 19s. 6d. to 20s.; very common, 16s. 6d. to 17s.; fair to good large and medium, 17s. to 18s. Sago Flour: Only moderate quantities have been sold at 13s. 9d.

SPICES.—Pepper, Black: Little animation; only about 4,000 bags Eastern sold; Penang and Siam, 3⅜d. to 3½d.; Tellicherry, 3⅞d.; Malabar, 4⅛d. White Pepper: 5⅜d. Cinnamon: Limited inquiry; 300 bales; Ceylon realised previous rates. Cassia Lignia: Freely dealt in; nearly 2,700 packages sold thus:—Very ordinary course to low middling, 83s. to 86s.; middling to good middling, 87s. to 91s.; good, 93s.; mouldy and broken, from 79s. to 85s. Zanzibar Cloves: These have gradually receded ½d. per lb., at which, however, 2,600 bags have been disposed of; ordinary dark to fair, 3¼d. to 3½d.; good bright, 3½d. to 3⅝d.; 100 bags Amboyna went at 4d. to 4⅛d.; 14 cases middling to fine Penang fetched 1s. 2d. to 1s. 5d. Cochin Ginger: 426 at public sale were only partly sold; common to fair, 67s. to 78s.; bold, 96s.; fine, 118s.; in other kinds there is nothing of moment to report. Mace: This has brought full prices, and 73 cases were chiefly taken off; low to fair red, 8d. to 1s.; palish, 1s. 1d. to 1s. 3d.; bright, 1s. 5d. to 1s. 8d. Nutmegs: 254 cases have been nearly all realised at the former value; wormy, 9d.; small and middling, 10d. to 1s. 3d.; good middling to rather bold, 1s. 4d. to 1s. 11d.; good, 2s. 5d. to 3s.; fine, 3s. 4d. to 3s. 7d. per lb.

COTTON.—Surat: 1s. 1d. to 1s. 7d. per lb.; since the decline of ¼d. to ½d. per lb., there has been a recovery of ⅛d. of value

HEMP.—Markets very firm. Manila: £23 to £26 per ton; market animated, and rates have risen fully 10s. per ton; 776 bales sold at auction at £24 to £26 per ton for middling to good roping, down to £23 for common, and large business accomplished privately upon similar terms; sales of Sunn at £24 for fine.

TIN.—Banca, £130 to £131 per ton; Straits, £126 to £128 per ton. Market quiet; moderate business done in both descriptions; in Banca within our quotations; in Straits at £126. 10s. to £127 for cash, £128 three months prompt, and £128. 10s. for arrival.

JAPAN WAX.—60s. to 70s. per cwt.; large arrivals not yet on market; scarcely anything doing in the interim.

MISCELLANEOUS.—Rum: Small business at easier prices; quotation 1s. 3½d. to 1s. 4½d. per gallon. Tapioca: Limited sale, Pearl middling to fine quality withdrawn at 24s. to 28s. per cwt. Aloes: £1 to £2 per cwt. cheaper. Cardamons: 6d. per lb. cheaper; quotation 5s. to 7s. per lb. Caster Oil: 4½d. to 6d. per lb.; Calcutta sold at slight decline of ¼d. per lb. Galls: We quote Japan and China 42s. to 65s. per ton; 277 cases of Japan at auction, sold at 45s. to 49s. Mother-o'Pearl Shells: 25s. to 64s. per cwt. Oil of Anniseed: 5s. 8d. to 5s. 9d. per lb.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 5s. to £6. 10s.; nail rod, £7 to £7. 5s.; hoops, £8. 5s. to £8. 10s.; sheets, single, £9. 5s. to £9. 15s.; Staffordshire bars, £7. 10s. to £8; rails, £5. 7s. 6d. to £5s. 17s. 6d.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and Sheating, £99 per ton; yellow metal, 8¼d. to 8⅜d. per lb.

TIN.—122s. for block; 123s. for bar. Tin plates, best charcoal, I.C., 28s. 6d. to £29s. 6d. per box.

LEAD, &c.—English pig, £20. 5s. to £20. 10s.; shot, patent, £23. 10s.; sheet, £21. 10s.; spelter, £17. 17s. 6d.; zinc, English sheet, £23; quicksilver, £7 per bottle.

The following is from the circular of Messrs. French and Smith:—The metal market has been active throughout the past month, particularly in Copper and Foreign Tin. Iron: In Welsh and Staffordshire there has been a fair demand, but prices have not been altered. Scotch Pig has advanced, the prices being about 2s. per ton higher than at the beginning of the month. Copper: English smelters have declared an advance of £3 per ton, making the price for sheets and sheathing £99, for flat bottoms £104, and £109 per ton for hammered; unmanufactured, £92 for tough cake and ingot, and £95 for best selected. Foreign Copper has quite kept pace with the advance in English, and very little is offered. An advance of ¼d. per lb. on price of yellow metal was declared on the 30th ult. Tin: The annual sale of Banca Tin took place on the 24th ult., at Amsterdam, when the whole quantity (119,200 slabs) offered was sold at 76 guilders, equal to 130s. per cwt. laid down here, sales have since been made at 76½ and 77 guilders, and 78 guilders is now the quotation in Holland. Straits: A few parcels have been sold at 126s. 6d. and 127s. cash, and 128s. for full prompt. English is steady at quotations. Tin Plates: The demand, principally for coke, has been good during the past month, and quotations 6d. to 1s. per box higher. The quantity shipped to all parts was about 90,000 boxes, against 85,000 in June, 1862. Lead has been quiet. Spelter: Scarcely any business has

Digitized by Google

been done in this metal, and quotations are 5s. less than at the beginning of the last month. The stock is 5,200 tons, against 5,700 tons the same period last year.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton during the present year (to 30th June) by the P. and O. Company's mail steamers.

	Gold.	Silver
Shanghai	—	£714,562
Foo-Chow-Foo	—	8,119
Hong Kong	—	622,341
Amoy	—	1,000
Singapore	£4,650	178,895*
Penang	£500	4,750
Ceylon	£93,101	—

FROM MARSEILLES.
(BY THE P. AND O. COMPANY'S STEAMERS.)

	Gold.	Silver
Shanghai	—	£174,274
Hong Kong	—	179,420
Singapore	£4,540	91,156
Penang	—	1,040
Foo-Chow-Foo	—	—
Ceylon	£220	—

The bullion by the French mail is as follows:—To Singapore, £2.152 in gold, and £99,700 in silver. To Hong Kong: In silver, £223,550. To Shanghai: In silver, £134,934.

GOLD AND SILVER.

Bar Gold (per ounce)	£3 17 9	
Spanish Doubloons	3 16 0	to 3 17 0
United States Gold Coin	3 16 8	
Silver in Bars	0 5 1½	
Mexican Dollars	0 5 2¼	

MANCHESTER MARKETS.

We have had a more active business in yarns, at about the same prices. The buying has been chiefly for Germany and the Mediterranean, with a fair business also for the home trade. The India people have made a good many offers in yarns suited to the markets of that country, some of which have been accepted. In general spinners are asking higher prices, which has rather restricted operations. The tone of the yarn market is altogether better, and it closes rather strong.

Sam Mendel's circular quotes Grey Shirtings, 8 lbs., 18s. 6d.; 9 lbs, 19s. 6d.; T.-Cloths, 11s. 6d; White Spot Shirtings 18s.; White Brocades, 18s. 3d.; Damasks, 31s. 9d.; Maddapollams, 6s. 4d. to 6s. 6d.; Cotton Yarn, 16-24, 2s. 2d.

FREIGHTS AND CHARTERS.

Outward freights are dull, there being but little business doing in exports. In homeward freights there is no change to report.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 42s. 6d. meast. To Nagasaki: 65s. To Hankow: 65s. weight, 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. measurement. To Shanghai: 50s. weight, 30s. measurement. To Hong Kong: 40s. weight, 35s. measurement. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. to 35s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £42 and £2. For Shanghai: £50 and £2. 7s. 6d. For Manila: £1. 10s. For the Philippine Islands, Penay, or Zebu: £2. For Singapore: £27 and £1. 7s. 0d. For Penang: £24. For Galle: £27. and £1. 6s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have taken up the Louisa for the conveyance of troops from Portsmouth and Cork to Hong Kong, and have invited tenders for the conveyance of 344 tons Government stores (navy provisions, &c.) from the River Thames to Hong Kong.

CASUALTIES.

The Dictator, Phillips, from Liverpool to Hong Kong, with coals, which was burnt by the Confederate steamer Georgia, was captured on April 25, in lat. 25 N., lon. 22 W.

The Eva Johanna and Bochore, from Batavia for Rotterdam, put into the Mauritius, May 7, for repairs, having experienced heavy weather, during which she made water. Her upper works had been caulked, &c., and after repairing she sailed, June 5, for her destination.

The Adela, Symons, from Galle for Falmouth, put into the Mauritius June 1, with foremast cut away, having experienced a hurricane May 19, in lat. 14 S., lon. 79 E., which lasted 14 hours.

The Fairy (British barque), of South Shields, from Colombo for London, with coffee and oil, foundered at sea May 20, in lat. 14 S., lon. 79 E. Crew saved and landed at the Mauritius by the Arundel, Broadfoot, from Bombay.

The hull and materials of the Bittern, from Shanghai for Montreal, which stranded at Louisburg June 4, were to be sold on June 11.

At Mauritius, May 7, Eva Johanna and Bochore, from Batavia for Rotterdam, for repairs; Lizzie and Kate, Morton, from Siam; 14, Martaban, Hepburn, from Shanghai; June 1, Adela, Symons, from Galle for Falmouth; Marie Anais, de Venancourt, from Colombo. Sailed from Mauritius, May 27, Chekiang (steamer), Wadsworth, for Hong Kong.

WHOLESALE AND SHIPPING PRICES ON APPLICATION AT THE

WORKS, UPPER MARSH, LAMBETH, LONDON.

CHOLERA, DYSENTERY, DIARRHŒA, AGUE, FEVER, SPASMS, &c. The Safest and Best REMEDY is that marvellous remedy known a

CHLORODYNE,

which was discovered by Dr. J. Collis Browne, M.R.C.S.L. (ex-Army Medical Staff), and the SECRET OF HIS RECIPE CONFIDED ONLY to J. T. DAVENPORT, pharmaceutical chemist, 33, Great Russel-street, Bloomsbury-square, who is the sole manufacturer. Medical testimony furnished by the highest authorities in military, naval, and Civil practice, and numerous gratifying statements from the public generally, establishes this property as invaluable. It relieves pain, soothes the system, inducing refreshing and soothing sleep without producing or having any unpleasant effects like opium, and may be taken at any time in a few drop doses. Extracts from the General Board of Health, London, as to its efficacy in Cholera:—"Third Stage, or Collapse—In all cases restoring the pulse. So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases." From Dr. Andrew Smith, Director-General Army Medical Department:—"I have seen it used, and apparently with much advantage." From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an anti-spasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am perfectly satisfied with the results." From Dr. M. M'Millman, of New Galloway, Scotland:—"I consider it the most valuable medicine known." Dr. M'Grigor Croft, late Army Staff, says:—"It is a most invaluable medicine." Dr. Gibbon, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa." Dr. I. Baker, Bideford:—"It is without doubt the most valuable and certain anodyne we have."

Sold in bottles, 2s. 9d. and 4s. 6d., by the sole Agent and Manufacturer, T. DAVENPORT, 33, Great Russell-street, Bloomsbury-square, London; or sent carriage free on receipt of Stamps or Post-office Order, and with Professional Testimonials enclosed. None genuine without the words "Dr. J. Collis Browne's Chlorodyne" engraved on the Government stamp on each bottle.

*** Beware of counterfeits sold under the same name. Orders can be sent through any of the Agents of this Paper

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C. Sole Manufacturer.

HOLLOWAY'S PILLS.—Safety amidst dangers.—Surrounded on all sides by the causes of disease, man must keep up a constant watch if he would preserve or recover his health. These purifying pills present the most vigorous and effectual means of removing all obnoxious matters from the blood, at the same time they regulate any disordered actions which their presence has induced. The harmless and strengthening balsams of which Holloway's Pills are composed render them peculiarly well adapted for the young and delicate, who can with impunity bear only tender treatment. Even when disease has assumed a serious or chronic form, its progress will be arrested and its power ultimately broken by a judicious use of these advirable Pills.

TELEGRAPHIC COMMUNICATION BETWEEN ALEXANDRIA AND ENGLAND And the Continent generally.

Duty paid—Double, at 21s. sparkling Hock, Moselle, Champagne, and Claret, in Bond and Duty Paid.

TO THE NERVOUS AND DEBILITATED.

Dr. Curtis on Marriage, Nervous Debility, Spermatorrhœa &c., with Plates. Post free by the Author, 12 stamps; sealed ends, 20.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour; being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excess: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Invaluable Lotion, the result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS 15, Albermarle-street, Piccadilly, London.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 29, 1858.

The book concludes with numerous, varied, and interesting cases, to which is added the Author's Receipt for a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

The work may be obtained of Mr. HINNAM, Queens-road, Hong Kong.

Milne, Cargill and Co., Colombo Kandy, and Galle; Messrs. Bowra and Co., Hong Kong; Messrs. H. Fogg and Co., Shanghai.

QUINTESSENCE OF JAMAICA GINGER AND CAMOMILE.

GINGER has long been deservedly known as an excellent domestic medicine, and, combined with Camomile, it is the most efficient stomachic tonic known; for while the ginger relieves the stomach from distension and flatulency, arising from impaired digestion, the camomile strengthens the coats of the stomach, and by that means gives it a healthy and invigorating tone. So highly concentrated is this preparation, it is unimpaired by age or climate, and well adapted for exportation. In Gout, Spasms, Dysentery, Cholera, or those complaints incidental to tropical climates, it is invaluable, as in numerous cases a dose or two has checked, and frequently cured most alarming attacks. No families should be without it. Sold in half-pints, quarter-pints, and one-eighth-pints.

Agreeable Seidlitz Powder, in one bottle, protected by a case, with measure and spoon included. The advantage of this preparation is the perfect combination of the solid ingredients of the Seidlitz Spring in one compound powder. It is very cooling and refreshing, well adapted for Exportation, or Travellers by Land or Sea.

Aromatic Tincture of Quiniodine. For the Prevention of Fever, Intermittent or Remittent Ague, and other effects of Malaria.

No person exposed to the influence or predisposing cause of Fevers should be without it, for if taken in small doses daily, the system will become so thoroughly impregnated with its principles, as to be rendered proof against all attacks of Contagion or Malaria. Sold in pints, half-pints, and quarter-pints.

Agents—BATHGATE and Co., Old Court House-street, Calcutta; F. W. BROWNE, Old Court House-street, Calcutta; TREACHER, Bombay, Poona, and Kurrachee; ROGERS, Bombay; OAKES, Exchange Hall, Madras, Apothecaries and Medical Halls, Colombo; Apothecaries and Medical Halls, Kandy; PITERS, Piont de Galle LITTLE, Singapore Dispensary.

The above articles prepared only by THOS. WILKINSON (late WILKINSON, BRIDGE and Co.) 270, Regent Street, London, W.

With immediate despatch.

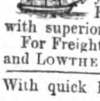
DIRECT FOR SHANGHAI, the splendid clipper-built ship, VICTORY, A 1, 13 years, 595 tons register, LEONARD MOON, Commander, Loading in the East India Docks. This fast-sailing and well-known ship presents a most favourable opportunity for shippers.

For freight or passage, apply to DEVITT and MOORE, 9, Billiter-street; or to GELLATLY, HANKEY and SEWELL, 27, Leadenhall-street, E.C.



FOR SHANGHAI, the well-known clipper ship POLMAISE, A 1 fourteen years, 887 tons register, lying in the St. Katharine Docks. This ship has a full poop, with superior accommodation for passengers.

For Freight or Passage, apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange Buildings, E.C.

With quick Despatch.—Having a large portion of her Cargo engaged.

FOR SHANGHAI, the well known China clipper MERSE, A 1 thirteen years (belonging to Messrs. John Willis and Son), 628 tons register, F. M. MOORE, Commander, loading in the East India Docks. This ship has excellent accommodation for passengers.

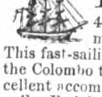
ELLIS, WILLIS, and FICKLING, 132, Leadenhall-street, E.C.

To sail on the 25th July.

FOR SHANGHAI Direct, the well-known clipper ship AURORA AUSTRALIS, A 1 thirteen years; 508 tons register: W. A. DAVIDSON, Commander; West India Docks. This ship has very superior accommodation for passengers.

For Freight or Passage, apply to KILLICK, MARTIN, and Co., 29, Nicholas-lane, Lombard-street, E.C.

To follow the CORSAIR'S BRIDE. With despatch.



FOR COLOMBO Direct, the regular trader ECLIPSE, A 1 twelve years, 404 tons per register, JOSIAH HARRIS, Commander, loading in the St. Katharine's Docks. This fast-sailing clipper-barque is admirably adapted for the Colombo trade, in which she is well known. Has excellent accommodation for cabin passengers.

For Freight or Passage apply to JOHN WILLIAMSON, York-chambers, 55, King-street, Manchester; or ROBERTSON and Co., 5, Newman's-court, Cornhill; or to SUART and SIMPSON, 9, Clement's-lane, Lombard-street, London, E.C.

With quick despatch—Having a large portion of her cargo engaged.

FOR HONG HONG and WHAMPOA the well-known clipper ship JOHN BANFIELD, A 1 thirteen years; 528 tons register; GEORGE SHERRIS, Commander; loading in the London Docks. This ship has excellent accommodation for passengers.

ELLIS, WILLIS, and FICKLING, 132, Leadenhall-street, E.C.

With quick Despatch.

FOR SINGAPORE Direct, the splendid clipper barque FLOWERY LAND, 3-3rds, A 1, and Newly Coppered. 400 tons Register. J. M. SMITH, Commander. Loading in the West India Docks. Has superior Accommodation for Passengers.

For Freight or Passage apply to DOUGLAS and MILLS, 23, Billiter-street, E.C.; or to ANDREW WRIGHT, and Co., 19, St. Helen's-place, Bishopsgate-street, E.C.

To follow the "Skimmer of the Waves," with despatch.

FOR COLOMBO Direct, the fast-sailing clipper barque CORSAIR'S BRIDE, A 1 thirteen years; 323 tons per register; THOMAS ISAAC BROWN, Commander; loading the West India Docks. This well-known clipper is an excellent opportunity for shippers of fine goods, as she will carry no creosoted timber, and invariably discharges her cargo in perfect order. She is guaranteed to be continued A 1 for four years, and has good accommodation for cabin passengers.

For Freight or Passage apply to JOHN WILLIAMSON, York-chambers, 55, King-street, Manchester; to ROBERTSON and Co., 5, Newman's-court, Cornhill; or to SUART and SIMPSON, 9, Clement's-lane, Lombard-street, London, E.C.

To follow the ELIZA THORNTON.—With immediate despatch.

FOR SINGAPORE and BANGKOK, the splendid fast-sailing ship GWALIOR, A 1; 336 per tons register; G. F. THOMSON, Commander; loading in the West India Docks. This vessel has superior accommodation for passengers.

For Freight or Passage apply to ANDREW WRIGHT and Co., 19, St. Helen's-place, Bishopsgate-street, E.C.; or to DOUGLAS and MILLS, 23, Billiter-street, E.C.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

Destination.	Ships.	Docks.	To Sail.
Shanghai	Dunkeld ...	W.I.D.	July 25.
H. Kong & Whampoa	Red Ridg.Hd.	W.I.D.	In a few days
H. Kong & Whampoa	Her Majesty	E.I.D.	With des.
Nagasaki & Kanagawa	Etheldreda...	W.I.D.	July 18.
Manila	Trafalgar ...	St. K.	With des.
Bombay & Simon's Bay	Stamboul ...	W.I.D	With des.
Kurrachee	Telegraph ...	W.I.D.	With des.
Singapore and Penang	Frederica ...	W.I.D.	With des.

London, 5, Newman's-court, Cornhill; or York-chambers, 55, King-street, Manchester.

THE BANK OF HINDUSTAN, CHINA and JAPAN (Limited), 16, Cornhill, London. Capital, One Million.

Deposits of £100 and upwards received, at rates of interest varying according to the length of time for which they are made. Quarterly payment of interest allowed.

Drafts on India and Circular Notes payable throughout Europe, &c., issued. Approved Bills on India and China purchased and sent for collection.

The purchase and sale of Indian and other Securities effected, and the safe custody of the same undertaken. Interest, pay, pensions, dividends, or other monies realised for remittance, through the bank or otherwise. No commissions charged on remittances through the bank.

Every other description of banking and money agency business conducted in London, and at the branches at Calcutta and Bombay.

Forms and powers of attorney supplied at the office.

J. OUSELEY, General Manager.

THE LONDON AND CHINA TELEGRAPH.

THE FOURTH Volume of this JOURNAL was completed on the 14th Nov. 1862 The Subscription is 18s. per annum, or 5s. per quarter, not including Postage, and to the Export Supplement 12s. Terms for advertising, 2s. 6d. per five lines; and 6d. for each additional line.

DEBATE ON CHINA.—*Continued from page* 377.

barbarians. Such, he thought, he could show had been the policy of the Government. But not only had Her Majesty's Government been made responsible for their own policy in China, but also for that of Russia and France, but he thought he could show that there was nothing in the policy of the Government analogous to that pursued by Russia. It was said that Russia by following our example had acquired possession of nine hundred miles of coast, but there was no such example set by us, for we had appropriated no territory. Our policy had been consistent with the interests of China. He would remind the House that our relations with China had changed within the last few years—not that the opinions of the Government had changed, but circumstances had altered, necessitating a change of policy. Formerly we had no relations with the central Government of China, and the Government of Peking was a mystery to us. We had to deal with small governors—each port being almost treated as a distinct capital. The central Government was as ignorant of us as we were of them, and it was the interest of the local Governments to deceive the central Government and to delude us. That state of things brought about a great evil, and the British Government had great difficulty in checking the proceedings of the consuls and naval commanders on the station. It became the habit, if such redress as the merchants deemed themselves entitled to were not accorded without inquiry, to adopt very high handed proceedings. The conduct of our admirals and consuls was described as consistent with our English policy, and addresses of congratulation were voted and services of plate were presented to them. China was called upon to observe treaties which we ourselves did not always observe, and many of our fellow-subjects behaved in China upon the bucanier's maxim of no law across the line. But all that had now changed. After the Treaty of Tien-tsin a Minister was appointed to reside at Peking. In former times, when the Chinese question had been discussed, it had been imputed to the Government that they had gone to war in order to obtain a resident Minister at Peking. If the charge were a just one the result had proved the Government had not overrated the importance of having a resident Minister at Peking. Now, instead of desultory negotiations with local governors, we had direct communication with the central Government at Peking, and instead of exchanging shot and shell, we simply exchanged diplomatic notes. The central Government now could learn the truth, which before had been concealed from it, and they were beginning to understand that the treaties we had made with them were not one-sided, but were as much for the benefit of China as for the advantage of England. The power of direct communication with the Emperor and the Ministry had completely changed our position with regard to the Chinese people and Ministry. Our policy had in view two objects—to strengthen the Chinese Government and to secure the observance of treaties, not only with this country, but with all nations, without the necessity of that constant pressure which in former days used to end in war. In order to attain these objects it was necessary to support a Liberal party in China; and most fortunately for the success of the British policy there was at the head of affairs in China a very enlightened man, Prince Kung. The noble lord said that this Prince was the only man of the class in China, and that if he failed us we should recur to the old state of anarchy. Now, from the reports of Sir F. Bruce, he believed that there were in China many statesmen who shared the views of Prince Kung—men of great ability and determination, who would assist him in carrying out the policy which, fortunately for us, he had adopted. At the same time we enjoyed the advantage of having at Peking a very able Minister in the person of Sir F. Bruce, whose prudence, impartiality, and high sense of justice tended greatly to the success of this policy of conciliation. But Sir F. Bruce had had a most difficult task to perform, and the difficulties arising from the Chinese themselves were small in comparison with those very frequently created by persons who ought to have supported him—namely, British subjects. The Government entirely approved the course which he had pursued in treating with the Chinese upon the purest and most just principles, and regarding theirs as a civilised Government, capable of fulfilling treaties without foreign pressure. It would be impossible to follow the noble lord in all his remarks, though had he time he thought he could answer almost one by one the objections taken to the policy of the Government. It was very easy to find in the blue-books isolated points for criticism. In carrying out any policy, no doubt there must be some things open to objection He admitted that this might be the case here; but taking a broad view of the question, and looking at the broad principles on which the Government had acted in China, he believed that, on the whole, their policy was a just one, and that it was most consistent with the interests, not only of this country, but of China itself. From the little study which he had given the subject, the Chinese appeared to be a peculiar people, with what might be called innate good qualities, for they were industrious, they loved order, and they were easily governed. Persons well acquainted with the country declared that its disordered condition was owing, not to the presence of the Tartar element, but to the predominence of the Chinese element. It was because the Tartar element had declined that a state of chronic anarchy had existed so long there. When the Tartar dynasty first governed the country, they were able to maintain order. But their military power had grown gradually weaker, through the peaceful tendencies of the Chinese themselves, and after the lapse of some centuries the village police became so small, and the check upon the population so little, that brigandage arose in many of the provinces, and a state of anarchy existed which the Government, not possessing an adequate military force, were unable to put down. One of the principles of Chinese policy used to be the exclusion of foreigners, contact with whom they believed would ruin the country. All they knew of us was that we went to China, as they believed, to cheat them and to bear them down by our high-handed proceedings; and the Imperial Government never had any communication with us, except through local governors. Now, the first thing Sir F. Bruce had to do was to remove this unfavourable impression, and lead Prince Kung to believe that we were ready to discuss points with him, to interchange ideas, and see whether a fair understanding could be come to without quarrelling and without war. Among the first fruits of this new policy were two remarkable concessions given to us by the Chinese Government. Those acquainted with the details of the treaty of Tien-tsin would know that one of the points most strongly resisted by the Chinese Government was the opening to British vessels of the carrying trade of a staple article of food—a kind of bean flour and pulse, which formed a considerable trade between the north and south of China. But Sir F. Bruce discussed this subject with Prince Kung, and after pointing out the advantages of a free-trade system, and showing that a system of protection only increased the price of food to the Chinese themselves, he convinced the Prince of the soundness of these views, and British shipping thus acquired a great advantage. Again, by argument, instead of force, our Minister had induced Prince Kung to open that great river the Yang-tse-Kiang to British shipping, and allow two ports there for the settlement of European traders. At one time the whole river was thus thrown open, but, unfortunately, a contraband trade sprang up, in consequence of which the restriction of the British to two ports became necessary. Both these important concessions were obtained entirely through talking the matter over with Prince Kung, and leading him to see that the advantages were as great to the Chinese as to the English. Now, formerly, in order to obtain such concessions, we should have had to go to war, and should have had to spend hundreds of thousands, or perhaps millions of money, instead of obtaining what we desired by diplomatic arrangements. In all those communications with Prince Kung and the other Imperial Ministers, they said:—

OPENING NEW PORTS.

"You ask us to open our ports, and allow British subjects to go into the country in all directions, in order to develop fresh sources of trade; but how can we do these things when this rebellion is going on? You complain of disorder, you say that protection is not given to your goods, and that extortions are sometimes practised on British subjects. Help us to procure disciplined troops, and to put our finances in order, and then we will do what you wish." Were these demands unreasonable? To listen to the noble lord one would fancy that no Power had ever before employed foreigners, either for the better regulation of its finances, or for the reorganisation of its army. Why, Russia not 200 years ago was in a far more barbarous state than China, and it then called to its aid English admirals, French generals, and German financiers, so that there was scarcely a Minister who was not a foreigner. In our own time, Turkey followed much the same course, employed foreigners in its army and navy, while even now there was an English admiral in the Turkish service. An extraordinary fallacy ran through the speech of the noble lord—namely, that what we had done was war, and that we were at war with a portion of China. Now it seemed to him, on the contrary, that what we had done was a proof not of war, but of peace, and we were never further from war with China than we were at the present moment. Then they were accused of *solidarite* with the Chinese Government against the Chinese people. Yet after making this accusation the noble lord read two extracts one from a despatch of Lord Russell to Sir F. Bruce, and the other from Sir F. Bruce to Mr. Consul Harvey—laying down precisely what our objection was in furnishing the Chinese Government with this assistance, and disclaiming altogether any intention to interfere between the Government and their rebel subjects, or to do anything else than reorganise the Chinese troops, and put the finances of the country in order. Her Majesty's Government considered it necessary to defend the treaty ports, because in them was an enormous amount of British property. We defended them because we knew that if they were captured that property would be destroyed. [Colonel SYKES: "No."] His hon. and gallant friend said "no;" but he would prove to the House that the British merchants were of the same opinion as Her Majesty's Government. His noble friend asked whether the English officers employed under the Chinese Government were still British subjects. To a certain extent they were; for all English officers remained so even after they took service under another Government in the way those officers had done; but for the time being they were actually under the command of the Chinese Government, and we were not responsible for their actions. The noble lord seemed to think that, in consequence of Her Majesty's Government having allowed the Chinese to employ British officers, we should have for several years to keep British troops in China. Indeed, his hon. and gallant friend had more than once stated that the number of our troops in China had increased; but so far from that being the case, the policy of allowing British and other officers to be employed in China—for the foreign officers employed under the Chinese Government were not exclusively British officers, but were officers of all nations, French officers being among them—had resulted in a diminution in the number of British troops in China. In September, 1860, the number was 21,235; in September, 1861, it was 9,626; in September, 1862, 4,679; and on the 1st of February in the present year, 4,639. On the 7th of the same month the officer commanding was instructed to send back the 31st Regiment, 800 strong, a battery of artillery, and a wing of an Indian regtment.

THE TAIPINGS.

With regard to the thirty miles' radius, of which so much has been said, and respecting which some gentlemen contended the Government had gone a great deal too far, the question was a military one, and the Government had had nothing to do with it but to sanction the report of our own military officers, who thought that a radius of thirty miles was absolutely necessary for the defence of Shanghai. The noble lord had made a most remarkable admission in the beginning of his speech, which he seemed to have forgotten at the latter end of it, though the matter was almost the essence of this question—namely, that the Taipings had no recognised Government with which Her Majesty's Government could communicate. This was a point of the very greatest importance in the consideration of the question, because it was impossible for us to enter into relations with the Taipings if there were no means by which we could enforce the treaties into which we might enter with them. But he was not disposed to again go over the question of the Taipings. Every one who had visited China, and who had had an opportunity of forming an opinion on the subject—whether our own agents, independent merchants, or missionaries, agreed in this, that the Taipings were unable to found any Government; that they were mere plunderers going over the country and devasting right and left—destroying and not building. As that point might be disputed by his hon. and gallant friend (Colonel Sykes), he begged to read an extract from a letter of one of the most distinguished English merchants in China, Mr. Michie:—

"I have no hope of any good ever coming of the rebel movement. No

Digitized by Google

decent Chinaman will have anything to do with it. They do nothing but burn, murder, and destroy. They hardly profess anything beyond that. They are detested by all the country people, and even those in the city who are not of the 'brethren' hate them. They have held Nanking eight years, and there is not a symptom of rebuilding it. Trade and industry are prohibited. Their land-taxes are three times heavier than those of the Imperialists. They adopt no measures to soothe and conciliate the people, nor do they act in any way as if they had a permanent interest in the soil. They don't care about the ordinary slow and sure sources of revenue. They look to plunder, and plunder alone, for subsittence, and I cannot see any elements of stability about them, nor anything which can claim our sympathy."

It had been alleged that the Taipings would not have attacked our treaty port at Shanghai; but what took place when they threatened that city? If hon. gentlemen turned to the Blue-book they would find that the English merchants there formed themselves into a band to defend the city. They held a meeting and passed certain resolutions, among which was the following:—

"'That the committee be empowered to request from the Naval Commander-in-Chief increased protection for this settlement during the present emergency.' In conformity with the resolution, we would venture to point out to you the extreme probability that the present movement of the Taipings, or rebels, so different from former ones, both in the force reported to be employed and the avowed object with which it is commenced, may keep the settlement in a state of danger and alarm for many months to come. Should the Taiping forces not be dislodged from the surrounding country, they will probably lay a sort of siege to the city and settlement of Shanghai, and, according to usual Chinese tactics, keep up a constant annoyance. Under these circumstances, the small volunteer corps that exists here, and which is now, as you are aware, performing the duty of guarding nightly the inner lines of the defences, will be quite inadequate to the labour; for it must be borne in mind that the gentlemen forming it have still to attend to their usual daily business occupations. We feel strongly, therefore, the advisability that the regular forces of Her Majesty should be so strengthened as at an early period to relieve the volunteer force of constant duty, and to give such a feeling of security to the residents of the settlement as may prevent these recurring panics, so utterly destructive to trade, and at all times imperilling the lives and property of Her Majesty's subjects. It having been understood that the policy of Her Majesty's Government is to defend the city and settlement of Shanghai from the Taipings, or rebels, it has led to a vast accumulation of population and wealth here. This latter is daily a greater temptation to the Taipings to endeavour to plunder, the more especially now as their armies are relieved from the siege of Hang-chow, and are flushed with the capture of Ningpo. Hence, if the policy of Her Majesty's Government is to be maintained,—and that it should be so we most cordially agree,—we believe that a considerable permanent addition should be rapidly made to the force of troops stationed here."

NINGPO.

Now as to Ningpo, a great misconception had arisen with regard to that place. The city of Ningpo was divided into two parts. The river ran between them. On one side of the river was a part of the city thickly inhabited by Chinese; on the other side, the Europeans thought it right to make a settlement. On a former evening his hon. friend the member for Northumberland made some observations on this settlement. He looked on it as if it was something peculiar and out of the general rule.

Mr. LIDDELL.—I said we had no legal status there.

Mr. LAYARD.—That was one of the ports with which we were authorised to trade; but as to our not having a settlement there, that was a mere matter of detail. When the Europeans had settled themselves in one of these ports they found it most convenient that they should have a portion of it to themselves in order to avoid those strifes which so frequently arose from a mixture of European and Eastern populations. There was another reason for that arrangement, arising from Europeans being "extraterritorially"—that was, having rights differing from those of the native population, having different laws, and having those laws administered by their own officers. At Ningpo the Taipings came down on that part of the city opposite to the settlement of the Europeans—namely, on a part occupied by the Taipings—and the whole of the Chinese inhabitants fled. He had heard it said, by way of argument against the policy of Her Majesty's Government, that trade went on in Ningpo after the Taipings had entered. Why, the fact was, that the Chinese inhabitants fled to that part of the city occupied by the English, and that being a treaty port we held it. The Chinese took refuge under our laws, and the population became so enormous that the trade did not fall off, but, on the contrary, increased. The noble lord had somewhat misstated the state of things at Ningpo before Captain Dew interfered. If hon. members would read the further papers which had been presented on this subject, they would see that the real cause of quarrel was that the Taipings insisted that they should have authority over the English settlement, and that that part of the town inhabited by Europeans should be placed under them. In a letter from Consul Harvey, it was stated that the interference was just in time, for that the Taipings were meditating a treacherous attack on the European settlement, which was to have been put into execution in the course of a few days If we had allowed the Taipings to occupy the treaty ports, the result would have been the entire destruction of our trade. That was the conviction of every merchant in China. Either we must have gone to war with the Taipings, to defend our own interests and to support our traders, or we must have gone to war with the Chinese Government, to compel them to make the Taipings respect the treaties.

CAPTAIN OSBORN AND MR. LAY.

The noble lord had not stated the case quite fairly as regarded Captain Osborn and the other officers who had taken service under the Chinese Government. Captain Osborn did not come from China to organise volunteers, nor was he, in fact, the agent and representative of the Chinese Government. Mr. Lay was the agent of the Chinese Government, with full powers here, his powers were acknowledged by Prince Kung and Sir F. Bruce, and he was the only person authorised to act for the Chinese Government here. This flotilla was intended to put down piracy, and for that object almost alone. The Chinese Government had pledged themselves to put down piracy, and if they did not do it we should have to do it. The principal reason why we had to keep so large a force in the Chinese waters was to keep down piracy, which was known to be the greatest evil our traders had to encounter, and if the Chinese Government were in a position by their own forces to put down piracy, we should be relieved of a responsible duty, and a great security would be given to British trade. So that Captain Osborn would remove a great source of difficulty and of constant discussion between the British Government and the Chinese authorities. The same policy prevailed in regard to the Custom-house. The noble lord spoke as if the Customs were entirely under the authority of Englishmen, but the list which he read contained the names of Germans, French, Americans—in fact, of all countries. Mr. Lay, a gentleman of great experience and ability, had been selected by the Chinese Government to be placed at the head of their Customs, and if hon members would read the papers they would see how much the Customs' revenue had increased under his able management. Sir F. Bruce, writing to Lord Russell, said:—

"Before the Treaty of 1842, when Canton was the only port open to foreign trade, the revenue from Customs was assessed at 900.000 taels (£300,000). On the opening of the four new ports stipulated by the Treaty, the revenue from the Customs diminished, and in 1857-58 it did not reach 400,000 taels (£133,000). On the introduction of the foreign element into its management the revenue rose, and in 1861 the receipts were 1,400,000 taels (£470,000). Deducting 40 per cent. (560,000 taels=£187,000) payable for the indemnities, there remain 840,000 taels (£280,000), being not far short of the sum derived from the whole foreign trade of China, when concentrated at one port. The results of foreign management have been the same at every port where it has been introduced; and looking to the recovery of the indemnities, and to the great importance of the Chinese Government not being deprived of funds at a moment when it is striving to restore tranquillity to the country, I think your lordship will agree in the policy of upholding the system against the clamour of those who are interested in returning to the former corrupt and unsatisfactory Customs' administration. I have just heard the result of the first month's collection at Amoy. The estimate of the Chinese authorities was 5.000 taels (£1,666), and the receipts were 30,000 taels (£10,000)."

It was perfectly true that this introduction of foreigners into the Customs had been much attacked in China. Up to the present time foreign merchants had always been attempting to evade the payment of any duty. They had recourse to all manner of fraud and deception. Of course there were many exceptions. There were in China firms of the highest respectability who would never be guilty of such practices; but there were also a vast number of adventurers who went out to make fortunes as rapidly as possible, who had no regard for morality, or anything else, and whose great object had been to cheat the Chinese Government. He wished very much that hon. gentlemen would read Mr. Lay's letter on this subject, which was to be found in the appendix to this year's paper, and which showed the origin of this opposition to the introduction of foreigners into the management of the Customs.

MESSRS. LINDSAY AND CO., AND JARDINE, MATHESON AND CO.

Mr. Lay mentioned that several firms of the greatest standing had been concerned in these evasions, and in justice to two of them who had been named—Messrs. Lindsay and Messrs. Jardine and Matheson—he wished to read to the House their explanation on the subject. Mr. Lindsay wrote,—

"Two clerks in the employ of Lindsay and Co., in direct violation of their agreements, and without the knowledge of their partners, committed this act of smuggling. On discovery, they were justly punished by the confiscation of property worth £1,000. The firm bearing my name have throughout been consistent supporters of the new system, the object of which was that the legal duties should be fairly levied on all. Such an act of smuggling, discreditable under any circumstances, would, in my opinion, have been absolutely disgraceful and dishonourable had it been committed by a firm avowedly supporting the introduction of a new and better system of collecting duties. Under these circumstances, I think I may in justice request that Lord Russell will allow this refutation of an unjust and injurious charge to appear in the next batch of Chinese correspondence laid before Parliament."

Mr. Jardine wrote in a similar strain. He said,—

"There is nothing which we desire more than an efficient Custom-house system established on the coast of China, and we have from the commencement cordially approved the principle of a foreign inspectorate." Here, then, was the testimony of two of the largest houses in China that the new system worked well, and that it was favourable to trade. No greater boon could be conferred on the respectable British trader than the introduction of a regular, well-defined Custom-house system. He trusted he had shown to the House that there was nothing extraordinary or against the policy of neutrality either in permitting the Chinese Government to have recourse to the services of British officers who were at the time on half-pay, or in allowing British subjects to undertake the organisation of the Chinese Custom-house. Another difficulty which Sir F. Bruce had to contend with arose out of the difficulty of dealing with many of our own subjects. No doubt many of them were highly respectable, but a large portion were the very reverse. The Europeans of this class were almost the worst portion of the population of China. They supplied members of the House with complaints against the British and Chinese authorities, and they did their utmost to thwart the policy of Sir F. Bruce. How was it possible for Sir F. Bruce to persuade the Chinese authorities that the British Government were acting in good faith when they too often saw British subjects acting in direct violation of treaties, and in a manner discreditable to the nation to which they belonged? Sometimes they took possession of land, for which they refused to pay. Sometimes they smuggled goods, and then the representatives of the Government were unable to support them in such practices. That was one reason why hon. members were so often getting up and reading letters and extracts from newspapers containing charges against the Chinese authorities and the English Government. He believed that the policy of Her Majesty's Ministers was calculated to prevent, instead of encourage war, and that we were never so far from war with China as at the present moment. If, indeed, the Government were to revert to the old state of things, and withdraw their officers, it would be better to allow the old East India Company to deal with China, and to confine the trade under severe restrictions to one or two ports.

MINISTERS AND FOREIGN TROOPS.

The noble lord talked of Sir F. Bruce as being the Prime Minister of China; but Sir F. Bruce had colleagues at Peking; he was acting cordially with the American and French Ministers, and the assertion that he was Prime Minister of China was therefore without foundation. The authority of Dr. Legge had been quoted. Dr. Legge said, "Talk about the cruelties of the Taipings, but what cruelties have I not seen committed by the Imperial braves!" But Her Majesty's Government were putting an end to the system of employing these braves by the introduction of disciplined troops, who would not be guilty of these atrocities. He believed, however, that the Imperialist atrocities had been much exaggerated. ("No!" from Colonel Sykes). Yes, he would take the word of Admiral Hope in preference to that of the informants of his hon. and gallant friend. Dr. Legge talked of the Government putting down the rebellion, and sending 50,000 troops for that purpose; but Her Majesty's Government were not engaged in putting down the rebellion. They were, on the contrary, withdrawing British troops, of which there was a smaller number this year in China than last. The more the Chinese disciplined their troops the less necessity there would be for the British Government to defend the treaty ports, which were so necessary for the trade of this country. The noble lord talked of the Government as withdrawing the filibusters, and giving the command into the hands of English officers. Was it not much better that the Chinese troops should be commanded by men who would not permit acts of cruelty to be perpetrated? Then the noble lord drew an analogy between China and India. In India a portion of territory had been acquired by British subjects. But the British Government went to China, not to establish themselves as rulers, but to strengthen the Chinese Government, and enable them to put an end to disorder and disorganisation. The noble lord was correct in saying that the tea trade had not fallen off, because tea was for the most part grown in districts still occupied by the Imperialists. The noble lord added that the silk trade had increased. A considerable portion of the silk district was occupied by the Taipings, but not the whole, and the reason why the supply of silk had not diminished was that the Taipings did not interfere with the agricultural population, but only sacked the cities. The noble lord had fallen into the error of supposing that all the country overrun by the Taipings was occupied by them. If he had read the statement by Consul Parkes he would have seen that after they had sacked one city they went to another, and did not attempt to occupy the agricultural districts which they overran. The only place they had occupied for any length of time was Nanking. The latest accounts from that city represented it as deserted, except by the Taipings and the young women they used as slaves, for they did not permit marriage. Nothing had been done to rebuild the city, or to introduce commerce, and the Taiping leaders had stated that if they had not interfered with the treaty ports, it was only in consequence of the policy pursued by Her Majesty Government at those ports. That admission of the Taiping leaders showed that the policy of Her Majesty's Government in regard to the treaty ports was just and right. If, however, the Government had done nothing; if the treaty ports had been allowed to fall into the hands of the Taipings; and if the trade had been stopped, the noble lord would have been the first to denounce the inaction of the Government. He believed that the Taiping rebellion was gradually breaking up. Already some of the more important Taiping leaders had gone over to the Chinese authorities, and when Nanking fell the whole Taiping rebellion would fall with it. In addition to that, he would state confidently to the House, from the reports which he had heard, that the discipline of the Chinese troops, not only under European, but under Chinese officers, was greatly improved, that few cruelties were now committed, that cases of plunder were unknown, and that they were entirely supported by paying for what they obtained from the population. That was a great step in advance, and would go far to show that Captain Sherard Osborn, who was as well known for his humanity as for his gallantry, would introduce great improvements into the Chinese army, and that Her Majesty's Government were deserving of praise and not blame for allowing such men to go to China. Looking at what had gradually taken place in China he had very great hopes. He saw in the distance tranquillity restored; that vast population engaged in agriculture; the fields teeming with that produce which, once a luxury, had now become a necessity; the canals once more covered with boats; new markets opened to our industry;—and if those hopes should be realised, he believed the policy of Her Majesty's Government would have contributed as much to the general interests of humanity as to the particular interests of this country.

Mr. S. FITZGERALD said they had had two very long and important speeches made that evening, and the House must have derived considerable instruction from what had passed. There was not a member of the House who had listened to the speech of his noble friend who would not admire the research and knowledge which it evinced, and the clear and lucid way in which a speech of nearly two hours' length presented the whole subject to the House, to their great information and instruction. But they might also obtain some information and instruction from the speech of the hon. gentleman opposite, because he had shown that, after listening to the long and important speech of his noble friend, he could get up and meet a difficult case, where defence was impossible, by a speech of an hour's duration which conveyed no information to the House. The hon. gentlemen had accused his noble friend of having made a speech founded on isolated points taken from the blue-book, but those who heard that speech knew well that that was not a fair representation of it. His noble friend had attacked the whole course of policy of Her Majesty's Government, and shown that it was systematically contrary to that which they had professed as the only policy upon which we could deal with the Chinese Government, and that it was likely to bring us into collision with vast forces in that distant empire. But the hon. gentleman contented himself with getting up and making a speech, one-half of which was devoted to the abuse of those who were engaged in commercial transactions in China. The hon. gentleman spoke for nearly an hour, and only once, and that by accident, did the word neutrality drop from his lips. It was now two years since the noble lord at the head of the Foreign-office, speaking in that House, said that the only policy which could be followed with advantage by the Government in dealing with China was a policy of neutrality. That declaration of the noble lord met with the universal acceptation of the House and the sanction of the country. But that policy had been entirely reversed by Her Majesty's Government. The hon. gentleman had represented in a most wonderful manner the speech of his noble friend, for he said that it was now proposed that we should not defend the treaty ports. But nothing which would give a colour to such a supposition ever fell from his noble friend. His noble friend not only admitted that policy, but absolutely insisted on defending the treaty ports. But what his noble friend pointed out was that, having with a view to the defence of these ports adopted the principle of the 30-miles' radius, in concert with the Taiping chiefs, we had engaged in operations beyond that—operations which we were not called upon to undertake, and which seriously compromised our neutrality in China. The effect of this policy upon Ningpo would be best shown by a despatch from Consul Harvey to Mr. Bruce, in which he said:—

"We must all be agreed upon the point that the Taipings are essentially a destroying, as we Englishmen are a constructing, Power. Let us, therefore, for ever live apart; we are not made, nor can we afford, to breathe the same air, or to mix in congenial pursuits. For my part, let me state that it will be a source of great satisfaction, and I may add, of pride, in after time, to think that I have been placed in a position to use my feeble pen, and to have exercised my humble powers (always within the limits of my official duties) in weakening and undermining, as perseveringly and indefatigably as I have been able, the most gigantic imposture and the most blasphemous structure that ever disgraced ancient or modern ages."

Were these the words of the agent of a Government which professed a strict neutrality between two parties? It was perfectly obvious that within the last two years the policy of Her Majesty's Government, to use the words of the hon. gentleman, "had altered with events." The policy now pursued by Her Majesty's Government was not for the interest of this country. The evidence which his noble friend had produced with respect to Ningpo showed some of the most extraordinary conduct on the part of an officer of Her Majesty's Government that could be imagined. The last letter of Captain Dew to the Taiping chiefs contained a passage so remarkable that, though it had been quoted by his noble friend, he could not help calling attention to it again:—

"We now inform you that we maintain a perfect neutrality, but if you fire the guns or muskets from the battery or walls opposite the settlement on the advancing Imperialists, thereby endangering the lives of our men and people in the foreign settlement, we shall then feel it our duty to return the fire and bombard the city."

This neutral officer says, "I profess neutrality; but if you venture to pull a trigger in your own defence we shall bombard the city." What was the consequence? The British poured shot and shell into Ningpo as evidence of their perfect neutrality. The hon. gentleman had made representations which would mislead the House as to our position with respect to this settlement. He said, "The city is divided into two parts, one occupied by the Chinese population, the other where the traders have taken up their residence with a view to trade." But that was not what was meant by a settlement. What was meant by a settlement was this—it was land positively ceded, within the limits of which British law and not Chinese law was to have effect. He should like to know had we British law established there. At no time had any concession of that kind been made by the Imperial Government of China, and yet Captain Dew said that if the Taipings allowed a single musket to be fired on a certain portion of the town the English would fire on the Taipings. It was perfectly clear that the English had no right or title to hold that language; and the use of it reflected very little credit on the discretion of Captain Dew, whatever might be his character for gallantry. One point which his noble friend dwelt on the hon. gentleman had studiously avoided a reference to, and that was that the course of policy now being pursued was sure, sooner or later, to bring this country into collision with other European Powers who were struggling to establish great and permanent interests in China. His noble friend pointed out that the policy pursued by Russia for many years had led to the extension of her territory in the Chinese seas, and that the Russians had obtained as the result of that policy a seaboard of 900 miles, approaching within three days' sail of Shanghai, with most valuable ports on it. The efforts making by France in China were well-known; and he was convinced that the policy of Her Majesty's Government was such as, sooner or later, would lead to a collision of interests with France and Russia. He begged the House, therefore, to consider in what a position this country might be placed by seeing its trade crippled, by having half the population of China against it, and finding itself led into dangerous complications with European nations having interests in that part of the world. He was convinced that the old policy of the Government was the true policy—that of neutrality, and he, for one, hoped that it would soon be resumed.

Lord PALMERSTON: I listened with great attention to the very long and able speech of the noble lord who began this discussion, and who showed that he had gone through with the greatest industry the details of all the events which have happened in China for several years past; but I was at a loss to understand the conclusion which he arrived at—that of censure on the Government for the course of policy which they have followed. In the first place, it was rather surprising to hear from gentlemen on the other side of the House such enthusiastic defence of rebels, and to be told that rebellion is so sacred an institution that it is quite culpable in the Government to give any help to a friendly Power to suppress it. Theirs is a new doctrine. Does that principle apply to Italy? Are hon. gentlemen opposite prepared to say that they would apply the same protection to those who have cast off their allegiance to former Governments in Italy as they are prepared to show to those Taipings in China? But the main question is—has the policy pursued by Her Majesty's Government in China been attended with good results?—is it founded in good faith, and likely to be attended with advantage? In years gone by, though not long gone by, we were perpetually in a state of squabbles and hostilities with the Government of China. We were attacked and condemned by hon. gentlemen, who told us that we were engaged in hostility with one-third of the human race, and that we were needlessly risking all the commercial interests of the country connected with China by

Digitized by Google

those quarrels and conflicts with the Chinese Government. We were told to abstain from such a course of proceeding, and let affairs take their course. The state of things is now altered, and those very hostilities which were found fault with have resulted in this – that we are now on the most friendly terms with the Government of China, and that we have access to the supreme Government, from which we were before debarred by local and provincial authorities. The noble lord himself has quoted returns, showing the enormous increase of our trade with China within the last two or three years. Compare the state of our commerce in China some years ago, when we were contented with the limited intercourse of the East India Company to one portion of the Chinese Empire, with the great development now given to the industry and commerce of this country over the whole surface of the Chinese Empire. Look to the great extension of that commerce which is likely to arise, if by our friendly assistance we should be able to place the internal arrangements of China on a more regular footing. A great part of the noble lord's speech seemed to me to be high praise of the Government. If I had been listening to any one moving a vote of approval I should have expected him to repeat those very things which the noble lord, in the simplicity of his mind, put forward as the ground of complaint against Her Majesty's Government. He said, "What are you doing? You are teaching the Chinese authorities the arts of Government practised in Europe. You are enabling them to collect their revenue on systematic principles, and to increase it by the regular manner in which their Customs duties will be collected; you are giving them the means of preserving order in their territory, and you are allowing your soldiers and sailors to enter into the Chinese service for the purpose of suppressing those disturbances which lay waste and desolate from time to time the finest portions of the Chinese Empire." Well, we admit the charge, and we consider it a great merit on the part of Her Majesty's Government in having done these things, and I am surprised and gratified at the noble lord for coming down here and, in an endeavour to bring charges against Her Majesty's Government, being compelled to enumerate facts which I think do infinite credit to the Ministers. I hold that since China has altered its policy with respect to foreign na ions, and with respect to the English nation - that since the policy of China, as conducted by Prince Kung and associates equally liberal with himself, proves that China is now prepared to enter into intimate relations with foreigners instead of keeping them at arm's-length, and endeavouring to prevent all intercourse whatever with them - that, since the policy of China is to encourage commerce with the nations of the world, it would be suicidal on our part not to endeavour to assist the enlightened Government of China in those efforts of improvement. While the noble lord and honourable gentlemen opposite admit that we are entitled, and, indeed, bound in duty, having regard to British interests, to defend the treaty ports. they complain that we took measures to rescue one of them – Ningpo – from the occupation of the Taipings. The admission of the noble lord is an answer to the accusation which he makes against us. There is nothing inconsistent with the practice of nations in one friendly Power lending to another officers to drill and direct its troops. Therefore, when we authorised Queen's officers to enter into the service of China we did nothing which has not been done in innumerable instances, and which is not perfectly justifiable. I am rather amused by what the noble lord said as to its being one of Captain Sherard Osborn's duties to suppress piracy. It is not necessary, he told us, to send ships of war for that purpose, because anybody can destroy a pirate if he meets one on the high seas. Yes, but you must first bell the cat. It is all very well to say that you are at liberty to destroy any pirate that crosses your path, but then the chances are that he may destroy you. That is just what is happening in China. The coast of China is infested with fleets of pirates, some Chinese and some Europeans, who prey on all ships of commerce which they meet. It is of no use to say that merchant vessels may destroy these pirates. One of the great objects which Captain Osborn has in view is, by the squadron under his orders, to sweep these pirates from the waters, and to restore security to the commerce of Europe and China on the coasts of the latter. The noble lord went into a description of the great encroachments which Russia is making in China, and told us that France also has views of ambition on parts of Asia in connection with that country; and then the noble lord warns us that the course we are pursuing may lead us into conflict with these two great Powers. Our present course is to strengthen the Chinese Empire, to augment its revenues, and to enable it to provide itself with a better navy and army. That is one method of inspiring other countries with caution as to any future encroachments they might be tempted to make on China. But what is the natural inference to be drawn from the advice which the noble lord offers? It is that we ought to withdraw from China our Minister, our settlements, our merchants, and abandon the country to France and Russia? France and Russia, the noble lord says, are bent upon aggressions in China, and if we are there when they come we are sure to be brought in to collision with them, and therefore we had better retire at once and leave China to the future mercies of those two Powers. I do not at all admit the wisdom of that policy. It is quite true that Russia has of iate made very great encroachments on the northern provinces of China. It is also true that France, a Power which has a great tendency to extend itself, has carried on operations in Asia. France, Russia, and England are, however, perfectly agreed, for the present at least, in their policy with regard to China. All concur in supporting the Imperial Government; and therefore our policy, as at present conducted, has no tendency whatever to lead us into collision with other Powers. Our Minister at Peking is on the best possible terms with the representatives of France and Russia, and, so far from there being any jealousy or antagonistic views between the three, I am happy to say that we all share the feeling that it is our mutual interest to restore, if possible, tranquillity to the interior of China, and extend the commercial relations between Europe and that nation. I am quite at a loss to see in what respect we are blameable. In scanning the futur the noble lord apprehends European wars as likely to aris : out of our commercial relations with China. I, on the contrary, anticipate that the policy we are pursuing will open to us a still larger and more useful sphere of commercial industry. Depend on it that a country peopled by nobody can tell exactly how many hundreds of millions of men must afford great resources and means of development for trading enterprise. The Chinese are a commercial race. There has been no hostility towards Europeans among them as a people. The hostility was entirely confined to a number of mandarins, whose interest it was to maintain certain monopolies of their own, and has been swept away. The Government of China is now friendly, and I have not the least doubt that, if the internal disorders of the empire could be suppressed, we should find in commercial intercourse with China an important source of national wealth and prosperity. We should then behold the result of that faithful, straightforward. friendly policy which we are now pursuing. If the House will only agree to wait the development of our policy, I am confident they will find that, so far from deserving the censures of the noble lord, it has been eminently advantageous both to this country and to China, and deserving of the thanks of Parliament.

Mr. LIDDELL was glad that an exposition of the policy of the Government had been elicited. The noble lord had, however, evaded the real question—what was the effect of our policy in China? Our interference, in his opinion, was not only uncalled for, but mischievous, because it taught the Chinese to rely on us and not on themselves. He did not know how to reconcile the noble lord's statement, that we were acting in accord with France and R asia, with the Under-Secretary's previous observation that our policy had no analogy with that of those two Powers. The Under-Secretary for Foreign Affairs said that the rebellion was waning. Mr. Oliphant, with better opportunities for observation. made the same statement in the year 1858, yet since then the richest producing districts of China had fallen into the hands of the rebels, and were now held by them. The fact was, that the rebellion, instead of waning, was, according to the last accounts, gaining strength. Trade in China was now threatened, not by the Taipings, but by the action of the French contingent in the neighbourhood of Ningpo, and one of the first operations which Captain Sherard Osborn would have to perform would be to control the lawless operations of our allies. He could not imagine a more difficult position in which a British officer could be placed. He thought that he had detected in the language of the Government that evening some glimmerings, at least, of an intention to retire from the untenable position which they had assumed. The observation that his noble friend, if he had any cause of complaint, ought to have proposed a vote of censure was a very old argument. The country had, it was true, once declared in favour of the noble lord upon a Chinese question, but the people were in his favour—not because they approved of his policy in China, but because he was defending public servants in that country. Had they understood to what difficulty, embarrassment, and danger the policy of the Government was likely to lead they would have acted in a different manner.

Colonel SYKES ridiculed the idea of considering the Tartar Government of China as a civilised Government, and in that character entitled to consideration and forbearance. That Government was a myth, and had no executive power whatever. The decrees of Prince Kung were not obeyed a hundred leagues from Peking, and in the provinces persons and property were only protected by the bayonets of our soldiers. The Blue-books did not contain a single instance in which person and property had been outraged by the Chinese; but, on the other hand, there had in the districts of China which were under Imperial Government been numerous outbreaks against the authorities. At places in the very neighbourhood of Canton, the pork butchers and the brick and tile makers had risen to resist taxes imposed to pay the foreign contingents. The Under-Secretary for Foreign Affairs had said it was utterly impossible to communicate with the Taipings because they had no Government. Why, they had occupied one-third of China for the last thirteen years, and consequently must have some central authority with which a treaty might have been made. At Nanking there were six boards corresponding with those of Peking, though for the mom nt the civil was inferior to the military department. Sir Henry Parkes had been in repeated communication with the Taipings, and long ago Sir George Bonham assured them that the British Government would acknowledge any chief they might like to set up. They had a system of custom-houses, moreover, throughout the whole of the country. The fact was, we did not know the whole truth, and that was the reason why we were acting under a misconception.

Mr. GREGSON admitted that the Imperial Government was imperfect, but it was improving, and he had no doubt that Captain Osborn would soon restore its authority and put an end to the atrocities hitherto committed on both sides. Our merchants were perfectly satisfied with the policy pursued by Her Majesty's Government, and we were never in a better position than at present with respect to China.

Mr. WHITESIDE said that what his noble friend who brought forward this subject objected to was that, owing to our present policy we were assuming all the powers of Government in China, and undertaking to do that for her which she ought to be allowed to do for herself. If our trade were interfered with, it would, of course, be our duty to protect it; but that was quite a different thing from taking upon ourselves the collection of the revenues of a country like China, and sending the most distinguished officers of our army to fight her battles, as well as gunboats. The Under-Secretary for Foreign Affairs, indeed, said it was necessary to encourage the Liberal party in China, but what, he should like to know, did he mean by the Liberal party? The party of ancient and respectable Whigs. no doubt. For his own part he had heard nothing in the course of the discussion to convince him that it was right to send out British officers, to double and treble their pay under a foreign Power, and he should not be surprised to hear the Chancellor of the Exchequer make as eloquent a speech in reprobation of the policy of the Government as he had done on a previous occasion when China was concerned.

ATTACK ON TRINGANU.

(10th.) Sir J. HAY called attention to the attack on Tringanu, a town belonging to the kingdom of Siam, which on the 12th of November, 1862, was bombarded by a British war steamer by order of the Governor of Singapore—an act which he characterised as cruel and illegal. He prefaced his motion for papers by an exposition of a somewhat complicated passage in Malay politics connected with the history of the chief whose residence at Tringanu was the primary cause of the attack.—Sir C. WOOD said he had not received all the official papers relating to the transaction, which, he admitted, appeared to be of a questionable character, but he thought it would not be fair to express a decided opinion without knowing more upon the subject. He was ready to give the papers.—Mr. LIDDELL and Lord NAAS denounced the act, and the latter suggested that orders should be sent out to prevent these unauthorised wars.

List of Passengers.

PASSENGERS INWARD.

By this mail, to Marseilles, per Vectis arrived 4th August.—From Shanghai: Messrs. Harvey and Jackson, Mr. and Mrs. Bradfield and infant. From Hong Kong: Mr. and Mrs. Hazeland, infant, and native female servant, Depy. asst. comy. general Wingfield, Mr. Munoz. From Singapore: Mr. Ruel. From Galle: Mr. Braine.

To Southampton, per Delta, expected to arrive Aug. 11.—From Shanghai: Captain Binet, Mrs. Pickwood and two children, Mr. Fitzroy. From Hong Kong: Assist.-Com. General Thompson, Mr. Humphrey, Mrs. Pickwood's European female servant, W. Stocks, A. Pascoq, G. Merrick, and J. Woods. From Singapore: Mr. and Mrs. McTaggart, three children, and European and native female servants, Mr. Schreiber, Captain Burton and native male servant. From Penang: Mr. Burns. From Galle: Staff Assist.-Surgeon Collier and European male servant, Mrs. R. Cocq, four children, and European female servant.

To Suez per Mooltan, arrived 28th July.—From Penang: Mr. Dance. From Galle and back. Dr. Webb's native man servant. To Alexandria: From Hong Kong: Mr. and Mrs. Ryril, Messrs. Wilzer and Ward, Mr. Sangster.

Per last Bombay mail to Marseilles, per Massilia, arrived 2nd August.—From Hong Kong: Mr. H. W. Davis. To Alexandria: From Ceylon. Mr. G. B. Leachman.

PASSENGERS OUTWARD.

By last mail, per Ripon, from Southampton, 20th July.—To Shanghai: Mr. George Bell and Mrs. Mackenzie's native servant, Mrs. Beal.—To Hong Kong: Mr. Merry, Mrs. Corbis and son, Mr. J. C. Thomas, Mr. Wm. Anderson, Mr. Grady.—To Singapore: Mr. R. C. Forbes, Mrs. Tarrant's native male servant. Mr. T. Wright, Mrs. Bennett's native female servant, Mr. E. C. Cooke.—To Calcutta: Mr. C. Willoughby, D. C. Jones, W. H. Happerfield, John Badderley, Ellis Greaves, John Hartley, Henry Kerry, Mr. A. F. Watson, Mr. A. N. Nimmo, Mr. A. Izat, Mr. G. Pothecary, Mr. C. Blair, Mr. W. C. Rennee, Mrs. Russell's native female servant, Mr. F. M. Avein, Mr. W. Scott, Miss Douglas, Mrs Presgrove's ayah, Mr. H. D. Rowland, Mr. B. S. Knight, Mr. Rowland Hill, Mr. W. A. Bound.—To Madras: Mrs. Grove's ayah, Mr. Risch, Mr. Blake, Mr. N. Massie, Col. Whistler's native male servant, Lieut. A. H. Vandeleur, Mrs. Sparks' native female servant, Mrs. Haigh's ayah, Mr. F. L. Clementson, Major Nisbet's native female servant, Col. Maitland's native female servant, Capt. G. F. and Mrs. Fischer, John Brewer.—To Ceylon: R. Davidson, Mr. Minty, Mr. and Mrs. J. Blackett, Mr. Daniel's native female servant, Robert Reid.—To Alexandria: Mr. Appleford, Henry Williamson, Owen Williamson.

From Marseilles, per Euxine, 29th July.—To Shanghai: Mr. Schroers, Mr. Bovenschen, Mr. Woodward, Mr Robert Daly.—To Hong Kong: Alfred Stanley, Mr. C M. Kerr.—To Singapore: Mr. and Mrs. R. C. Woods and two sons, Mr. Dennison.—To Calcutta: Capt. A. Tulloch, Mr. Black, Mr. J. Tweedie.—To Madras: Capt. and Mrs. P. D. Horn, infant, and native female servant, Mrs. Campbell.—To Ceylon: Mr. T. Steele, Mr. Jas. Russell.

Per P. and O. steamer Poonah, 4th Aug., from Southampton.—To Shanghai: Mr. F. P. Morris, Mr. J. Maitland.—To Hong Kong: Mr. Frank Leyburn, Mr. Lalor.—From Marseilles, 12th Aug.—To Hong Kong: Mr. H. W. Carey, Mrs. Carey, Mr. F. Carey.—To Singapore: Mr. W. Walters.—To Ceylon: Mr. W. Pollock, jun.

Per P. and O. steamer Pera, 20th Aug., from Southampton.—To Hong Kong: Mrs Marston and infant, Mr. Thos. Dobbin, R.N.—To Ceylon: Mrs. and Miss Anderson.

Per P. and O. steamer Delta, 27th Aug., from Southampton.—To Hong Kong *via* Bombay: Mr. and Mrs. G. Tyson.

Per P. and O. steamer, 4th Sept., from Southampton.—To Hong Kong: Mrs. Rice.

Per P. and O. steamer, 20th Sept., from Southampton.—To Hong Kong: Mr. and Mrs. G. A. Roesing.—To Ceylon: Mr. H. Kindersley, Mr. and Mrs. B. L. Ronald—From Suez to Shanghai: Mr. and Mrs. Probst, Mr. and Mrs. Bolsted.—To Hong Kong: Mr. W. Wilson.

Per P. and O. steamer, Sept. 27, from Southampton.—To Shanghai, *via* Bombay: Mr. Isla Sitwell.

Per P. and O. steamer, Oct. 4, from Southampton.—To Ceylon: Mrs. Skinner and daughter, Mr. J. B. Evans, Miss M. B. Evans, Mrs. Horne, infant, and child. From Marseilles, Oct. 12.—To Ceylon: Mr. and Mrs. Gibbon.

Per P. and O. steamer, Oct. 28, from Marseilles.—To Shanghai: Mr. A. K. McDonell, Mr. Crawford Kerr. To Hong Kong: Sir Hercules and Lady Robinson. To Singapore: Mr. Callaghan.

Per French steamer Peluse, from Marseilles, July 19.—To Pondicherry: Mr. A. K. Moorat. To Calcutta: Mr. Seleby. To Singapore: Mr. Moss. To Point de Galle: Mr. and Mrs. de Haultain.

Per P. and O. steamer Poonah, August 4, from Southampton.—To Ceylon: Mr. F. Y. Williams From Marseilles, Aug. 12.—To Hong Kong: Mr Currie. To Singapore: Mr Dennison, Mr. Buxton.

Per P. and O. steamer Pera, August 20, from Southampton.—To Shanghai: Mrs. W. Birt.

Per P. and O. steamer, Sept. 4, from Southampton.—To Hong Kong: Mr. Walker. To Ceylon: Miss A. Nicoll, Mr. G. Damman (en route to Australia).

Per P. and O. steamer, Sept. 20, from Southampton.—To Hong Kong: Capt. Thomsett. From Marseilles, Sept. 28.—To Hong Kong: Mr. Reine, Mr. W. Lamond. From Suez.—To Hong Kong: Mrs. Wilson.

Per P. and O. str., Oct. 4, from Southampton.—To Hong Kong: Mr. Duncanson, Mr. Hancock, Mr. T. Rothwell. To Ceylon: Miss Tarrant.

From Marseilles, Oct. 12.—To Ceylon: Mr. and Mrs. C. H. Stewart.

Per P. and O. str., Oct. 20, from Southampton to Penang.—Mrs. Walter Gillespie, infant, and two children.

THE DETENTION OF THE MAILS.

The detention of the present mails has been owing to the breaking down of the P. and O. screw steamer *Bengal* a few days after leaving Calcutta for Galle. The *Bengal* left Calcutta on the 23rd June, and returned on the 29th, having broken her screw. The *Mooltan* was substituted, and proceeded to Galle, where she picked up as usual the passengers, mails, &c., from the Straits, China, and Japan. When the railway is completed from Bombay to Calcutta, and the present service of the P. and O. Company is altered accordingly, we trust the ports beyond Galle will not be dependent on the steamer from Calcutta, but come on to Suez direct.

Summary of News from the Far East.

JAPAN.

Dates from Yokuhuma were conveyed to Shanghai to the morning of the 27th May, by H. M's. ship *Coquette*. No settlement of our demands had been announced by Admiral Kuper, although the last time named (21st) had passed over. It was rumoured that the prospects of peace were increasing, and that daily negotiations were proceeding. Mr. Consul Winchester called a meeting on the evening of the 26th, and informed the residents that, notwithstanding a prospect of the Japanese yielding peacefully to our demands, it was necessary for them to maintain the same vigilance against the possibility of an open or secret outbreak. It was assumed by the residents that the meeting was called in consequence of the special conference held on the 25th and 26th by the English and French Ministers and Admirals, and TAKIMOTO, the TYCOON'S special envoy. It is said that if the British demands are conceded, a civil war must result for the dethronement of the TYCOON. We may note that the 31st regiment, which was believed to be embarking at Shanghai for Japan, when the last mail reached us, has left for England, which certainly adds weight to the pacific settlement of the affair.

Digitized by Google

At Nagasaki matters are not so promising. Dates are to the 30th May by the Russian screw *Abrecht* to Shanghai. At that date the few residents left held themselves ready to embark for Shanghai, all their books, &c., being already on board ship. H.M.S. *Rattler*, with *Ringdove*, were in harbour, but were not allowed to land any men for the protection of the foreign settlement. Mr. Morrison, the Consul, retired on board the *Rattler* every night, but the other residents assembled nightly at the house of Messrs. W. J. Alt and Co. This determination was arrived at at a meeting held specially to consider whether they should abandon the place or remain until some act of the Japanese necessitated the step. The following extract from a letter will illustrate how certain war is anticipated by both Japanese and foreigners at Nagasaki :—

"According to the Governor of Nagasaki's notification, as soon as war is declared, all foreigners, of whatever nation, must leave in forty-eight hours; excepting the Russians in port, as they have the war steamer *America* here repairing, and all the crew and guns are on shore at Inasia Temple. I think the reason why the Japanese allow the Russians to remain is because they are afraid, as they have a large squadron in the seas.

"All the forts and batteries outside at the entrance of the harbour have just received large numbers of guns, and the men in them reinforced. New batteries are also being commenced on several commanding points on the hills around the bay. At the iron factory, hundreds of men are employed casting shot. Everywhere preparations are being made for making a desperate resistance in case of attack from the English; so that I think it was bad policy on the part of Colonel Neale to grant a further extension of time. Daily we observe bands of armed men coming in from every quarter, while the inhabitants of the city and adjacent villages are fast clearing out. The ordinary class of labourers and coolies refuse to work for us; they prefer remaining all day long idling on the Bund, in the chance of plundering the Settlement, than to go on board ship to work. We used to pay for coolie hire at the rate of 2¼ itziboos for six men, they now ask an itziboo each. Our own servants are all running away into the country, and in a few days we shall have to do all the work we require ourselves. Freights are daily rising; the steamer *Hellespont*, Captain Mooney, loaded at $10 per ton for your port. Holders of Japan produce are likely to make large profits at Shanghai, and there will be nothing doing for some time but shipping all the export cargo that is ready. Tonnage continues very scarce, and agents of ships are asking extravagantly high rates.

"The ships of war in port, after the French steamer *Dupleix* leaves, will be as follows:—H.M.S. *Rattter*, Captain Howard; *Ringdove*, Captain Brown; H.N.M.S. *Vice-Admiral Koopman*, Captain Buys; H.I.F.M.S. *Dordogne*, Lieutenant Vidal; H.I.R.M.S. *Amerika*, Captain Bautlin; and the *Manjoory*. Also the Japanese steamers, *Shantung* and *Sir Charles Forbes*. I hear that the Governor of Nagasaki is anxious to sell the *Shantung*, as he is afraid that as soon as war is declared the English will seize her. She will, no doubt, be a good prize for the *Rattler* and *Ringdove*, as she cost the Japanese Government $135,000 paid in hard cash. She is now in command of a Russian officer; and has made the voyage from Nagasaki to Yedo and back. The Prince of Satsuma bought the steamers *Contest* and *Sir George Grey* for $95,000 each. The steamers *Kumsing*, *Hellespont*, and *Stork* (late H.M.S. *Beagle*) are here for sale, but owing to the unsettled state of affairs they are not likely to be sold. The *City of Nantes* arrived this morning; and in the afternoon an accident happened on board. One of the coolies while employed passing up cargo, fell over the stage into the hold and was killed instantly. It is anticipated that the Japanese authorities will make some fuss about it, or at all events give considerable annoyance to the British Consul, as they say the man was knocked down by a negro in Alt and Co.'s employ. Great credit is due to Mr. Morrison during these 'troublous times,' for all that he has done to protect British interests, and indeed the general welfare of the foreign community, for which he is entitled to their best thanks."

NOTIFICATION.

To the British Community at Nagasaki.

The undersigned, Her Britannic Majesty's Consul, has received a communication from the Governor of Nagasaki, to the effect that much excitement prevails in the town, in consequence of many rumours regarding an unfavourable progress of negotiations with the British authorities at Yedo, in consequence of which a patrol has been appointed for the protection, night and day, of the foreign quarter.

The community at Oroma has in general better means of information on local topics than Her Majesty's Consul, and has equal means of estimating the various rumours which circulate. As far as the Consul has been able to gather, they indicate a conviction on the part of all Japanese, from the governor downwards to the water carriers, that the demands made by Her Majesty's Chargé d'Affaires on the 6th ult., and to which a definite reply was required in twenty days, would be rejected, and that an attempt to enforce them would be resisted. On this subject, however, the Consul is bound to inform the community that he has received no further information or instructions from Her Majesty's Chargé d'Affaires than those which he made known to them on the 14th ult. On that occasion (he may remind them) he was directed to state that the Commander-in-Chief would take such measures for the protection and defence of British subjects in Japan as by him might be considered expedient or practicable. Nevertheless the Consul has not neglected to draw the attention of Her Majesty's Chargé d'Affaires to the dangerous situation in which this community would be placed by the hostility or fanaticism of the Japanese soldiery being aroused, while for his own part, as the community is aware, he has considered himself justified and necessitated for the public security in taking the step pertaining to him for the detention of Her Majesty's ships *Swallow* and *Ringdove*. He has, further, neglected no means in his power to obtain information affecting the interest of Her Majesty's subjects at the port, and at the proper time to obtain from the Governor such positive intelligence as he was willing to communicate, and such explanation as he was able to afford of the public excitement.

It was not to be expected that the Governor would afford any very precise information, but the consul has been able to gather that he shares the public apprehensions as to the issue of negotiations, and the consul has no confidence in his power to suppress excesses on the part of the soldiery or other disorderly characters, while his voluntary establishment of a guard for the foreign quarter is evidence of his belief in the existence of such danger. The Governor has admitted that he fears the negotiations will not terminate satisfactorily; that (with all of us) he ardently hopes they may, and he has promised to inform the consul the moment that positive information of any nature reaches him, if favourable for the quieting of apprehension; if unfavourable, that British subjects may provide for their personal safety, Her Majesty's Consul is disposed to place the utmost faith in the good disposition of the Governor and officers of the Tycoon's Government towards foreigners, but is bound to confess his doubts as to their power of control over the existing sources of danger.

It remains for the community to decide for themselves on the advisability, or otherwise, of preparing themselves for any emergency that may arise, by providing for the safety of their most valuable property, and holding themselves in readiness to embark on board ships at the shortest notice, for it must be apparent to all that, with the small force at his disposal, the senior naval officer cannot undertake the protection of the settlement by land.

(Signed) GEO. S. MORRISON, H.B.M. Consul.

British Consulate, Nagasaki, May 9th, 1863.

To the British Community at Nagasaki.

Her Majesty's Consul has received instructions from Her Majesty's Chargé d'Affaires in Japan. to make known to the British community at this port, that at the urgent solicitations of the authorities at Yedo, he has accorded an additional period of 15 days (to May 11th, inst. inclusive) for the final and categorical answer to the demands made upon the Japanese Government. At the expiration of that period, if no satisfactory settlement has been arrived at, the same contingency as to the commencement of coercive measures on the part of the squadron under the command of Rear-Admiral Kuper, and the same risk of danger to the foreign residents at the open ports of Japan, will as heretofore prevail. The Consul would again, therefore, earnestly impress upon British subjects the desirability of their making use of the interval to take all the precautions and make all the arrangements in their power for the safety of their property and persons under any contingency that may arise, and the necessity of holding themselves in readiness to embark on board ship at the shortest notice. He would further clearly impress upon them that no more assistance can be expected on an emergency from the naval forces present, than to protect the embarkation of individuals unimpeded by baggage.

The Consul has the satisfaction of announcing that the Admiral intends to despatch a ship of war to this port as soon as any coercive measures may be undertaken, but the presence of a single vessel is the extent of protection which can be afforded to this port. From the copy of a despatch from Her Majesty's Chargé d'Affaires to H. M. Consul at Kanagawa, the community will gather that the demands of Her Majesty's Government are peremptory, and will not admit of refusal or evasion without entailing a resort to force.

In conclusion, the Consul earnestly recommends Her Majesty's subjects to avoid as much as possible exposing themselves to the risk of collision with the strange soldiery in and about this neighbourhood, and with this view, to abstain from unnecessary traversing the town; for it is not reasonable to expect that in the present excited state of the time, the Civil Government is as powerful for protection as in ordinary times. It becomes us all to practice the utmost forbearance and discretion pending the crisis anticipated, remembering that it is not only our individual safety is concerned, but, in a greater or less degree, the conduct of any one person may affect the safety of the whole foreign community.

(Signed) GEO. B. S. MORRISON,

Nagasaki, May 11th, 1863. H. M's Consul.

In one letter from Yokuhama it is stated that the American Minister's house has been burned to the ground.

The following is from the *China Mail*:—

"The danger which was foreseen is, that the terms of the *ultimatum* may be so far departed from as to cast doubts both upon English promises and threats, and to give the Japanese courage for the perpetration of future acts of patriotism or insolence—according to the view that may be taken of those acts. Prince Satsuma cannot very well be taken into favour without making some very adequate amends for the conduct of his retainers, and the only alternative open to us will be to resume pacific relations with the Tycoon's Government, leaving Satsuma out of the reconciliation, and dealing with him ourselves as we shall consider best. The reports go on to say that a civil war in Japan is deemed inevitable, and this gives strength to our hypothesis. At the same time, even in the cause of humanity, a foreign war would be better than the civil strife that is said to be on the point of breaking out. It is a pity that we cannot trade with a people without also being the direct means of bringing upon the country all the horrors of a civil war. Not that the world would be much the worse if one-half of the Daimios with their retainers were destroyed by the other half. There is no royal road to free institutions and civil liberty, and if these boons are ever to be possessed by the Japanese the stages necessary for their attainment must all be duly traversed; and we rather think that years of bloodshed lie between the feudal aristocracy of Japan and the present stage of European advancement. All that we want, however, is access to the country for peaceful purposes of every kind. If we are determined to retain a position in the country it is clear that acts of hostility must be resented, and that without abatement of any portion of the penalty that is demanded. If the Japanese are allowed to ride easily through a crisis like the present, they will be entitled to hope that future difficulties will be as easily overcome."

CHINA.

PEKING.

Mr. W. C. Milne, Assistant Secretary to the British Legation, died in a fit while sitting at table. He was formerly attached to the London Mission Society, and has written successfully on subjects connected with China. At the time of his death he was also in charge of the student interpreters at Peking. The Legation loses, by his death, a valuable servant, whose place it will not be easy to fill from the slender staff of consular interpreters. Mr. Milne was deservedly esteemed by all who had the pleasure of knowing him, whether privately or officially; his loss is, therefore, sincerely regretted.

TIEN-TSIN.

The Nyen-fei marauders have disappeared from the neighbourhood, and business has taken an active turn in consequence. Foreign merchants are continuing to build, though it cannot be said that there is much activity displayed in the erection of premises by foreigners. The annual races came off on May 12th and the two following days; the weather was fine, and Chung-how, the Port Commissioner, honoured the meeting with his presence.

SHANGHAI.

A brutal murder had been committed in an hotel in the French Concession. A ruffian named Bulkly, in the course of a dispute with the master (McKinnon) of the *Emily Banning*, drew a revolver and mortally wounded him. The greatest indignation was felt among the foreign community at the perpetration of such an outrage; the American residents met and voted $5,000; $3,000 of which was to be offered for the capture of the murderer, who had escaped—$2,000 to be given to the murdered man's widow. The officers and crew of the American ship *Ringleader* have reached Shanghai in safety, with the exception of two seamen who were drowned. The vessel was wrecked on the South west end of Formosa.

CAPTURE OF TAI-TSAN.

With regard to the rebels, we have to report the capture of Quin-san by the Anglo-Chinese contingent, under Major Gordon. This city is situated between Tai-tsan and Soochow. The following notice of its capture is from the *North-China Herald*:—"It appears that this place is surrounded with stockades of a formidable character, chiefly built of granite. The attack was begun on those on the south side of the walls, from which the rebels were speedily driven. The force then marched round to the west side and succeeded in taking the stockades there. Major Gordon with a rapidity of movement unknown in Chinese warfare, immediately led his troops along the only road leading to Soochow, along the east bank of the creek, which at this point becomes a broad and deep river—the *Hyson*, armed steamer, accompanying the force. On the road he captured three stone forts; and afterwards encountered a body of some 15,000 rebels, whom he attacked and defeated with great loss to them. He then proceeded in the *Hyson* to reconnoitre the country in the vicinity of Soochow, coming within view of the walls of that famous city. The steamer then returned to where the force stood, when they marched to the attack of Quinsan, which was being evacuated by the garrison. A number escaped, but many yielded submission to their captors. Then followed the taking of the strongest rebel post near Soochow, with the loss of only a few killed and wounded, while on the Taiping side the loss is estimated by thousands. This rebel force was chiefly composed of picked men from Soochow, under the leadership of the Moowang, who, it is said, has himself been cut off. There was scarcely any loot found in Quinsan, as it was purely a garrison town; having a manufactory for ordnance, shot, and shell. Two good 18-pounders were found in the place, which had been worked by foreigners.

At last, H.M.'s 31st Regiment are returning to England after an absence of nearly ten years. However, the whole force are not taking advantage of leaving China for the mother country: about 200 non commissioned officers and privates remain to try their fortunes in Shanghai, of whom 100 are in the municipal police force. The remainder, between 600 and 700 strong, will proceed in the sailing ships *Caroline Coventry* and *West Derby*, in about three weeks, to be landed at Portsmouth. The *Gorilla*, also, is chartered to take the 5th Bombay N.L.I. to India, and are expected to leave in a week. The Shanghai garrison will then comprise the 67th head-quarters, a portion of the 22nd, and the 2nd Belooch regiment.

The daring acts of the Chinese officers in their interference with Europeans and Chinese residing in the settlement is becoming daily of more importance. It appears that foreigners are employed to collect the local taxes, and two of these persons had entered the market premises of Mr. Smith, although warned against it. They were warned by the Consul not to repeat it. One of the Royal Engineers was arrested and thrust into prison for not paying a tax on a boat.

The following mercantile notices have been published:—

The business of the undersigned will hereafter be carried on by their successors, Messrs. Trautmann and Co., who have taken over their assets and liabilities.—Harkort and Co.

The business hitherto carried on by Messrs. Harkort and Co., will be continued by the undersigned, under the firm of Trautmann and Co., they having taken over all assets and liabilities of their predecessors.—Johann Friederich Heinreich Trautmann, Frederick Horsen Block, August Wieters.

The following notification has appeared from the office of Maritime Customs, signed by H. Tudor Davies, Commissioner:—"His Excellency the Superintendent of Customs of Shanghai desires to notify the foreign community that by agreement between the Chinese and foreign high authorities at Peking, the following modification has been made of that part of the treaties of Tien-tsin under which duty-paid imports, carried coastwise, have been heretofore cleared at the second port of entry by exemption certificates:—On and after the 1st June no more exemption certificates will be issued by the Customs, but any merchant re-exporting imports as above, their marks being unchanged and the conditions of the treaty affecting them otherwise being fulfilled, will receive instead a drawback, on the face of which it will be stated that the same may be tendered by any merchant in payment of any duties, whether import or export, within the port at which it is issued; but that it will not be a valid tender in payment of duties at any other port."

The new steamer *Wan-loong-fei* has just returned from a trip into the silk districts, at present in occupation of the rebels. A correspondent obligingly sent us the following remarks upon the state of the new crop; and the peaceable condition of the rebels, not only amongst the inhabitants, but towards foreigners who visit the district for commercial purposes:—"The silk is backward, but in fair quantity; a week more ought to bring it down here. The rebels I found well fed, well clothed, perfectly civil, and very obliging. No attempt was made to molest or alarm us."

Some time ago, reports arrived in this country with regard to cruelties inflicted upon Taiping prisoners: these reports were not substantiated. Since the capture of Taitsan, however, it appears that several acts of cruelty have come to light, which are of a nature disgraceful to humanity. The following letter to the *Daily Shipping News* of Shanghai will show what is narrated on the subject:—

"Much has been said of the innate cruelty of the rebels in China, and arguments innumerable have been derived therefrom, favouring the introduction of a foreign element to crush the rebellion. We question much, however, whether a more diabolical act has ever been committed than that which took place after the capture of Taitsan. Some Imperial soldiers, it appears, took seven rebels prisoners. After piercing their eyes out with arrows, they saturated their clothes with oil, then applying fire, roasted the miserable wretches alive. This is no idle tale, more than one Englishman saw the deed done and heard the cries of the unhappy victims, powerless alike to help or save. It is of little use to expatiate upon the exquisite pain this mode of torture must have caused. Retribution should be exacted, and that speedily."

To this letter a reply was made by an officer who was present; he denies the assertions about the oil being used, but what he admits having seen is sufficiently bad to call for interference. He says—

"Seven rebel prisoners, who escaped from Taitsan, were captured by the Imperialists, and brought into the Chinese camp near Wy-con-sin, where a field force, consisting of Royal Artillery, the 31st Regiment, and the Beloochees, was at the time stationed, affording 'moral support' to the disciplined Chinese when they were attacking Taitsan. These seven prisoners were condemned to death by Chinese martial law. About eleven in the forenoon they were each tied to a stake, and each had four small arrows with little flags at the end (official emblems of death) stuck into them. In no instance was any injury whatever done their eyes. They were kept thus exposed to public gaze until sunset, when they were taken down and beheaded in the ordinary way. While they were tied up, they gave no external manifestations of suffering; on the contrary, they seemed to display remarkable indifference."

It will be seen that the writer was surprised at the indifference displayed by the suffering victims, which confirms the belief that there was torture sufficient to lead to the expectation of a display, by the sufferer, of anything but indifference.

Mr. Wellington E. Ayers committed suicide at Hankow on the 18th May.

The *Friend of China* has some severe comments on Mr. Lay's *repose* in the Blue Book.

Digitized by Google

HANKOW.

The market would not open until the arrival of the contract teas, and no additional chops had yet arrived. Prices would probably range high, as teas lay down from the country at 34 taels, which, with a £10 freight, is equal to 2s. 4d. sterling; with these rates ruling, no profit was anticipated. It is the very high prices paid by the Shan-si men, who are the buyers for Russia, which has made the leaf cost so much in the country. These buyers have succeeded in purchasing about two-thirds of the first crop leaf, which will make fine teas scarce in England. This is the first time that the Shan-si men have gone in for fine first crop tea. Heretofore, they have been satisfied with buying second crop, or No. 2 quality teas. This change is occasioned either through an improvement in the taste of the Russians, or the satisfactory result of the fine teas sent from England to Russia last season, inducing Russian merchants to order first qualities themselves. It is not unlikely that the trade in England, rather than pay the necessary price to make a profit on a first shipment from Hankow, will go in for second crop teas, which will probably be plentiful and good. There is a difference of opinion as to the quality of this season's teas as compared with last. The truth seems to be that in some respects they are superior, and in other inferior. They are generally very well made, well twisted leaf, and not badly picked; though there is room for improvement in that respect, as the brownish leaves are rather plentiful. They are mostly of the small, blackish style of leaf, not the true large Oopack leaf, which is mostly liked. The flavour is fine, better than last season, but thin—a great fault. Our last season teas were made much of, on account of the strength; and this season that excellent quality is rare. Altogether, whether equal to last season or not, they are said to be below the average, not above it.

KIUKIANG.

Business was unusually dull, especially in imports, for which the demand was slack. In exports very few transactions had taken place. The trade in tea was seriously affected by the new customs regulations which limit the time of receiving the drawback of the coast-trade duty to one month after the arrival of the teas at Shanghai; and compel the exporter to pay duty a second time, if not shipped within three months. These stringent regulations have checked shipments to a large extent. The management of the customs at riverine ports continued a source of complaint. The last eccentricity has been committed by the Taotai at Kiukiang, who had come to an arrangement with two or three compradores of foreign hongs, in virtue of which they farm the collectorate of the opium duty for one-third of the revenue. These compradores deal in the drug too, and have, of course, greater advantages in disposing of their consignments than those who do not belong to their association. The houses whose compradores belong to it do not kick against it; but as soon as the "Union" has squeezed enough dollars to import opium from Shanghai in quantities, they as well as other foreigners will be in no very favourable position to compete in the market. It was hoped that an arrangement would be made to put a stop to it before it reaches this point. The steamer *Elfin* had been detained for having evaded the customs at Chin-kiang. Accounts continued to come in from the tea districts announcing that there would be a late crop.

NINGPO.

The French force garrisons Shao-shing, and Sao-tsan was held by the Anglo-Chinese. Blame seems to be attached to the Taoutee for his parsimoniousness in supplying funds for enlisting men, and recruits have to be sought for among the islands of the Chusan Archipelago—brave fellows enough, but a set of piratical scoundrels. Complaint has been also made of unfair play in the division of loot taken at Shang-yu and Shao-shing, the French tenaciously holding on to all they have fingered. The taking of loot, it is to be feared, has, except under the strictest regulations and in justifiable circumstances, a demoralising effect upon the troops.

AMOY AND FOO CHOW.

News from these quarters is unimportant.

SWATOW.

Considerable excitement had been caused by the action of H.M.'s Consul in reference to the new site for a foreign settlement. It appears that when it was determined to quit Double Island, the American Consul chose for himself a site on the south side of the river, while H.M.'s Consul selected the "Kailut site" on the north. The U. S. Consul, Mr. Bradley, exerted himself in numerous ways to induce the English community to settle on his side, where he has bought up the land. A Chinaman, partner, it is said, in Mr. Bradley's business, claimed the Kailut site, but a mandarin was sent from Canton to investigate the matter, and his visit issued in the site being leased, in perpetuity, to the British Government. But opposition did not end here. An attempt being shortly afterwards made to survey the site, a band of Chinese were brought from the neighbouring town, and they offered such serious molestation to the surveying party that the latter had to retire. The astute Chinaman before alluded to was, no doubt, the instigator of the row. It is therefore surmised that the baffled British Consul has gone over to the side where all the land has been bought up by Messrs. Bradley and Co., who desire upon it the moderate profit of five hundred per cent. The Consul has acted weakly in the matter, and so, we think, has Sir F. Bruce, in giving his sanction to the change.

HONG-KONG.

In consequence of the facts which came out on the late trial of four of the crew of the *Beatrice* for murder, reported in our last issue, no insurance-office would take risks on her so long as she was in charge of her present master; the master thereupon failing to demand an inquiry, Messrs. Smith, Kennedy and Co. felt bound to have those charges, or implied charges, cleared up. The Acting-Governor accordingly issued a warrant for the inquiry, which occupied three full days, and the Court decided the result to have been "mysterious, sudden, and startling," that discipline was maintained and observed on board the ship up to the instant of the mutiny, and subsequently to its repression, and that nothing had been exhibited in evidence showing the master's incompetency or unfitness for command.

The Canton Fire Brigade Representatives (1856) met June 12th, and determined to hand over the funds at their disposal to be applied towards the erection of a City Hall in Hong Kong. No proposal to resuscitate the old fire brigade at Canton having been brought forward, no objections to this application of the money were made.

It was proposed and seconded that the sum in hand, arising out of the indemnity paid by the Chinese Government for British losses, should be paid into the Consulate at Canton for the general purposes of the community there; but the motion was not carried, owing to want of support.

The native traders have memorialised the foreign merchants with a view to having the Canton Customs practices assimilated to those of Foo-chow and Shanghai.

The French cathedral at Canton is being steadily proceeded with Althoug scarcely brought to the level of the ground, the plan of this enormous structure is evidenced in some measure by the form of the foundation. There appears to be in contemplation two spires, after the Notre Dame model; and the work is being carried out under the superintendence of two French architects sent out for the purpose, with a staff of French workmen under them. The pile, when completed, will form one of the most prominent features in the City of Rams—not a difficult thing to do, as the chief characteristic of that city, when viewed from a distance, is the monotonous level presented by a sea of roofs, broken only by those aerial structures of bamboo which young comers believe to be erected by mandarins and rich teamen as places where they can take the air and enjoy a whiff of tobacco about the hour of sunset.

THE AMERICAN MINISTER IN JAPAN.

(*Overland Trade Report.*)

We do not know whether our readers have heard the rumours which are current relative to the business qualifications of Mr. Pruyn, the United States Minister at Yedo. It would seem certain that this honourable individual has obtained the lucrative appointment of broker for the Japan Government for the purchase and supply of steamers and munitions of war. Of this broad fact we believe there can be no doubt whatever, but regarding some of the operations reported, the stories current do not agree. For instance, one story runs that he effected the sale of the steamer *Ly-ee-moon*, and pocketed $50,000 by the operation, which, as he received as a commission, the late owners claim. Another story contradicts this to a certain extent, by a statement that the purchase was negotiated through a broker at Shanghai named Rogers, who was employed by Messrs. Allmand and Co., of Yokuhama. But then a third story is told that Messrs. Allmand and Co. are Mr. Pruyn's agents.

We have already had our say respecting American diplomacy in the Far East, and we would be spared the trouble of re

Digitized by Google

capitulating all we have more than once stated. Suffice it for our present purpose to remark that, we are under the conviction that United States diplomacy in Yedo has been made subservient to the Japanese institution of assassination.

We say it is clear, abundantly so, that the United States Minister had an assurance from some reliable source of immunity from this diabolical political weapon, and that on consideration thereof, he screened to the utmost of his power the Japanese Government from the consequences of that series of wilful murders which have made their name so execrable and notorious. And if we be right in the course of reasoning which we deem inductive, whereby we have arrived at this conclusion, it follows necessarily that United States diplomacy in Japan has been evoked systematically to encourage assassination.

We saw it stated in the London *Times* lately that General Butler, of New Orleans notoriety, entertained the same feelings towards the English as Marshal Haynau must have cherished towards Messrs. Barclay, Perkins, and Co.'s operatives. Inasmuch as the aspirations of United States diplomacy in Japan are entirely devoted to counteracting British interests, it cannot be said that Butler is by any means singular either in his ideas, or more unscrupulous than his fellows in carrying them out.

It may be foolish, and we feel sure it is so, for United States diplomacy in these regions to place itself in antagonism with British diplomacy, because so long as the English aim at no exclusive advantage, their policy subserves United States interests as well as it does our own. But considering the contemptible figure which "Yankee" diplomatists have ever cut here, and the lamentable failure they have always made in their attempts to command respect at Peking and Yedo, we are not surprised at the antagonism being perpetuated by the class of politicians from United States representatives of the national dignity who are chosen.

But when the point at issue comes to be assassination as a political weapon, then a very different stand-point has to be taken. It is in this view of the case that we utterly condemn Mr. Pruyn's position at Yedo. It is bad enough that the Japanese government should have the conviction forced upon them, that Western civilisation can be made to subserve all that the allaying of *cacoethes* of the palm is a panacea for the recoil of that virtuous indignation which has been so often prated in their ears, is really humiliating to reflect upon.

No wonder that Mr. Pruyn was absent from a conference which was lately held at Yokuhama by the representatives of the Treaty Powers. The marvel is that they would assent to meet him. There is no doubt that a good deal of ill feeling exists at present on the part of Americans against the British in consequence of the depredations committed by the *Alabama* and *Florida*. The equipment of those craft was not against international law, but was against the Foreign Enlistment Act. Of this the Federal Government cannot complain, because they themselves have been habitually and systematically violating that Act.

Still we admit that the feeling is natural, but we never expected to see it going the length of speculating in Americans taking service in Japanese employ, and equipping as cruisers against British commerce some of the steamers which the Japanese have lately been buying. Amongst a certain class of Americans this is now the talk—it is but talk, and very absurd talk, too—but still at the same time it should be marked, because in these matters the wish is generally the mother to the thought.

Under such circumstances we were somewhat surprised at reading the following in Messrs. Parker and Co's. last freight circular :—"The prospect of hostilities between Great Britain and Japan has improved the prospects of American vessels for business in Chinese waters, as it is feared that in case of open war, the many steamers recently purchased by the Government and the Daimios of Japan, will be sent into the China Sea to prey upon British commerce. Already a preference is shown to neutral flags for coast business, particularly by the Chinese." The reader will mark the word "feared," and also the fact averred of the Chinese being the shippers most alarmed. We do not think that Mr. Torrey need be under much apprehension, and unless he alarms the Chinese with the shadow he has raised, we fancy they will not take fright without some equally valid show of reason.

This kind of dodge is fair enough in trade under some circumstances, and we like to see a man stand up for his own nationality; but Mr. Torrey should remember that he is in a British colony, and that being by no means popular with his own countrymen, he relies on British support. We are sure that he is not the man to sanction or support the Japanese in their diabolical practices, no matter if a fleet of *Alabamas* slided on their trial trips and became destroyers; but we are equally sure that the information he gives is all bosh, whether he be the hoaxer or the hoaxed, and in pointing the subject out to him we need scarcely add we are performing a friendly duty, which he will fully appreciate and remember.

THE PHILIPPINES.

MANILA.

The telegram which announces the destruction of Manila by earthquake, with 10,000 native inhabitants, turns out, as we anticipated, to have been an exaggeration of the facts, which were as follows :—

"On the 3rd of June, at half-past seven in the evening, a circumambient flame was seen to rise from the earth and gird the city of Manila (the "Beauteous Flower of the East," as she is finely and poetically designated by her possessors), and at the same time a most terrific quaking of the earth took place. It lasted scarcely a minute, but in that short space nearly the whole of Manila was reduced to a heap of ruins. The abomination of desolation has taken possession of her palaces, her temples, and her dwelling-places, and death and destruction have ridden triumphantly over the land. Upwards of a thousand have been killed, and many thousands wounded, but it is impossible to say or to estimate. Scarcely an edifice has escaped without dead or wounded. The good priests, their choristers and sacristans, and the faithful who were hearing the vespers of Corpus Christi, have been nearly all buried and suffocated under the ruins of the cathedral and other churches. The only church that escaped wholly is San Augustin, the same that withstood the tremendous shock of 1645. The Palace and nearly all the public and private, as well as commercial edifices, have either been thrown down or shaken from their foundations. Not a single foreigner was killed, but two were seriously hurt, though not dangerously. The Rodriguez property, left to the British nation, and where the British Consulate was, has been entirely destroyed, and is nothing but a mass of ruins. Spanish subjects of all classes, during this great and sudden trial, acted admirably. The Governor-General and the Archbishop set a brilliant example, which was copied nearly by all, of calmness, fortitude, resignation, and energetic sympathy.

"The city, after the occurrence, was nearly deserted, lest there should be a repetition, for, at the slightest shock, the remaining edifices threatened to fall. Before the earthquake took place, sulphurous odours were perceived, rumbling like the firing of ordnance, and the approach of locomotives! The flame that surrounded the city was seen from the Bay to ascend towards the sky; and another, a triple snaked one, came from the land over the water to the shipping, and threw them up at least two or three feet; while on shore the earth has everywhere sunk at least two feet. The residents had experienced considerable sickness and nervousness, partly attributable to the charged state of the atmosphere."

The following is another account of this disastrous affair from Captain Winchester, of the *Caribbean*, lying in the harbour at the time :—"At half-past seven in the evening, I was on deck, and observed a white sheet of foam, or something like it, flying towards the ship, travelling about S.E. to N.W., it struck the ship with such violence that she made a plunge and bounded over it, causing her to shake and vibrate as though striking on a hard bottom, the sea boiling up on both sides with great commotion, and appearing white, as though we were in a field of snow; on shore, I saw flashes of fire travelling in the same direction, and upwards, having the appearance of a bullet skipping over the water, and throwing it sprays as it went. The whole appearance was grand and terrible, lasting to our view about one minute;—there were two other slight shocks, at half-past eleven and three in the morning. Daylight showed us the fine cathedral, churches, and public buildings on which the sun had set in splendour the night before, lying in ruins. I went on shore, and looked with amazement at the devastation of one minute; the foundations of the harbour, and quays about the harbour-master's office, had sunk about four feet, the sea flowing through the streets: in the city, nothing could be seen but ruins, from the Governor's palace to the peasant's hut; the streets all strewed with furniture crushed and broken, from a costly piano to a Chinaman's stool, soldiers and others

Digitized by Google

busy digging out and carrying away the dead and dying from the ruins. I asked an officer of the garrison, a Spanish regiment stationed here, how many were killed; he said it was not yet known, already 576 had been buried, but the barracks, hospitals, gaols, market-place, and tobacco factories had yet to be cleared away, and he believed the mortality could be nothing less than 2,000. Several priests, and a number of other persons were killed in the cathedral, while celebrating the eve of Corpus Christi, the following being a great day of festival. I found the British Consulate, like other parts of the city, completely in ruins, burying our ship's papers; but, strange to say, opposite the Consul's seat hung the portrait of Her Majesty Queen Victoria, that portion of the wall standing like a pinnacle with picture suspended on it uninjured, as if looking down on the devastation, and under it was the iron safe belonging to the Consul, supported in its place by the ends of some planks, and almost giving one the idea of a special protection over British property. Many of the Europeans were injured by jumping from their windows and balconies into the streets, but I understand that only one Englishman has lost his life. The inhabitants are mostly lying under tents in the fields, expecting a repetition of the shock in a few days. The city is a heap of ruins, burying under the wreck all its wealth and its merchandise; fortunately the weather has been dry ever since; had it been otherwise, much if not all of this property must have been injured and destroyed before it could have been rescued and brought under cover. Vessels of a light draught are much wanted here as store-ships."

JAVA.

BATAVIA.

A very large and much-respected sugar firm, with liabilities to a large amount, has failed.

The Governor-General was still absent on his tour through Java. An expedition against Pooloh Nias had been organised, and two steamers and a sailing vessel with a couple of companies of European and native soldiers had left Padang for that island.

Business continued dull. The crushing season had lately commenced, and the luxurious condition of the sugar cane promised a rich harvest.

The American whaling ship *Newark* from New Bedford was lost on the 24th April, on the east coast of Sandalwood Island. She had a cargo of 1,700 barrels sperm oil on board. The captain and crew (all saved) on arriving on shore with their effects, were seized and everything taken from them excepting the clothes they had on. The crew managed to get to Sourabaya and from thence to Batavia, where the ship was sold by order of the consul, at auction, for 950 guilders.

MALACCA STRAITS.

SINGAPORE.

The residents had been glad to learn that the Duke of Newcastle had pronounced himself favourable to their early transfer; but there was little doubt that receipts would exceed the estimated sum submitted to his Grace. There was a great improvement in revenue on the spirit farms. The colonial office would have abundance of money to go upon.

The death of the Bandahara Muda, or reigning Sovereign, is announced. There were only four days between the deaths of father and son. The Bandahara Muda left no children old enough to succeed him, and Wan Ahmet would probably be allowed peaceably to assume supreme power, as Regent, during the minority of the proper heirs. Some arrangement of this kind would be supported by the Government of the Straits.

The expedition to Gunong Poulai had reported that the hill was too far removed and too difficult of access to be made a sanitarium.

On the application of Captain Robinson, of the British barque *Cleveland*, which, on her way from Shanghai loaded with a cargo of tea for New York, ran ashore on Tanzong Bolus, Her Majesty's steamer *Rifleman* was despatched to render assistance, and the vessel was speedily got off without apparent injury, and proceeded on her voyage. The route taken by the *Cleveland* is rather an unusual one, as it is customary for vessels from China bound home to proceed through Sunda Straits at all seasons of the year.

The American steamer *Che Kiang*, Captain E. Dexter Wadsworth, from New York with dates to 30th March, having called at Cape St. Vincent, Simon's Bay, and Mauritius, arrived in the harbour on the 10th inst.

The British ship *Sovereign of India*, Captain W. Scott, with troops *en route* to Shanghai, in charge of Lieut. Metcalf and Dr. Craigh, anchored in the roads on June 10th. She landed ten convicts, Chinese and Malays, whose periods of transportation to Bombay have expired.

The Government had directed periodic inspection of the volunteers.

PENANG.

The Governor had left for England. Previous to the departure of his Excellency, a native deputation waited on him to express regret at the event. Great inconvenience was felt by the public by not having a fixed rate of exchange for calculating the stamp duties. The Queen's birthday was a perfect gala day for planters merchants, and other inhabitants. There had been very sultry weather, followed by high winds and refreshing showers.

Orders from the Supreme Government had been received by the officers commanding the troops in the Straits, to hold periodical inspections of the volunteers.

CEYLON.

Our advices are to July 10th. The Sikhs all refuse to labour. The planters were beginning to fear a great scarcity for the next crop. The sale of crown lands in the Western Province was steadily and satisfactorily increasing; but in the Central Province no bids were made. The company for lighting Colombo with gas, and perhaps supplying it with water also, was in course of formation. Mr. Rust's place in the Council had been supplied by the appointment of Mr. John Capper, editor of the *Ceylon Times*. It was rumoured that the 50th regiment would be shortly removed from Ceylon to Bangalore. Railway works were progressing; the line had been got into shape almost to the Kalany-ganga. The finances of the colony were in a very favourable state. There would probably be an increase of nearly £101,000 in the first six months of this year, as compared with the corresponding period of last year, viz.:—In the ordinary revenue, including customs, of £50,000; and in the pearl fishery of £51,000; making a total increase of £101,000.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

Boyd—On the 24th inst., at Monturpie, Largo, Scotland, the wife of T. D. Boyd, Esq. merchant, Amoy, China, of twin daughters.

Dauelsberg—On the 12th June, at Singapore, Mrs. Heinrich Dauelsberg, of a son.

Deane—On the 9th June, at Singapore, the wife of Mr. Thomas Deane, Master of the British barque Annie, of a son.

Gray—On the 14th June, at Singapore, the wife of Capt. W. Gray, of the Bombay ship Kusrovic, of a son.

Lockie—On the 22nd inst., at Marseilles, Mrs. Lockie, wife of Captain A. M. Lockie, of the P. and O. Company's Service, of a daughter.

Magniac—On the 9th inst., at 10, Upper Brook-street, the wife of Charles Magniac, Esq., of a son.

Maxton—On the 10th inst., at 46, Highbury New-park, the wife of P. Maxton, Esq., of a daughter.

Sanford—On the 20th inst., at Grove Villa, Park-road, Stockwell, the wife of Heaume Sanford, Esq., of a daughter.

Thomson—On the 20th June, at Singapore, Mrs. W. Thomson, of a daughter.

MARRIAGES.

Grant—Stirling.—On the 23rd inst., at St. John's, Paddington, by his Grace the Archbishop of York, assisted by the Rev. Albert Mangles, incumbent of Horsell, uncle of the bride, Alexander W. Thorold Grant, Esq., Boujedward, Jeuburgh, N.B., to Anna Hamilton, third daughter of Admiral Sir James Stirling.

Inglis—Inglis.—At Elm Park, Leven, Fifeshire, Scotland, by the Rev. Richmond S. Thomson, M. A. Andrew Lysaght Inglis, Esq., of Martello Avenue, Kingstown, late Harbour master of Hong Kong, to Margaret, second daughter of the late Andrew Inglis, Esq., of Kirkcaldy, Fifeshire, Scotland. No cards.

Thompson—Clendinen.—On Thursday, the 18th June, at Calvary Church, New York, by the Rev. Mr. Draper, rector of St. Andrews, Harlem, Mr. William Waldron Thompson, of Kingsbridge, New York, son of the late Pell Thompson, Esq., Waterford, to Miss Mary M. Clendinen, of Glenn Park, New York, only daughter of the late Dr. Wm. Clendinen, Baltimore.

DEATHS.

Ayers—On the 18th May, at Hankow, Wellington E. Ayers, Master Mariner, aged 38 years.

Howard—On the 18th inst., at Croydon, Nelson Howard, Esq., late of Bombay and and China.

McKinnon—On the 23rd May, at Shanghai, Captain J. McKinnon, Master of the Emily Banning, from the effects of a shot during a discussion with an American named Bulkly.

Milne—On the 15th May, at Peking, Wm. C. Milne, formerly of the London Missionary Society, and latterly Assistant Chinese Secretary to H.B.M. Legation, and in charge of the Student Interpreters.

Reuter—On the 14th inst., at 19, Finsbury-square, Alfred Julius, the beloved son of Julius Reuter, aged 3 years and 10 months.

Wynyard—On the 22nd inst., at the house of her son-in-law, Colonel Bingham, Bingham's Melcombe, Dorset, in her 87th year, Jane, widow of the Rev. Montagu John Wynyard, B.D., for many years rector of West Rounton, and of St. Martin, York, and Chaplain to the Queen.

COMMERCIAL REPORT.

CHINA EXPORTS.

Tea.—The business in the new Congous has it will be seen commenced in earnest at Foo-chow-Foo. At Hankow the market has just opened at date of last advices thence—four ships were loading there for London direct. New Congous are expected at Canton in about three weeks. The advices from Kew-kiang regarding the new greens make it appear that the districts in which they are produced are being visited by the Taipings for the purpose, as it would seem, of exacting black mail. The usual conflicting rumours are afloat both as to the quality and quantity of the

Digitized by Google

coming crop. There is no reason to suppose that the supply will be short; on the contrary, there are many reasons to expect that it will be fuller than usual.

MACAO.—New Tyshans, sales amount to 4,000 half-chests and 800 boxes at 18.5 to 19.5 taels, leaving in stock 1,000 half-chests with 1,500 half-chests old teas, which are being manufactured in Souchong and Powchong for the Straits.

CANTON.—The settlements of Congou during the fortnight have been very limited; offers have been made for several chops, but at rates below the idea of the teamen. There is no reliable information as to the coming crop, further than that some new Congous are expected towards the end of this month. A little more has been done in Tyshan than in Country Congous. In Scented Teas and Canton Greens a fair business has been done at previous rates. The following are the settlements for the fortnight:—Congous: 1 chop Honchow at 24 taels, 1,000 half-chests Canton packed at 23 taels, and 1,800 chests Tyshans, common to fair at 22 to 28 taels. Scented Teas: 10,000 boxes Caper (new) at 22 to 28 taels for middling to good, and 31 to 32 taels for finest—13,000 boxes Orange Pekoe at 24 taels for good middling mixed, 26 to 28 for good new, and 32 taels for finest. Canton Greens: 10,000 boxes Gunpowder at 11½ to 15 taels for low old and common, and 22 to 27 taels for fair to good new—2,000 boxes Young Hyson at 17 to 20 taels for middling to good.

SHANGHAI.—Black: Two settlements of Hohow at 15 to 17 tls., are the only transactions reported during the past fortnight, and the stock of old tea is now entirely exhausted. The new crop teas are now daily expected from Hankow, where, by last advices, the market had just opened. Judging from the musters that have been sent down as representing the bulk, the quality of the new teas is good, and the flavour very delicate, but the leaf shows the hurried nature of the preparation. Shipments and settlements for the fortnight 1,584 chests, making a total to date of 289,696 against 209,532 chests last season. Stocks nil. Green: The greater portion of the settlements reported below were made immediately before the departure of last mail, at rates equal to former quotations. The stocks are now very small, and entirely composed of common teas. Shipments and settlements for fortnight 13,600 half-chests, making a total to date of 370,800 half-chests, against 341,133 half-chests last season. Stock, 5,000 half-chests.

FOO-CHOW-FOO.—The market for Congous was opened on the 22nd ultimo, and a very large business has since been done, principally caused by the necessity imposed upon some firms to provide for their tonnage engagements by first clippers. Prices opened at 34 to 36 for inferior to good Suey Kuts, and fine teas (especially those with Souchong flavour) have advanced steadily, under the influence of strong competition, to 39½ taels for finest Kisows Hapyangs and other second class descriptions began at 31 to 34, but as supplies have lately come in more freely, and there has not been so much competition for them, they have declined fully 3 taels. Regarding the quality of the crop, we have to add that the fine Sinchunes and Kisows are decidedly above the average, the first perhaps somewhat deficient in strength, but very well flavoured; and the latter, though in some instances showing that they have been injured by the rains, are both strong and well flavoured. All kinds however are more mixed in leaf than usual. Souchongs about 2,700 chests have arrived, and two or three parcels of inferior quality have been settled at 33.5 to 41. The owner asks 60 taels for the finest two chops that have arrived. Quality appears better than last year, and decidedly above the average. Pekoe only one parcel of the mixed leaf (Paklum) kind yet on the market. Oolongs: The few lots that have arrived are of inferior quality, but have been taken readily at 23 to 24 taels. Scented: Those that have been shown are either mixed with old tea, or the scent is of an inferior description, the jasmine flowers not being sufficiently forward to produce the proper effect. The settlements of the new season's tea to date are as under:—Congou: 52,300 chests, 34,300 half-chests, and 1,200 boxes at 12 to 25 taels for flavory broken to mixed leaf; 26 to 32 taels for Yunghow and Sueykut (3rd and 2nd class); 32½ to 36 taels for fine Sueykut, Kaisow, and Sinchune; and 36 to 39½ for finest Kisow and Sinchune. Souchong: 450 chests at 33½ to 41 taels for inferior to fair. Oolong: 1,600 half-chests at 23 to 24 taels for inferior cargo. Scented Teas: 700 boxes at 23 to 28 taels for fair leaf but inferior scent. The stock on the market is thus stated:—Congou, 7,000 chests new and 600 do. old; Souchong, 1,800 chests; Flowery Pekoe, 350 chests; Oolong, 1,300 half-chests; Scented Teas, 1,600 boxes. The arrival of new Congous to date amount to 76,800 chests for sale upon the market, and 22,000 do. under contract; together 98,800 chests against 54,900 chests corresponding period last season.

AMOY.—Transactions in the new crop commenced on the 25th ultimo, and settlements to a moderate extent have taken place at gradually increased prices. The quality of the crop proves inferior to last season's. Congou: This description has attracted considerable attention, and prices have been steadily hardening in consequence. The present rates show an advance of fully $2 on opening quotations. Settlements amount to 3,550 half-chests at $21.50 to 27.50 short, many of which have not yet arrived from the country. Total arrivals 2,860 half-chests. Orange Pekoe: A trifling business has been done in this description, the opening of the market closely following that of Congou. Settlements consist of 240 half-chests at $17 to 17.50 short, and 400 boxes at $23.50 short. Stock 1,780 half-chests and 316 boxes. Total arrivals 2,700 half chests. Oolongs, Ankois, and Capers: No musters are yet at hand.

KEWKIANG.—Accounts continue to come in from the tea districts confirming last report that it will be a late crop; so that we may not expect the market to be opened before the end of July or beginning of August. As to the abundance of the crop, that will depend upon the growers being unmolested by the rebels.

HANKOW.—Small musters of twenty-five chops of new tea had arrived up to date of last advices. No chops of tea had yet arrived, and the market was not yet opened; we think it cannot do so until after arrival of the contract teas which will not be received for a week yet. Prices must be high, as teas lay down from the country at 34 taels, which with a £10 freight, is equal to 2s. 4d. sterling. At such prices there can scarcely be any chance of profit. It is the very high prices paid by the Shan-si men who are the buyers for Russia, which has made the leaf cost so much in the country. These buyers have succeeded in purchasing about two-thirds of the first crop leaf, which will make fine teas scarce in England. This is the first time that Shan-si men have gone in for fine first crop tea. Heretofore they have been satisfied with buying second crop, or No. 2 quality teas. We suppose that this change is occasioned either through an improvement in the Russians—or that the satisfactory result of the fine teas sent from England to Russia last season has induced Russian merchants to order first qualities themselves. It is unlikely that the trade in England, rather than pay the necessary price to make a profit on our first shipment from Hankow, will go in for second crop teas, which we dare say will be plentiful and good. There is a difference of opinion as to the quality of this season's teas as compared with last. The truth seems to be that in some respects they are superior, and in other inferior. They are generally very well made, well twisted leaf, and not badly picked; though there is room for improvement in that respect, as the brownish leaves are rather plentiful. They are mostly of the small, blackish style of leaf, not the true large Oopack leaf which is best liked. The flavour is fine, better than last season, but thin—a great fault; our last season teas were made much of, on account of the strength; and this season that excellent quality is rare. Altogether, whether equal to last season or not, they are said to be below the average, not above it.

YOKUHAMA—Some few new season musters are to hand, principally of very small parcels; we trust, however, to be able to form a better idea of the crop within the next ten days. Our quotations are:—Ordinary to common, $5 to 11; good common to medium, $12 to 22; fine to finest, $23 to 30 per picul.

RAW SILK.—Shanghai: The market has been completely cleared by the settlements of 350 bales, and at the present time there is not a bale remaining unsold. Several small musters of the new crop Tsatlees have been shown, and muster bales are daily looked for. They compare favourably with last season, with the exception of the colour, which is rather inferior. The Tsatlee districts are the only ones from which reports are favourable, all the others are said to have suffered more or less in consequence of being disturbed by the rebels. The arrivals from Japan have been small, and by last advices there was but a trifling supply in the market. From the absence of stock, it is impossible to give the usual quotations. The transactions of the fortnight are reported at 500 bales against 2,000 bales during corresponding fortnight of last season, and 1,000 bales during same period the season before. There is now no stock remaining—same time last season there were 500 bales, and season before 3,000.

CANTON.—The first yield of the new crop is at market, but settlements are restricted to the purchase of 50 bales for shipment to Bombay. The following are the quotations given, which must be deemed nominal. Loonkong, No. 1 $425 to $430. No. 2 $415 to $420, Gowkong No. 3 $370. Cumchook, rereeled $475.

MACAO.—Of the first crop of new silk only 20 piculs Cumchook were received here, which proved inferior in quality and are held at $400, the second crop will be down in a week or two; so far no transaction has taken place.

YOKUHAMA.—Stocks very light, arrivals readily taken at full rates. We quote.—Mybashie, best parcels $520 to 540, medium, $480 to 500; inferior; $440 to 470 per picul. Ida, best parcels and medium, none; inferior, $380 to 400. Sodai, none. Coshio, none. Oshio, best parcels $500 to 520; medium, $460 to 480; inferior, $380 to 440. Hadchoodjie, $360 to 370 per picul.

DRUGS, &c.—The following is the report upon the Canton market:—Cassia Lignea sales, 500 pls. to $15.50, stock 1,250 pls. Cassia Oil, still no supplies. Cassia Buds, the small lot named in last report is still on the market, $47 would buy it. Star Aniseed, still do supplies. Rhubarb is scarce and wanted. Gamboge, no stock, $35 to 45 is the quotation. China Roots, stock 300 pls., quotations $3.75 to 64.25. Galls, 100 pls. are on the market for which $18 is asked.

CHINA IMPORTS.

HONG KONG.

COTTON YARN has again met with fair inquiry at this port during the past fortnight, and the value of the medium and higher numbers has advanced still further. The sales of the fortnight are put at 300 bales; while in Canton, where a rise in price is also observable, the settlements are estimated at 250 bales.

GREY SHIRTINGS have been in very fair demand amongst native purchasers, and the market has been pretty freely met. Rates again, particularly in respect to the heavier descriptions of goods, show some improvement, and the sales are estimated at 20,150 pieces on Chinese account, and some 17 600 taken by foreign purchasers on speculation. In Canton, 1,000 pieces are reported to have changed hands.

WHITE SHIRTINGS are in a very small stock, and the extreme rates demanded by holders of these goods have the effect of checking consumption to a great extent. The sales reported in this colony are 545 pieces. In Canton there has not been any business doing.

T.-CLOTHS have been purchased in Hong Kong by the consumers to the extent of 4,250 pieces, at prices which do not show any material change on the rates given in last circular. Some 10,000 pieces of these fabrics have likewise been taken upon foreign account. No sales have been reported from Canton.

AMERICAN DRILLS, which are held by one or two importers only, have not met with any sales, and the quotations remain almost nominally as before.

WHITE SPOTTED SHIRTINGS, DYED DO., BROCADES, WHITE AND COLOURED.—The demand for these goods continues dull, and prices remain without improvement to notice. The settlements of the fortnight in Hong Kong are estimated at 250 pieces of Dyed Spotted Shirtings and 500 pieces of Coloured Brocades. In Canton, there appears to be no inquiry for these fabrics.

DAMASKS.—There are not any sales of these goods to notice either here or Canton.

CHINTZES AND HANDKERCHIEFS.—The former have found purchasers in this colony to the extent of 1,500 pieces, prices remaining much as before quoted. In Handkerchiefs there are no transactions to notice, and in Canton they continue without inquiry.

RAW COTTON has again advanced about 75 cents per picul, and the

Digitized by Google

business transacted during the fortnight has been upon a very fair scale, amounting in this colony to about 16,000 bales of Shanghai and Manila staple. In Canton some improvement in value is also observable, and the sales of the fortnight are put at 3,800 bales.

Woollens. — Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths.—In Hong Kong the sales of the first-mentioned have been upon a fair scale, and amount to 936 pieces, the prices paid running much the same as during the previous fortnight. In Canton these goods remain without any inquiry whatever.

Long Ells have also been in good request in this colony at about the rates previously current; but in Canton, from whence there are not any sales reported, the nominal value has declined about 25 cents per piece. The settlements in Hong Kong are put at 1,700 pieces.

Camlets.—Dutch have declined in value, English remaining as before quoted, the sales being 100 pieces of each.

Lastings.—300 pieces have been sold here at previous rates.

Blankets.—244 pairs purchased.

Metals.—Iron, flat, &c., have been in moderate demand in Hong Kong at previous quotations, and the sales of the fortnight are estimated at 3,360 piculs of nail rod, 2,000 piculs of round bar, 600 of hoop, and 250 of wire. In Canton, where the value was slightly lower, no transacrions are reported.

Lead again shows some advance in Canton, and 3,200 piculs have changed hands. Nothing doing in Hong Kong.

Tin has found purchasers in this colony to the extent of about 600 slabs.

Tin Plates.—250 boxes sold.

Steel.—200 tubs placed in Canton.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cent and is divided into decimal parts of ten.

SHIPPING INTELLIGENCE.

ARRIVALS.

At Shanghai.—May 26, J. C. Munro, from Sunderland; Cambalu, from London; 27, Cha-sze, from London.

At Amoy.—June, 1, Philomela, from London.

At Hong Kong.—May 28, New Granada, from Cardiff; 31, Contest, from New York; June 1, Sidon, from Hamburg; Invincible, from London; Montmorenci, from New York; 9, Uncowah, from Shields; Veronica, from Liverpool.

At Manila.—None.

At Batavia.—None.

At Singapore.—June 13, China, from London; D. Gungadhur, Che-kiang (str.), from New York.

DEPARTURES.

From Shanghai.—May 27, Castle Howard, for London; 29, East Lothian, for London; 31, Emperor, for London; June 2, Dunnikier, for Montreal.

From Foo-chow-Foo.—May 27, Fiery Cross, for London; 28, Falcon, for London; Min, for London; Bahama (str.), for London; June 1, Flying Spur, for London; 3, Ellen Rodger, for London.

From Hong Kong.—May 30, Alfred Ray, for Liverpool; June 8, Flutworth, for Liverpool.

From Macao.—May 29, Notos, for London.

From Singapore.—June 10, Mountain Ash, for London; 19, Cleveland, for New York.

LOADING.

At Shanghai.—For London: Aerolite, Caroline Coventry, Coulnakyle, Glen Aros, Grenadier, Guinevere, Kestrel, Lorton, Procymatia, Raphael, Scawfell, Silver Eagle, Vigil. For Liverpool: Empress of India, Ophir-Onangondy, Oxus. For New York: Cambridge, Mary, and Louisa.

At Foo-Chow-Foo.—For London: Highflyer, Maggie Leslie, Shakespeare, Star of China, Viola.

At Hong Kong.—For London: Beatrice, Eastern Chief, John Lidgeet, Lord Clyde, Lamana. For Liverpool: Chrysolite, E. T. L. Jura, Yuca. For New York: Competitor.

At Canton.—For London: Benian, Valdivia. For New York: Panama.

At Singapore.—For London: Ellenborough, Dewa Gungadhur. For Liverpool: Sparkler.

At Manila.—For London: Carribean, G. General, John Banks, Thrudvang. For Liverpool: Maritana. For Cork: Duiveland. For Falmouth: Hermelin.

FREIGHTS AND CHARTERS.

HONG KONG.

Since the date of our last report the opportunities for the employment of shipping has been very limited, in consequence of the large amount of tonnage in the harbour. The current rates for England are £4. 10s. Eight vessels are on the berth here and at Banton for London; for New York, none.

The following are the principal coast charters:—Amelie, 350 tons, British barque, Macao to Saigon and back, 60c. per picul. Susan Douglas, British brig, 116 tons, to Taku for $1,800; thence to Newchwang, to load for Hong Kong, at 60c. per picul. Sophie, Hamburg barque, 200 tons, Manila to Shanghai, at 60c. per picul. New Granada, British barque, 360 tons, to Bangkok for 45c. Panama, Bavarian barque, 295 tons, $2,300 in full to Shanghai. Osnabruck, Hamburg brig, 460 tons, Whampoa to Shanghae, at $5 per ton. Ignacio, Spanish brig, 177 tons, for Manila, at $8 per ton.

FOO-CHOW.

The rate for England is now £6 for clippers.

SHANGHAI.

The current rates of freights are as follows:—To London, per first class vessels, £4; per favourite clipper, £6. 10s. To Liverpool, £4 to £4. 5s. To New York, $17.50 (coin). To Japan, nothing doing. To Tien-tsin, 5 to 6 taels for meast.; 5 mace per picul dead weight. To Amoy, 70 to 75 cents per bale of cotton; 10 cents per picul dead weight. To Hong Kong, $3 to $4 per ton meast.; cotton, 50 cents per bale.

PASSED STRAITS OF SUNDA.

From England and Continent to China.—May 25, Childe Harold, London to Shanghai; 30, Northfleet, London to Hong Kong; Beemah, London to Shanghai; Maiden Queen, London to Hong Kong; China, London to Singapore; 31, Clara R. Sutil, from New York to Batavia; June 2, Prince Alfred, London to Hong Kong; 6, Jane Leech, Cardiff for Shanghai; 8, Finzeel, London to Shanghai; Garrawalt, London to Shanghai; Patna, Liverpool to Hong Hong; 9, Havelock, London to Shanghai; Royal Albert, Liverpool to Canton; Benefactor, New York to Hong Kong; 10, Emma Jane, Falmouth for Singapore; 11, Panic, Liverpool for Singapore; Reindeer, Newcastle to China.

From China to England and Continent.—May 30, from Shanghai to New York, Benefactress. From Foo-chow-Foo to London, June 9, Bahama (str.). From Hong Kong to London, 5, Margaret Mitchell. 7, from Hong Kong to Melbourne, Omar Pacha. From Singapore to London, May 26, Benledi; 29, Oscar.

COMMERCIAL POSTSCRIPT.

City, Thursday Afternoon.

Arrivals not included in Tables.—August 5, at Falmouth, from Rangoon, Josephus, Noord Brabant; from Akyab, Himalaya; from Singapore, Olympia, 4 off Falmouth; from Akyab, Anna Lange, 3 at Antwerp; from Rangoon, Aalborg. July 21, at New York, from Shanghai, Cæsar and Helene. August 4, at London, from Canton, Damietta, 6 off Liverpool; from Hong Kong, Cumberland; from Shanghai, Caldera; at Deal, from Canton, Peterborough.

Departures.—Aug. 5, from London for Colombo, Julia Augusta; 3, from off Dover for Penang, Argo. July 30, from off Scilly for Singapore, Blohn. Aug. 3, from Sunderland for Shanghai, Cambodia; 6, from Liverpool for Hong Kong, Annie Duthie.

Spoken.—Yarra, Colombo to London, 19 May, 30 S., 87 E. Avondhu, Antwerp to China, 3 June, 42 S., 36 E. Woodville, London to Shanghai, 29 May, 38 S., 18 E. Ballarat, London to Shanghai, 23 May, 39 S., 4 E. Benares, Londonderry to Singapore, 3 June, 39 S., 37 E.

The French Mails to India and China.—We noticed in our last that a notification had been issued by the Post-office that correspondence could be sent by the French mails on the same terms as the English. We pointed out to the secretary that papers had been omitted

Naval and Military.

The 50th Regiment will proceed from Ceylon to New Zealand, the 65th, which were ordered to be relieved, will remain; and the 2nd Battalion of the 18th will have arrived seasonably enough for the defence of the colonists. It had been arranged that the 50th were to go to Madras, upon being relieved in Ceylon by the 2nd Battalion, 25th.

The reinforcements for the Royal Engineers in China embarked in the freight ship Louisa sailed from Spithead at two p.m. on the 1st inst. for Hong Kong. She had on board the following troops, viz. :—22nd Company of Royal Engineers—Major Edwards, Lieuts. Williams and Bond, 100 non-commissioned officers and men, 12 women, and 15 children. Commissariat Staff Corps—4 Staff sergeants, 4 women, and 8 children; 22 men, 4 women, and 2 children. Royal Engineer Department—Clerks of works, Walker and Diack. The 97th Regiment, 4 women; the 99th Regiment, 4 women. Staff Assist.-Surg. Wood proceeded in the ship in medical charge.

The Odin, 16, paddlewheel steam frigate, Commodore Lord John Hay, C.B., left Simon's Bay on the 30th of May, and St. Helena on the 17th June, and left on the 19th for England.

The following vessels of the Lay-Osborn fleet had arrived at the Cape: —Peking, Captain Burgoyne, V.C., June 12; Amoy, Captain Nicolas, May 27; China, Commander Noel Osborn, May 25. The Kwang-tung, Captain Allen Young, was at Ascension on the 24th ult.

REINFORCEMENTS FOR CEYLON.

Her Majesty's screw troopship Himalaya, Captain Lacy, sailed from Portsmouth for Ceylon on the 1st inst., having embarked on the previous day—2d battalion 25th (the King's Own Borderers) Regiment, Major Henry Torrens Walker in command; Major Charles Stewart Wallace; Capts. J. R. Harvey, H. Helsham, A. S. Cameron, V.C., F. S. Terry, H. R. Floyd, S. J. Lowe, N. C. Ramsay, and Harger; Lieuts. F. G. Coleridge, G. T. L. Carwithen, H. J. Harvey, E. H. P. Vivian, H. W. Scriven, W. T. Morgan, J. Pender, E. C. C. Farnall, S. R. B. Partridge, and H. R. S. Armstrong; Ensigns: A. H. Turner, W. G. Thomas, J. F. C. Hayward, G. M. Shirley, A. James, R. X. L. O'Connell, Houlditch, and Konarski; Lieut. and Adjutant J. T. Coke, Surgeon Brown, Assist.-Surgeons Armstrong and Markey, Paymaster Furlong and Quartermaster Kettyles. Officers' Wives and Widows:—Mesdames Walker, two children and servant; Ramsay, two children and servant; Brown and two children; Furlong and one child: Terry, Harger, and Kettyles; 38 sergeants, 21 drummers, 38 corporals, 662 men; 64 wives of soldiers and 92 children. 50th Regiment (Queen's Own).—Detachment from Parkhurst to join headquarters, now at Ceylon:—Captain Creagh, Mrs. Creagh, and servant; one subaltern, 145 non-commissioned officers and men, ten women and seven childreu. The officer in command of the 25th, Lieut.-Col. Henry Torrens Walker, was gazetted to the Lieut.-Colonelcy of the regiment on the day of embarkation, vice Lieut.-Col. and Brevet Col. Allen, retired. On the arrival of the Himalaya at Ceylon the 25th will disembark from her and relieve the service companies of the 50th, which will join the detachment on board the Himalaya and proceed in that vessel to Japan, New Zealand, or India, according to the existing state of affairs at the two first-named places on the arrival of the Himalaya from Ceylon.

Parliamentary Intelligence.

HOUSE OF COMMONS.

JAPAN.

(July 13th.) Lord NAAS asked, in case of the forces of the Tycoon of Japan becoming engaged in hostilities with either the forces of the spiritual Emperor or those of the native princes, the instructions issued to the Commander-in-Chief of Her Majesty's fleet would authorise him to take part in such hostilities.—Lord PALMERSTON said that it was the invariable rule, founded on the best possible reasons, never to publish instructions sent to the naval and military officers of the country, until the operations to which they referred were completed, and not often in that case. Therefore, he could not give an answer to the question just asked.

THE TRADE WITH CHINA.

(16th.) In reply to Mr. LIDDELL, Mr. LAYARD said that he was not aware that there was any correspondence, in addition to what had been published, between the Government and Mr. Lay, or between the Government and merchants connected with the China trade, on the subject of the complaints made in August, 1861, by the Chambers of Commerce of Hong Kong and Shanghai.

CASE OF MR. T. CHISHOLM ANSTEY.

(17th.) Colonel DUNNE rose to call attention to the case of Mr. Anstey, late Attorney-General at Hong Kong, and to ask what reparation had been made to him for the injustice acknowledged to have been done him by the authorities in that colony. He said Mr. Anstey was formerly a member of that House, and was celebrated for a speech which he made inculpating the noble lord at the head of the Government. The noble lord on that occasion delivered a speech of four hours' duration, which produced a greater effect and sensation than any speech which he recollected to have been delivered within the walls of Parliament. There was nothing in the speech of Mr. Anstey to excite the personal dislike of the noble lord, and accordingly the noble lord, some time after, sent Mr. Anstey to China as one the high legal authorities of Hong Kong. Soon after his arrival Mr. Anstey perceived, as he thought, the members of the Government at Hong Kong in many instances corrupt, and he brought charges of a very serious character against them. From the authorities at Hong Kong Mr. Anstey received no support; a quarrel was the consequence; Mr. Anstey pressed his charges with still greater vehemence, and the result was that Mr. Anstey was dismissed from office. Mr. Anstey still pressed his charges against the chief officials, including the Governor and the secretary to the Governor, but especially against Mr. Caldwell. When Lord Derby came into office an inquiry was ordered not only into Mr. Caldwell's conduct, but also into that of the other officers implicated; but the Duke of Newcastle soon afterwards succeeding to the Colonial-office, Sir H. Robinson was sent out with orders to inquire into the conduct of Mr. Caldwell alone. The inquiry was a very protracted one; it lasted from August to the beginning of the following year, and the result was that the charges which Mr. Anstey brought were proved to be established. Those charges were that Mr. Caldwell was in league with pirates in those seas, and that he exerted his influence over the Government at Hong Kong to induce them not only to connive at the pirates, but actually to assist the pirates with the Government vessels. The circumstances of the whole case were altogether so suspicious as to make any man who voted against the Government on the occasion of the lorcha *Arrow* affair congratulate himself on that vote. The fact was, as was proved by the papers which had been laid on the table, there were at that time in the seas about Hong Kong two classes of pirates, who might be called Government pirates and Opposition pirates; and Mr. Anstey attacked, with perhaps more warmth than discretion, those officials whom he believed to have been guilty of abetting the Government pirates. The Duke of Newcastle, however, threw a shield over all that were accused except Mr. Caldwell, and therefore it would be impossible to say whether they were guilty; but there seemed to be grounds for suspicion enough to fix a stigma upon the Duke of Newcastle for not having inquired into the whole affair. He (Colonel Dunne) invited an examination of the papers, which would be found to bear him out in what he stated. He was not surprised that the Government had removed Mr. Anstey from office for having made accusations apparently so monstrous and so unlikely to be proved; but when they were proved surely the Government were bound to make him some reparation for what he had suffered. Mr. Anstey applied to the noble duke, and any Englishman would have supposed that his grace could not have hesitated to make some *amende*, but he actually refused, on the ground of expense, to publish a large part of the evidence which had been brought before the court of inquiry. At last Mr. Anstey forced from the Colonial-office an acknowledgment that he had been right. He (Colonel Dunne) was not aware that this acknowledgment had ever been included among any papers published by authority, but it had been printed, the letter was genuine, and every Englishman who saw it would be astonished that such a letter had been written. The Duke of Newcastle stated, through the hon. gentleman the Under-Secretary for the Colonies (Mr. C. Fortescue), that there were other grounds upon which he founded his dismissal besides the fact that Mr. Anstey had made the accusations, and then the letter proceeded thus:—"Having made these observations, I am directed to inform you that the Duke of Newcastle is perfectly ready to express his opinion that the proof of the charges of which you were the principal author, brought against Mr. Caldwell before the commission of inquiry of 1858, has been substantially established by the recent investigation before the Exchequer Court, as far as the culpability of his connection with Mu Chow Yong is concerned. Consequently, it cannot be said, in the words of Sir J. Bowring, that none of these charges have been substantially proved. His Grace will go further, and say that in forcing a public inquiry into that officer's conduct you did in that respect render a material service to Her Majesty's Government at Hong Kong." He knew that it was said Mr. Anstey made a bargain, that if he were allowed to clear his character he would not ask for more, but it was disgraceful to Government on that account to exclude Mr. Anstey from office. Of all men the Duke of Newcastle ought to be aware that faults committed in office were not held afterwards to constitute a reason for exclusion from office, and that a man of tried and proved incapacity in one Administration could yet be a Minister in another Administration. Therefore he thought that the noble duke ought to have taken a more Christian and considerate view of the errors, if errors there were, of Mr. Anstey. Whether there were other faults committed by Mr. Anstey as Attorney-General of Hong Kong he knew not, but in respect to the charges which Mr. Anstey brought forward, the Government stood convicted of having done him injustice; and it was neither generous nor fair to have acted towards that gentleman as they had done. The conduct pursued was so unlike anything he had ever known to proceed from the noble lord at the head of the Government that he was perfectly certain the noble lord was no party to it. No man stuck more by his subordinates than the noble lord, and this, he believed, was one of the causes of the popularity which placed and kept the noble lord on the Treasury bench.—Mr. C. FORTESCUE said that this question of the case of Mr. Anstey and the Colonial-office had been for five months past in the hands of two members of that House, sitting on opposite sides, whose opinions were deserving of the greatest weight —he alluded to the hon. and learned member for East Suffolk and the hon. member for Birmingham. During the last two months they had both been in communication with the Colonial-office, and were both perfectly satisfied with the treatment which Mr. Anstey had received from the noble duke at the head of that office. When the hon. and gallant gentleman attacked the noble duke, the present Colonial Secretary, he aimed his fire in the wrong direction, for the gallant gentleman ought to have attacked the colonial representative of the late Government. Mr. Anstey was dismissed from office by the right hon. member for Hertfordshire, and the only charge that could be brought against the Duke of Newcastle was that he had not thought right to overrule the decision of his predecessor. The statement made by the hon. and gallant member of the causes which led the late Colonial Secretary to dismiss Mr. Anstey from office had been a very defective and fallacious one, and all who read the reasons given by the Governor of Hong Kong for dismissing with the unanimous advice of the Executive Council, Mr. Anstey from office, would find that those reasons extended far beyond the single issue raised by the hon. and gallant gentleman. The fact was that Mr. Anstey, from the moment when he arrived at Hong Kong, manifested, in spite of his great ability, such a want of temper, discretion, and judgment in many respects as confidential adviser of the Governor, that it was more than once a question whether it would be possible to retain him in office. In one case in particular it was with great difficulty that Mr. Labouchere, now Lord Taunton, had been able to feel it his duty to retain Mr. Anstey in office; and the circumstance to which the hon. and gallant member had alluded, so far from being the original cause of Mr. Anstey's suspension and dismissal from office, was only like the last drop of water in the bucket. The hon. and gallant gentleman put the issue entirely on the question whether another official in Hong Kong, against whom Mr. Anstey brought a list of charges, was or was not a fit person to remain in office in Hong Kong; but that was not the issue on which Mr. Anstey's dismissal took place. No doubt Mr. Anstey brought a long string of accusations against another official in the colony, some of

Digitized by Google

which were disproved, and others were proved, but the real ground of Mr. Anstey's dismissal was not whether all those charges were true or false, but whether, as Attorney-General of Hong Kong, and legal adviser of the Government, Mr. Anstey had not brought forward those charges in such a way, and treated his superior, the Governor, in such a manner as to warrant the Government in not continuing him in a confidential position in the colony. From the evidence contained in the blue book, it appeared that Mr. Anstey had shown a violence and virulence of temper, and an excess of personal animosity and want of respect towards the Governor, which, irrespective of the truth or falsehood of the charges brought against the official in Hong Kong, caused the then Colonial Secretary to come to the conclusion that Mr. Anstey, in spite of his remarkable ability, was not a safe person to be continued in the responsible post of Attorney-General and legal adviser of the Governor. With regard to the official against whom charges were brought, a rigorous investigation into his conduct was ordered. One of the first acts of his noble friend was to direct the Governor of Hong Kong, Sir H. Robinson, to institute a thorough and searching inquiry into the conduct of Mr. Caldwell, who was then what was called Protector of the Chinese, and against whom charges had been brought by Mr. Anstey. That investigation took place. It lasted some time, and was conducted with great care. The result was that Mr. Caldwell was pronounced to be an unfit person to be retained in the service of Her Majesty, although all the charges against him were by no means held to have been proved. That cause, however, had really nothing to do with the question of Mr. Anstey's fitness for a high official position. His noble friend instructed the Governor to dismiss Mr. Caldwell, which was done accordingly. Shortly afterwards Mr. Anstey applied to his grace to be reinstated in his office, proceeding on the assumption that the judgment against Mr. Caldwell amounted to a decision in his own favour, and that, because the former was deemed unfit to be Protector of the Chinese, it followed that he, Mr. Anstey, was fit to fill the office of Attorney-General at Hong Kong. The noble duke, in reply, very naturally pointed out that there was no connection between the two things, and stated also that the grounds upon which Mr. Anstey had been suspended went far beyond the question immediately at issue, that they had no relation to the case of Mr. Caldwell, and that there had been an accumulation of reasons showing that he was not qualified to act as the confidential legal adviser of the Governor. His noble friend therefore refused the application. Some time afterwards Mr. Anstey addressed another letter, in a very different tone, to the duke, stating that he no longer pressed for reinstatement or compensation, but that, as he had entered on a new career at the Indian bar, he hoped his grace would furnish him with some expression of opinion as to his conduct at Hong Kong, which would relieve him from any undeserved slur that might have been cast upon him to the injury of his professional prospects. His noble friend gave careful and generous consideration to that application, and, although he had made up his mind that it was not his duty to reverse the decision of his predecessor in regard to Mr. Anstey, he was anxious at the same time to say as much he could, consistently with his own convictions, to establish that gentleman's character. It was with that view that the letter of his noble friend to Mr. Anstey was written, and he was sorry to find that it had been turned against the writer, and construed into a confession of error, and a ground for claiming further compensation for the gentleman in question. That letter was gratefully received by Mr. Anstey, who, in acknowledging it, expressed his satisfaction with its contents, and gave no hint that he intended to base on it a complaint of ill-treatment and a demand for compensation. He was personally acquainted with Mr. Anstey, and entertained a high opinion of his remarkable ability and original mind, but he must express his conviction that full credit had been given to him for his truthfulness in the case of Mr. Caldwell, and for the public service which he performed in making that exposure, but that his violent temper and want of discretion warranted the former Secretary of State in suspending him, and his noble friend in confirming the decision of his predecessor.

JAPAN.

(21st.) Mr. B. COCHRANE said that at the present period of the session and in the present state of the House—(there were rather more than a dozen members present)—he would not go largely into a question like that of Japan; but it would not be right to separate without bringing the matter forward at all, for if not actually at war, we were in a position very likely to lead to it. The question of whether an officer serving in a foreign country ought so to conduct himself as to render hostilities probable, or even to declare war without orders from home, was a matter well worth the consideration of the House. Our relations with Japan were much more recent than those with China—in fact, they had only originated in 1854. Previous to that time very little was known of that most interesting country. What we knew of Japan was that the country was highly civilised and the people admirably conducted—they were a peaceable, quiet, happy, and contented people, and their form of government was such that many so-called civilised nations might have taken a lesson from their government. In 1853 the Americans had a treaty with Japan, and in 1854 Admiral Stirling obtained the same concessions for us. Those concessions, however, although important, led to but slight results until 1858, when Lord Elgin went to Japan. When we were on the verge of a war the House ought to know the real facts of the case, how far our conduct had been justified, what demands we had made on the Japanese, what were likely to be the results of the war, and how the war was to be conducted. If not, we might find ourselves involved in overwhelming difficulties and enormous expenditure. One positive condition of the concession was that no man-of-war was to anchor within a certain distance of Yeddo. What happened? Lord Elgin actually, to arrive where he did, broke the condition which had been entered into between Admiral Stirling and the Japanese Government; and what was his excuse? When he was implored not to take the ship where he did, he said he had a yacht to present to the Tycoon. The present of a yacht to a man who did not leave his palace was absurd. The position of the Japanese Government was a very peculiar one. There was a spiritual head and a temporal sovereign, but overriding them was a great aristocracy—the Daimio princes—who were really the controlling power of the country, and do what we might, until we could exercise an influence over them, our influence over the Tycoon and the Mikado would have very little effect. When Lord Elgin presented his yacht to the Tycoon he insisted on a commercial treaty being signed, and he did this in spite of all the remonstrances made to him by the great council of the state. What the Japanese simply said was, "Will you let us alone? We do not want a treaty of commerce, as we have been a happy people since we got rid of foreigners 250 years ago. We mistrust your merchants, and your missionaries, for when we look at China and abroad, we find your merchants and missionaries are followed by war and rapine." It was a hard thing upon a nation to compel, to induce, or to bribe them to make a treaty, and then, when it was impossible to carry out the treaty, to declare war against them. The people of Japan had been called a set of barbarians; but were they so? Mr Oliphant, and every other writer on Japan, told us that their civilisation and prosperity were very great indeed. The important point of the case was this, what was the feeling of the people, as evinced in their conduct towards Sir Rutherford Alcock when he went to Japan to carry out the treaty in 1858? Were the people ungenerous or violent? Did they commit outrages on the English? Quite the contrary. Sir R. Alcock bore testimony to the kindness and gentleness of the whole of the people, and he even went a journey to the sacred mountains, passing through villages never seen by Europeans before, and the kindness and good disposition of the people were most extraordinary. In a despatch to Lord Malmesbury, Sir R. Alcock stated that nothing could be more prompt, obliging, or seemingly straightforward than the action of the Japanese Government in this matter. Were these a savage, brutalised, rough, and discourteous people? Exactly the reverse. In this very despatch of Sir R. Alcock, he touched upon the important point which bore on the issue which might lead to war. If we were to force our way into a country against the wishes of the people, surely it was most desirable to consider the best means of carrying out our views. When Sir R. Alcock arrived there he found that the Japanese had an establishment at Yokuhama, about three miles up the Bay of Yeddo, and the workmen were busily employed in constructing a granite pier, and every effort was being made by the Japanese to lead foreigners to that place. Sir R. Alcock objected to our consul being located there, and insisted on his going to Kanagawa. The authorities explained to him the reason why they did not wish the consul to go Kanagawa, stating that that was on the royal road along which the Daimio princes passed, and that there might be confusion and hostile encounters with those great princes, who were opposed from the first to this commercial treaty. What had been the result? Just what the Japanese authorities had predicted. A conflict had taken place. One of those great princes got into an encounter with Mr. Lenox Richardson and some other persons, and Mr. Richardson was killed; and now we were demanding reparation from the Japanese Government. That was a very hard case indeed, because the authorities warned us of what would happen if we went to Kanagawa. Sir R. Alcock admitted all this, and stated in 1859 that in point of facility of access from the Bay the advantage on the side of Yokuhama was beyond all question, and that the real motive of the Japanese Government had been to remove foreigners from the line of the route of the Daimio princes to the capital. When he read the appeals which the Japanese had made to the good feeling of this country he felt almost ashamed of the way in which we had conducted ourselves towards them. The Japanese Government said that until lately their nation had not been accustomed to foreigners, and that it was not therefore to be wondered at that the officers of different foreign Powers should be molested in their walks, but that they had taken every precaution to provide against that. Sir R. Alcock, in one of his despatches, admitted that the Japanese Government had in an evil hour been induced to make a sudden and violent change by admitting foreigners to commercial and diplomatic relations, which reversed all the traditions of the country, and that since then nothing but trouble and danger had resulted. And now we, who boasted of our Christianity and civilisation, were declaring war against the Japanese because they were unable to carry out a treaty which had been forced upon them. It was proved conclusively by the despatches of Sir R. Alcock and others, and by Mr. Oliphant, and every writer on Japan, that we compelled the Government of Japan to enter into this treaty, and having done so we were bound to see that the British subjects located in that country conducted themselves properly, and did not add to the inconveniences of their residence there the grossest misconduct. He was compelled to say that some of our merchants in Japan had been guilty of gross misconduct, and yet for these persons we were going into an expensive war, which might add another twopence to the income-tax next year. It would be a war which could not be carried on on the sea-board, and must render necessary the employment of troops in the interior, and he understood that troops were now being ordered from India to Japan. With regard to the currency question, he said that under the treaty our merchants had compelled the unhappy Japanese to give exchanges which yielded to the former sometimes a profit varying from 50 to 100 per cent., and referred to a despatch of Sir R. Alcock to Earl Russell, in which he said that in Japan the purchase and shipment of gold and silver was looked upon as a lawless spoliation and an abuse of treaty provisions. In fact, the people had burnt down the Tycoon's palace in order to afford them an excuse for stopping the issue of this money, which was impoverishing the country. The English merchants, so far from conducting themselves with generosity towards the Japanese, and according to the ordinary principles of justice, made not only exorbitant demands, but couched them in the most offensive and insulting manner. One merchant asked for change for twenty millions of dollars, and another, who gave the name of "*Doodle*" required change for 250 millions of dollars. Further demands were made in such names as "*Nonsense*," "*Snooks*," "*His Brother*," "*Bosh*," "*Grumble*," "*Stick Tub*," "*Swindlepipe*," and in other names equally atrocious. He did not think we were justified in the overt acts we were taking against the Japanese, and he reminded the Government of the enormous strength of the country against which we were about to go to war. The princes and nobles, not only possessed great wealth, but were enabled to bring an enormous number of retainers into the field. If we carried out our commercial treaties with Japan without violence and bloodshed, and without offending the religious feelings and prejudices of the people, he hoped those treaties might be consummated; but if they were, on the contrary, carried out by shedding the blood of that happy, contented, and

Digitized by Google

innocent people, and by covering the country with rapine, slaughter, and misery, then he would like to see such treaties torn to pieces, and our fleets drawn from the shores and waters of Japan.

Mr. LIDDELL, in seconding the motion, said many Englishmen would, in the course of the next few months, ask what the Government of this country were doing in Japan. The treaty with the Japanese Government had been, according to Mr. Oliphant's account, obtained by fear. It was an ill-considered treaty; it had been hastily drawn, and had been brought about to satisfy the national pride, in consequence of the Americans having been first in the field. The treaty between this country and Japan was an illegal document so far as Japan was concerned, for there was no Mikado, or spiritual chief, in existence at the time of its signature. The treaty might be described as a document for the free admission of foreigners to the ports of the kingdom of Japan. But what had been the feeling in Japan in reference to foreigners? It had been one of hatred and distrust. Why was it? Did not the intrigues of the Jesuits and the commercial frauds of the West discover a sufficient ground for that hatred and distrust? The treaty had been obtained in a manner which involved the humiliation of the Japanese, and the Daimios did not consider that it was binding upon them or upon their retainers. Were the Government going to war with the present Mikado, with the Tycoon, or with the Daimios, the powerful chieftains of that country with large bodies of retainers? This was a serious question, for it was an alarming thing to undertake a war on the other side of the globe. The House of Commons ought seriously to consider this subject, as it was said this country was drifting into a war for an idea which would cost a large sum of money, to be paid by the taxpayers of this country. He expressed a strong hope that the Government would explain why we were going to war, and what object we could possibly attain from a war.

Mr. LAYARD said he had listened attentively to the speech of the hon. member for Honiton, but he confessed that he could not understand what it was that the hon. member required. All that Her Majesty's Government was now doing was in the performance of an absolute duty, which had been forced upon them much against their own wishes. Her Majesty's Government had entered into a commercial convention with Japan somewhat similar to those which had been entered into with America and Russia. He contended that it was the duty of the Government to enter into such a treaty, seeing that they had to protect the interests of the greatest trading community of the world, and they would have been liable to severe censure if they had allowed Russia and America to steal a march upon them. The treaty was made by Lord Elgin under the instructions of Lord Malmesbury, and if its provisions were of so objectionable a character, why did not hon. members opposite denounce it at the time it was entered into? Having been concluded, it became the duty of Her Majesty's present Government to see that the stipulations of the treaty were carried out. Unfortunately, there existed in Japan a sort of Conservative party, who were opposed to any intercourse with foreign nations, from which fact all the subsequent difficulties had sprung. He denied that the treaty had been extorted from the Japanese by fear, and said that Mr. Alcock had endeavoured, as far as possible, to prevent the British merchants from infringing the laws of Japan. No doubt proceedings had taken place on the part of certain gentlemen there which were in the highest degree improper. Mr. Alcock had remonstrated with them, and had appealed to their sense of justice and propriety to refrain from such proceedings in future. He believed the effect of Mr. Alcock's remonstrances had been to secure a better class of British residents in Japan, and that the Japanese had no further cause of complaint. Yet the conduct of the Japanese themselves had been very different. They had committed a series of outrages not only against British subjects, but against foreigners generally, which ended in an attack upon the British Legation. We had given the Japanese every proof that we had no wish to press upon them undue exactions, but that we had every disposition to treat them with consideration and fairness. He contended that we had no alternative but to call upon the Japanese Government for ample reparation for the outrages which had been committed upon unoffending British subjects. By the last accounts from Japan it appeared that the struggle between the Tycoon and his opponents was still going on; and Her Majesty's Government had every reason to hope that their demands would be acceded to, and hostilities would be avoided. He regretted being obliged to refuse papers asked for, believing that their production would, under circumstances, be prejudicial to the public interests. The motion was then withdrawn.

(23rd.) Mr. LIDDELL asked whether any application had been made to the Governor-General of India for troops to be employed in Japan; and further, whether the Governor-General possesses the power of ordering troops on foreign service without the previous sanction of Parliament. He had been induced to ask the question in consequence of what was now occurring in Japan, and of an announcement reported to have been made by Admiral Kuper to the British residents in those islands that he was unable to afford them protection.—Sir C. WOOD: I am not aware that any such application has been made to send troops to Japan.

LIEUTENANT TINLING.

(21st.) Colonel SYKES rose to call attention to the despatch of Admiral Kuper, dated the 14th day of April, 1863, reporting the death of Lieut. Tinling, of Her Majesty's ship *Encounter*, at the siege of Showshing. On a former occasion the noble lord the Secretary to the Admiralty stated, in reply to a question from him, that Lieut. Tinling lost his life in consequence of his own indiscretion. Since then he had received a letter from Sir Arthur Hallam Elton, formerly a member of that House, and a relative of the deceased, stating that he felt deeply grieved at what was stated by the noble lord, knowing as he (Sir. A. H. Elton) did that the young officer had sacrificed his life in the service of his country, and under the orders of his superior officer. In the despatch from the admiral it was stated that Lieutenant Tinling lost his life under the walls of Showshing from the effects of a wound, and that the service had lost in him a most gallant and promising officer. The admiral suppressed the facts in his despatch that Lieutenant Tinling lost his life fifty miles beyond the boundary to which Captain Dew's military operations were expressly limited by repeated communications from the Foreign-office, and it was upon that statement, forwarded to the Lords Commissioners of the Admiralty, that the noble lord founded his answer. It appeared that Captain Dew, with General Staveling, Lieutenant Tinling, and others, took a 68-pounder gun to Showshing, and although they had the strictest orders not to act against the Taipings it would appear that Captain Dew exceeded his instructions, and in a letter to the admiral Captain Dew held himself responsible for Lieutenant Tinling's death. According to a letter received from a missionary on the spot, it appeared that Lieutenant Tinling was directing the large 68-pounder gun for the purpose of breaching the city wall, and whilst giving instructions to the gunner a bullet struck him at the back of the skull which stunned and blinded him, and he died shortly afterwards. The hon. and gallant member said he had placed these facts before the House with a view to rescue the memory of a gallant young officer from the stigma which had been cast upon it, and added that, as the Secretary for the Admiralty had consented to present the papers he asked for, he did not intend to conclude with a motion.—The SPEAKER said if the hon. and gallant member did not conclude with a motion, the whole proceeding was irregular.—Colonel SYKES said that, for the purpose of putting himself in order, he would move for any further papers on the subject.

Lord C. PAGET said he would be extremely grieved if any expression of his had given pain to a family whom he had known by reputation, as well as on account of their connection with a youth whom he had the happiness of knowing personally, and who was a most gallant and meritorious officer; but his hon. and gallant friend had unintentionally misled the House in regard to the origin of the expression he made use of, and which had given pain to a worthy family. He would recall his attention to the fact that he had always been most averse to answering any questions as to the particulars concerning the death of Lieutenant Tinling, and that he had told him that the Admiralty had no official information on that subject. His hon. and gallant friend, however, asked him if he had received any information privately, and he told him that he had seen a letter from Captain Dew, containing expressions which led him to believe that both Captain Dew and certain of his officers were at the siege of Showshing as amateurs. Captain Dew stated in that letter that they accompanied some French officers to the siege as amateurs, and that was the expression which had given offence to this estimable family. But he must leave the House to judge for itself whether Captain Dew and Lieutenant Tinling were both there in the discharge of their duty. The first official information they had of the death of Lieutenant Tinling was in a short letter from Captain Dew. A few days later they received a letter forwarded by the admiral on the station, in which he stated that in taking the part that he had done in the siege of Showshing, Captain Dew had exceeded his instructions, as the strictest orders were given to officers not to act against the Taipings, or run any risk by exposing themselves. Captain Dew at the same time, however, held himself responsible for the sad fate of Lieutenant Tinling. He asked the House whether, in the face of such a communication, when they were doing all they could to discourage such desultory attacks and movements in China, and when these officers had gone a long way beyond the radius of thirty miles to which they were limited, could he be justified in stating to the House that Lieutenant Tinling died in the service of his country? He had not the remotest doubt that the poor young man died with the feeling that he was doing his duty, yet he was not prepared to state distinctly to the House, particularly in the face of the acknowledgment of Captain Dew, that he had been given the strictest orders not to act against the Taipings, that he (Lord C. Paget) was wholly wrong in stating that this young officer had not died in the execution of his duty. He had asked his noble friend the Duke of Somerset whether he might say that Lieutenant Tinling had died in the execution of his duty, but he regretted that he could not do so until he received further intelligence on the subject. If, however, they should hear that Lieutenant Tinling had received orders to act as he had done, he (Lord C. Paget) would be very glad to apologise for the terms he had used in speaking of that gallant officer.

Mr. WHITE was very glad that the hon. and gallant member had brought forward the subject, if he had done nothing more than elicit from the Secretary to the Admiralty the very singular manner in which the business of that department was conducted. Never did any conduct demand more severe reprehension than that kind of conduct which was exhibited on this occasion. The acts of our officers in China were directly at variance with the ostensible instructions which were sent from this country, and were such as tended to lead us into another war with China. He thought that the answer of the Secretary to the Admiralty was utterly unsatisfactory.

Mr. BAILLIE said it was perfectly obvious from the explanation of the noble lord that Captain Dew had not acted in accordance with the instructions he had received; but the case was very different as regarded Lieutenant Tinling. The expression used in Captain Dew's letter, that he himself was distinctly responsible for the death of the young officer, showed that Lieutennnt Tinling must have considered that he was acting under the directions of his superior officers. Colonel Sykes then withdrew his motion.

(23rd). Colonel SYKES gave notice that early next session he would call the attention of the House to the circumstances attending the death of Lieutenant Tinling in China, and to the conduct of Captain Dew in relation thereto.

THE CHINESE INDEMNITY.

(24th.) Colonel SYKES asked the Secretary to the Treasury in what annual account and in what year the sum of $451,000 26c., balance of the sum of $3,000,000, received from the Chinese Government under the Treaty of Nanking, in payment of the debts due by Chinese merchants to British subjects, was brought to the credit of the nation.—Mr. PEEL said that the Chinese indemnity was $21,000,000, 12 for the war, 6 for the value of the opium, and 3 compensation to the Hong Kong merchants. That sum was increased by interest and other charges to $25,800,211. $250,000 were allowed to the Chinese Government, and $2,548,981 were paid to the merchants of Hong Kong. The sum received into the exchequer was $18,158,755, being equivalent to £4,050,090. This sum was carried to the credit of the Government in succeeding years, according as it was received.

The London & China Telegraph.

LONDON, THURSDAY, AUGUST 6, 1863.

JAPAN IN PARLIAMENT.

Mr. Baillie Cochrane has done good service by bringing the subject of Japan before the attention of the House. It was high time that a distinct statement should be elicited from the Government, and that an opportunity should be afforded to members for expressing their opinion on a matter so weighty. We are glad, then, that the session has not been allowed to pass, and that the country has not been suffered to drift into another Eastern war, without a statement from the Government, of the conduct it has been deemed necessary to pursue. But the discussion which took place on the evening of the 21st inst., although of some value, as all such debates must be, was, to our thinking, unsatisfactory. Mr. Cochrane's speech was evidently one-sided; Mr. Liddell, who seconded the motion, said nothing worthy of comment; and Mr. Layard replied after his accustomed fashion by pleading necessity for the course adopted by Her Majesty's Government, and by averring that under the circumstances it was impossible to have acted otherwise. This is the stereotyped argument to which everyone must listen who disapproves of our policy in the Far East, and it is one which it is difficult to answer without a knowledge, such as few possess, of English state craft and Japanese diplomacy. Mr. Cochrane considers that, in the first place, we forced our treaty on Japan, and therefore we are not justified now in turning round and demanding that its provisions should be carried out; he reverted to the unjustifiable conduct of persons supposed to be British merchants, and he concluded by dilating on the power of the Daimios, and by observing that it were better the Treaty should be torn in pieces if it could only be observed by shedding the blood of a happy and contented people.

This sentiment is, no doubt, to be commended, but Mr. Cochrane's arguments being founded on a fallacy are themselves fallacious. It is not true in our case, however true it may be in the case of America, that the Japanese signed a treaty with us on compulsion; it is not true that we are about to go to war for the sake of merchants whose "conduct was open to objection;" it is not true, as Mr. Cochrane implies, that the murder of Mr. Richardson arose from his own fault in venturing where it was unwise to go, for the murder was committed on the road which was open to all foreigners; and it is assuredly not true that in this impending quarrel the Japanese "have justice on their side."

Mr. Cochrane lays great stress on the disgraceful conduct of certain Englishmen in Japan—undoubtedly every one must deplore that conduct; but he regards with apparent leniency the persistent course of aggression pursued by the Japanese, and the duplicity they have manifested from the first day we set foot in the country. This is not the way to gain that attention to what we may call the opposition side of the question which it in reality deserves, and Mr. Layard had only to recount the gross outrages committed on Europeans in Japan, and to stand up for the necessity of protecting our commercial interests in that country as guaranteed by treaty, in order to elicit the applause of the House. If, on the other hand, instead of taking part with the Japanese, Mr. Cochrane had endeavoured to show to the House, that our trade is not of sufficient magnitude to make a war with Japan advisable on commercial grounds, or if he had attempted to prove, however incorrect such a line of argument may be, that without dishonour, or any political detriment, we could retire from the country altogether, he would have occupied a far stronger position, and one from which Mr. Layard might have found it difficult to drive him. As it is, the Under-Secretary of State although he refrained from using his strongest weapon and defending the policy of the Government on political grounds, had by far the best of the argument.

While our relations with Japan are being discussed in Parliament, and our right to take defensive measures is denied or asserted, it is not improbable that the first blow has been struck, and that we are already involved in a war with that country. It is difficult to understand the aim of the British Admiral in granting an additional time for the decision of the Japanese Government. It seems as though the effect of such a delay must prove unfavourable to our cause, since it would be esteemed a token of weakness; and it is probable that it has been thus regarded by the Governor of Kanagawa, whose conduct, like that of the lower classes, betokens a determination to drive us from the country. It is an evil sign indeed if the common people, hitherto so friendly, have caught the spirit of the Daimios. The position of foreigners is imminently perilous, and we are not surprised to learn that so many had left, and were leaving for Shanghai. If it be true, as has been asserted, that the conduct of the American Minister is opposed to our interests, this adds a further complication to the difficulties by which we are surrounded. Mr. Harris has all along pursued a separate line of policy, and, at this threatened rupture, will be likely to show more distinctly than ever a want of sympathy with his European colleagues.

It is possible even now that war may be delayed for a time, but we cannot hope that it will ultimately be avoided. The antagonism between the warlike spirit of the Daimios and the business aims of Europeans is too powerful to be removed, or even to be greatly lessened. To bring them into contact is like confronting the heroes of the middle ages with the statesmen and the merchant princes who win honour or wealth in the present century. When we knew less of Japan than we do now, we were more hopeful of the possibility of friendly intercourse with the Japanese; we believed that mutual interests would produce mutual good feeling, and that commerce would carry with it the higher blessings of civilisation and Christianity. But peace does not seem likely to achieve victories in Japan, and future intercourse with that land is left to the arbitrament of war. In one sense we have no fear for the result, but we cannot hope for a speedy settlement.

LORD NAAS AND THE CHINA MERCHANTS.

After the comments which appeared in our last, a letter from Mr. Walkinshaw—which will be found below—was published in *The Times* of the 20th, and the letter to ourselves from Mr. Walkinshaw (which we publish) further elucidates his meaning. We quite agree with him that the majority of the merchants do not approve of the various methods which are now being used by the Foreign Inspectors for the collection and protection of the revenue in China. The Foreign Inspectors themselves may be reputable men, but if their crew is bad the system will undoubtedly be wrecked. We all know how difficult it is in China to procure subordinates of any description, for such capacities as Custom-house officers; and we also know what takes place when this class of men get any power. We hold that it is unnecessary to adopt such means as Mr. Lay has instituted for the collection of the Customs dues. Mr. Lay knows well enough that he can trust to the honour of the merchants who import and export four-fifths of the trade of China, and to arm and employ a set of rowdies to look after any possible smuggling of the other fifth of the trade, we are quite sure costs more than the matter is worth. With proper vigilance by the Inspectors, we believe that in a few years the persons engaged in the one-fifth would not find it worth their while to keep up the struggle for smuggling.

We must, however, still adhere to the opinion expressed in our last issue, that Lord Naas would have done the merchants in China a greater service had he confined his speech to the exposure of the *modus operandi* of the foreign element in the Customs, and the additional difficulties likely to accrue when the Lay-Osborn fleet is in working order in Chinese waters. This pet scheme will, we are convinced, be fraught with great mischief to trade, and will ultimately lead to a collision, not only with the Chinese Government, but also with other foreign Powers. Is it likely that Admiral Osborn will be able to mould all the officers and crew of his fleet into that shape which will secure the ends of justice without inflicting grievous wrong? In the discretion of Capt. Osborn we have faith, but he cannot be everywhere directing his force, and sure are

Digitized by Google

we that time will develop wreckless officers of the Captain Dew style.

Mr. Walkinshaw, in his letter, confirms the opinion we expressed, that a misconception exists on the part of the public generally as to the object of Lord Naas's attack, which was intended to be, not against the *policy of the Government* in sanctioning the establishment of Foreign Collectors of Customs, but the manner in which that duty has been performed. Now, Lord Naas, in his letter to *The Times*, repeats this error. His words are, that "Mr. Dent and Mr. Walkinshaw "informed me that I was at liberty to state, on their authority, "that the China merchants, as a body, were opposed to the "*new policy of the Government*." If Lord Naas were a supporter of the Palmerston Ministry, the misconception might not have arisen. Mr. Gregson appears also to have fallen into a similar error. No doubt the merchants he conversed with did admit satisfaction at the present policy pursued, but had Mr. Gregson asked his friends if they were satisfied with the *working of the Customs*, which is the point of interest in the new policy, we venture to say he would not have stated what he did in the House, nor in the following letter to *The Times*:—

Sir,—Mr. Walkinshaw, in his letter to you, which appears this morning, complains of the employment of British officers and men in the service of the Chinese Government, and treats of other details in connexion with the English policy in China, which he asserts to be in opposition to the views of our merchants there.

The remark which I mentioned in the House of Commons the other evening was based upon conversations which I have had with several gentlemen largely engaged in trade with China, and some of them recently returned home. Their opinion is to the effect that, apart from the lamentable results of the Taiping movement, the course of business is going on quite as satisfactory, and the result of British diplomacy is working quite as smoothly as they could reasonably expect.

I am, Sir, your obedient servant,

House of Commons, July 20. S. Gregson.

ENGLISH POLICY IN CHINA.

(To the Editor of *The Times*.)

Sir,—In your impression of yesterday I am glad to notice a letter from Lord Naas, conveying to you the source whence he derived his information upon some of the points alluded to in his speech on the China question on the 6th inst., and, as my name is mentioned therein, I take the liberty of pointing out, from personal knowledge, that in place of the China merchants as a body being "perfectly satisfied with the policy pursued by Her Majesty's Government," as maintained by Mr. Gregson, they are, almost to a man, dissatisfied with the policy that authorises British officers and men to carry arms in the employ of the Chinese Government; they consider such policy to be fraught with the most dangerous consequences, and one far more likely to prejudice than benefit the trade between the countries. They approve generally the system whereby duties are regularly collected, but not of the manner in which their consuls are suffered to be browbeaten by the European and American collectors of customs, or of the way in which the Foreign-office treats the memorial of the Chambers of Commerce by placing them in the hands of one of these Chinese Government officials to be commented upon, and accepting and publishing accusations of smuggling upon the simple representation of this gentleman.

I believe the mercantile communities in China will be found to agree with me in stating that what would conduce more to the permanent establishment of friendly relations with the Chinese than any other policy that can be pursued would be—non-interference between the Government and rebels; protection of treaty ports by European troops; the adoption of the plan proposed in your article upon Japan of yesterday—viz., "strengthen the powers of the consular courts." Either let the Superintendent of British Trade divide his time between Peking and Shanghai, so as to devote personal attention to the workings of the trade during part of the year, in place of, as at present, passing the whole year at Peking, communication with which is partially closed during four months of the time, or let there be a visiting Consul-General, with a view to strengthening the courts at the various consulates. According to the present system of administration, consuls are absolutely powerless, and reference to the Superintendency at Peking occupies months, and may be years: or, in other words, our commercial interests are allowed to stand subservient to the arbitrary will of the Chinese Government, and those foreigners whom they employ to collect their revenue.

Trusting you will favour me by giving insertion to this letter,

I remain, Sir, your obedient servant,

W. Walkinshaw.

THE *MODUS OPERANDI* OF THE CUSTOMS IN CHINA.

(To the Editor of the *London and China Telegraph*.)

Sir,—Your note of the 14th inst. reached me here only on Saturday the 18th, otherwise I should have answered it sooner. In it you state your opinion that Lord Naas has made use of the conversation he had with Mr. Dent and myself in a manner we did not expect, and request my views of the present policy of the Government with regard to China, so as to save you perhaps from falling into error in discussing this important subject. In reply, I have the pleasure to inform you that Lord Naas was quite at liberty to make use of any conversation he had with me in any manner he pleased. My views of the present policy of the Government, as far as China is concerned, coincide with those expressed by Lord Naas in the House of Commons on the 6th inst.; in support of which, and in contradiction of the statement made by Mr. Gregson on that occasion, that "our merchants were perfectly satisfied with the policy pursued by Her Majesty's Government," I would, with the view of saving you from falling into error, point out the following facts, which, in my opinion, most completely prove that the merchants of China are very much dissatisfied with the present policy of the Government.

It appears to be a common misapprehension that it is against the foreign inspectorate *system* that Lord Naas, Mr. Liddell, and others inveigh, in animadverting upon the present policy of our Government; it is not against the system, I believe, but against the arbitrary manner in which the system is administered—the employment of British officers and men to fight in the service of the Imperial Government, and the consequent intervention between Imperialists and rebels, all of which are considered to be fraught with most dangerous consequences, and liable at any time to bring our Government into disagreeable collision with one or other of these two parties, to say nothing of the other nationalities that form part of this singular and incongruous Government mixture. Referring more particularly to the Custom-house question, which is the one upon which I conceive the greatest amount of misconception to exist, I may point out that Mr. Layard, in replying to Lord Naas on the 6th inst, brings forward in support of his argument, that Mr. Jardine and Mr. Lindsay, as representing two of the first houses in China, cordially approve the principle of a foreign inspectorate. Undoubtedly they do, and so does every well-disposed merchant in the country; they approve the principle, but not the practice. You are perhaps not aware that when the memorials, recently published in the Blue-book, against the practice of this system by the Hong Kong and Shanghai Chambers of Commerce were framed and transmitted to Lord Russell, the chairman of the first was the leading partner of Messrs. Jardine, Matheson, and Co., in China, and of the other the managing partner of Messrs. Lindsay and Co.; and the latter gentleman a few months ago maintained a lengthened controversy with Mr. Lay in the columns of *The Times* upon this very subject. If you will peruse the memorials in the Blue-book you will find how incorrect is the opinion attempted to be set forth that the present policy of the Government is satisfactory, and much the less so seeing that these very papers were placed by the Foreign-office in the hands of Mr. Lay, the Inspector of Customs, to be commented upon—or, in other words, the accused made to sit in judgment upon himself! The consequence was natural—full acquittal, and recrimination upon the memorialists, with which the Government seem to have been quite satisfied. If you will further peruse the last received copies of the *China Mail* you will find some admirable letters subscribed "An English Merchant," entering very fully into the present state of matters in China, and commenting upon the extraordinary position and functions of Mr. Lay there. Add to this the various items of intelligence that come forward by every mail, showing the languishing effects of present policy upon the import trade and the general disatisfaction at the conduct of affairs, and you will surely see that there is want of a change somewhere.

Having been a member of the Hong Kong Chamber of Commerce from its commencement, and vice-chairman until shortly before leaving China last July, you will perhaps consider that I am not a visionary exponent of the general views entertained upon China matters, nor should the advocacy of similar views by so eminent a member of the House of Commons as Lord Naas be so lightly treated, as is the case in the article published in your issue of the 16th inst.

The present action of our Government in China may be summarised as follows:—Superintendence of Chinese interests to the almost total neglect of the interests of British subjects. What the merchants alone desire and have a right to expect is superintendence of their interests by the British Superintendent of Trade; and to effect this properly one of the three following plans should be adopted:—1. Strengthening the consular courts, so that the merchants can have fair play against the arbitrary enactments of the Custom-house. 2. Appointing a Consul-generals to be also Superintendent of Trade, who would visit the consular port, periodically. Or, 3, making it incumbent on the Minister Plenipotentiary and Superintendent of Trade to reside at least six months of the year in Shanghai where merchants could have access to him, and where he could supervise the working of the trade, in place of passing the whole year at Peking, the communication with which is almost entirely stopped during four months of the time. If these remarks are of any service to you I shall be glad. Meanwhile I remain, Sir, your obedient servant,

Ardenvohr, Helensburgh, 20th July, 1863. W. Walkinshaw.

MR. MOSS AND EARL GREY.

Earl Grey, it will be seen—by referring to our last issue—has made the *amende honorable* to Mr. Moss for the expressions he used in the House of Lords on the 10th ult. It is a pity that Earl Grey and other noble lords should be so reckless as to make such defamatory comments on the sole authority of Mr. Moss's judge, Sir R. Alcock, and this, too, gained from a book. The writer of an article in *The Times* also fell into the same error, and we are glad to perceive that they have afforded Mr. Moss an opportunity of telling his story in the following letter, which appeared in *The Times* of the 24th ult. Our own opinion on this matter has not altered since we discussed it in a series of articles. We still consider Mr. Moss to be an injured man.

(To the Editor of *The Times*.)

Sir,—I have to ask a little space in the interests of fair play, and I hope you will not refuse my request because I myself am the victim of the injustice I wish to remedy.

In the discussion on Japan in the House of Lords on the 10th inst. allusion was made by Earl Grey and by the Earl of Carnarvon to the British subject who, while returning from a shooting excursion, was seized by the Japanese at Kanagawa, towards the end of 1860. In your leading article of the 13th inst. on this debate you dwelt in strong terms of reprobation on the conduct of this British subject, on "his flagrant act of insolent violence," and stigmatised him as one of the "scum of Europe."

Digitized by Google

I myself am the Englishman alluded to, whose conduct and character have thus been branded infamous by you, with what justice I trust the following facts will show. On reading the speeches of Lord Carnarvon and Earl Grey I wrote to both these noblemen, stating that their Lordships were entirely misinformed of the circumstances of my case. I forwarded a pamphlet to them which I had written, describing all the particulars of my seizure, and begged them to do me the justice to set right those portions of their speeches which had done me so great wrong. I received a reply from Earl Grey on the 15th inst., the tenour of which may be concluded from his Lordship's words that evening from his seat in Parliament.

In consequence of Lord Carnarvon's absence from town, my letter did not reach his Lordship till the 17th inst., when his Lordship wrote me that his immediate departure that night for the continent prevented his explaining,—that he had spoken on the sole authority of Sir R. Alcock's book on Japan, and repeating what he perceived Earl Grey had already said.

As the circumstances of the case are very different to what Sir Rutherord Alcock would make them appear, I hope you will grant me space to clear myself of the stigma which has been attached to me in your columns in consequence of his version.

The real facts are briefly these:—Following a common practice among all the merchants of Yokuhama, I occasionally went out shooting. At one time it was unofficially intimated from the Consulate that the Japanese objected to this. The practice was discontinued for a time, but after awhile, the objection having apparently passed, it was renewed; indeed, again became so general both with the merchants and gentlemen of the Consular service, that when starting on my expedition I met two guests of the English Consul returning from a day's sport, and on the same day the Secretary of the British Legation, having sent down his guns and dogs, left Jeddo for Kanagawa on a shooting excursion with the knowledge and permission of the British Minister (Sir R. Alcock). On my return, while quietly walking along the principal street of Kanagawa, accompanied only by a native servant, a party of armed Japanese suddenly made their appearance, rushing up from behind, and shouting to me to stop. All who have read Sir R. Alcock's book well know that the country at this time was in a turbulent and dangerous state. Several assassinations had taken place, and we all held our lives in our hands. The sinister appearance of my assailants, and the threatening manner of their approach, at once impressed me with a sense of imminent danger, and left no doubt on my mind that they were other than a party of "loonins," or native rowdies, the partisans of a hostile Daimio, or Prince. The so-called Japanese policemen wear no uniform or perceptible insignia by which they can be known. It seems hardly necessary to argue seriously that any man placed as I was would do what he could to defend himself from such an attack. I turned quickly back to my servant, who was not, as Sir R. Alcock states, pounced upon, but who was carrying a wild goose I had shot, and my gun. This latter I had barely time to take into my own hands, when my assailants were close upon me, but I sprang back, and by cautioning them of the deadly nature of my weapon I endeavoured to keep them off. Others, however, sprang on me from behind. The gun was torn from me, and flung on the ground. I was treated with great barbarity, with the details of which I need not trouble you, and conveyed to a Japanese prison. It was while lying on the ground, and while my gun was in the hands of the Japanese, that it was fired. Of the effects of that shot I am as guilty as Sir R. Alcock. Twelve hours passed before the English Consul could discover my fate, and then with armed aid and the threatened use of force he alone succeeded in rescuing me. Every difficulty had been put in his way by the Japanese authorities, who, by denial, falsehood, and prevarication, sought to destroy all traces of me. During these twelve hours I had been in a Japanese prison, suffering great physical pain, and under terrible anxiety, anticipating a speedy death by strangling, which the words and manner of my gaolers led me to infer would be carried into effect the following morning. Under no clause in the treaty had the Japanese any shadow of right in their attempt to arrest me, or for their conduct afterwards. They asserted that the sole object of their approach was to learn my name. No question, however, was ever put to me, nor was there a word spoken by them, and one or two men might certainly have been considered sufficient for that purpose. But the falseness of the plea is evident from the fact that, by consulting their register of natives in the employment of foreigners, they might easily have discovered through my servant my name, if unknown to them, and brought forward any charge they thought fit against me. I was, however, well known, having been one among the earliest residents, and from any shopkeeper along the road I have not the least doubt all information about me could have been obtained. Conscious of my entire innocence, I went through my trial, or, as I rather thought it, the investigation into the circumstances of my cruel seizure, without any anxiety. No prohibition or warning of any kind against shooting game was in existence, and the Japanese law, if there be any, which appeared very doubtful even to my assailants, few of whom had ever heard of it, could not be held to affect foreigners. As little could any other of their strange code. As well might an English merchant have been seized for not prostrating himself on all fours with his forehead to the ground when a Japanese high official or great man passed along his way, or for riding on horseback, or for not observing any other of the servile customs and rigorous regulations of their country. I cannot describe my bewilderment nor the surprise of my friends when the consular decision became known. The sentence of deportation, far from being a nominal one, was utter ruin to me. Hurried off to a vessel which had received from the British Legation at Jeddo notice of my coming before my trial, or any inquiry into my seizure, I was allowed no time to arrange my affairs, which were left in confusion, and I was carried off, in spite of my protest, in a ship widely infected with smallpox, though others were available. Sir R. Alcock would have the world believe that this sentence of deportation was an act of merciful protection and humanity, by its withdrawing me from the sworn vengeance of the Japanese. This imposes only on the judgment of those to whom the previous circumstances are unknown. Urged by the Japanese officials, and relying for this once on their professions and promises, with the falseness and treachery of which he ever had an unalterable persuasion, and with which he fails not again and again to impress his reader, Sir R. Alcock ordered, but two days after my rescue, while I was sick and unable to move from my bed through the ill-usage I had received, that I should be handed back to the Japanese, to be lodged within their prison walls, and this when the vindictive passion of the infuriated Japanese and wounded official was at its height, and in the absence of all foreign vessels of war. The indignant and active intervention of the British merchants alone prevented the execution of this cruel order, and with it, with little doubt, the loss of my life. Public opinion may now appreciate the truth of Sir R. Alcock's translation of his sentence of deportation, and judge how large is the measure of my gratitude for such humanity and merciful protection. If anything more can be needed to show how much my case has been misrepresented, it will be found in the fact that my sentence, unanimously dissented from by three assessors, was subsequently, though not till after nearly a year's negotiation, cancelled by the Home Government, who thus acknowledged its injustice and illegality. This was for me a great moral victory, though unfortunately barren of any other results. The deportation, which, according to Sir R. Alcock, carried no punishment and appeared to him inadequate, has changed me from a prosperous merchant to a ruined man. I think you will now understand the feelings which impel me to address you, and seek to make public the true facts of my hard case. That you may better judge its hardship I send you the pamphlet I have written.

The above short outline will, I trust, convince you that I do not merit the bitter reproach of your article of the 13th inst., and that "the flagrant act of insolent violence" was on the side of the Japanese.

"Truth," writes Sir R. Alcock in his preface, "I believe to be far less dangerous to those who have the courage to utter it than misapprehension or misrepresentation." In accordance with this principle is his version of my case; but though he may have a fine pulpit from which to put it forward, I shall not care for this if you will do me the justice of giving publicity to mine.

I am, Sir, your obedient servant, MICHAEL MOSS.

Langbourn-chambers, Fenchurch-street, July 20.

AN AMERICAN VIEW OF ANGLO-CHINESE POLICY.

THE debate on Lord NAAS's motion on the 6th inst., of which an epitome has been given, forms an apt pendant to certain criticisms indulged in in the *New York Times* of the 15th ult., by an American resident in Shanghai, who adopts the characteristic signature "Q. E. D." Each arrives at the same conclusion though from widely divergent premises. "Q. E. D.," openly accuses England of tampering with the Rebels, expressly in order that she might get a pretext for interfering in China, and indulges in the usual sourrilous platitudes about English hypocrisy and commercial selfishness. As to the first assertion, it amounts simply to this, that Lord RUSSELL and the present Administration have been conspiring together to get Captain SHERARD OSBORN a berth of some £4,000 a-year, and Major GORDON and Captain HOLLAND positions of similar emolument! At all events, that is the only result as yet evident of the alleged covert designs of England, and such an accusation comes with an ill-grace from the fellow-countryman of Mandarin WARD and General BURGEVINE. In still worse taste are such general charges as "commercial selfishness," "England's resolve to possess herself of China," and the like, from one of the "nation of sovereigns" whose manifest destiny they claim to be the annexation of an entire continent and dictation to the entire world. As a correspondent of the *New York Times*, we presume he must be "sound" upon the great issue which is at present convulsing his native land—sound, that is, from the Northern point of view. If so, how are we not hypocritical enough and commercially selfish enough to recognise the South at once, and so terminate that war at a blow? And if we could (but do not) carry out such a policy among our own cousins, warriors like ourselves, and now trained and inured to war, why should we be unable to execute our supposed designs by a recognition of the Taipings, as Lord NAAS and Colonel SYKES advise? We doubt if there is, or ever was, since the days of GEORGE WASHINGTON, as much self-denial in American public life as could have so long pursued, even with barbarians, the dignified neutrality observed on all occasions by Lord PALMERSTON'S Government. If Lord NAAS's motion was an unworthy party manœuvre, "Q. E. D.'s" attack is but an ebullition of mortified national vanity, which not even the saving clause he inserts at the close, as to the worst English rule being better than the best Asiatic, can save from merited contempt.

THE FRENCH MAIL SERVICE.

We are informed that a protest has been forwarded to the directors of the French Company, by Mr. D. W. Mackenzie and other passengers, in reference to the provisions and general treatment on board the company's steamers. Mr. Mackenzie left Hong Kong by the steamer *Alphee* on the 23rd May. At Galle we understand some of the passengers had their passage money returned and came on by the P. and O. Co.'s steamer *Candia*. When the reply of the company is received we shall notice the matter again.

STEAMERS AND CLIPPERS FOR CHINA.

The China and Japan Company have despatched the *Mona*, and have contracted for two paddle-wheels of 300 tons, and 90 H.P. The *Elfin*, Captain Thomas, screw of 300 tons (builders) has been despatched from Liverpool to Hong Kong, by Messrs. James Baines and Co., on sale. A small steamer is building by Mr. Marshall, at Sunderland, for a party in Shanghai. A clipper ship is building by Messrs. Hall, of Aberdeen, of iron and wood, for Messrs. Turner and Co., which is to be commanded by Capt. Inglis, late of the *Gauntlet*.

Foreign Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, July 21.

The First Chamber of the States-General is prorogued. After passing the Bill for the concession to construct a railroad between Samarang and the Regencies in Java, as well as some other business—among which was the Bill for paying off twelve millions of florins of the East India Debt—the session was closed.

The King has gone to Baden-Baden, from whence he will probably pay a visit to his venerable father-in-law, the King of Wurtemberg, who is now in his eighty-second year, and the oldest Sovereign in Europe.

A letter from Utrecht states that in the Botanical Garden of that university there is now a splended Java coffee tree in full blossom. It was a present from the Councillor of State. Mr. Van der Oudermeulen, late President of the Netherlands Trading Company.

It is announced that the new iron-clad gunboat, lately launched at Fynenoord, is to be stationed for some time at Vlissingen to enable her to undergo several scientific tests at the mouth of the Schelde. The experiments will be conducted by a commission of naval officers, at the head of whom is Captain Pels Rycken of the royal navy.

At a late sitting of the Literary Department of the Royal Academy of Arts and Sciences, a paper was read by Mr. Leemans sent in by Dr. R. H. R. Frederich, relating to some inscriptions found on a stone statue of Mandjucri, sent to this country by Mr. Engelhard, late Governor of Java's Easthook. From the inscriptions it appears that the statue was made in the year 1265 of the Javanese Æra (A.D. 1343) and placed in the Buddhist Temple by a native prince of ancient family in honour of Buddha.

From the annual report of the Dutch Consul-General in Japan, published in the *Staats-Courant*, of the trade and navigation in that country in 1862, it appears that the number of vessels under the flags of treaty nations that arrived at Nagasaki was 212, of 69,471 tons (of which 30 of 9,284 tons were Dutch), whilst the total number that cleared out from that port was 203, of 65,638 tons (of which 28 were Dutch). During the same year 121 ships, of 42,595 tons, arrived at Yokuhama, and 97 sailed. The value of the imports at Nagasaki amounted to $3,753,994, Mexican, and the exports to $4,352,879. At Yokuhama the imports were $2,576,930½, and the exports $6,305,126½.

H.M. steamship *Ardjoeno* left Helvoetsluys for Java on the 20th inst. She carries out a heavy mail.

Mr. G. Dufresne, of Rotterdam, is appointed agent at Batavia for the Anglo-Belgian and Dutch Bank, and Mr. N. P. Van Der Berg, of Batavia, is appointed agent in that city for the Nether ands India Commercial Bank, lately established at Amsterdam, the directors of which are Mr. F. Van Heukelom, Mr. Robert Browne, and Mr. G. C. De Clercq.

The following fifteen first class vessels have been chartered by the Netherlands Trading Company to load cargoes of produce in Java for the undermentioned ports:—Zaanstroom, Louisa, Watergeus, Laura and Adele, Admiral Piet Hein, Willem Kroonprins Der Nederlanden, Christina and Jeannette and Ortelius, at Amsterdam; Medea, Hollandia, Susanna, Maria Anna and Susanna Johanna, at Rotterdam; and Catharina Maria and Pauline at Middelburg.

A private letter from Decima, published in the *Utrecht Dagblad*, contains the following:—

"At the opening of Nagasaki for general trade the foreigners established themselves at the village of Oora, situated to the westward of Nagasaki, whilst the Dutch merchants fixed themselves at Decima. It is now talked of joining Decima with Oora by filling up a part of the bay that separates them. In case this plan is executed, Decima will be much enlarged, which is of great importance, as subjects of all nations may live on the island and acquire property there. A short time ago the house of the former Government medical officer at Decima was sold to the British Consul Dr. Winchester for 3,000 dollars, and the Prussian Consul has hoisted his flag on the island. Adieu, then, to Holland's ancient establishment in Japan, though it is the natural consequence of the opening of the ports in Japan; there are, however, many people who believe that our trade with the country was much more prosperous on the old footing of our establishment at Decima. We are busy erecting the slips for putting together a twenty-four gun corvette lately arrived in pieces from Holland, and ordered by the Japanese Government. Mr. Metman, our Vice-Consul at Nagasaki, has been placed at the disposal of the Swiss Embassy, and for that purpose has gone to Jedo in H.N.M.'s *Vice-Admiral Koopman*. Hitherto the trade at Nagasaki has not suffered much from the uncertain state of political affairs, but it is generally understood that in the event of hostilities Mr. De Wit, our Consul-General, is instructed to give orders to all the Dutch in Japan to embark with their property on board our ships of war, and to quit the country till peace is restored and trade can be resumed."

The *Staatsblad*, No. 83, contains the law for the naturalisation of Mr. F. P. J. Cassalette, merchant at Batavia. In Nos. 87 and 92, of the same official journal, are published the laws for the naturalisation of several other gentlemen, among whom are Mr. T. H. Eisinger, medical officer of the second class at Batavia, First Lieutenant H. F. Von Ende, of the E.I. infantry, and Mr. W. G. Bosse, chief engineer, both at Batavia.

Mr. C. Sonderegger has received his exequatur as Consul-General of Switzerland at Batavia, and Mr. R. Sehlmacher has been recognised as consul at Sourabaya for the Free and Hanseatic city of Hamburg.

H.M. first-class screw steamship *Willem* has been safely launched at the royal dockyard in this city. She will carry an armament of sixteen heavy guns, and is considered one of the finest vessels in the Dutch navy.

COMMERCIAL.

COFFEE.—Since last mail the market has been in a sluggish state, and though prices remain unaltered, certain symptoms would seem to indicate a wish on the part of the holders to realise even below present rates. A sale of 1,570 bags of Java ex *Monitor*, by private contract is reported at 46 to 46½ cents, and at public auction 794 bags of Java triage were knocked down at from 29 to 41 cents. 12,000 bags of Sumatra have arrived per *Susanna* from Padang.

TEA maintains its position, but has given rise to but few transactions.

SUGAR.—At the company's sale of 67,788 kranjangs of Java, the whole quantity found purchasers at 1½ fl. above the valuations, but still about 1½ fl. below the prices paid at the last sale in May. In consequence, the present value of the principal numbers is fixed by the brokers as follows:—

No	9	28	fl.	..	No.	13	32	fl.	..	No.	17	36½	fl.
„	10	29	„	..	„	14	33½	„	..	„	18	37	„
„	11	30	„	..	„	15	34½	„	..	„	19	37½	„
„	12	31	„	..	„	16	35½	„	..	„	20	38	„

Refined goods calm, and no alteration in values.

RICE.—There have been no dealings in paddy, with the exception of a cargo of 9,700 bags of Rangoon ex *Hunter*, but the market is firm. A parcel of 792 bags of bold-grained Java, ex *Soleftea*, is advertised for sale by tender next week. Cleaned rice is in fair request, and several parcels changed hands, the prices paid being a shade lower.

SPICES.—The company's annual sale is advertised for the 19th of August at Amsterdam, when the following quantities will be brought forward: 2,000 casks of nutmegs, 900 casks of mace, 600 casks of cloves, 1,100 bales of Java cinnamon, and 5,200 bags of black pepper. The announcement has had no influence on the market. The only article that finds an easy sale is Java cinnamon No. 3, the stock of which is much reduced. Some parcels of pepper are advertised for sale by tender next week. Soy is in rather more demand, as is also Java Vanille, better prices being obtained for both.

TOBACCO.—By private contract 1,400 bales of Java PK have been sold for arrival. At Rotterdam a public sale of Java has been held, and all sold as follows: 635 bales MS average 22 c. 167 b. BA 25½ c., 180 b. W Malang 22¾ c., 467 b. CH *d* B 21 cents, and 45 b. DIP 13½ c. A public sale is announced of 3,383 bales of Java, as well as 400,000 Manila cigars of 1861, on the 5th of August, and 1,500 bales of Java on the following day by tender. About 500 bales have arrived here per *Drie Gebroeders*. The present stock of Java is 6,402 bales.

TIN is dull and prices cannot recover their position. Banca is offered at 76½ fl. without finding purchasers.

INDIGO.—70 chests of Java have been taken at former prices.

RATTANS.—8,300 bundles were sold at full values.

CHINA AND JAPAN COAST AND RIVER STEAM NAVIGATION COMPANY.

The second annual meeting of the shareholders in this company was held on the 21st ult. at the offices, 10A, King's Arms-yard. In the absence of the Hon. Mr. Bruce, the chairman of the company, Mr. J. N. DANIELL presided. The following is the substance of the report of the direcors: "At the date of the last report the steamer *Titan* was on her passage to Shanghai, and the screw steamer *Elgin* was on the eve of departure from Birkenhead. The *Titan* reached her destination on the 12th August, and has since been very profitably employed as a tug. The result of her working, up to the 31st of January last, appears in the accounts, and though the board are not enabled to present a statement balancing her earnings since that date, they have every reason to be satisfied with the operations of the vessel. The *Elgin* reached Shanghai on the 2nd January, after a rapid passage, her run to the Cape being the shortest on record. She conveyed full cargoes between Singapore and Hong Kong and between Hong Kong and Shanghai. The *Elgin* is now being employed on the River Yang-tse, and she has constant and remunerative employment. Large additional funds have been received by payments on account of shares, and the company's fleet thereby increased. The screw steamship *Mona*, 746 tons, b.m., with stowage capacity for nearly 1,000 tons of measurement cargo, and large passenger accommodation, sails to-day

Digitized by Google

for Singapore, on her way to China. Two more steamers, paddle-wheel boats, each 300 tons and 90-horse power, will follow within four months' time. These vessels, while specially constructed as powerful tug-boats, such being the primary object in their employment, will also have capacity for 200 tons of measurement cargo, in addition to eight days' fuel, with accommodation for saloon and other passengers. A balance appears on the working of the *Titan* to the 31st of January, of £1,311. 3s. 1d., out of which, after making deductions for depreciation, it is proposed to pay six months' interest, at the rate of 5 per cent. per annum, on the capital paid up to that date.

The CHAIRMAN, in moving that the report be received and adopted, said that when the directors had last the pleasure of meeting their constituents the company possessed only two vessels. Every one acquainted with China knew how enormous was the enterprise of the Chinese people, but the development of that enterprise had been retarded and checked by what was called the Taiping rebellion, and by the large number of pirates which infested the coasts and rivers of the country. The Government of this country had, however, undertaken a project which he hoped and believed would prove successful in the suppression of such such illegality, and that so, in course of time, all those difficulties in the way of legitimate commerce would disappear. Under those circumstances they might not only look forward for room, but for much ampler room than they at present enjoyed. It was in itself satisfactory to find that private persons having a number of vessels at their command had been enabled to obtain for them a most lucrative employment, and that was an index of the support which a public company was likely to receive from those merchants who had not vessels of their own with which to carry on their coast and river trade; and without indulging much in a favourable picture of the future, he thought the recent services of the *Elgin* had been such as to lead them to anticipate the most favourable returns.

His Excellency Mr. H. B. LOCH, Lieut.-Governor of the Isle of Man, seconded the motion.

A SHAREHOLDER inquired the number of shares which have been issued in full.

The CHAIRMAN replied that of the number issued about 6,000 were paid up in full.

Mr. LAIRD said he was just going to ask the question which had been answered by the chairman, and he now wished to know what was the rate of interest allowed by the company on shares paid up in advance of calls if it were true that 2,000 shares had been bought up on the market, at a premium by the company, and what use was made of the premium obtained on the shares which had been sold above par. He also wished for explanation with respect to the accounts, for, as he read them, there was a discrepancy of £11,000 unaccounted for.

The CHAIRMAN replied that the rate of interest allowed on shares paid in advance was five per cent. With respect to the purchase of the shares in the market by the company's broker, he was surprised that it had been again brought before the notice of the shareholders after the explanations given at the ilast meeting, and especially by Mr. Laird, who knew as well as any man l ving that the directors had formally entered their protest against the transaction. As to the amount received on premiums, it had been put to the account of preliminary expenses. As to the alleged discrepancy, there was no such thing. The company had, from a want of funds, been obliged to borrow £10,000 on the mortgage of the *Elgin*, and had as a collateral security lodged 1,000 paid up shares of the company in the hands of the mortgagees.

The motion for the adoption of the report was then agreed to unanimously. A resolution was then agreed to to allow 5 per cent. interest for the six months ending the 31st of January last on the capital of the company paid up to that date.

TRIAL OF THE P. AND O. STEAMER "RANGOON."

The new screw steamship *Rangoon*, built for the Peninsular and Oriental Company by Messrs. Samuda, of London, and commanded by Captain J. M. Rogers, had her official trial on the 4th inst., at the measured mile in Stokes Bay. She is 2,014 tons burden, and her engines, which were constructed by Messrs. Humphrys and Tennant, of Deptford, are of 400-horse power. The results of four runs on the mile were as follow:—

Run.	Time.	Knots per Hour.	Vacuum.	Revolutions.	Steam.
1	4m. 47s.	12·543	26	65	25
2	4m. 41s.	12·811	25	66	27½
3	5m. 7s.	11·726	25	66½	27½
4	4m. 26s.	13·533	26	66	27
Mean of runs		12·460	25½	66	26¾

Indicated horse-power, 1,870; nominal ditto, 400. Draught of water, 17ft. 11in. forward, and 18ft. 9in. aft. Coals on board, 561 tons; water, 50; stores, 80; ballast, 100;—total weight on board, 791 tons. Among the gentlemen present at the trial were Messrs. Dinnen and Luke, Admiralty Surveyors; Messrs. Rubie and Murray, Board of Trade Surveyors; Captain Patey, R.N., Admiralty Superintendent of Packets at this port; Messrs. Humphrys and Samuda, builders of engines and ship; Messrs. Allan, Ritchie, and Olding, managers of the Peninsular and Oriental Company; Captain J. R. Engledue and Mr. A. Lamb, general and engineering superintendents; Mr. J. Robinson, surveyor; Captains Cooper, Kellock, and Hall, of the company's service, &c. The party also included several ladies.

THE POSITION IN JAPAN.

(THE TIMES.)

The chief part, and, we may add, the more important part, of this debate was of much more general application than to the matter of chastising an assassin chief and exacting reparation for some of the victims. Lord Carnarvon and Lord Grey assert that the hands of England are not clean in this matter, and that if we have suffered wrong that wrong has not been without provocation on our part. Lord Carnarvon relates the intolerable misconduct of certain persons who, to the disgrace of some wealthy commercial houses, were sent to represent them when the country was first opened. It was suddenly discovered that in the currency of Japan gold bore a much lower value in relation to silver than in Europe. The greedy and brutal adventurers who found themselves in the newly opened country no sooner learnt this than they bought up all the gold they could obtain, and, in language which was often too filthy to repeat, made the most impudent demands upon the Japanese officials for fabulous amounts of gold at the same rate. Of ccurse the Japanese found that they had been cheated, and their officials saw that they were being grossly insulted. Sir Rutherford Alcock complained of this scandal at the time, and we brought the matter before the public. Nothing, however, was done, and Sir Rutherford Alcock was found by the Japanese to be as powerless over these British Daimios as the Tycoon is said to be over the Japanese Daimios. Soon after this a very flagrant act of insolent violence occurred, which still more strongly illustrated the impotence of English Plenipotentiaries and Consuls over their own Daimios. There is a portion of the domain of the Tycoon to which access is forbidden, and where the birds have a sort of sacred character. An English merchant went forth to shoot in this forbidden spot, and, having shot a wild fowl, was bringing it away. A Japanese policeman interfered and stopped the sportsman's native servant; the European interfered, cocked his gun, and threatened to shoot the policeman. He did shoot the policeman, whether deliberately or in the scuffle is not fully ascertained, and the man was grievously wounded. The sequel is, however, the most instructive part of this matter. Sir R. Alcock sentenced this man to three months' imprisonment, and to banishment from Japan; but he appealed to the Supreme Court at Hong Kong, and not only got his sentence annulled, but actually recovered damages against Sir Rutherford Alcock. Well may Lord Grey, commenting upon this case, say "You have no right to protect British subjects unless you at the same time control them." Lord Grey's proposed remedy is to give up the ex-territorial stipulation, and make British subjects amenable to Japanese Courts. To introduce the system of "Happy Despatch" into a British community is not a seductive proposition. A much simpler plan would be to strengthen the powers of the Consular Courts and to abolish the jurisdiction of the Supreme Court of Hong Kong, except within the island of Hong Kong, and as to such cases as may be remitted to it by the Consuls.

The Supreme Court of Hong Kong is the greatest nuisance in the East. Any Consul or Custom-house officer who dares to take any measure against any of "the scum of Europe" found running goods, or levying blackmail, or shooting natives in China or Japan is immediately sued in the Supreme Court. The Consul or official is there tried by the very class which it is his duty to keep in order. The result is uniform. As in the case of Sir R. Alcock, the judge is always mulcted in damages and the criminal is let loose. The verdicts given in that Hong Kong Supreme Court have sometimes been so whimsically unjust that they are fitter for a jest-book than a grave discussion. So long as such a jurisdiction exists we have no right to talk either to the Chinese or Japanese of civilisation or courts of equal justice. If, however, we were to confine the jurisdiction of the Hong Kong Court as we have suggested, and if we gave an appeal direct from the Consular Courts to the Privy Council, we do not think we should be driven to Lord Grey's extreme remedy, or that we need have recourse to the Chinese or the Japanese criminal code.

The English public will be glad to see a generous but not a truckling policy pursued towards this weak Japanese Government. There certainly is no desire here at home to push the *Civis Romanus* principle to the extent of protecting every rowdy adventurer in his fraud and violence; nor to spend ten or twelve millions in repressing a feeling of national hatred which he, and men like him, have engendered in the minds of a half savage race. After this exposition in the House of Lords the Home Government must be held responsible for the offences of the English adventurers in China and Japan, for it is shown that the most simple and natural means of repression and punishment are not provided. It must, however, not be forgotten that the assassinations of which we now complain were committed long after these provocations, and upon persons who had no connection with them, and against whom no complaint could be made. The circumstances dwelt upon by Lord Carnarvon and Lord Grey should make us ashamed of the past and more careful for the future, but they need not make us renounce our treaty rights, or hinder us from pursuing with swift vengeance the assassins of our guiltless fellow-countrymen.

(DAILY NEWS.)

The discussion of our action in Japan at the present moment involves questions of principles so essentially similar to those raised by our recent policy in China that it is almost impossible, even were it desirable, to consider the two cases entirely apart. In both countries we have to do with a semi-barbarous people, intensely jealous of European interference, who regard the presence of foreigners amongst them with suspicion and dislike, and who, therefore, until their prejudices are softened by longer intercourse, may easily be roused to express their hostile feeling in acts of mischief and violence. In both empires the Government is of a thoroughly oriental type, too weak and divided to maintain order or secure the effective administration of justice at home, and incapable of resisting any organised attack from without. There are, moreover, in both countries large factions more or less actively opposed to the Government, who coerce its policy or defy its power. Under these circumstances, it no doubt requires the exercise of great judgment and discretion on the part of our representatives to avoid coming into constant collision with the local authorities, to keep clear of intestine brawls, maintain a strictly pacific policy, and never exceed the simple duties which our position as merchants trading under treaty stipulations may impose. Without constant watchfulness and care, we shall almost of necessity drift into war, or into a policy of intervention that would in the end be equally burdensome and expensive. We have already done both in China. We drifted into a war which cost this country eight millions, and as a legacy of this war we are now drifting into a policy of active intervention which, if persisted in, promises at no distant date to entail upon us still graver evils, and infinitely more serious responsibilities. Fortunately, we have not yet got to this pass in Japan, but it is impossible to say how soon we may be involved in a war with the Japanese, that would inevitably be most disastrous to them without being of the smallest permanent service to us. The discussion raised by Lord Carnarvon on Friday shows how essential it is that public attention should be directed to our proceedings in these distant centres of trade, and the public mind be fully enlightened as to the guiding principles of our com-

Digitized by Google

mercial intercourse with these semi-barbarous Governments. We seem already to be rapidly approaching in Japan the same fatal cycle of local disturbance, diplomatic pressure, and hostile intervention that has already proved so costly and burdensome in China and elsewhere.

(MORNING POST.)

We are at a loss to perceive the object of the discussion which took place in the House of Lords on Friday night on the present state of our relations with Japan. It must of necessity happen in the course of our intercourse with semi civilised races that difficulties will arise involving the employment of coercive measures. Had Lord Carnarvon or Lord Grey been able to furnish us with a persuasive formula which should be infallible in such cases, we should not have grudged them the time they wasted in desultory and captious criticism upon our policy in the East, which led to nothing except a display of weak logic and imperfect information. Had these two noble lords accompanied Messrs. Richardson, Marshall, and Clarke upon that ride in the course of which the former was killed and the two latter seriously wounded, we venture to say that their speeches would have been more worth listening to and conceived in a very different spirit; and if circumstances compelled them to protract their residence in Japan, we should not have them deprecating the measures which the Government have thought it expedient to adopt to protect the lives of British subjects in that country. The complaint made by persons on the spot is to the effect that these measures are not stringent enough, and, had they not been adopted at all, life would have been intolerable to people obliged to live under the daily dread of assassination. Whereas Lord Carnarvon would confine himself to letting British subjects be murdered without redress, Lord Grey would desire to furnish the Japanese with the legal means of exterminating them. Abolish, he says, the principle of exterritoriality, and hand what he calls the "scum of Europe" over to the Japanese Government. "These persons, when you withdraw your protection, will be promptly dealt with by the natives, and British subjects will, I have no doubt, be very kindly dealt with." The only inference we can draw from this is, that those diplomatic agents and other officials who were killed and wounded, and otherwise "unkindly treated" in Japan, were part of the "scum" Lord Grey denounces. We can imagine the satisfaction with which the Japanese Minister for Foreign Affairs, after having had Lord Grey's speech translated to him, will pen a despatch to Colonel Neale, excusing the massacre of the next Englishman in Japan, on the ground that he is "scum." Lord Grey seems to have got into his head that all our troubles in Japan have arisen from the acts of a few disreputable individuals who happen to have misbehaved. The fact is that the conduct of foreigners has been, on the whole, very creditable; and, even if it had been otherwise, the Daimios, at whose instigation they were murdered, are just that class who have had no kind of intercourse with them, and whose hostility is not based upon any specific acts committed by foreigners, but upon a fundamental principle which applies to all strangers, and may very possibly include angels.

(MANCHESTER EXAMINER.)

Lord Palmerston has dragged the country into war after war. The noble lord at the head of the Government, if you would take his word for it, never had any deep or far reaching policy in regard to these Eastern countries. All he ever desired was simply reparation—now for one violation of treaty, now for another; but the result, as we all know, is that after a quarter of a century's constant persistence in his policy, he has reduced the Government of China to complete dependence upon the ambassador of England, and that at the present moment the Brother of the Sun is rapidly descending into the condition of the Great Mogul. That his lordship should seek to repeat his success in Japan need occasion no surprise. But it is undoubtedly somewhat extraordinary that the statesmen who, when out of office, saw so distinctly the faults of his Chinese policy, should now have become its warmest advocates, and should, moreover, display the utmost eagerness to repeat its main features in regard to Japan. The noble lord has certainly received ample satisfaction for more than one piece of eloquent denunciation under which he had to suffer during the celebrated debate in 1857. But although Earl Russell has now become so much enamoured of the "vigorous" and "spirited" foreign policy which he formerly opposed, we cannot so readily forget the principles for which we once had his authority. We cannot narrow this question to a mere point of law, and discuss it very much as lawyers would treat a case of alleged distress or trespass. The substantial issue is this—are we prepared to break up another Eastern empire at an immense cost of blood and treasure, in order that we may force our commerce upon an unwilling people? A very short retrospect of the circumstances which have led to the existing embarrassment will justify this assertion. It cannot be denied that the treaty of whose violation we complain was imposed upon the Tycoon and his advisers by the fear, if not the direct pressure, of superior force. . . . We all recollect the preposterous demands made by our merchants upon the Japanese authorities for supplies of corn, upon which they were able to make a considerable profit by exporting it. These acts, fraudulent and mischievous as they were, were those of individuals. But it seems that we have also, as a nation, failed grievously to fulfil our obligations. Having obtained by treaty the exemption of Englishmen in Japan from Japanese jurisdiction, we have failed to provide any competent means for ensuring their punishment if they commit crimes. So shamefully partial is the court which we have established, that an Englishman who had deliberately fired at a Japanese policeman, and wounded him severely, was only punished by it with a fine. That conclusively shows the animus of our countrymen who are resident in those islands, and certainly leads us to believe that the outrages of which we hear so much are not entirely on one side.*

LABOUR-SUPPLY AND ROAD EXTENSION IN CEYLON.

Considerable interest has been excited in trading circles by the report of the proceedings of the Planters' Association at Colombo, on 28th May last, and a general feeling of satisfaction has been expressed that, before it was too late, the Government had turned its attention to the two great requirements of a Crown colony like Ceylon—a steady supply of labour, and improved and extended means of communication between the various outlying coffee estates. The mode of raising the requisite funds for construction of roads has likewise attracted attention, as at once supplying an adequate test, *before* the expenditure of public money, and inviting to healthy exertion to attain the required standard of production. It will be necessary, however, to exercise strict supervision to prevent anything like laxity in the application of such a test, affording, as it necessarily must, unbounded facilities for fraud and favouritism. Of course, entirely embryotic as the scheme at present is (indeed it is only *assumed* to be the *probable* policy of the local Government), it would be idle to speculate as to the checks to be devised for attaining this desired provision, and *for guarding against spasmodic developments*, which might result in roads being constructed where the ground was in rapid process of exhaustion, thus entailing the expense of their construction upon the community at large. The measure, if carried out, will in fact depend for its success upon each district so opened up paying its own expenses; and it is precisely because the principle, though good in itself, is liable to abuse, that we administer this preliminary warning. We do not, however, anticipate that, in a measure so vitally affecting the welfare of the community, all requisite precautions will fail to be taken, and we therefore look forward to a long career of prosperity for the island. On the other question of labour we may have more to say at a future date, but though we are glad to find that it attracts public attention in Ceylon, we do not share in the apprehension that a dearth of labour is even near, far less imminent.

Egypt.—New Railways, &c.—Several new commercial and railway schemes are spoken of. Amongst the latter the project of a Central Egyptian Railway promises a very great success. It is proposed to run this line from Cairo by the Valley of the Nile to Kenneh, near ancient Thebes, a distance of 380 miles; from Kenneh to Cossier, on the shore of the Red Sea, a distance of ninety miles; and then along the coast of the Red Sea to Ras Benas (ancient Berenice), a distance of 130 miles, where there is a spacious deep harbour, capable of containing a great number of large ships. The representatives of this company, to whom a concession was promised by his late Highness Said Pacha, are still in Egypt, and I presume that some expression of opinion from the English Government will now be made upon the subject, so as to induce his Highness the Viceroy to seriously consider the propriety of confirming his predecessor's promises in this respect. The influential deputation which lately waited upon Earl Russell relative to this project stated very truly that the formation of this line would shorten the route from Southampton to Bombay by two days; and as the first section, from Cairo to Kenneh, is the garden of Egypt, the profits from at least this part of the line must be of a very remunerative character.

Literature.

Criminal Law Cases, Vol. IX, Part V., Edited by Edward W. Cox, Esq., of the Middle Temple, is published by Mr. John Crockford, 10, Wellington-street, Strand. The first part contains reported cases, the second the latest statutes of interest to the legal profession. In the latter we have the amendment of the Merchant Shipping Act, the Act to amend the law relating to the fraudulent marking of merchandise, and an Act for the incorporation, regulation, and winding-up of trading companies and other associations—all of importance to our colonies. This is an authoritative work, admitted in the Courts, and wonderfully compendious and clear in its statements.—A new edition of a *Cyclopædia of Commerce, Mercantile Law, Finance, Commercial, Geography, and Navigation*, by William Waterston, Esq., and edited by P. L. Simmonds, Esq., is published by Mr. Henry G. Bohn, York-street, Covent-garden. The last twenty years has been prolific of change in all those departments to which this work relates; steam and the modifying effects of political influences, gold discoveries, free trade measures and industrial improvements, are changing the face of the world, and this work clearly and concisely presents all needed valuable information for reference on trade products, finance, law, shipping, and commerce.—*A Treatise on the Pathology and Treatment of Pulmonary Consumption;* the local medication of Pharyngal, Laryngal, Bronchial, and Nasal Diseases mistaken for, or associated with, Phthisis, by John Hughes Bennett, M.D., is published by Messrs. Adam and Charles Black, of Edinburgh. This is a standard medical work on the subject. The author has attained a wide fame for his science, skill, and scholarship. The laws governing the progress of pulmonary consumption are here clearly stated, the mode of judging the stage it may have reached

* Our readers will be astounded at such ignorance on Mr. Moss's case.

Digitized by Google

in any individual case stated, whilst a knowledge of the means of correction and recovery are communicated, and the application of these means admirably elucidated.—*Five Hundred Plans of Sermons*, by the Rev. George Brooks, of Johnstone, is a work published by Messrs. William Oliphant and Co., of Edinburgh, and is of value for the very effective analysis it provides for stated texts.—*Eight Lectures Delivered at the School of Musketry, Hythe*, by Lieutenant Watson, 60th Rifles, Staff, Hythe, have been published by Mr. W. S. Paine, of Hythe. It is an explanation of the "theoretical principles" as laid down in the "Book of Musketry Instruction," and will prove of great service to all who desire to become good riflemen. — *The Memories of New Zealand Life*, by Edwin Hodder, Esq., published by Messrs. Jackson, Walford, and Hodder, has reached a second edition. After a graphic sketch of ship-board experience, the author bears us into Nelson Harbour, shows us the wharves, shipping, streets, and suburbs, and fairly introduces us into colonial society. That independent spirit which characterises true colonial life is admirably rendered, and the author well characterises New Zealand as a colony of self-made men. Placing the banner "Excelsior" in our hands, he carries us off to the diggings, and there we have a time of it; "Nothing venture, nothing have." What Hogarth was with his pencil Hodder is in verbal sketches.—*Scripture Alphabet Richly Illuminated* is a most tasteful and elegant work; the borders, which exhibit some most exquisite and chaste designs, and are printed in gold and colours, enclose on each page two lines of Scripture, designed in accordance with the accompaniment.—*The Shanghai Almanac* reached us only by the last mail; the contents are varied and useful. There is a general complaint, however, that the information most needed and expected—that is, the foreign residents at the new ports on the Yang-tse and further north—are not given; even Nagasaki is omitted, and the list for Yokuhama should have been compiled, showing the various firms. The space devoted to the Hong Kong Government would have been better used in this way, and the information more in accord with the publication, as we do not require a repetition of what has existed for many years in the Hong Kong directory. The tariff import and export duties would be also a valuable addition.

Monetary and Commercial.

City, Wednesday, July 25.

At a special meeting, on the 11th ult., of the proprietors of the Agra and United Service Bank, Dr. Farr, D.C.L., F.R.S, was unanimously elected an auditor of the bank, in the room of Mr. W Newmarch, F.R.S., who has resigned. The correspondence of the Clearing Committee, noticed in our last, was also laid on the table.

At the annual meeting of shareholders in the China and Japan (Coast and River) Steam Navigaton Company, held at 10a, Kings' Arms-yard, it was decided to pay six months' interest at the rate of 5 per cent. per annum, being against the earnings only of the company's first ship. A report will be found in another column.

The underwriters at Boston and New York had further advanced their rates on American ships, and judging by the following they were quite justified.

The capture and burning of the American ship *B. F. Hoxie*, by the Confederate steamer *Florida*, laden with large consignments of silver ore, &c., to English merchants, made known at Lloyd's, produced some commotion among the underwriters, as also at the various marine insurance companies, who are interested in her cargo to the extent, it is stated, of £150,000, that amount of insurance having been written on the consignments. The *Florida* carried off $95,000 worth of silver bars from her previous to ordering the ship to be burnt. About the same time she also destroyed another large American ship, the *Red Gauntlet*, while on her voyage to Hong Kong from Boston. It is stated that in both instances the captain of the *Florida* offered to release the ships on bonds being exchanged, but the masters refusing the ships were burnt.

At the half-yearly meeting of the London Joint-stock Bank, Mr. Henry Christy in the chair, the net profits were stated at £58,689, and the usual dividend was declared of 12s. 6d. per share, or at the rate of 12½ per cent. per annum, with a bonus of 7s. per share, leaving £189 to be carried forward. The guarantee fund now stands at £264,205, and the accounts of customers amount to £12,984,172. The report was received with satisfaction, and the proceedings were entirely formal.

At the half-yearly meeting of the Bank of London the available balance was stated at £33,606, and a dividend was declared at the rate of 10 per cent. per annum. The sum of £18,000 was carried to the reserve fund, which is thus raised to £100,000, and this point having been attained, the directors will henceforth be prepared to recommend an increased rate of dividend.

Messrs. Dent, Palmer, and Co., the agents for the payment of the dividends on the debt of Indiana, have received advices that the dividend due on the 1st instant cannot at present be paid.

The *Ganges* arrived at Demerara from Hong Kong in 82 days with 398 Chinese emigrants.

The number of English limited joint-stock companies registered since the commencement of the present year has been 296, and their nominal capital represents £62,690,150. This total, however, has little real weight, since the amount paid upon shares actually issued would probably not be equal to 5 per cent. of that sum. The Irish companies registered in the same period have been only 9, with a nominal capital of £124,000; and the Scotch 11, with a nominal capital of £668,843. The smallest company registered is the Aberdare Public Offices Company, with a nominal capital of only £410., and the largest, the General Credit Company, with a nominal capital of £10,000,000. The average capital of each English company is £212,000, that of the Irish £14,000, and that of the Scotch £60,000.

The Atlantic Telegraph Company invite tenders for the manufacture and subsequent laying down of a submarine telegraph cable between Valencia (Ireland) and Newfoundland. The distance from point to point is 1,640 nautical miles, but about 2,100 nautical miles of cable will be required, of which about 2,000 miles are expected to be used. This gives an ample allowance for "slack." If the submersion of the cable take place next year, it will be between July and August.

Messrs. Glass, Elliot, and Co. have despatched a steamer to the Mediterranean, with a view to the commencement of operations for the repair of the fractured cable between Benghazi and Alexandria, about 500 miles in length. The cable will be gradually raised, and, on the fractured portion being discovered, a new piece will be "spliced" in.

THE ORIENTAL HOTELS COMPANY.

The Oriental Hotels Company, capital £250,000, in £10 shares, for the erection of hotels, first at Bombay and Point de Galle, and subsequently at Madras, Singapore, and Kurrachee. The capital with which the company commences operations will be subject to increase. The directory includes gentlemen personally acquainted with the East, and consequently with the requirements of travellers. The great want of the East has not only been adequate but suitable hotel accommodation. Hitherto a great many travellers by the overland route have from this cause been compelled to throw themselves on private hospitality of Eastern residents; but although this hospitality is known to be almost unbounded, there is a limit to the extent to which individuals would desire to take advantage of it; and, indeed, looking to the increase in the number of travellers by the Overland route, and the growing commercial importance of other points where this company contemplates commencing operations, there is no reason why they should not possess first class hotels. Looking to the large amount of patronage these establishments cannot fail to secure, the only wonder is that they have not been long since erected. The names that appear in the directory of this company constitute an ample guarantee that this great hotel want will be efficiently met, whilst there is no doubt the undertaking will prove amply remunerative.

THE MARINE INVESTMENT COMPANY.

The Marine Investment Company, capital £500,000, in £25 shares for the granting of temporary loans and advances on eligible ships and other eligible property, by way of mortgage or assignment on the vessels and their freight, covered by policies of insurance, and on such other security as may be considered suitable; and for receiving money on interest to be employed in the same way.

The amount of bullion by the P. and O. Company's steamer *Ripon*, from Southampton, on the 20th inst. was—in gold, to Mauritius, £10,000; to Madras, £1,467. In silver, to Madras, £10,986; to Calcutta, £28,800; to Singapore, £50,000; to Hong Kong, £49,909; to Foo-chow-Foo, £1,500; to Shanghai, £27,866. Total, in gold, £11,467; in silver, £169,061.

ARTICLES OF IMPORT.

Tea.—The market continues stagnant, the dealers being very desirous to lessen their stocks of old tea before the arrival of the new crop, whilst the demand for export has been extremely limited, the Russian market being now over-supplied with finer sorts of Congou. Prices generally show a downward tendency, through the non-arrival of fresh cargoes during the month—there being now about 9,000,000lbs. fully due—has in some degree supported them. Low and dusty kinds of Congou, also fair to good common, remain without change. Fair flavory kinds are only in moderate request, at prices rather in favour of the buyer. Fair to good Ho-Hows and Ning Chows, and second class Honams, Monings and Wopaks, are difficult of sale at ½d. to 1d. per lb. decline. Good to fine Congous, both Kaisow and Moning and Wopak kinds, have been sold at public auction "without reserve" at a reduction of 1d. per lb.,

Digitized by Google

showing a fall of 3d. to 4d. per lb. from the highest point. No change in Tayshans. Oolongs, Souchongs, and Flowery Pekoes are neglected. In Scented Tea there is no material alteration. Uncoloured Japans have sold as before. Assam and Indian Teas sold at the public sales (of the 14th) at an advance of 1d. to 2d. per lb. Green Teas have shared in the general stagnation, with the exception of Young Hyson, for which there continues a small demand for export. The public sales consisted of 57,776 packages, of which 1,396 packages were Assam and Indian Tea, and 16,797 packages "without reserve." 27,749 packages were sold, including the Assam and Indian Tea.

SILK.—A notice will be found in our latest.

SUGAR.—Under the influence of numerous and extensive parcels advertised to be brought forward by auction, the market opened heavily, and the transactions, with few exceptions, were at a reduction of about 6d. per cwt., but more recently, buyers have again operated freely, and a good business has been done at prices nearly recovering the decline; 8,000 bags Clayed Manila, fair brown quality, were bought in at 31s. 6d. Our quotations are: Siam and China, white, 22s. to 26d. per cwt., brown and yellow, 14s. to 21s.; Manila, clayed, brown and yellow, 18s. to 19s., Muscovade, 15s. to 16s.; Java, grey and white, 23s. to 26s. 6d., brown and yellow, 15s. to 23s.; Penang, grey and white, 23s. to 25s. 6d., brown and yellow, 15s. to 22s. 6d. The Dutch Company's sale of 67,800 baskets Java, on the 15th instant, commenced at prices two guilders below those of May last, which were the valuations, and closed at about 1½ guilders below; the whole quantity being sold.

COFFEE.—More firmness has latterly prevailed, and towards the close of the sales a decided improvement was in most instances established. Ceylon: Of plantation, 1,050 casks, 716 barrels and bags have been offered by auction, which were taken freely at full rates to an advance of 1s. per cwt., fine fine ordinary to low middling 79s. to 83s. 6d., middling 84s. to 88s. 77 casks, 2,178 bags native were held firmly for an advance of 6d. per cwt., at which greater part was taken at and after the sales, good ordinary 69s. 6d. to 70s. MOCHA: 380 bales fair Alexandrian were disposed of at 86s. 6d. to 88s.

RICE.—Landed parcels continue in only partial request, and not above 15,000 bags have been sold, cargo Bengal 8s. 3d. to 8s. 4½d., good white 13s. 3d., fine new Bassein 11s., and middling Rangoon at 9s.; floating cargoes, however, have been more inquired for, and six of Nakrenzie have been realised at the following rates, viz., two, together 2,400 tons, at 9s. 9d. for the United Kingdom only, two, 1,710 tons, at 9s. 10½d to 10s. for the Continent, or 3d. extra for the United Kingdom; two together, 1,550 tons, 10s. for the United Kingdom.

SAGO.—Privately, 1,000 boxes large grain are reported sold at 17s. to 17s. 6d. Sago Flour: This article has been taken in small quantities at 14s.

SPICES.—Pepper: The market still exhibits little animation; 2,112 bags Penang, at public sale, were disposed of on rather easier terms, fair dark 3⅛d. to 3⅜d., a few grey 3½d. to 3¾d. Privately, about 1,000 bags Singapore have been sold at 3⅜d., and Penang at 3¼d. to 3⅜d. White: 140 cases, 13 bags Tellicherry were released as follows: Common to fine Coriander sort to 5½d. to 7d., good and fine white 9¾d. to 11½d.; but 162 bags Penang were bought in above the value. Pimento: 913 bags, in auction, went of steadily, low middling to good middling 2⅛d. to 2⅜d. Cinnamon: The quotations are—Ceylon, 1, 2, 3, 11d. to 2s. 6d. per lb.; Malabar and Tellicherry, 7d. to 1s. per lb. Cassia Lignea: This meets scarcely any demand, and only about one fourth of 817 boxes, at auction, was sold, middling (large bundles) 86s. loose and broken 77s. to 79s. Ginger: In public sale 563 cases Cochin were realised at moderate prices; ordinary to good small 60s. to 66s., middling to fair 67s. to 75., good bold 86s. to 90s. Nutmegs: 74 cases offered by auction, were only partly sold; middling to good 11d. to 1s. 6d., boldish 2s. 10d. to 2s. 11d., good bold 3s. 2d. to 3s. 9d. 3 cases Mace were bought in. The quotation for Mace is 8d. to 2s. per lb.

COTTON.—The market has had a dull tone, and prices of Tinnivelli, Madras, Kurrachee and Bengal are ¼d. to ½d. per lb. lower; the total sales being barely 3,400 bales, as follow:—Fair Kurrachee 12d. to 12½d., middling fair Compta to middling fair Broach (Surat) 16d. to 17d., ordinary to good Tinnivelli Madras 14½d. to 16¾d., and middling fair to good fair Bengal 11⅜d. to 13d.

HEMP.—Manila: Quiet, but not pressed on the market; of 889 bales at auction, about one-fourth sold at £25 per ton for fair roping; little business doing privately. Quotation for current quality, £23 to £26 per ton. Sunn: Only 139 bales Bombay at auction, about two-thirds sold at £23 to £24. 5s. per ton for ordinary to middling.

TIN.—This market has become quite inactive; business very trifling; quotations for Banca nominal; Straits offering at £122 per ton cash. The price of English lowered £4.

JAPAN WAX.—Rather cheaper; of 1,142 cases at auction two-thirds sold at 68s. to 69s. 6d. per cwt. for good saucers, and 60s. to 66s. fair to very good block; limited transactions privately.

MISCELLANEOUS.—Rum: Rather more steadiness has been observable in the market, and an increased amount of business has been done. Aloes: Nothing of consequence doing. Castor Oil: Fine quality has risen, ¼ to lb. Of 3,237 cases at auction, little more than one-half sold at 4¼d. to 6¼d. per lb. for straw to fine quality. Galls: We quote Japan and China 42s. to 65s. per cwt., without any business of consequence. Mother-o'-Pearl Shells: Firm at 25s. to 64s. per cwt. Teeth, elephants', 70lbs. and upwards, £33 to £39 per cwt.; 40 to 60 lbs., £31 to £38; 20 to 40, £27 to £33; Scrivelloes, £12 to £32; Ball do. cut, £43 a £55; Ball do. uncut, £23 a £43; Hollows, £13 to £30; Points and tips, £14 to £34. Sea Horse, 4 lbs. and upwards, 4s. a 11s.; 3 lbs., 2s. to 5s.; 1 to 2 lbs., 9d. to 2s. Tortoiseshell, 6s. to 20s. Beeswax: Quiet, we quote white, £9. to £9 10s. per cwt. Turmeric: Large business, commencing at 23s. 6d. per cwt., and gradually running up to 26s. 6d., and the market remains firm. Shellac: Has recovered as much as 5s. per cwt. of the recent decline, with a good general demand. Camphor: We quote China, £6. 5s. to £6. 10s. Of 260 cases at auction, 160 cases sold at £6. to £6. 2s. 6d. good, £5. 15s. to £5. 17s. 6d. fair, and £5. 10s. very dark. Cubebs: £5. 5s. to £5. to 15s. per cwt.; good demand. Dragons' blood: Firm; in reeds, £10. to £14; in lumps, £4 to £11. Gutta percha: 11 tons good reboiled, sold at 1s. 6d. per lb., being rather cheaper. India rubber: Sales of fine Java to a moderate extent effected at 1s. 6d. per lb.; 71 cases Assam sold at 9½d. to 10d. for lump, and 8¼d. ball.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 5s. to £6. 15s.; nail rod, £7 to £7. 5s.; hoops, £8. 5s. to £8. 10s.; sheets, single, £9. 5s. to £9. 15s.; Staffordshire bars, £7. 10s. to £8; rails, £5. 7s. 6d. to £5s. 17s. 6d.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and Sheating, £99 per ton; yellow metal, 8¼d. to 8¾d. per lb.

TIN.—118s. for block; 119s. for bar. Tin plates, best charcoal, I.C., 28s. 6d. to £29s. 6d. per box.

LEAD, &c.—English pig, £20. 2s. 6d. to £20. 10s.; shot, patent, £23. 10s., sheet, £21. 10s.; spelter, £18. 5s. to £18. 7s. 6d.; zinc, English sheet £23; quicksilver, £7 per bottle.

The following is from the circular of Messrs. French and Smith:—Metals continue as by our last price current, with the exception of English tin, which is reduced 4s. per cwt. Straits and Banca are a little lower. In Holland the quotations are rather higher.

FREIGHTS AND CHARTERS.

Outward freights for vessels on the different berths remain quiet. Coal freights are firm, and better rates are obtainable for Shanghai and Hong Kong. The P. and O. Company have contracted for 9,000 tons to be shipped to Galle within the next three months, and vessels not being in over supply are not obtainable to the extent required for the various orders for coal for India and China now in the market. Homeward frieghts continue unaltered; suitable vessels find ready charters from Ceylon at 80s. per ton for coffee, &c.; from China at 70s. to 75s. for tea; from Manila to the United Kingdom at 75s.; and from the rice ports at 82s. 6d. to 87s. 6d., according to the size of the ship, to the United Kingdom or Continent.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 42s. 6d. meast. To Nagasaki: 65s. To Hankow: 65s. weight, 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. measurement. To Shanghai: 50s. weight, 30s. measurement. To Hong Kong: 40s. weight, 35s. measurement. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. to 35s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £42 and £2. For Shanghai: £5 and £2. 10s. 0d. For Manila: £1. 10s. For the Philippine Islands, Penay, or Zebu: £2. For Singapore: £27 and £1. 6s. 0d. For Penang: £24. For Galle: £27. and £1. 7s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have engaged freights for the conveyance of Government stores in the Red Riding Hood and Her Majesty, both from the River Thames to Hong Kong, and have invited tenders for the following:—To Hong Kong 585 tons (heavy and light). To Colombo 11 tons heavy, and 64 tons light. To Trincomalle 205 tons (heavy and light).

CASUALTIES.

The Duke of Roxburgh, Parnell, from Cardiff, for Manila, arrived at Rio Janeiro, June 21, leaky.

The Gertrude, Whitman, from New York, for Shanghai, arrived at Rio Janeiro, June 13, leaky.

Ceara, June 16.—The Robin, Gammon, from London, for Shanghai, put in here June 6. The master reports that after crossing the line in 34 days the vessel could not make any further progress, owing to her bottom having become foul, and to her not answering her helm, wanting, in his opinion, a false keel. After trying to proceed for 50 days, he was obliged to let her drift before the wind. There being no means of repairing her here, she was advised to proceed to Maranham.

Shields, July 21.—The Anna and Elise, Roover, hence to Batavia, which was stranded at Sadler's Point, in the Tyne, May 19, was lifted to-day and towed further in shore.

Falmouth, July 24.—The Marianna, arrived at this port from Monte Video, for Antwerp, has on board the master of the Red Gauntlet, (Amer. ship), from Boston to Hong Kong, which was captured by the Confederate steamer Florida, on the June, 14, in lat. 9 N., lon. 35 W.

The Wilhelmina, Wiersma, from Macassar for Rotterdam, put into Ascension, June 23, with loss of sails and mainyard.

The Henrietta, Doe, which arrived at New York, July 15, from Bermuda, brought the crew of the Red Gauntlet, from Boston to Hong Kong, which was taken, as before reported, by the Confederate str. Florida, June 14, when a prize crew was put on board, and kept her in company till the 26th, when she was burnt in lat. 29, lon. 47.

Rio Janeiro, July 9.—The American ship Talisman, from New York for Shanghai has been captured by the Confederate str. Alabama, and her crew landed here. Vessel since reported as having been burnt, June 5, in lat. 14 S., lon. 34 W.

The Zarah, Grote, from London to Colombo, put into Bahia, July 2, leaky, and would have to discharge.

The Constitution, from Philadelphia for Shanghai, which was captured by the Confederate steamer Georgia on the 25th June, was retained to be fitted out as a cruiser.

The Mary Henzell, Richardson, from Shields for Galle, put into Rio Janeiro 25th June leaky. About 200 tons of her cargo has been discharged, and she has been recommended to be caulked from the copper upwards. This vessel brought on to Rio the crew of the American ship Talisman, from New York for Shanghai, which had been captured and burnt by the Confederate steamer Alabama, as before reported.

Maranham, June 27.—The Robin, Gammon, from London for Shanghai, came in here, June 16, from Ceara, where she put in with her bottom foul; about half her cargo has been discharged, and she was beached yesterday and found to be perfectly sound. It is thought that she requires repairs which will detain her for 15 or 20 days.

The Venilia, Paige, from Colombo for London, put into the Mauritius, June 13, having experienced hard gales from 22nd to 23rd May, in lat. 4 to 3 N. lon. 81 E., during which she sprung a leak, making a great deal of water. She had to discharge part of her cargo, and to caulk upper works, &c.

SECRETARY (PRO TEM.).

Macdonald Yates, Esq.

TEMPORARY OFFICES.

36, Cannon-street, E.C., and 5, Parliament-street, Westminster.

The deficiency of hotel accommodation in India, China, and other places in the East to which Europeans now resort in large and annually increasing numbers, is a subject of general complaint; and it is evident that the development of the means of transit by ocean and river steamers, and by railways, which has been in rapid progress now for some years, must imperfectly fulfil all its important objects, so far as European intercourse with the East is concerned, until this want is adequately supplied.

In England, and on the Continent of Europe, it is now an ascertained fact that the Joint-Stock system may most successfully be applied to the establishment of hotels of the first class. If this be so where good private hotels before existed in large numbers, there seems no reason to doubt that an equal degree of commercial success is attainable by the application of capital, upon the same system, to the same object, in countries where, though the demand is great and increasing, it may almost be said that good private hotels do not exist.

In Calcutta a Joint-Stock Company has lately purchased and undertaken the management of an hotel, and the prospects of the enterprise, as a commercial speculation, may be inferred from the very high premium at which their shares are quoted in the Calcutta market, see *Times* July 17, the *Englishman's Weekly Mail* of June 8th, 1863, and *Allen's Indian Mail*," viz., £25 paid, present value £42½ ex div., equal to 70 per cent. premium, and the payment of a dividend of 10 per cent. for the half-year ending 30th April last, equal to 20 per cent. per annum. Bombay offers a wide field for the establishment of a hotel of a first-class character. The early completion of vast lines of railway converging in the island of Bombay, and the more frequent steam communication between that port and Europe, which will soon take place, must very much increase the demand for such accommodation. The same may be said of Madras.

It is under these circumstances that the Oriental Hotels Company (Limited) is established, in the confident belief that the application of European capital to India in this form, will not be less profitable than useful. It is proposed, in the first instance, to supply the urgent requirements of Bombay and Point de Galle. There are other equally important places which will naturally engage the early attention of the Company, such for example as Madras, Singapore, and Kurrachee; not to speak of many very important Railway Stations in the Interior of India, where there are now no Hotels at all, and where, at a comparatively small outlay, there is a large field for profitable operations.

The larger class of the Company's Hotels will afford all the conveniences of the best European Hotels, adapted to the climate, and to the habits of those for whom they are intended; whilst, in even the smallest class, the health and comfort of the inmates will be carefully studied.

It is intended to constitute Local Committees of Management in each Presidency, where Hotels may be established.

In the event of two-thirds of the first issue of Shares not being subscribed for, no allotment will take place, and the deposits will be returned to the subscribers, without deduction.

It is proposed to pay to Shareholders 5 per cent. interest upon the capital as paid up, until the first dividend is declared.

Prospectuses and forms of application for Shares may be had on application to the Bankers, the Broker, or the Secretary.

THE ORIENTAL HOTELS COMPANY (Limited).

FORM OF APPLICATION FOR SHARES.

To be retained by the Bankers.

To the Directors of the Oriental Hotels Company.

Gentlemen,—Having paid to the Bankers of the above-named Company the sum of £ , I hereby request that you will allot me Shares in the said Company; and I agree to accept such Shares, or any smaller number that may be allotted to me, and to become a member of the Company, and I authorise you to place my name on the Register of Members in respect of the Shares to be allotted to me, and I agree to be bound by all the conditions and regulations contained in the Memorandum and Articles of Association of the Company, in manner provided by "The Companies' Act, 1862."

I undertake to pay the Balance (if any) of the Deposit of £2 per Share on the Shares allotted to me within ten days after notice of allotment, and in default thereof, I authorise you to cancel the allotment, and I agree that the Deposit paid shall be forfeited to the Company.

Dated this day of 1863.

CHINA AND JAPAN (COAST AND RIVER) STEAM NAVIGATION COMPANY (Limited)

At the second Ordinary General Meeting of the Shareholders of this Company, held at 10A King's Arms Yard, Moorgate street, on Tuesday, the 21st day of July, 1863,

JAMES NUGENT DANIELL, Esq., in the Chair,

The advertisement convening the meeting was read.

The Common Seal of the Company was then affixed to the Register of Shareholders.

The report having been read by the Secretary,—It was proposed by the Chairman, and seconded by his Excellency H. B. Loch, C.B., and resolved unanimously,

"That the report now read be received and adopted."

It was moved by the Chairman, seconded by Harry Borradaile, Esq., and resolved,

"That six months' interest, at the rate of five per cent. per annum, be allowed on the capital paid up to January 31st, provided all calls made shall have been paid on or before the 30th June. Such interest to be payable on and after the 28th July instant."

It was moved by the Chairman, and seconded by Philip Shore Fletcher, Esq., and resolved,

"That George Braginton and George Lathom Browne, Esqrs., be re-elected directors of this company."

It was moved by Mr Alderman Dakin, and seconded by F. W. S. Oakes, Esq., and resolved,

"That Benjamin Dawson and Ellis Clowes, Esqrs., be re-elected auditors."

The Chairman having declared the business of the meeting concluded, it was proposed by H. Alers Hankey, Esq., seconded by Mr. Alderman Dakin, and carried unanimously,

"That the best thanks of this meeting are due, and hereby given, to the Directors for their attention to the interest of the Company."

(Signed) J. N. DANIELL, Chairman,
J. SPENCER PRICE, Secretary.

WHOLESALE AND SHIPPING PRICES ON APPLICATION AT THE

WORKS, UPPER MARSH, LAMBETH, LONDON.

CHOLERA, DYSENTERY, DIARRHŒA, AGUE, FEVER, SPASMS, &c. The Safest and Best REMEDY is that marvellous remedy known as

CHLORODYNE,

which was discovered by Dr. J. Collis Browne, M.R.C.S.L. (ex-Army Medical Staff), and the SECRET OF HIS RECIPE CONFIDED ONLY to J. T. DAVENPORT, pharmaceutical chemist, 30, Great Russell-street, Bloomsbury-square, who is the sole manufacturer. Medical testimony furnished by the highest authorities in military, naval, and Civil practice, and numerous gratifying statements from the public generally, establishes this property as invaluable. It relieves pain, soothes the system, inducing refreshing and soothing sleep without producing or having any unpleasant effects like opium, and may be taken at any time in a few drop doses. Extracts from the General Board of Health, London, as to its efficacy in Cholera:—"Third Stage, or Collapse—In all cases restoring the pulse. So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases." From Dr. Andrew Smith, Director-General Army Medical Department:—"I have seen it used, and apparently with much advantage." From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an anti-spasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am perfectly satisfied with the results." From Dr. M. M'Millman, of New Galloway, Scotland:—"I consider it the most valuable medicine known." Dr. M'Grigor Croft, late Army Staff, says:—"It is a most invaluable medicine." Dr. Gibbon, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa." Dr. I. Baker, Bideford:—"It is without doubt the most valuable and certain anodyne we have."

Sold in bottles, 2s. 9d. and 4s. 6d., by the sole Agent and Manufacturer, T. DAVENPORT, 33, Great Russell-street, Bloomsbury square, London; or sent carriage free on receipt of Stamps or Post-office Order, and with Professional Testimonials enclosed. None genuine without the words "Dr. J. Collis Browne's Chlorodyne" engraved on the Government stamp on each bottle.

*** Beware of counterfeits sold under the same name. Orders can be sent through any of the Agents of this Paper

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C. Sole Manufacturer.

TWOFOLD EXTRAORDINARY CURE EFFECTED by HOLLOWAY'S PILLS and OINTMENT.—Mr. J. Webb, boot and shoemaker, Chapel-street, Cahircevin, Ireland, writes, under date Jan. 10, 1863, that he had been afflicted for seventeen years with a most dreadful asthmatic cough and shortness of breath, and latterly was also subject to benumbed sensations in his limbs, attended with heavy, drowsy feelings, which threatened an apoplectic fit. In alarm he consulted the most skilful of the profession within many miles of his residence without avail, and fruitlessly used every means recommended by friends, till he heard of the repute of Holloway's remedies, and resolved, with death staring him in the face, to give them a trial. They immediately relieved and ultimately cured him.

TELEGRAPHIC COMMUNICATION BETWEEN ALEXANDRIA AND ENGLAND And the Continent generally.

MR. E. ST. JOHN FAIRMAN, MERCHANT, ALEXANDRIA, EGYPT, will undertake to receive and Forward Telegrams, &c., &c., for account of Firms abroad

TO THE NERVOUS AND DEBILITATED.

Dr. Curtis on Marriage, Nervous Debility, Spermatorrhœa &c, with Plates. Post free by the Author, 12 stamps; sealed ends, 20.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour; being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excess: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Invaluable Lotion, the result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS 15, Albermarle-street, Piccadilly, London.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 29, 1858.

The book concludes with numerous, varied, and interesting cases, to which is added the Author's Receipt for a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

The work may be obtained of Mr. HINNAM, Queens-road, Hong Kong.

Per P. and O. steamer, 4th November, from Southampton.—To Singapore: Mr. and Mrs. Shaw, Mr. and Mrs. C. W. Hatch.

Summary of News from the Far East.

JAPAN.

Dates from Kanagawa come down to the 14th of June, and announce the adjustment of our demands, but the particulars had not been made public when the mail left. The following from the *Overland Trade Report* appears to be the reflex of general opinion on the subject :—

"From Japan the intelligence is most difficult to comprehend. The arrangement referred to in last report has clearly been carried, but all particulars are carefully suppressed. The probability is that wise councils have prevailed, and that war with England has been eschewed. The menacing attitude of affairs drew together about Yedo a vast number of Lonins, that is, the discharged retainers of the Daimios—a most desperate, dangerous class of men. That these men have banded together to kill all the foreigners who might fall in their way, the Japanese authorities declare, and make it appear that the difficulty has been to thwart and restrain them. Negotiations have been conducted with the Tycoon, who seems to be associated in Council with the young Prince of Mito, who is known to be adverse to the admittance of foreigners into the country. Whilst these negotiations have been going on, the authorities have managed to frighten every foreigner out of Yedo and Kanagawa too—all are now at Yokuhama. The United States Legation caught fire at Yedo by accident, and this circumstance was availed of to induce the Minister to abandon the capital. The warnings of the intentions of the Lonins succeeded in frightening the foreign dwellers from Yokuhama.

"The result of the negotiations, so far, has been a decided retrograde movement of the position of foreigners in the country, for not only are they restricted to Yokohama, in the Bay of Yedo, but they are actually confined there; for the authorities have given notice that the Lonins swarm to such an extent in the neighbourhood, that they cannot ensure the safety of foreigners beyond the precincts of the limited settlement. Besides all this, the loss of trade to British merchants, pending the negotiations, has been heavy.

"The probability is that the British Admiral has been completely 'choused.' The Tycoon's Government have doubtless convinced him that they cannot control the country, but that if he will save their faces and keep his demands quiet, they will arrange by degrees. The pecuniary demands will, of course, be satisfied, and as the poor admiral will doubtless be persuaded that a complete overturn of the Government and consequent anarchy will result by his proceeding to violence, he probably has been induced to temporize and yield. It is the Canton city gate affair over again. The Japanese seem to have had it all their own way, for immediately they had succeeded in driving all foreigners to Yokuhama, matters began to resume their wonted appearance. The servants began to return—artisans could be had as usual—the native shops of houses began to be filled with goods and furniture, and so on.

"The closest reticence was observed by the British authorities. It was believed that the indemnity claimed had been paid—that it was entirely out of the power of the Tycoon to surrender the murderer of Mr. Richardson, but that a tradal concession, in the state of an open port, would be given instead."

The following is on the burning of the American Legation, which we noticed in our last :—

"On the night of the 23rd May the temple at Yedo, in which the United States Legation resided, was burned down. The fire originated somewhere near the kitchen, and is thought by some to have been purely accidental, while others incline to the opinion that the priest to whom the temple formerly belonged, and who wished very much to get possession of it again, had some cognisance of the matter; and that it was a deliberate act of incendiarism. Be that as it may, we are sorry to hear that it has resulted in a very serious loss to the legation; nothing having been saved except the archives, which General Pruyn, by some extraordinary effort, succeeded in rescuing from the flames. We

Digitized by Google

understand than his Excellency has sustained a loss of personal property to the amount of at least $10,000; and that the other members of the legation, in like manner, lost everything except the clothes in which they escaped; the fire consumed the whole building in an amazingly short time. General Pruyn, notwithstanding this privation, still remains at Yedo with his staff."

CHINA.

PEKING.

There is no news of any moment.

Tables showing the population of China under various dynasties have been transferred to the *China Mail* from the learned German work translated by the Rev. W. Lobscheid. From these it appears that the total number of inhabitants of China is upwards of 414,686,994, and of Peking and its environs, 2,553,159.

SHANGHAI.

CAPTURE OF TAI-TSAN.

The Bishop of Victoria's stirring appeal to those who were eye-witnesses of the atrocious cruelty perpetrated on the rebel prisoners after the capture of Tai-tsan, to place him in possession of reliable details of the affair, will not be in vain. Numerous rumours, reports, assertions of similar inhumanity on the part of the Imperialists towards their conquered enemies have at different times been circulated; but we believe no case has occurred susceptible of such undoubted verification as the present. An eye-witness, whose statements the *North China Herald* unhesitating endorses, adding that others were witnesses of the facts he relates, says :—

"About eleven o'clock a.m. on the day following the capture of Tai-tsan (Sunday, May 3rd), seven prisoners were brought into the Imperialist camp near Wy-con-sin, being stripped perfectly nude; they were each tied to a stake and tortured with the most refined cruelty. Arrows appeared to have been forcibly driven into various parts of their bodies, heads, region of heart, abdomen, &c., from whence issued copious streams of blood. This mode of torture falling short of satiating the demoniacal spirit of their tormentors, recourse was had to other means. Strips of flesh were cut, or rather hacked (judging from the appearance presented, the instrument seemed too blunt to cut), from different parts of their bodies, which, hanging by a small portion of skin, presented an appearance truly horrible. In no case, however, were their eyes injured. For hours these wretched beings writhed in agony. About sunset they were led forth more dead than alive by a brutal executioner who, sword in hand, thirsting to imbrue his hand in blood, seemed the very incarnation of a fiend. Seizing his unfortunate victims, he exulting led them forth, mocking and insulting them, and then, by hewing, hacking, and using a sawing motion, he succeeded eventually in putting an end to their sufferings by partially severing the head from the body."

The *North China Herald* adds the following remarks:

"These men were captured by the Imperialists mainly through the instrumentality of troops disciplined by Europeans and led by a British officer, and unless we use every exertion to prevent a repetition of such inhuman cruelty, we become morally implicated in the deed. No remonstrances that can be made by Sir Frederick Bruce to the Prince of Kung; no threats that can be held out by General Brown to the Fuhtai can be too strong for the occasion. The latter possesses the power, if he can only be inspired with the will, to check such acts on the part of his subordinates."

The plaintiff engaged to prove that the present defendant not only acted as his brother's agent, but as principal, in the matter. He had entered into a contract as the actual principal, and was liable for its performance. The sale to Mr. Sassoon D. Sassoon had been effected as stated in March, 1862. Since the 13th July of that year, defendant had been in receipt of all rents and profits accruing from the property; not a cent of them had reached Dr. Barton. Not only so, but the property had been re-let to the tenants now in possession, and the rents received by the defendant. The land was sold by Dr. Barton as Lot 117 and registered in the Consular Books—he should prove this by Mr. Solomon Sassoon—and nothing was said about measurement. Dr. Barton informed Mr. Sassoon D. Sassoon before leaving London, that he was coming out here to settle the matter; and after his arrival the contract was entered into on which he now sued the defendant, and by which the latter undertook to settle the affair with Dr. Barton. He signed it as principal, and said nothing about signing as agent. Mr. Sassoon had put up landmarks, showing he considered himself in possession of the property, and had left them standing until the previous day, with the mark of David Sassoon, Sons, and Co. on them. The reason why the contract was not fulfilled was as follows. A deed of sale had been prepared for signature, but objected to by Dr. Barton, because it specified a particular quantity of land. It was then, first, that Mr. Sol. Sassoon said he was only an agent, rescinded the contract he had entered into, and referred the matter back to his brother. He considered such conduct at least a gross instance of bad faith. However, whether the contract were rescinded or confirmed, it was urgent that it should be settled, and it was to hasten such a result that the matter was brought before the Court. There were two points to be considered—1st., whether the defendant were only an agent; 2nd, whether the contract were really entered into.

In his evidence Dr. Alfred Barton stated :—

"At the time of signing the contract, it was understood that the bond should be cancelled and the deed of sale executed. The bond has been cancelled. The deed of sale has not been executed, because the defendant would not allow the words 'more or less' to be inserted. The draft deed was submitted to my solicitor, who qualified the covenant by the insertion of these words. I said that 'more or less' must remain, and if it proved any smaller quantity they should still stand. I did not sell any actual quantity. I sold a plot of ground. One of the title deeds describes a part of the property as containing 10 mow 1 how; the other describes another part as 2 mow 7 fun. I don't know whether Mr. Solomon Sassoon's statement as to the quantity is right or wrong. I appointed Mr. Tootal my agent in Shanghai to conclude the matter. The sum of taels 1,000 was agreed on to settle a dispute of enchange, not on account of dispute about rents. There were disputes as to who should receive the rents. It was understood that he should pay £13,000, and that he should receive the rents. I do not know that the descriptions contained in the title deed are wrong. I went with Mr. Knevitt the surveyor and showed him the land. The agreement of 22nd December was so far carried out as to transfer the register. Mr. Sol. D. Sasoon's letter contains his objection. I am aware that he objects to take the property on the ground that it is less than is mentioned in the title-deeds. There has been a long correspondence. (Mr. Barton's letter replying to Mr. Sassoon's, accepting sale, produced.) I don't remember ever telling Mr. Sassoon that there were about 13 mow of land."

For the defence, Mr. Solomon David Sassoon testified :—

"I have acted as agent for Mr. Sassoon in London, in relation to the sale of Dr. Barton's property. My authority was by letter only. The original letters written by Mr. Sassoon D. Sassoon are in London. I was informed by my brother, through a Hebrew letter, that the property in question was 13 mow. I wrote to say I heard it measured about 10 mow; but he answered positively it was 13 mow—that I was mistaken. The date of his letter was August, 1862. I had not seen the title-deeds when I wrote. I did not consult a solicitor till December. That was when agreement of 20th December was drawn up. I had not seen the title-deeds on the 20th December. I got the deeds immediately after the agreement was drawn up from the Consulate. I wrote immediately afterwards to Mr. Sassoon in London. I believed the representation in the title-deed, that the property contained 13 mow. I got the impression as to its being 10 mow from the Land Renters' list. I did not know till I got the deeds how much was going to be transferred. It was after I got the title-deeds that I knew that there was a transfer of the 13 mow. But for the subsequent occasion which led me to get the property measured, I should have accepted the amount mentioned in the deeds as correct. Mr. Barton never told me that the descriptions in the deed were incorrect. On the 14th May I was anxious to have the matter closed, and the memorandum in question was drawn up. Nothing was mentioned in it about the bond or the deed, as drawn up by Mr. Barton's agent. I remember your telling me that I should have to be particular about the title-deed, as it might be questioned in London. The land proved about 4½ mow short. Acting as agent, I did not consider I could accept the quantity without consulting my principal. I have no letter from my brother which would justify me in accepting so short a quantity. The land measures 8m. 3f. I have been requested by him to be very particular. I have no personal interest in the matter. If I act beyond my instructions, I am liable for what I do; and for that reason I decline to accept a short quantity."

On the assembling of the court the following morning it was announced that it had been agreed to wait till an answer could be received from Mr. Sassoon David Sassoon in London, before taking any further proceedings. Mr. Lawrance said he was empowered by his client to accede to the arrangement, as a part of which Mr. Sassoon had agreed to pay Dr. Barton 4,000 taels on account of the rents he had collected. The case was accordingly adjourned for five months. On June 15th, however, the parties came again into court, unable to agree as to the form of receipt which should be used. The Court stated it was under the impression that the 4,000 taels were to be paid on account of rents. Counsel for the plaintiff contended that it was to be paid out of rents. After further discussion and evidence on the merits of the whole case, the Court decided that the defendant Solomon D. Sassoon had sufficient authority from his brother Sassoon D. Sassoon to enter into and complete the contract of the 14th May, 1863, for the purchase of the land in question; that the plaintiff did not give any warranty express or implied as to the actual area of the lots; that the plaintiff did not sell the lots "per mow" but in bulk, as a certain property with buildings thereon; that the defendant, by accepting the customary transfer of the property at the British Consulate so far back as the 28th July and 20th December, 1862, without any stipulation whatever as to the measurement; and by entering into the contract of the 14th May, 1863, by collecting the rents, renewing leases and exercising divers other acts of ownership, satisfied this Court that he, the defendant, bought the property, and the Court considers that the defendant is not justified in withholding the payment of the purchase money; and that the plaintiff had performed his part of the contract. Judgment was therefore given for the plaintiff with costs.

The grievance caused by the Chinese Taoutae being allowed to tax residents in the foreign settlement, has been amicably adjusted by the establishment of a co-operative plan of taxation, by which half of the sums collected goes to the Municipal Council for civic expenditure, and the other half to the Taoutae for military purposes.

A meeting of the pew-renters of Trinity Church was lately held at H.B.M.'s Consulate, when it was agreed to memorialise Lord Russell to appoint a suitable chaplain for Shanghai, to whom £800 a-year will be paid.

On the 15th of June a sad accident occurred, by which two captains lost their lives by falling overboard while wrestling in a good-humoured way. Their names will be found in our list of deaths. Another accident occurred by an explosion of gunpowder, in which Monsieur Juvet lost his life.

An action had been brought in the Consular Court, before J. Markham, Esq., the officiating Consul, and J. G. Flowerdew and F. Gamwell (assessors), by Mr. Lessler against Messrs. Moses and Co, to recover the sum of 1,575 tls., which the plaintiff alleged he had lost owing to the non-fulfilment by the defendants of an agreement to carry 1,000 piculs of rice to Ningpo on board the steamer *Argus*. The morning the *Argus* arrived the plaintiff had asked Messrs. Moses and Co. whether they would load 1,000 piculs of rice in her. The answer was positively in the affirmative, and a shipping order was given for that quantity. The order could not then be stamped at the Custom-house, as the inward cargo had not been received. The next morning plaintiff found the steamer loading in ballast, and complained. The answer was that there was not time to take the rice on board. He had lost the opportunity of chartering another ship, because he could not make up the full cargo by 1,000 piculs. On the part of Messrs. Moses and Son, it was argued that to enable Mr. Lessler to bring an action he must show that Moses and Co. had contracted to send his cargo by the *Argus*, at a particular time and on that particular trip. There was not the slighest ground to assume that this was the case. The Court decided that this shipping order must be looked upon as a contract between them. Plaintiff had failed to show loss, and the judgment would merely mark the sense of the Court of the breach of contract. Defendants to pay plaintiff the sum of two hundred taels, and the costs of the suit.

The following was the verdict come to by the jurors assembled at the United Estates Consulate to inquire into the cause of the death of the master of the *Emily Banning*, to which we referred in our last :—

An inquisition taken for the people of the United States, at the "International Hotel," in this Port of Shanghai, China, on the 24th of May, 1863, before me, George S. Porter, Deputy-Consul of the United States, in and for the said port, upon the view of the body of Captain John McKinnon, then and there lying dead upon the oaths of E. H. Brown, J. S. Dollim, Captain C. L. Abbott, Captain J. McKay, W. C. Clemons and James E. Wainwright, good and lawful men of the said port, who being duly sworn to inquire on the part of the people of the United States, into the circumstances attending the death of the said Captain John McKinnon, and by whom the same was produced, and in what manner, and when and where the said Captain John McKinnon came to his death, do say upon their oath, as aforesaid, that one J. D. Bulkly, of the port of Shanghai, on the 22nd day of May, 1863, at 7.30 o'clock or thereabouts, in the evening of that day, with force and arms, did at Shanghai, the port aforesaid, then and there feloniously and violently make an assault, in and upon the body of the aforesaid Captain John McKinnon, then and there present, and that the said J. D. Bulkly, then and there with a certain pistol, which he the said J. D. Bulkly, then and there held in his right hand, violently and feloniously inflicted a mortal wound in the abdomen, about four inches above to the right of the naval, the ball passing through his body and lodging on the right side of the spine near the surface of the said Capt. John McKinnon, of which said mortal wound the said Capt. John McKinnon, at the hour of 3.15 o'clock P.M., on the 23rd day of May, 1863, died, and so the said jurors do say that the said J. D. Bulkly did then and there feloniously mortally wound and murder the said Capt. John McKinnon, against peace of the people of this port. In witness whereof, as well as the said Deputy-Consul, as the jurors aforesaid have this inquisition, set their hands and seals on the day of the date of this inquisition as aforesaid—Geo. S. Porter, Deputy-Consul; J. S. Dollim, J. H. Brown, Wm. C. Clemons, J. McKay, C. L. Abbott, J. E. Wainwright."

It is not usual that the Chinese present flattering testimonials to foreigners, therefore when such an incident occurs it is worthy of record; not merely as a mark of good-will and esteem between the givers and the receiver, but as another indication of the "new order of things in China," inaugurated since the commencement of the reign T'ung C'hi. Mr. Chaloner Alabaster, interpreter to H. B. M.'s Consulate at Shanghai, having signified to the Chinese mandarins, and other native persons of note with whom his duties have brought him in contact, that he had obtained leave of absence, in consequence of ill-health to visit his native land, they, without his knowledge, got up a testimonial to him, which they presented on the eve of his departure by the last French mail steamer. The mode of conveying their sentiments on the occasion was thoroughly Chinese, and gives us foreigners another example of their peculiar customs. On the day appointed, five "grave and reverend seniors" came to Mr. Alabaster's residence, their servants carrying a large crimson satin canopy, such as are borne over the heads of mandarins, only this had triple folds hanging down and covered with a profusion of Chinese characters; four large ones in velvet, and upwards of 600 embroidered in gold thread. The translation of the former, with three rows of small ones on the upper part, signify that "the gentry and people of Shanghai and Soon-kiong, present this testimonial to Interpreter Alabaster with gratitude and affection, for his eminent services in the council and the field. Shanghai, June 15th, 1863." Then follows the name of the donors, upwards of 200 in number, tastefully sewn with gold thread. This singular testimonial was presented in due form by the bearers of it "kotowing" to the recipient; which was responded to by Mr. Alabaster thanking them in his choicest Chinese, at which all parties were much gratified.

Mr. Henry Jefferd Tarrant, Barrister of the Middle Temple, was, on the motion of the Attorney-General admitted to the bar of this colony.

CHIN-KIANG.

Chin-kiang (says the *North China Herald*) as one of the three open ports on the Yang-tse, rarely commands the attention which it deserves. Formerly, before the descent of the Taipings into this province, it was a great commercial emporium, with a population of half a million, and presenting a bustle and activity unequalled by any other trading mart on the "Great River." Its proximity to the entrances—north and south—of the imperial canal, situated midway between Peking and Hangchow; its commanding site as a place of defence in case of hostile invasion, and its position on the first narrow rocky reach as you ascend the mighty stream, rendered it the central key of the Chinese Empire towards the sea. Since these devastating insurrectionists have made their appearance, this once populous city has become almost deserted, and its fine temples and streets a mass of blackened ruins. The legitimate commerce of the place has dwindled down to a limited import trade with foreigners, and the export trade in produce has ceased. Notwithstanding these drawbacks, Lord Elgin, with commendable foresight, stipulated in the Treaty of Tien-tsin that Chin-kiang should form one of the open ports; and that a tract of land, adjoining the town, be set apart as the British concession. Accordingly, shortly after the river was opened a number of enterprising merchants proceeded to the port in order to establish themselves in business; the foreign inspectorate of customs sent up a staff of officials, with a commissioner, and a vice-consul in H.B.M.'s service was stationed there. As the country at that time was in a more unsettled state than it is at present from the incursions of the rebels at Nanking and Soochow, it was deemed prudent by various members of this foreign colony to take up their abode in ships afloat; with the exception of the British Consul, who fixed his quarters on Silver Island, some two or three miles below the city. At first, when the traffic up the river did not exceed one or two vessels a week, and there was scarcely any competition in trade, this state of affairs was not felt inconvenient. But as shipping and commerce increased, the delays, nay the dangers, experienced by shipmasters in being obliged to stop at Silver Island—where the river during the greater part of the year runs like a sluice, was felt by English merchants to be a crying evil, from which traders of other nations were exempt. So much is this the case, that one English firm of long standing and influence in Shanghai, have a steamer plying on the river under the American flag.

A melancholy accident has occurred by the upsetting of a boat near Silver Island, in which a man-of-war's man belonging to H.M. gunboat *Hardy* was lost, and the British Consul narrowly escaped from drowning. The accident has brought to a climax the necessity of removing the Consulate and the Custom-house from that island to the mainland at Chin-kiang. The foreign residents had taken this occasion to call a meeting and petition Sir Frederick Bruce on the subject of a transfer of location.

NINGPO.

The following letter is from a correspondent of the *Friend of China*:—

Digitized by Google

"There is a report here that the French are again going against the rebels, and are making grand preparations at Shauhing. But what place they intend to attack is a secret. The Footai is said to be trying all sorts of dodges to increase his revenue. The last was to put out placards warning the country people and merchants against selling their goods to foreigners! These placards are posted at Shauhing, Yeuyou, and on the other branch of the river, at Kungwha. It is evident that the French have an eye to this place, or part of this province. They do little or no trade here, but are never without a French Government vessel. The one here at present is the *Dorol dge* (formerly the *Duncan Hoyle*) a man-of-war. This craft came to relieve the *Tancrede*, which vessel left this last Monday. The French are building two large gunboats, and say they are going to build four. They have a regular dockyard just outside the South-gate of the city, where is also the residence of the French vice-consul, say about three miles from any place of business. This French consul styles himself, L. Verney, Vice-Consul de France, et Officier des Engineers.

"Consul Harvey may well be able to go home on sick leave and half-pay, if he only gets half the rent of the land and houses he owns down here. You can't walk 100 yards about the place but you see stones stuck up with F. P. cut on them, marking out Harvey's property, and also that of his boy.

"I never heard of so many vessels in Ningpo at any one time as there are at present. The place is crammed with them, and nearly all are foreigners—Danes, Germans, &c. So much for free-trade. They run all the English vessels off the coast. Steamers run every day from this to Shanghai, and *vice versa*."

SWATOW.

At Swatow the chief topic of interest continues to be the change of site for the Consulate. It is considered that the Consul's excuses for making the change are flimsy. Some remarks on the subject, as well as a letter from the Consular interpreter, are published in the *China Mail*.

HONG KONG.

The fortifications of Hong Kong are spoken slightingly of by the *China Mail*, which designates them as a few straggling earthwork batteries, calculated rather to alarm than to satisfy the minds of the timid, and we hear that a few Chinamen of substance are leaving the colony. The same thing happened during the Russian war, and it was some years until the absentees returned. As a naval and military depot, and the headquarters, in China, of both branches of the service, Hong Kong must always be garrisoned; but this important and wealthy colony is left to the protection of a few mud batteries.

Great improvements are taking place at Pokfoolum. Five permanent brickstone houses have been erected, one is a Japanese house, brought from the country of the Rising Sun, piecemeal, and put together here. Verdure is taking the place of barrenness; flowers, shrubs, and trees were being freely planted by the settlers, and groves of bamboos had also been laid out.

The clock-tower is a total failure as regards the site, except as viewed from the harbour. Still, it is found a great convenience, and a public appeal had been made to discharge the debt upon it.

The *Verbena* reports having been attacked by pirates outside Green Island. A suspicious-looking junk hove in sight astern of the ship, fired a gun across the vessel's stern; afterwards worked her way to windward, got in-shore off the land so as we could not see her. She fired several shots at the ship; we returned two or three shots from our large guns, and several musket shots. After the shots were fired, she lowered a boat with the intention of coming on aboard; several passengers could speak the Chinese language; the Captain told them to hail the boat, that if they should approach nearer the vessel, he should fire at them, so they returned to their junk. From the report of the junk's guns, they must have been heavy metal.

The Chamber of Commerce has published a report of its progress during the past year. The number of members is now down to forty-six; but as that number comprises all the best names in the colony, and as Mr. Lay's charges against the foreign mercantile body are to be dealt with immediately, the Chamber is likely to make its existence felt during the next twelve months.

CANTON.

Three French soldiers were captured by the Chinese in the western suburbs of Canton in the act of robbing a silversmith's shop, and it was only after a desperate resistance that they were seized and handed over to the authorities, who sent them to the French Consul.

Considerable alarm among the European residents at Honam has also been excited by the appearance of another burglar, bent, apparently, on emulating the feats of the "spring-heeled Jack" who committed so many adroit robberies there about a year ago.

The trade is thus noticed in the *China Mail*:—To commence with the summary of duties received, we are enabled to place in juxtaposition the totals reported during the years beginning with the last twelvemonth under the old system, which show unmistakably the progressive decline of the trade:—

	1860.	1861.	1862.
Duty receipts, ...	Taels 1,496,293	1,230,296	1,089 308

A difference of 400,000 taels between the years 1860 and 1862 shows a sad falling off in the revenue, and probably represents with tolerable fairness the relative condition of trade, though we have been given to understand that an amount of control formerly exercised by the Foreign Inspectorate over the foreign trade in native boats has of late passed into the hands of the native customs, so that the total amount of 1862 probably excludes certain receipts for duty which might legitimately have been credited to the revenue from foreign trade. Although, however, the amount of duty receipts is perhaps the most substantial form in which the movement of commerce can be exhibited, there still remains a tangible mode of representation, in the estimated value of the import and export trade. This we find represented as follows:—

	1861.	1862.
Total Export	$15.811,512	$17,742,590
Total Import	12,977,358	10,580,928

These figures, which are of course an approximation only to the truth, are arrived at by computing at an average price the total amounts which have been imported and exported of each description of merchandise. The detailed list from which these totals are taken—and which is suggestive of enormous labour in the compilation—affords some curious facts. Here, as everywhere else (it will be a satisfaction to our Federal readers to perceive), the American war has produced its mark. We find that, during 1861, the staple by far the most largely imported, was Bombay cotton, which figures in the return for that year to the enormous value of $3,105,917. In the first half of 1862, only $481,617 worth was imported, and after the 30th June, not an ounce seems to have found its way into port. During the six months ending 31st December, 1862, we only find foreign (Japan) Cotton to the value of $4,216 imported, but native cotton has been brought in from the coast to the value of $631,520.

With regard to opium, the year 1862 appears to exhibit a vast increase in the amount passed through the Customs—the result probably of the active measures adopted by the Chinese last year for maintaining a surveillance over the native trade. Thus we find that whilst in 1861 the gross value of opium imported is computed at $933,412, the value in 1862 is placed as high as $2,663,005. Still it would be difficult to determine how large a proportion of this increase is attributable solely to a difference in the average price.

Of Tea, we find there were exported in 1861, 39,474,859 lbs., of which upwards of 31,000,000 lbs. were for Great Britain; and in 1862, 32,894,031 lbs. The values are respectively computed at $9,829,028, and $8,066,485.

MACAO.

From Macao we learn that the new Governor (Amaral), who arrived from Lisbon a few days ago as successor to Governor Guimarens, was received with great rejoicings.

THE PHILIPPINES.

MANILA.

Dates from Manila are to the 24th June. The following letter is from a correspondent of the *China Mail*:—

"People here have not got over the panic caused by the earthquake; the destruction of life and property, especially the latter, has been terrible. I should estimate it at the very lowest at six millions of dollars. No statistics have been published of the killed and hurt—that is, no general ones—and those referring to particular places are very incorrect, and do not give anything like the real number. I should say that the killed cannot be less than 1,000, and the hurt 500 or 600. Some people estimate the former at 5,000 or 6,000, but this I think is not likely to be correct. The only foreigner killed was a Prussian engineer, who would go into the street, and was immediately crushed by the falling tiles and stones. In such cases, if you are living in a stone-house at Manila, you should always take refuge in the Zaguan or Porte Cochere, which is usually built with strong pillars and arches, and is the safest place in the house. The aspect of Manila now is exceedingly *triste*, and she will not recover her prestine splendour for fifty or a hundred years to come. Mr. Higgin has resigned the post of Acting Vice-Consul at Iloilo."

Notwithstanding the disturbance and confusion caused by the earthquake of the 3rd, the principal articles of export not only maintain their prices, but some have advanced. Hemp has been fixed at $4.3-8ths the picul, and sugar has not gone down. The want of warehouses and vessels will greatly con-

Digitized by Google

tribute towards prices not corresponding proportionally to those of the markets of Europe and China.

The following is an extract of a private letter on the late distressing earthquake:—

"Shortly after seven o'clock p.m., while at my desk writing, I was abruptly startled by my wife running into my room with the intelligence that a broad and vivid flame had shot up from the earth, nearly encircling the city. I rushed out; but had scarcely reached the door-step when I became sensible of a slight trembling of the earth, and then a terrific vibration, as of thousands of cannon being discharged together. Before I had time to secure my papers, &c., the noise grew louder—the earth quaked; and then—how shall I describe it? houses fell in every direction, churches with tapering spires and beautiful architecture trembled, tottered, and fell; public edifices, mansions, and houses crumbled to a mass of ruins. All of this once beautiful city—the work of years—was annihilated in less than five minutes! Among the ruins is my own house. Thank God I saved my wife! Over the whole arose a dense cloud of dust, fillling the eyes and nostrils of the terrified survivors, whose cries of terror as they ran from street to street were heartrending. A most unpleasant and suffocating smell of sulphur pervaded the amosphere preceding and during the earthquake. After placing my wife in the Church of San Augustine (the only church that escaped destruction, and in which hundreds of fugitives took refuge). I sallied forth to ascertain, if possible, the number of human lives sacrificed. In the first street I visited there had once stood a most elaborately-built mansion, and it appeared the owner of which, at the moment of the earthquake, was entertaining a number of guests, as I saw several females in holiday attire wringing their hands and crying in despair for some lost relative or dear one. Costly furniture, books, plate, and valuables of every description were scattered around, damaged or broken. Low and piteous moans met my ears at every step. Numbers were flying towards the beach, in the hope of escaping by water from the horrors of the scene. Even the shipping, I am told, was heaved up during the earthquake, and the shore has sunk several feet, so altering the appearance of many places that they are almost unrecognisable. After considerable difficulty I managed to pick my way to one of the principal temples, where I knew, at the fatal moment, vespers were being performed—it was a mass of ruins; appalling were the groans proceeding from beneath the heaps of rubbish; here and there could be seen the end of a priest's garment, a mutilated face, or a dead infant. From reliable information, I believe there are about eight or nine hundred killed and some thousands wounded and maimed. The Governor-General, assisted by the Archbishop of Manila, have been indefatigable in assisting the needy, but God only knows when the wounded will be extricated and the dead buried; all is confusion; business entirely at a standstill. Temporary habitations are being erected for the homeless."

JAVA.

BATAVIA.

Batavia papers are to the 26th June.

The import and export duties collected in Java during the first quarter of 1863, are 27 per cent. less in amount than in the corresponding quarter in 1862.

The American whaler *Newark*, Captain Smith, was wrecked on the 24th April, at Sandalwood Island. The crew, nineteen in number, were saved and had arrived at Sourabaya. Seven other vessels were lost on the same Island in a violent gale, and the natives would appear to have behaved very badly, plundering the wrecks and burning them to get the iron and copper work.

Numerous shocks of earthquake, some of them of rather a smart kind, were felt on the west coast of Sumatra during the months of April and May last.

The Samarang papers state that seven vessels lying at Sandalwood Island had been driven on shore in a severe storm on the 9th May and destroyed. Part of the shipwrecked crews had arrived at Sourabaya.

Captain Ballard, of the English ship *Leven*, from the Cocos Islands, reports that on the 15th May that quarter was visited by a devastating hurricane. The largest of the islands, which yielded 90,000 cocoanuts per week, was completely destroyed and on the next to it there were only 40 trees left standing. The houses did not suffer much damage. The brig *Harriet*, which lay at anchor within the reefs, broke her chain and was driven on shore but without sustaining much damage. According to a report of the natives they observed after the hurricane a ship in a crippled state drifting at a distance; flag unknown.

THE RELAPSE OF TRADE IN JAVA.

The temporary suspension of a large house in Batavia was mentioned in our last. The following extract from a Batavian paper throws some light on the cause:—

"If we should judge of the journey of the Governor-General in the Western Provinces of Java by the reports given in the *Official Gazette*, or *Java Courant*, that voyage can have produced nothing of much interest to the public. Reports received from all parts of the country made us look to the future with great anxiety. Within the past few days attention has been entirely engrossed by the difficulties that have obliged one of the greatest and most respected houses in the commercial world to resort to measures of self-preservation. Seldom has any similar event met with so much sympathy, and the firm enjoyed the general confidence to such an extent that the delay of payment for which they had petitioned the Court was not only granted by the unanimous consent of the creditors, but even at their urgent solicitation. Rumours of war have also had an adverse influence, as the insurers have opposed the departure of ships for Japan—a measure of prudence fully justified by the last reports from our Consul-General. It seems, moreover, that the whole of our commercial community has obtained or taken a delay, if not for payment, at least not for carrying on any trade. No business whatever is done. It has been calculated that during the first five months of this year not half the usual number of stamps for commercial documents have been taken out. Many hundreds of chests of piece goods that had already paid the import duty are sent to British India, where they find most willing purchasers. And yet the Bank of Java hold obstinately to a discount of 9 per cent., in consequence of which their specie and emission, though allowed by their charter to be 8,400,000fl. or £700,000, are already reduced to 4,500,000fl., or £375,000. Some attribute this stubbornness, equally prejudicial to the trade and the shareholders, to the resentment of the directors, who cannot prevail on the shareholders to adopt their ill-concocted plans, and have therefore, as it is asserted, applied to the Government, so that these authorities may be induced to decree measures totally at variance with the charter and the rights thereby secured to the shareholders. It is, however, generally expected that the Government will not approve their course, and that the imbroglio will end in the resignation of the entire body and the accession of a new set of directors. If they persist in obstructing trade and industry, and if the authorities in Holland continue to put impediments in the way of the Governor-General, we shall soon see a difference between the progress of British India and the Dutch East Indies as great as the difference between the modes in which the local gains of revenue are treated here and there. Here they are remitted to Holland, for the construction of roads and the gratification of some speculators in public funds; there they are made use of to extend the railways of British India by a guarantee of interest, and to reduce continually the import duties on cotton goods, yarns, &c., and increase the consumption."

MALACCA STRAITS.

SINGAPORE.

A frightful case of amok occurred on the morning of the 1st July, in Shaik Madarsah Lane, Campong Glam. A Javanese sailor, for what cause we have not yet heard, ran amok, cutting a woman nearly to pieces, and inflicting wounds more or less severe on other three persons. He then set fire to the house in which this took place, and brandishing a kris in one hand and a large knife in the other, defied all attempts to capture him. Inspector Cox having arrived on the spot, repeatedly called upon the murderer to surrender, but he refused and attempted to break through the partition into the neighbouring house. Inspector Cox then fired at him through the Venetians, intending to disable him, but the ball went through the heart.

Complaints continue to be made of the inconvenience caused to the public from there being only one person at the stamp office authorised to issue stamps. When sickness or engagements elsewhere cause the absence of the collector, there is no one else to give out stamps, and applicants, however urgent their need for stamps may be, must wait for the return of the collector to his office, whether the delay be only of hours or days.

Her Majesty's steamer *Osprey*, Captain Tunes, from the Cape the 28th May last, arrived here on the night of the 5th of July, and sailed for Hong Kong.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BORRADAILE—On the 9th inst., at the residence of her father, the wife of T. S. Borradaile, Esq., of Hong Kong, of a daughter.

BOOKER—On the 9th inst., at the parish of Edmonton, the wife of Fred. Booker, Esq., of a son.

COPLAND—On the 9th inst., at 3, Bedford-terrace, Clapham-rise, the wife of P. Copland, Esq., of a daughter.

GODDARD—On the 28th ult., at 7, Victoria-road, Clapham-common, the wife of Mr. James Goddard, jun., of a son.

LESSLER—On 1st June, at Bangkok, Siam, the wife of Paul Lessler, Esq., of a daughter.

LEVESON—On 4th June, at Singapore, the wife of E. J. Leveson, Esq., of a son.

MONTIGNY—On the 6th inst., at 32, Pembridge-square, Bayswater, the wife of Rémi de Montigny, Esq., of twin daughters.

TURNER—On the 29th May, the wife of the Rev. S. W. Turner, Consular Chaplain, Amoy, China, of a daughter.

WILLS—On the 6th June, at Shanghai, the wife of J. H. Wills, master of the ship Kingsan, of a son.

MARRIAGES.

BARNEY—DENNISON.—On the 4th inst., at the English Episcopal Chapel, Dunoon, H. G N. Barney, R.N., to Mary, sixth daughter of the late William Dennison, Esq., Knight of the Netherlands Lion, of Sindang Lael, Java. No cards.

BELL—BEECH.—On the 29th inst., at Richmond, Mr. Lawrence R. Bell, of Leith, to Emma Isabel Turner, eldest daughter of Mr. Thomas Beech, late of Manilla. No cards sent.

FITTOCK—WILKINS.—On the 4th inst., at St. James's, Hatcham, by the Rev. H. C. Seller, B.A., James Fittock, Esq., H.M.'s Civil Service, youngest son of Captain J. R. Fittock, R.N., to Marion Lavinia Emma Wilkins, elder daughter of the late J. W. Wilkins, Esq., R.N. No cards

RENAUT—RICHES.—On the 1st inst., at St. Ann's, Limehouse, by the Rev. E. R. Jones, Chas. H. Renaut, of Limehouse, to Anne Jane, eldest daughter of the late Capt. James J. Riches, ship Imaum of Muscat, who died in Hong Kong. No cards.

SARGENT—TREDWELL.—On the 28th ult., at St. Luke's, Lower Norwood, Surrey, by the Rev. Wodehouse Raven, M.A., incumbent of Christ's Church, Streatham, John Sargent, C.B., Knight of the Legion of Honour, Lt.-Colonel of The Buffs, formerly stationed at Hong Kong, to Alice Mary, second daughter of the late Thomas Tredwell, Esq., of St. John's Lodge, Lower Norwood. No cards.

DEATHS.

CRAMER—On the 8th inst., at 10, Stockwell Villas, Stockwell, Sarah Ann, the beloved wife of Mr. F. A. Cramer.

DUDDELL—On the 17th June, at Macao, the infant son of Henry Duddell.

EVANS—COUTTS—DURAND—In the interior, about the 10th June, Daniel Evans, Henry Coutts, and Jeanne Durand, mariners, supposed to have been murdered by their native subordinates in a silk boat.

GREEN—On the 14th inst., at the residence of his brother-in-law John Dennis, Esq., Hill-side, Streatham, William Henry Green, Esq., of the firm of Messrs. Gilman and Co., China, aged 34 years.

JUVET—On the 15th June, at Shanghai, from the explosion of gunpowder, F. Louis Juvet, watchmaker.

LAKER—On the 23rd June, at Hong Kong, of fever, Charles Laker, master of the British ship Granville aged 42.

LUBECK—On the 14th June, at Macao, Ludwig August Lubeck, a native of Sweden.

MCLEOD—On the 14th Feb. killed before the walls of Taitsan, while gallantly leading his men to an assault of the breach, Captain William Duncan McLeod, aged 27, of the Chinese Contingent, youngest son of the late William McLeod, Esq.

MOUAT—On the 15th June, drowned, at Shanghai, — Mouat, master of the British ship Raphael

SMITH—On the 15th June, John B. Smith, of the Shanghai Pilot Company, a native of Aberdeen, aged 30.

WILLIAMSON—On the 15th June, drowned, at Shanghai, — Williamson, master of the British barque New York.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—Canton: The market has been cleared of the few chops which remained of last season's Congous at previous rates, the refined chop of the previous season being also taken at a low figure. The arrival of new Congous is still delayed, probably owing to the favourable terms which the holders can make in the Hankow market, and it is now said that even the Oonahms will not be down for ten days or a fortnight. A few small musters are upon the market. In Scented Teas the purchases have been principally of Capers, without material alteration in rates. Of Canton Greens a moderate business has been done at prices previously current. The stock on the market is stated as follows:—Congous, country Teas, none; Tayshaans, about 1,000 half chests; Canton, packed, 3,000 ditto; Oolongs, 3,500 half-chests; Scented Teas, 30,000 boxes Caper and 20,000 boxes Or. Pekoe; Canton Greens, uncertain.

SHANGHAI.—Black: New season's Teas have come forward freely during the whole of the fortnight, and a considerable portion of the Hankow purchases have been offered on this market; there has generally been little disposition shown to purchase, and most of the settlements reported below were made to fulfil freight engagements, and assist in the dispatch of the first ship. We quote good to fine Oopack, Tls. 38 to 42½; finest Oonahms, Tls. 38 to 40. Settlements during the fortnight, 4,308 chests. Reshipments on owners' account, 18,978 chests. Stock 10,000 chests. Green: All arrivals from Kewkiang have been readily placed at previous rates, and a fair amount of business has been done during the fortnight. New crop country Teas are not expected at Kewkiang before August, but the Hoochow leaf will come forward next month. Settlements and reshipments during the fortnight 2,500 half chests. Stock, 3,000 half-chests Country Tea; 3,000 half-chests Japan Shanghai, packed; 500 half-chests Hoochows.

FOO-CHOW.—There has been a steady business transacted in Congous during the fortnight, prices of all sorts having been firmly maintained. At one period (owing to the inclemency of the weather retarding supplies on the way to market) rates were so firm as to be almost deducible to an advance of one tael. The weather moderating the supplies came forward, and market rates continued as before. Souchongs have been eagerly settled up to 55 taels, one favourite chop fetching the extreme rate of 63 to 65 taels. The settlements of the fortnight are reported as under:—Congous, 19,500 chests, 24,200 half do., and 800 boxes at 6½ to 17 taels for ordinary and broken; 16½ to 23 taels for good common to flavoury; 23 to 29 taels for Souchong kinds to middling Kysows; 29½ to 37 taels for fine, and 39½ taels for finest. Flowery Pekoe.—200 chests at 26 taels for good Paklum. Oolong.—5,200 hf.chs. and 400 boxes at 26 to 26 taels for fair cargo to superior. Scented Teas:—2,700 boxes at 27 taels for fair. The stock on the market is thus reported. Congous.—13,500 chests (say 3,000 ordinary, 7,000 good common to flavoury.—3,500 good flavoury to fine (finest none). Souchongs.—12,300 chests. Flowery Pekoe 400 ditto. Oolong 1,700 hf. ch. and Scented Teas 2,500 boxes. The supplies of the new season's Congous to date amount to 144,800 chests against 134,600 ditto same period last season.

AMOY.—Buyers of Congou had been very eager to secure the best chops and high prices were being paid. Settlements amounted to 6,300 half-chests at $22 to $32 for ordinary to good flavoury. Plain Orange Pekoes were not attracting much attention; the settlements reported amounted to 500 hf.-ch. and 700 boxes at $15 to $19. Oolongs had commenced to arrive but no business had been done in them. The late advices state that the quality of the new crop is superior to that of last season.

KEWKIANG.—Green Teas: The settlements of the fortnight on foreign account exceed 2,500 half-chests com. to mid. Fychow at 24 to 26 taels. In addition to these the Shansi dealers have entered the market and purchased for shipment North. These men are said to be making purchases in the tea districts. The stock on the market is reduced to 500 packages refuse. The coming crop is stated to be short and the cost of course high. Black Teas: Of the new Congous five chops of contract teas have arrived (Oopack and Ningchow). One chop Oopack is offered at 35 taels. It seems probable that a proportion of the new Congous will be bought for the Russian market. The total shipments of tea during the season just over, amounted to 56,500 chests black, and 276,900 half-chests green. The intelligence as to the Taipings in the tea districts is very unfavourable.

HANKOW.—The tea market on the 29th ult. stood at 34 to 35 taels on the best Oopacks. A few days subsequent intelligence was received of the reduction of duty in London, when a little excitement was manifested and an advance established of 2 to 3 taels. Of the new Congous between 120 to 130 chops have arrived, about 30 of which were contract teas; about 70 chops have been settled at from 34 to 38½ taels, 3 chops ranging from 30 to 33 taels. The stock remaining on the market is a little over 20 chops. The quality of the fine Oopacks is pronounced superior to the produce of last season. Really fine teas appear, however, to be scarcer than then. The stock on the market, and the musters of the teas coming forward, exhibit a decided inferiority, and the probability is that little business will be done until the ideas of holders become rectified. The Challenger loaded at Hankow with Congous, and left Woosung on 13th June for London. The steamer Annette has also left. The Silver Eagle with troops took her lower hold full and sailed on the 16th.

RAW SILK.—SHANGHAI.—Considerable arrivals of new silk have taken places the bulk has however been brought down under contract, the first of which were shipped by the French mail steamer of the 17th ult. The prices paid in the interior are reported extremely high, and in consequence those asked here are beyond the ideas of buyers, so that the market has not yet opened. The new silk is decidedly inferior to last season, and the yield of the first crop is reported short. Their supplies have come forward from Japan, estimated at about 1,600 bales, principally inferior silks. The sales of the fortnight are estimated at about 2,000 bales, against the like amount at corresponding fortnight of last season, and 1,900 bales the season before. The stock on the market is stated at 5,000 bales, against 4,000 bales same time last season, and 3,000 the season before.

KANAGAWA.—We believe the season now affects the supply of this article—the old crop being almost exhausted and the new crop not yet quite ready for the market. We have been informed that the producers of this staple are very sanguine as to the superiority of this year's crops, both in quality and quantity; and, other circumstances favouring, a large business is anticipated. The best foreign judges, who have seen the new samples, speak well of them. Current quotations are Ida, best and medium, none; inferior, $400 to 440 per picul. Mibashi or Sinchiu, best, 530 to 540; medium, 500 to 520; inferior, 480 to 400. Sodai and Coshia, none. Oshio, best, 510 to 530; medium, 460 to 490, inferior, 400 to 440. Adsudjee, 365 to 375. Taysaam sorts 440.

DRUGS, &c.—Canton: Cassia Lignea, settlements 1,250 piculs at $15.25 to $15.75, stock 1,500 piculs. Cassia Oil, no supplies have come forward. Cassia Buds, 30 piculs have been taken at $48. stock 25 piculs. Rhubarb, still no supplies. China Root, no settlements reported, stock 250 piculs, quotations $3.75 to $4.25. Galangal, no settlements stock 300 piculs, quotation $4 to $4.25. Galls, no sales.

CHINA IMPORTS.

HONG KONG.

COTTON YARN has been in fair demand during the fortnight, and holders have succeeded in establishing an advance of fully $3 to $6 per picul upon the quotations then given. The actual sales are estimated at 362 bales in Hong Kong, 100 of which have been purchased by foreigners. In Canton, where the value has also advanced somewhat, transactions are put at 180 bales.

GREY SHIRTINGS have met with active inquiry at the hands of the Chinese dealers, while a moderate amount of business has also been done upon foreign account, at prices which, as in the case of Yarn, show a satisfactory improvement as compared with previous quotations. The sales are put at 23,000 pieces to Chinese, and 14,250 pieces to foreign buyers. At Canton the sales are limited to 1,750 pieces, rates remaining much as before.

WHITE SHIRTINGS receded nominally in value early in the fortnight, but to-day's quotations show an advance upon those previously given. The business done in these fabrics in Hong Kong has been but of little moment, being limited to about 1,800 pieces, and stocks are greatly reduced. A slight inquiry, for the purpose of exporting these goods to Shanghai, has arisen during the last two days, but holders are not desirous of quitting their stocks at present rates.

T-CLOTHS have likewise been in fair demand amongst the native dealers in this colony, and have been taken to the extent of 15,450 pieces at an advance in value of 10 to 15 cents. In Canton these goods are quoted 20 cents higher, but there are not any transactions reported from thence.

AMERICAN DRILLS.—A sale of 550 pieces is reported at about previous rates.

WHITE SPOTTED SHIRTINGS, DYED DO., BROCADES, WHITE AND COLOURED.—The only transactions reported in these goods, which (with the exception of Coloured Brocades) remain at about their previous value, is a sale of 750 pieces Coloured Brocades, taken at some advance. 960 pieces of these goods have also found buyers in Canton.

CHINTZES AND HANDKERCHIEFS.—A small sale of 500 pieces of the former at $3.30 is reported. In Handkerchiefs there have been no transactions.

RAW COTTON.—A further advance on the quotations given in last report is observable in the value of this staple, and the business transacted has been upon a fair scale, amounting to about 14,000 bales, equally divided between foreign and native purchasers. In Canton, the sales of the fortnight are limited to 1,420 bales.

WOOLS.—Spanish Stripes, Medium Cloths, Ladies and Habit Cloths.—The value of these goods remains without material alteration to notice, the sales in Hong Kong during the fortnight being limited to 352 pieces of the first mentioned. In Canton all goods of woollen manufacture remain uninquired for.

LONG ELLS.—180 pieces sold in Hong Kong at some decline in price as compared with last quotations, constitute the business of the fortnight.

CAMLETS have also given way in price, and have met with purchasers in this colony to the extent of 520 pieces.

LASTINGS remain without inquiry here; but in Canton 200 pieces have been sold at about previous rates.

BLANKETS.—No sales reported.

METALS.—Iron, flat, &c., have been in but moderate request in Hong Kong, and the value of all kinds, with the exception of hoop and wire (which show some improvement) remain in much the same position as at the date of last report. The sales of the fortnight are estimated at 1,400 piculs of nail rod, 1,800 of hoop, and 20 kegs of wire.

LEAD has declined about 10 cents in the colony, and about 5 cents in Canton, the sales at each port being estimated at 250 and 2,000 piculs respectively.

TIN.—1,750 slabs have been purchased, and the value of the article shows a slight advance.

TIN PLATES.—300 boxes have been purchased in Hong Kong.

Lady Agnes Duff, Singapore to London; 22nd, Ystroom, Singapore to Liverpool.

FREIGHTS AND CHARTERS.

SHANGHAI.

Excepting a few first-class clipper ships to load new teas for London, little employment is offering. The rates of freight for tea varying from £4 to £6, according to class of vessel. Cotton is scarce, a few vessels only loading; rates £4. 4s. per ton. For New York there is no vessel on the berth. Coast rates are very low; to load at New-chwang for South, 33c. to 35c. is given. Cotton for Hong Kong is freely taken at 40c.

HONG KONG.

The following are some of the settlements of the fortnight:—England.—Eliza Stuart (British barque) 494 tons, for Liverpool at £4. 10s.; Invincible (British ship) 657 tons, for Liverpool, at £4; John Masterman (British ship) 608 tons, hence to Singapore, to load there, at £3. 10s.; Northfleet (British ship) 876 tons, for London, at £4. 10s.; Emma Mathilde, 381 tons, to land at Foo-Chow-Foo; Melbourne, £5. 7s. 6d. E. T. L. (Ch. barque) 299 tons, loads at Manila for Australia, at £4. 7s. current rates to Shanghai, 26 to 30 cents; to Ningpo, 30 to 32 cent per picul; to Nagasaki, $7 to $8.

MANILA.

Tonnage is but little inquired after. The only settlement is the Maritana for Liverpool at the following rates: £3 12s. 6d. per ton for clayed; £4 for unclayed Sugar, and £4. 10s. to £4. 15s. for Hemp.

SINGAPORE.

The Avalanche (692), from Penang to London, £2. 15s. per ton; £3. 15s. sugar, £4. 15s. light goods, and 4½ per gal. for rum less 5 per cent. Gawerly, Chludon (Russ. 1,026 tons) to London, £2. 15s.; tin, £3; gambier and dead weight, £4. 5s.; light freight. Rates of freight.—Tin, £3. 5s.; sago in boxes, £4; sago flour, £4; gambier in bales, £3. 5s. per ton; sugar, £4, twenty cwt. per ton; black pepper, per ton, £4; hides and horns, £4, and six cwt. per ton; coffee, £4 per ton of eighteen cwt.; measurement goods of fifty cubic feet, £4. 10s. per ton.

CASUALTIES.

JAPAN.

The American ship Viking was wrecked on the 4th June, on Prince's Island, near Simoda. The following account of the disaster is from the *Japan Commercial News*:—"The Viking, an American ship of 1,349 tons, Capt. Townsend, sailed from Hong Kong, May 17, with Chinese emigrants bound for San Francisco. On the 4th instant, at about 1.15 o'clock A.M., the vessel went ashore on the N.W. side of Prince's Island—one of the Japanese group off Simoda—having been driven there by adverse wind and strong currents. The captain and crew did everything in their power to get the vessel off; she would not move, however, and the water gained so fast on the pumps that the lower hold soon filled, and it was found necessary to land the passengers. This was easily done, the shore being very near, and when the captain was starting in his long-boat for Simoda, which was about sixty miles distant, one-half of the passengers were landed. The Chinese passengers number upwards of four hundred. The captain left the vessel about 1 P.M., and arrived in Simoda the next afternoon. The Japanese officials treated him very kindly, and provided him with a boat to come to Kanagawa, where he arrived on last Sunday afternoon. He got severely hurt on board the ship, and had to be carried from the

Digitized by Google

boat to the United States Consulate after his arrival in the boat from Simoda. The United States steamer Wyoming, with Col. Fisher, the United States Consul, and some Japanese officials and others, started for the wreck early on Monday morning. Preparations are being made for forwarding the passengers and for stripping the ship, &c. Captain Townsend states that the centre passage had been characterised by light adverse winds, calms, much rain, and currents variable in strength and direction, and his chart has proved to be very incorrect. We must await the return of the Wyoming for further particulars." We have heard by private note that all the passengers were landed in safety.

SHANGHAI.

The Bremen barque *Amalia* was lost on the Loochoos on her way from Hong Kong to Shanghai. Crew and passengers saved.

The *Carnatic*, from Calcutta to Shanghai, was lost on the Saddles, on 2nd June.

COMMERCIAL POSTSCRIPT.

CITY, SATURDAY AFTERNOON.

ARRIVALS NOT INCLUDED IN TABLES.—Aug. 8, at Deal from Singapore, Violet; 7, at Falmouth from Rangoon, Constance; from Maulmain, Edwin; 8, from Sourabaya, Kalimaas; 7, Falmouth from Singapore, Bonita; 5, at Bremen from Rangoon, Von Berg; from Akyab, St. Helena; 6, at Texel from Batavia, Zeenymph, Harold; July 2 5, at Cadiz from Manila, Gertrudis; 10, at Deal, from Colombo, Mary Scott, Avery, Hotspur; 9, at Falmouth, from Akyab, Bristolian, Susan Fearing, Valkyrien, Potomac; from Bassein, Rival, Allegonda, Jacoba, James Jardine; from Rangoon, Hedwig; from Singapore, Jupiter; at Liverpool, from Akyab, Robert Ritson; 10, at London from Galle and Colombo, Belvidere; July 12, at Havana, from Macao, Mercedes; 25, at New York from Manila, Franklin; Aug. 10, at Falmouth from Rangoon, Landwursten; from Bassein, Sourabaya, off Falmouth, from Akyab, Gumtje and Marie; off Queenstown, from Akyab, Fop Smit. At London from Bankok, Lizzie and Kate; off the Wight from Batavia, Padang Packet; 8, from Banjoewangie, Twee Gezusters; off the Lizard, from Batavia, Wilhelmina; 6, at Texel, from Banjoewangie, Macassar; at Brouwershaven, from Banjoewangie, Diana; 9, as Brouwershaven from Padang, Billiton; 11, at Queenstown from Manila, Mary Fry; from Akyab, Rex; 7, at St. Nazaire from Manila, Anne de Bretagne; 11, at London from Colombo, Akbar; 12, at Deal, from Colombo, Devondale; 9, off the Owers, from Macao, Albis; 10, off Weymouth, from Batavia, Travancore; at Marseilles, from Alexandria, Peluse, str.; 12, at London, from Colombo, Ann Jenkins; 12, at Deal, from Colombo, Leila; off Portland, from Sourabaya, Ludwig; off Queenstown, from Akyab, Annie Sise; at London, from Galle and Cochin, Shallett; 13, at London, from Colombo, Greenwich; 9, off [illegible] Head from Sourabaya, Triton; 11, at Texel, from Banjoewangie, Senior; at Helvoet, from Macassar, Wilhelmina, July 29, at New York, from Colombo, John Robinson; 12, off Beachy Head, from Shanghai, Martaban; 11, off Plymouth, from Akyab, Catherine Jacoba Henriette; 12, at Texel, from Macassar, Elizabeth Jacoba; 14, at Queenstown, from Maulmain, Derwent, Lady Douglas; at Falmouth, from Bassein, Amos Lawrence; 15, at Deal, from Singapore, Isabella.

DEPARTURES.—Aug. 8, from London for Shanghai, Dunkeld; for Cardiff and Ceylon, Ardencraig; 6, from off the North Foreland for Batavia, Maria Anna; from Sunderland for Shanghai, Osborne House; 8, from Deal for Batavia, Albrecht Beyling; 7, from Cardiff for Singapore, Passing Cloud; for Galle, Ellora; 6, from off Falmouth for Singapore, Mary Goddard; 8, Zwerver; from off the Lizard for Batavia, Hendrina; 9, from Shields for Singapore, Maude; for Galle, Thomas Dryden; 12, from London for Hong Kong and Canton, Patrician; for Cardiff and Singapore, E. A. Hall; 11, from Cardiff for Galle, Ephrem; 13, from London for Singapore and Penang, Frederica; for Cardiff and Singapore, Augusta Norwood; from Cardiff for Shanghai, Oscar; 13, from Swansea for Singapore, Verena Collet; 15, from Liverpool for Galle, Aquator; for Shanghai, Blackburn.

SPOKEN.—Fort William, Liverpool to Shanghai, steering W.S.W., July 31, 50 N., 13 W.; Ridderkirk, Rotterdam to Batavia, June 14, 2 N., 24 W.; George (Brem. schnr.), Bremen to Hong Kong, June 18, 26 S, 31 W.; Lexington, Colombo to London, July 29, 42 N., 30 W.; Era (?), China to Liverpool, May 19, 29 S., 39 E.; Almonde, Surie, Amsterdam to Batavia, June 20, 5 S., 24 W.; an English barq., showing 3rd d.p., No. 9,128, Cardiff to Shanghai, 3 days out, Aug. 4, 49 N., 8 W.; Isabella (Bremen barque), Singapore to London, July 5, 4 N., 26 W.; Wilhelmina Catharina (Dutch brig), Macassar to Rotterdam, July 31, 41 N., 28 W.; Catharina (barque), of and from Hamburg for Singapore, July 9, 9 N, 26 W.; Vorsetzen (Hamburg barque), Batavia to Hamburg, July 12, 11 N., 26 W.; Triton (Swedish barque), Sourabaya to Amsterdam, July 30, 41 N., 30 W.; Zeemeeuw, Shields to Batavia, 50 N., 3 W.; Era, from Shanghai, July 7, 11 N., 29 W.; Laurentius, Emilie, Java to Amsterdam, May 24, off Cape Recife; Henrietta Gertruida, Amsterdam to Batavia, April 14, 25 S., 29 W.; Johanna Hendrikus, Ferdinand, Shields to Sourabaya, August 1, 49 N., 9 W.; Ariadne, Singapore to Littlehampton (?), July 19, 12 N., 31 W.; Bentinck, Liverpool to Shanghai, May 20, 23 S., 33 W.; Lodestar (brig), of Exeter, London to Singapore, 40 days out, June 30, 2 N., 24 W.; Otto (Dutch barque), Batavia to Rotterdam, July 6, 12 N., 27 W.; Lebanon (?) Colombo to London, ninety days out, July 3, 13 N., 30 W.; Burgomeister Hoffman, Banjoewangie to Rotterdam, July 10, 10 N., 27 W.; Rotterdam (Dutch ship), Java to Rotterdam; June 18, off Algoa Bay, Stad Enschede, Amsterdam to Sourabaya, June 8, 23 S., 35 W.; a ship showing 1st d.p. No. 4,208, Amsterdam to Batavia, July 4, 11 N., 25 W.; Philip I (?), Shanghai to London, fifty-four days out, May 23, 35 S., 23 E.; Estreala (?), Port. barque, Macao to Lisbon, sixty-six days out, May 27, 34 S., 16 E.; Pet, Hong Kong to Antigua, eighty-seven days out, June 13, 14 S., 8 W.; Cossipore, Manila to Falmouth, June 19, 17 S., 5 W.; Brockenhaven, Rotterdam to Penang, forty-one days out, June 19, 4 N., 14 W.; Samuel, Sunderland to Shanghai, June 28, 18 S., 32 W.; Laurina (?), London to Hong Kong, June 27, 19 S., 34 W.

AT TABLE BAY.—June 30, Henry Harbeck, True, sailed for Shanghai.

AT ALGOA BAY.—June 9, Star King, Smith, sailed for Singapore.

LAID ON AT LONDON.—For Hong Kong and Canton: Isabella. For Singapore: Avondale.

At LIVERPOOL.—For Shanghai: Sea Nymph. For Singapore: Oriental.

At GLASGOW.—For Singapore and Penang: Roslin Castle.

The Admiralty have invited tenders for the conveyance of thirty-six tons Government stores from the River Thames to Trincomalee, Ceylon.

The Adriatic, Tomogonops, and Shakespeare, arrived on the 6th of August at Liverpool, are from Bombay, and not from Manila, as reported.

THE CHINESE INSURRECTION IN SHANGHAI.

FOREIGN OFFICE, AUG. 14.

The following despatch has been received from Sir Frederick Bruce, Her Majesty's Envoy Extraordinary and Chief Superintendent of Trade in China:—

"Peking, April 30, 1863.

"My Lord,—Referring to my despatch * of September 8, 1862, I have the honour to state that Mr. Medhurst, before leaving Shanghai, published the letter to him which formed inclosure in that despatch. The publication has done good, by clearing up the misapprehension that prevailed as to the real position of foreigners at the Chinese ports open to trade, and as evidence that Her Majesty's Government will not agree to any system which does not respect the territorial rights of the Chinese Government, and its exclusive jurisdiction over its own subjects. The exclusive jurisdiction of China over Chinese, and of each foreign nation over its subjects, is the foundation on which the international relations of China with the outer world is based.

"I am glad to say that Monsieur Berthemy enclosed to the French Government the paper containing my correspondence with Mr. Medhurst as expressing the views entertained by him on this delicate question. They are fully concurred in by the Russian and the American Ministers.

"The British and American communities have appointed a committee to prepare a scheme for the municipal government of the large part of the settlement inhabited by them in conformity with these principles, and I hope that, with the aid of their experience, a system may be found which will meet the requirements of the place, and to which the Chinese Government will give its assent.

"The growth of Shanghai is wonderful; its population is estimated at 1,500,000, and it bids fair to become soon the most important city of the East. The Chinese flock to it on account of the security it enjoys, and the silk manufacture, which was destroyed by the Taiping occupation of Soo-chow and Hung-chow, is taking root at Shanghai.

"It is a subject of great satisfaction to me that our resolution to save Shanghai from the destruction that menaced it at the hands of the Taiping hordes has not only been productive of great benefit to trade, but has afforded a safe asylum and an escape from ruin to so large a body of the industrious and respectable native population.—I have, &c.,

"FREDERICK W. A. BRUCE.

"The Right Hon. Earl Russell, K.G., &c."

THE VICEROY OF EGYPT'S CARRIAGE.—This superb carriage, which is now completed, was built by Messrs. Laurie and Marner, and is one of the most perfect vehicles ever constructed; the style is quite new, and the finishing very beautiful. The body is painted of a brilliant azure colour, and is suspended on light C and under springs. The carriage is blue, vermillion, and gold. It is an open carriage, and the lining is not only of the most *recherche* character, but also novel in its arrangement, being made reversible, forming two distinct linings—a scarlet morocco and a rich blue silk. It is to be despatched to Egypt direct in a day or two.

DEPARTURE OF M. DU CHAILLU.—This celebrated traveller left St. Katharine's Docks in the *Mentor* for Africa. Amongst his stores is a complete photographic apparatus, for the purpose of taking views, portraits of animals, &c. M. Du Chaillu has received lessons in the art of photography from Mr. H. Claudet, who has taught him his newly-discovered quick process, by which means moving accidents by flood and field can be transmitted to paper.

CROWN APPOINTMENTS.—The Queen has been pleased to appoint Wilberforce Wilson, Esq., to be Assistant Surveyor-General for the Colony of Hong Kong. The Queen has been pleased to give and grant unto Julius de Gorreguer Dolmage, Esq., who is actually and entirely employed beyond Her Majesty's dominions in the military service of the Shah of Persia, in which he holds the rank of Colonel, Her Majesty's Royal licence and authority that he may accept and wear the Insignia of the Persian Order of the Lion and Sun, of the third class, which the Shah of Persia hath been pleased to confer upon him.

PROROGATION OF PARLIAMENT.

Parliament was prorogued by Royal Commission on the 28th July. The following is Her Majesty's speech, on the peculiar emptiness of which it would be superfluous to comment. The Speech was read by the Lord Chancellor:—

"My Lords and Gentlemen,—We are commanded by Her Majesty to release you from further attendance in Parliament, and at the same time to convey to you Her Majesty's acknowledgments for the zeal and assiduity with which you have applied yourselves to the performance of your duties during the session now brought to a close. Her Majesty has seen with deep regret the present condition of Poland. Her Majesty has been engaged, in concert with the Emperor of the French and the Emperor of Austria, in negotiations, the object of which has been to obtain the fulfilment of the stipulations of the Treaty of Vienna of 1815, in behalf of the Poles. Her Majesty trusts that those stipulations will be carried into execution, and that thus a conflict distressing to humanity and

* See No. 62 in papers relating to rebellion in China laid before Parliament in 1863.

Digitized by Google

dangerous to the tranquillity of Europe may be brought to a close. The civil war between the Northern and Southern States of the North American Union still unfortunately continues, and is necessarily attended with much evil, not only to the contending parties, but also to nations which have taken no part in the contest. Her Majesty, however, has seen no reason to depart from that strict neutrality which Her Majesty has observed from the beginning of the contest. The Greek nation having chosen Prince William of Denmark for their King, Her Majesty is taking steps with a view to the union of the Ionian Islands to the kingdom of Greece. For this purpose Her Majesty is in communication with the Powers who were parties to the Treaty of 1815, by which those islands were placed under the protection of the British Crown; and the wishes of the Ionians on the subject of such union will be duly ascertained. Several barbarous outrages committed in Japan upon Bri ish subjects have rendered it necessary for Her Majesty to demand reparation; and Her Majesty hopes that her demands will be conceded by the Japanese Government without its being necessary to resort to coercive measures to enforce them. The Emperor of Brazil has thought fit to break off his diplomatic relations with Her Majesty, in consequence of Her Majesty not having complied with demands which she did not deem it possible to accede to. Her Majesty has no wish that this estrangement should continue, and would be glad to see her relations with Brazil re established.

"Gentlemen of the House of Commons,—Her Majesty commands us to convey to you her warm acknowledgments for the liberal supplies which you have granted for the service of the present year, and towards the permanent defence of Her Majesty's dockyards and arsenals; and Her Majesty commands us to thank you for the provision you have made for the establishment of his Royal Highness the Prince of Wales.

"My Lords and Gentlemen,—The distress which the civil war in North America has inflicted upon a portion of Her Majesty's subjects in the manufacturing districts and towards the relief of which such generous and munificent contributions have been made, has in some degree diminished, and Her Majesty has given her cordial assent to measures calculated to have a beneficial influence upon that unfortunate sta e of things. Symptoms of a renewal of disturbance have manifested themselves in Her Majesty's colony of New Zealand, but Her Majesty trusts that by wise and conciliatory measures, supported by adequate means of repression, order and tranquillity will be maintained in that valuable and improving colony. Her Majesty has given her assent to a measure for augmenting the income of a considerable number of small benefices, and she trusts that this measure will be conducive to the interests of the Established Church. Her Majesty has given her assent to an Act for the revision of a large portion of the Statute Book, by the removal of many Acts which, although they had become obsolete or unnecessary, obstructed the condensation of the statute law. Her Majesty has felt much pleasure in giving her assent to an act for placing upon a well-defined footing that Volunteer Force which has added a most important element in the defensive means of the country. Her Majesty has gladly given her assent to an Act for carrying into effect the additional treaty concluded by Her Majesty with the President of the United States for the more effectual suppression of the slave trade; and Her Majesty trusts that the honourable co-operation of the Government of the United States will materially assist Her Majesty in those endeavours which Great Britain has long been engaged in making to put an end to the perpetration of that most disgraceful crime. Her Majesty has assented with satisfaction to many other measures of public usefulness, the result of your labours during the present Session. It has been gratifying to Her Majesty to observe, that notwithstanding many adverse circumstances the general prosperity of her empire continues unimpaired. Though great local distress has been suffered in Great Britain from the effects of the civil war in America, and in Ireland from the results of three unfavourable seasons, the financial resources of the United Kingdom have been fully maintained, and its general commerce with the world at large has not been materially impaired. It has been a source of great satisfaction to Her Majesty to find that her East Indian possessions, rapidly recovering from the disasters which lately overspread them, are entering upon a course of improvement, social, financial, and commercial, which holds out good promise for the growing prosperity of those extensive regions. On returning to your several counties you will still have important duties to perform; and Her Majesty fervently prays that the blessing of Almighty God may attend your efforts to promote the welfare and happiness of her subjects, the object of her constant and earnest solicitude."

REVIEW OF THE PARLIAMENTARY SESSION.

THE TIMES.

The session just ended has been barren of legislation and even of debate. Not a single party division has occurred in either House, and few but those who have been engaged in recording Parliamentary proceedings from day to day will be able to recall the principal subjects of discussion. The comparatively interesting debates which occasionally diversified the ordinary course of business were conducted by the accustomed speakers. The House of Commons still follows its well-known leaders, with the exception of the wise and thoughtful statesman whose unexpected death in the middle of the session caused universal regret. Lord Palmerston rules the House with growing authority, supported by a tact which rarely fails him. . . . . Even the annual measures which are, according to custom, brought forward by private members have lost their former attraction. Maynooth mustered only 100 votes against 198: Sir Morton Peto's Burials Bill was equally unsuccessful; the Ballot was extinguished after a mere pretence of debate in a thin and indifferent House; and the opponents of Church Rates for the first time suffered a defeat, in place of the barren victory which in the last year had degenerated into a drawn battle. Mr. Forster's attempt to re-open the question of the Game Act of 1862 was summarily suppressed by a majority which refused to listen to the arguments even of the Home Secretary. It appears that quiet times are not unfavourable to religious liberality and moderation. The House of Commons rejected the scheme of the Puritan and Temperance fanatics for imposing, by Mr. Somes's Bill, a Sunday fast on the working classes; and the most eminent members of the Opposition in both Houses supported the Government in passing an Act for payment in certain cases of Roman Catholic chaplains in gaols.

In the paucity of matters of political interest the Budget was expected with a curiosity not unmingled with cheerful expectations. It was observed with satisfaction that the financial statement was not pressed on with morbid hurry, and that Mr. Gladstone dispensed with his usual warnings against the extravagance which he sometimes imputes to his colleagues and to Parliament. The House of Commons adopted the resolutions on tobacco the more readily, when it was observed that the metropolitan members, under the influence of their constituents in the retail tobacco trade, offered an active opposition to the change.

The only important Government measure of the Session was brought forward in the middle of June, for the prospective relief of Lancashire distress. Mr. Villiers' Bill for enabling the Unions to borrow a million and a quarter for the employment of the operatives in useful public works was passed without serious opposition. A vote of little intrinsic importance gave rise to the most animated debate, or rather to the most tumultuous division, of the Session. The pretensions of the coterie of officials at South Kensington had provoked growing dissatisfaction both in Parliament and in general society. It was known that the projectors of the Exhibition had hoped to convert the establishment into a permanent institution, and suspicions had arisen that an unauthorised use had been made of the name and authority of the Prince Consort. . . . . In almost the only thoroughly bad speech which he ever delivered in the House of Commons Mr. Gladstone increased the irritation of his opponents while he discouraged his few supporters.

The foreign questions which have for some years become more and more prominent in Parliamentary debates have by no means lost their interest and importance; but it happened that there were strong reasons for avoiding the full discussion of the two contemporary contests which engage universal attention. Both Houses saw the necessity of allowing a large discretion to the Government in dealing both with the American war and with the Polish insurrection. In the debate on the Address Lord Derby, while he criticized Lord Russell's conduct in all other parts of the world, approved the strict neutrality which had been maintained in the American quarrel. It was unnecessary to be equally cautious in speaking of Denmark, Greece, or of China; nor could Lord Derby be expected to resist the temptation of quoting Lord Melbourne's frequent question, "Can't you let it alone?" The Government had little difficulty in showing that its conduct after the Greek Revolution had been dictated by a sincere goodwill, which those principally concerned have fully appreciated. The unanimous opinion that it would have been unwise to accept the Crown for Prince Alfred was pretty reconcilable with an approval of Lord Russell's determination to baffle the intrigues of Russia. At a later period the Ministers succeeded, after several abortive offers, in procuring for Greece a promising King of unobjectionable pedigree and religion. The proposed session of the Ionian Islands has excited neither alarm nor indignation. . . . . Mr. Liddell and Lord Naas, in the later part of the Session, called attention to the official and indirect support which has been lately afforded to the Government of Peking. . . . .

The relations of England with the United States are even more delicate and difficult than the problems of European diplomacy. It will be generally allowed that Parliament has shown commendable prudence in discountenancing, as far as possible, all debate on the American contest. When Lord Campbell, before the Easter recess, delivered an elaborate argument on the recognition of the Confederacy, Lord Russell briefly replied on behalf of the House of Lords, as well as in the name of the Government, that the precedents were not strictly applicable; that the war was undecided; and that, as it was not for the present expedient to act, it was desirable to say as little as possible on the subject. The difficulties which have arisen between the Federals, as belligerents, and the English Government in its neutral capacity, furnished a more legitimate subject of debate. Lord Russell, in the House of Lords, and the Solicitor-General, in the Commons, have repeatedly argued that the complaints of the owners of the captured vessels are properly subject to the adjudication of the American Admiralty courts. . . . . On the 27th of March, the Solicitor-General, in answer to Mr. Forster, delivered an elaborate apology for the conduct of the Government in the matter of the *Alabama*. Lord Russell, however, admitted in his correspondence, that the duties of international comity were more expansive than the strict rule of law. Mr. Roebuck, with his usual disregard both of prudent as well as of unnecessary reserve, determined that the session should not terminate without notice to the Americans of the North that one member of Parliament at least was not afraid to avow himself their open enemy.

Legal.

THE ACCOUNTANT OF THE ORIENTAL BANK V. FERSDAY.

Our readers will be surprised to find by the following evidence that Mr. Macnab, the Accountant of the Oriental Bank Corporation, has been arrested at his post in consequence of his connection as a partner in a business in the "white lead line." His salary was £900 per annum, and we presume that comfortable income is now in the possession of another person, as it would be highly dangerous and discreditable for the bank directors to allow anyone in such a post to be in any way connected otherwise in business. Mr. Macnab is no doubt now free to follow out his *penchant* for white lead profits.

This was an action brought in the Exchequer for false imprisonment, in which the damages were laid at £1,000. Judgment having been allowed to go by default, a writ of inquiry was executed to assess the amount of compensation to be awarded.

Mr. Kenealy appeared for the plaintiff, and Mr. Serjeant Ballantine for the defendants.

From the opening statement of the learned counsel and the evidence given by the plaintiff and two other witnesses, Mr. Hilliard, Sergeant-at-Mace, and also the testimony of a clerk to the plaintiff's attorney, it appeared that Mr. Macnab, who was accountant to the Oriental Banking Corporation, Threadneedle-street, was served with a copy of a writ of

Digitized by Google

summons on a bill of exchange for £70, and had obtained leave to appear, and notwithstanding such permission, he was arrested at the bank in Threadneedle-street on the 19th of June last, and was about to be taken to Whitecross-street Prison, but was allowed to remain at the office of Mr. Hilliard, the Sergeant-at-Mace, till ten o'clock at night, when he was released, it having been discovered by the defendant, Mr. Fereday, who was an attorney, that an appearance had been entered to the action. The other defendant was stated to be a bill discounter. For the detention from three o'clock to ten o'clock the action was brought, and as the defendants had admitted the complaint, the only question was the amount of damages to be assessed. The plaintiff stated that he resided at Bucklers-villas, Belsize-park, Hampstead, and Mr. Fereday lived near him. He was at the bank when arrested in an action in which he had obtained leave to appear, and was detained in custody until ten o'clock at night. There was ample property at his residence to pay the amount had an execution been levied. On cross examination, Mr. Macnab said his salary at the bank was £900 a-year. On being pressed, he said he was in business in Hill-street, Finsbury, under the firm of Sinclair, Roberts, and Co., as white lead merchants, and was not aware that the directors of the bank knew of the circumstance. The bill in question was connected with the business, and he was defending the action.

Mr. Serjeant Ballantine proceeded to examine the plaintiff as to his bill transactions with the firm of Sinclair, Roberts, and Co.—Mr. Kenealy objected to such a course of examination. The only question was the injury committed by an improper arrest.

The learned Secondary ruled that, under certain limitations, the plaintiff might be examined. The plaintiff was accordingly examined, and the learned serjeant complained of the manner in which he gave his evidence.

Mr. Hilliard, Sergeant-at-Mace, proved the arrest after the banking hours. He was offered a check for the amount, but could not take it. The plaintiff's attorney was sent for, and the plaintiff remained at his office until nearly ten o'clock, when he was released. The clerk to the plaintiff's attorney, in answer to Mr. Serjeant Ballantine, said he did not know that notice was given to the other side of the appearance being entered to the action. It was some hours before the discharge was obtained, and the plaintiff was all the time under detention.

Mr. Kenealy, no witnesses being called for the defendants, asked the jury to award substantial damages for the injury committed on a gentleman holding such an important situation as accountant to the Oriental Bank being arrested while attending to his duties in the City, and who had ample property at his residence, where an execution might have been levied. The defence would, no doubt, be that "a mistake" had been committed in not searching for an appearance; and, no doubt, the learned serjeant would comment on the business and bill transactions in which the plaintiff had been engaged. He would submit to the jury that he had answered the questions in a modest manner, and that on the whole he was entitled to have his character set right with the directors for the improper manner in which he had been arrested while attending to his duties.

Mr. Serjeant Ballantine commented in strong terms on the manner in which the plaintiff had given his evidence. As to the action, there was, in fact, no answer. An appearance had been entered, and it was not discovered before the arrest took place. It was the practice of attorneys to give notice to the other side, but in this case it had not been done. The jury had heard the statement made by the plaintiff as to his transactions with the firm of "Sinclair, Roberts, and Co.," and the manner in which he had answered the questions. He (Mr. Serjeant Ballantine) was surprised when he heard that his salary was £900 a-year. His learned friend had taken credit for the modesty with which the plaintiff had given his testimony, but he must be permitted to call it the shuffling manner in which he had answered the questions. He submitted that it was a case for small damages.

The learned Secondary placed the case before the jury as one in which they would say what amount ought to be awarded for an admitted false imprisonment by an arrest in a case in which an appearance had been entered. All the jury had to do was with the present cause, and the circumstances arising out of the bill of exchange. It would appear that leave had been obtained, an appearance had been entered, notwithstanding which the plaintiff had been taken in execution, and would have been taken to prison; he was, however, allowed to remain in the custody of the officer for some hours until he was discharged on it being discovered that an appearance had been entered to the action, which would probably be heard in another court. For the detention which had taken place from about 3 to 10 o'clock, the plaintiff was clearly entitled to compensation. The jury could not agree in the box, and retired; after a brief consultation they assessed the damages at £50.

Literature.

The second number of the "Chinese and Japanese Repository," published by Messrs. W. H. Allen and Co., has appeared, and will be found to repay its supporters. It contains, among other interesting articles, "Thoughts on the Past and Future of China," by Count D'Escayrac de Lauture, a memoir of the celebrated orientalist Rémusat, and "Notices of the Political Aspect of Affairs in China and Japan," by the editor, the Rev. J. Summers.—The "Technologist," a valuable periodical, very efficiently edited by P. L. Simmonds, Esq., and published by Messrs. Kent and Co., contains in the August number an able article on the tallow tree (*stillingia sibefera*), so extensively cultivated in the provinces of Kiangsi, Kongnain, and Chihkiang; and the pela, or insect wax of China, viewed botanically and commercially, by D. J. Macgowan, M.D.

(FROM OUR OWN CORRESPONDENT.)

Amsterdam, Aug. 6.

The *Staats Courant* publishes the text of the Royal Decree of the 20th of July, No. 46, letter H 3, containing the new regulations for the cultivation of sugar in the island of Java, the leading features of which are as follows:—The establishments for the manufacture of sugar, the contractors of which have lost their claim to an extension of time and renewal of their contracts by not giving their adhesion to the general fundamental principles published in the *Java Courant* of the 15th of June, 1860, will, on the expiration of the now running engagements, be put up to public competition and let for ten years. The persons admissible to take the contracts are Dutch subjects residing in Netherlands India, to the exclusion of natives placed on the footing of the Dutch, or Dutch subjects residing in the mother country, but their representatives or agents must come under the above category. The contractors must undertake to keep the sugar mills and the buildings belonging to the establishment in good order, and give them up to Government in perfect repair at the expiration of the contract. The competition will be held at the chief town of the district in which the works are situated, and due notice of each will be given in the *Java Courant* at least eight months before the day fixed. Those contractors, whose contracts have been prolonged in consequence of their having accepted the fundamental regulations, have a right to claim new contracts in accordance with the conditions of the present Royal Decree. They have for that purpose to send in a petition to that effect to the Governor-General, who will grant them a new lease for the period their present ones have to run. The sugar plantations are to be divided into *dessas*. Not more than one-fifth part of the *sawars* of each dessa will be used, including the space required for roads, and the sluices, dykes, and ditches not used for general purposes, but exclusively for the irrigation of the sugar canes and the convenience of those by whom they are planted. The land cultivated in sugar will be changed every year in the usual manner. The canes must be planted in such a manner as to become ripe in regular succession, and brought to the sugar mills for crushing at the most suitable period. The contractor is authorised to demand that the ground be manured on his paying the expenses of that operation. The extent of each plantation will be fixed by the Governor-General with reference to the population of the district, but in no case can it exceed 400 *bauws*, each of five hundred square roods. The contractor is bound to pay to the native workmen wages according to the quantity of sugar produced from the canes on each bauw, according to the following scale:—For each of the first 45 piculs, 3 fl.; for every picul above 45, 1 fl. 50 cents; but with a minimum of 90 fl. per bauw, even with a less produce than 30 piculs per bouw. Of these working expenses 45 fl. per bouw must be paid as soon as the planting of the canes is completed, and the other 45 fl. when they have arrived at maturity. The Governor-General is nevertheless empowered on the renewal of contracts as above mentioned to insert the condition making it binding on the contractor to pay a minimum of 75 fl. for wages to the native workman for each bouw, in which case 45 fl. must be paid at the planting and 30 fl. when the canes are ripe for cutting. To the chiefs of dessas the contractors are bound to pay a compensation for their superintendence of the plantations and for their time and trouble, according to the following scale:—

If the produce is less than 20 piculs, nothing.							
From 20 to 30 piculs per bouw				1 fl.	50	cents	per bouw
Above 30	„ 40	„	„	1 „	75	„	„
„ 40	„ 50	„	„	2 „		„	„
„ 50	„	„	„	2 „	25	„	„

Wherever it can be done without prejudice to the cultivated lands of the natives themselves, the sugar mills may be put in motion by water. If water cannot be obtained steam may be used as a motive power. In each contract the condition will be inserted if steam or running water is to be the motor. The cutting of the sugar cane, its conveyance to the mill and all the other operations, will be performed without any interference on the part of Government. In case the contractors are not able to find sufficient volunteer labourers to cut and bring in the canes, they may apply to the Government who will furnish the number of men required, to be paid wages at . . h

Digitized by Google

cent per bundle of twenty-fine canes. Contractors are not permitted to crush and boil any canes not grown on the plantation belonging to the establishment. No money is to be advanced to the contractors to enable them to carry on their operations, but they are permitted to demand a payment of half the value on account on all quantities of sugar delivered in to the Government stores, the rest to be left till the final settlement. The contractors are bound to deliver every year into the Government stores a certain quantity of sugar, 70 per cent. of which must be of the standard samples No. 16 to 20 inclusive and the remainder of the quality from No. 12 to 15 inclusive. The price to be paid by Government for the sugar is fixed at 8 fl. per picul of 125 Amsterdam lbs. for the standard sample No. 16, with an increase of ½ fl. for each higher number up to No. 20, and ½ fl. less for each number down to No. 12. The former fundamental regulations published in the *Staats Courant* of the 15th of June, 1860, are hereby repealed. The Minister for the Colonial Department is charged with the due execution of the Decree, and is bound to give a copy of it to the Council of State. Dated at the Hague, 20th July, 1863.

The Government has sent to the Second Chamber of the States-General the Budget for 1862 concerning the financial service for that year in Netherlands India, with the usual calculations and explanations, from which it appears that the expenditure, including 9,800,000 florins for interest on the Indian debt, is estimated at 84,018,936 fl. in India, and 18,351,904 fl. at home, making together 102,370,240 fl. To cover these expenses, the revenue is estimated at 61,127,184 fl. in India, and 47,577,794 at home; together, 108,684,978, showing a surplus of 6,314,737 fl. To make up the difference in the requirements of the service in Netherlands India, 22,981,752 fl. will have to be sent out in remittances and specie. As compared with the budget for 1861, the new one shows an increase in the expenditure of 7,998,897 fl. in India, and a reduction of 38,066 fl. at home; and in the receipts an increase of 7,554,857 fl. in India, and a reduction of 1,618,914 fl. at home. The revenue derived from trade (coffee, sugar, indigo, tin, spices, tea, and cochanille) is estimated to produce 16,828,731 fl. in India, and 46,850,000 fl. at home, showing an increase of 3,369,693 fl. for India, and 1,150,000 fl. less in Holland. The charge for the army in Netherlands India is put down at 20,832,353 fl.

The capital required for the construction of the railroad in Java has been subscribed, and a company is in the act of formation, at the head of which are Mr. Poolman and Mr. S. Jacob, both of the Hague, and Mr. Van Heukelom, of Amsterdam, Member of the Second Chamber of the States-General.

H.M.'s steam frigate *Zeeland*, 51 guns, has arrived at Vlisingen from her cruise in the Mediterranean, and is to be overhauled and fitted out with immediate despatch for the East. It is stated in naval circles that she is under orders for Japan, to reinforce the Dutch squadron there for the protection of the merchants and their property in that country. The third class screw corvette *Vesuvius*, of 10 guns, from the East Indies, last from Surinam, has arrived at Niewe Deep.

A fine clipper-built frigate ship called the *Dordrecht*, of 800 tons, has just been successfully launched from the building yard called Merwede, of the shipbuilders Messrs. Cornelius Gips and Son, of Dordrecht. She is intended for the East India trade, and belongs to a private association under the direction of Messrs. Gerrit van Hoogstraaten and Son of that city. She will be commanded by Captain F. H. Loos, who is well known in the trade.

At a meeting of shareholders of the Dutch Trading Company, Mr. A. Rueb was elected commissioner, and Mr. C. P. Sandel his substitute.

Mr. D. Bauduin, partner in the firm of Messrs. Kreglinger, Dumbler, and Co., of Batavia, now residing at Breda, has been elected one of the directors of the Bank of Rotterdam, just established in that city.

A letter from the Cape of Good Hope states that the Dutch ship *Prince of Orange*, from Java to this country, had been condemned as unseaworthy and sold for £1,100. The hull alone realised £260. The Hamburg ship *D. F. Weber Senior*, from Sourabaya had put into Simon's Bay, leaky and with damage to sails and rigging.

During the month of July 20 vessels have arrived from the Far East (against 40 in June, 25 in May, and 13 in April), bringing 47,388 bags of coffee, 38,627 kranjangs of sugar, and 2,198 bags of pepper. Four of these vessels brought cargoes for the company, and 16 for private merchants. Thirteen discharged at Amsterdam, and seven at Rotterdam. Three came from Batavia, four from Sourabaya, seven from Banjoewangie, two from Samarang, one from Passaroean, two from Padang, and one from Macassar.

The King of the Belgians has been pleased to accept the resignation of Ruys, hitherto H.M.'s. Consul at Batavia, and to appoint Mr. Rochussen to the vacant consulship.

Lieutenant-Colonel J. W. Kobold has just died at Maestricht, in his 60th year. He entered the army as a private, and went out to India as far back as 1825, when the war broke out in Java. In the following year he was promoted to the rank of Lieutenant, 1833 to be First Lieutenant, 1836 to be Captain, 1842 to be Major, and 1845 Lieut.-Colonel with the command of the Djayang Secars and Pradjoerits, in which capacity he remained till 1853, when he became Colonel and commandant of the First Military District in Java. In 1832 he received the medal for the campaign in Java, and then was named Knight of the Military Order of Willem. Two years later he was praised in the despatches for his conduct on the West Coast of Sumatra, and raised to the Third Class of the Order of Willem. He was buried at Naastricht with military honours, a funeral oration being pronounced over his grave by Colonel Lebron de Vexela, himself decorated for his gallantry at Kjaga Raga, the late King having presented him with a sword of honour as he had declined being made a military knight.

PASSENGERS ARRIVED.

Per *Electra*, Captain Wegman, at Amsterdam, from Banjoewangie: Dr. and Mrs. Eisinga, Captain de Rochemond and family, Captain Benschop and daughter, Mr. Baersmayer van Barienkhoven.

Per *Ouderkerk an der Amstel*, Captain Zwart, from Java: Rear-Admiral du Cloud, two children, and a Javanese servant, Lieut.-Colonel Moerman, of the E. I. Artillery, lady and four children, Mr. Helfrich, medical officer of the first class, lady, three children and a Javanese servant; Mr. Greiner, medical officer of the second class, Mr. van den Berg, pensioned officer of the Civil Service, Mrs. Hupscher and child, Miss L. Ottenhoff, Mr. C. Boen, and eighteen passported soldiers.

PASSENGERS OUTWARDS.

Per *Fagel*, Captain Verloop, from Amsterdam to Kanagawa (Japan): Mr. W. C. Bonger.

Per *Java*, Captain Mann, from Rotterdam to Batavia: Messrs. A. de Jaeger and N. C. Ament.

Per *Jedo*, Captain van Rossem from Rotterdam to Batavia: Mr. Coets van Baggen, officer in the East India Civil Service, Miss Coets van Baggen, Mr. J. Jut, Mr. de Roock; 1 Javanese servant.

Per *Doetwyn*, Captain Hoffman, from Brouwersnaven to Batavia: Mr. and Mrs. Lens, Mrs. Mrs. Sellewyn Gelpke, Mrs. Boers, Miss Linden, Messrs. Schas, Dumoulin, and Zaalberg; 3 Javanese native servants.

Per *Maria Anna*, Captain van Monnom, to Batavia: Mr. and Mrs. S. J. de Vries, Miss Beykerk and Miss A. Hiebink.

COMMERCIAL.

COFFEE.—Since the departure of last mail the market remained quiet for a week; but since then more activity has sprung up, and there have been some considerable sales effected at full prices. They consisted chiefly of Sumatra, of which 10,000 bags were taken at 45 cents, and 1,200 bags of inferior quality at 36. Of private trade Java the market is bare, and only a few lots out of the company's last sale have changed hands, for which a trifle above sale prices was paid by needy purchasers. The deliveries in July were 21,288 bags, against 20,605 last year. The deliveries for the first seven months were 433,194 bags, against 449,241 last year, and 607,457 in 1861. The present stocks on company's warrants are 100,962 bags, against 41,895 last year.

SUGAR.—The raw articles continues in a depressed condition, though rather less so during the last week. Refiners appear to have provided themselves largely with stock at the company's sale, and have enough to go with for some time. A few hundred kranjangs of Java have been sold for exportation at 1 fl. under the prices of the July sale. Refined sugars enjoy a little more demand. There is also again some inquiry for shipment to Russia.

RICE.—A sale of 6,000 bags of inferior paddy at 4¼ fl. depressed the market for a few days, but it is gradually recovering, and since then 4,000 bags have been placed at 5 fl. For cleaned descriptions there is but little demand, though values are not lower.

SPICES.—Java cinnamon, No. 3, finds easily purchasers at 97 to 98 cents. All other descriptions calm in expectation of the company's sale.

TIN is again lower. Sales have been made both here and at Rotterdam at 74½ fl., but purchases might be made at 74 fl. The total stock in warrants is 129,855 blocks, against 136,043 last year.

COPPER.—At the company's sale of 300,000 kil. the whole found purchasers, the large cakes at 50½ to 51¼, and the small at 50¼ to 50¾ fl. At a private trade auction that followed, 785 cakes (30,700 kil.) were all bought in 53¼ fl.

RATTANS.—At the company's sale of 172,400 bundles (10,014 piculs) all was sold as follows:—Banjermassing, 13 fl. 20 c. to 17 fl. to 10 c.; Padang, 13 fl. 50 c. to 17 fl. 10 c.; Koetie, 11 fl. 30 c. to 12 fl. 50 c.; and mixed parcels, 12 fl. 50 c. to 15 fl. 90 c.

HIDES.—For all descriptions there is a better feeling, and several parcels of E.I. have been sold for export; among which 1,167 light Java ox, imported per *Dominion*. During the first seven months of this year the import of E.I. has been 67,923 ox, and 22,981 buffalo, against 51,570 and 13,330 respectively in 1862. The present stocks of East India are 40,201 ox, and 19,382 buffalo, against 40,992 and 11,123 respectively last year.

TOBACCO.—East India calm, but prices well supported. Stock of Java 9,485 bales.

INDIGO.—Limited dealings, chiefly for Germany, but prices firm.

COCHENILLE.—Inactive, and in values no information to report.

The London & China Telegraph.

LONDON, SATURDAY, AUGUST 15, 1863.

PEACE IN JAPAN.

The news from Japan, though of a pacificatory character, is far from satisfying us that all danger of hostilities is averted, or that our foreign residents are not as liable as ever to the outrages of arrogant and arbitrary power. The delay first accorded to our *ultimatum* is succeeded by delay in enforcing its full conditions, by agreeing to accept a part and not the remainder until reference shall have been made to England. Our national honour—taking it as semi-barbarians comprehend it—is thus sacrificed, and an analysis of the "political position" at Japan will disclose that in every form which Asiatic cunning can suggest we continue to be openly defied. The Japanese must think us essentially simple if we put up with the plea that the Tycoon is powerless to arrest and give up the murderers. The Japanese, though little better than a vegetative mass of beings, own to a strong nationality; and the greatest and mightiest of their princes must and will yield to an inexorable national necessity. We know enough of their internal political arrangements to be satisfied that Japan is only a land of divided authority when occasion serves. It is easy enough for the Prince of Satsuma, surrounded by his army, to proclaim defiance of any attempt of the Tycoon to coerce him. This is part of the cunning which the Japanese enjoy heartily. The Tycoon, with the utmost desire to conciliate us, gets as far out of our reach as he conveniently can, and establishes the Prince of the House of Mito, traditionally the most virulent against foreigners, as acting Tycoon at Yedo. The evasion of the Asiatic suggests numberless combinations, whilst to complicate the phenomena and to prevent us from drawing any correct deductions as to how the balance inclines, Western Japanese Princes whom we never heard of, are quoted for having a wholesome dread of us. All this mystery on the subject is a sham. We put no more confidence in the friendliness of the Tycoon than in Prince Satsuma. If there is any difference between the two Asiatic barbarians, it is merely a difference of interest.

The present delay will not fail to be regarded in the light of a concession, extorted from us by duplicity, if not diplomatic skill, and as such is to be deprecated. In the Japanese we have condoned the price of blood, and been quieted at least for awhile. No doubt the Prince of Satsuma has secretly made good the £120,000 to the Tycoon. The prospect is by no means pleasant of having to put up with more petty manœuvring in the settlement of our national account. It is impossible we can act in this matter consistently, decisively, or successfully, so long as we listen to lying Japanese representations, and refuse to take counsel solely of ourselves. Until we cease to listen to excuses, we shall never overcome Japanese officials. They will have hopes of getting the upper hand. The Russians are really more regarded than ourselves by the Japanese, simply because the Muscovite thoroughly understands Asiatic cunning, adapts himself to the supple Japanese so far as serves the purposes of trade, but when rights are claimed will not yield an iota, knowing this would be accepted as a sign of weakness. It is the half yielding and conciliating spirit—a spirit not understood—that must be deprecated.

Is the British Government wholly exempt from the blame of this inglorious postponement? The Japanese, doubtless instructed by Russian officers that our force was insufficient for operations ashore—that, in fact, we could not make good our hostile demonstration—have acted accordingly. Had we been ready to land a large and imposing force, as well as dash the water-batteries to pieces, on receiving such a reply as they have tendered, then the most vital of our requirements—the arrest and delivery of the murderers of Mr. Richardson—would not thus have been virtually foregone. The Tycoon would have found his authority and his power in our ultimatum; and no internal difficulties—no dissevered jurisdiction—would have been pleaded.

THE FRENCH TREATY WITH THE KING OF ANNAM.

The *Moniteur* has published the decree promulgating the treaty of peace concluded between France, Spain, and the King of Annam. The principal provisions of the treaty are as follows:—The Europeans are to have full liberty to practice the Christian religion in the kingdom of Annam, and to make converts. The three entire provinces of Bien-Hoa, Gia-Dink, and Dink-Tuong (Mitto), as well as the island of Pulo-condor, are ceded to France. If any other nation desires to acquire territory on Annamite ground, the King is bound to inform the Emperor of the fact, and the latter is at liberty to lend or to refuse his aid to the Government of Annam as he may think fit, but no cession of territory can be made without the sanction of the Emperor. French subjects are free to carry on trade with the ports of Tourane, Balat, and Quang An. The King of Annam is to pay an indemnity of four millions of dollars, to be divided over the space of ten years. The citadel of Vinh-Long is to remain till further orders in the hands of the French, but it is to be given up as soon as the King of Annam shall have put an end to the rebellion, "which at present exists *by his orders* in the provinces of Gia-Dinh and Ding-Tuong, and the country shall be in a state of tranquillity."

It is impossible to forget, with respect to this treaty, that when the expedition was sent forth it was stated in the most emphatic manner that neither France nor Spain would, under any circumstances, make a settlement in Cochin-China, or accept a single foot of territory! The approaching arrival of an Ambassador from King Induk is announced, the principal object of his visit being the arrangement of the terms of a commercial treaty. The Ambassador, after leaving France, will proceed to Spain. The Imperial printing-office is engaged in the production of several works intended to facilitate relations between the two countries. One of these is a dictionary of the Annamite and French languages, of which the first volume has already been published at Saigon.

FRENCH VIEWS RESPECTING CHINA AND JAPAN.

(FROM AN OCCASIONAL CORRESPONDENT.)

Paris, August 6.

The prospect of war between the English and the Japanese, and, in fact, everything that relates to the Far East, attracts considerable attention here at the present moment; and as the point of sight and the habit of mind of the French differ widely from those of the English, the views and speculations of the former upon the state of affairs in the Far East are peculiarly worthy of attention at the present moment.

In the first place, the conduct of English merchants and speculators is not regarded with any special leniency, and the public here is told that, since the treaty of commerce was concluded, the manœuvres of the English merchants and their modes of acting have given birth to a spirit of hostility in the breasts of the Japanese which is constantly on the increase. That war with Japan is imminent is as clear to the French as to the English; and it is believed, or at least asserted, here that our Government is drifting into a great difficulty. A war with Japan, it is said, will entail upon England great expenses, and there is nothing to prove that she will not encounter difficulties similar to those which met the French expedition in Mexico. Of course, it does not escape the penetration of our neighbours that the interference with trade must have an effect on our establishments in China; and some people here are not averse to entertain the idea of the possible failure of a campaign against Japan, and say that, should such a reverse happen, the commercial edifice which since 1842 the English have raised to such colossal proportions in the East will be suddenly threatened with ruin. The principal force of Europeans, say they, consists in the moral authority which they exercise in the East, and which, being derived from military success, has a tendency to wear out in time; and the effect of a failure like that which occurred to the English fleet on the Pei-ho in 1858 would bring about a violent reaction, so that England has every reason to avoid a war, the results of which may be so disastrous.

It is curious to note the working of the French mind in the above remarks; the whole authority of the Europeans is supposed to be derived from military power, commercial energy integrity and perseverance go for nothing. We succeed in the East because we first made ourselves feared, and our power will decline unless we keep up the wholesome moral terror! The

Digitized by Google

lesson learned by all the rest of the world that military conquest and government never of itself yet created a colony or gave rise to a great commercial edifice—to borrow a term used by our neighbours in the present case—seems to have been wholly thrown away upon the Gallic mind. As regards the probable effect of warlike proceedings against the Japanese, it is said that if the hatred of the Japanese nobility for foreigners should force the Mikado to fight and to repel an armed, as it has a pacific invasion, and if the inhabitants of Yedo, foreseeing the destruction of their city, should retire into the interior of the country, the appearance of an English fleet on the coast may not suffice to bring about an arrangement even after the bombardment and burning of the ports, and then a land force, with all the heavy material necessary in such cases, will be required. Our arsenals in China and India are, no doubt, it is said, well supplied, and the Sepoys will furnish an imposing force; but the authority of Lord Clyde is quoted to prove that "English soldiers will be required to supply the iron for the lance[s]," and it is imagined that in the present state of India, "still trembling after her recent troubles," the British troops there could not be spared. It is admitted that during the last three years in spite of the constantly increasing insolence of the Japanese, the English authorities have constantly tried temporising schemes, and have made all imaginable concessions, but this is not attributed to any desire to avoid bloodshed, or to any good feeling on the part of the British, but simply to the fact that our position in China is a very dangerous one, and that any difficulties elsewhere would probably bring about a catastrophe. But in connection with the position of the English in the Far East a curious theory is broached here. Great stress is laid on the rapid growth of the Russian power in China and on the neutral position always maintained by the Russian Government with respect to the Chinese and Japanese, and it is conjectured that the English Government "seeing the *extremity* in which it is placed, and the dangers that it runs," will endeavour to obtain the support or the intervention of the Russians in its quarrel with Japan. This idea, we are gravely assured, is one of the principal causes of the tergiversations at present exhibited by the British! For if, it is said, the Russians were to promise their support to the Japanese, or were no longer to leave the Chinese to the tender mercies of the English Legation at Peking, and if their promises should hereafter pass into acts, the consequences would very soon become visible at Shanghai and Calcutta, and the commotion felt there would produce a terrible shock in the heart of the city of London itself. After the preceding passages you will be prepared for what is to come. If war should break out in Europe on account of Poland, and England should at the same moment have to struggle in another hemisphere for the maintenance of her prestige and her commercial empire, it is to be feared, say these French writers, that notwithstanding her sympathies with a people oppressed, she would find herself constrained to make common cause with Russia in establishing in Japan and China a system of compensation which would bode no good to other civilised nations, and to France in particular. When a fierce and bloody struggle again deluges the Continent of Europe with blood, and absorbs the resources of France, we are told that Great Britain and Russia rejoicing in the exhaustion of other powers, will set aside their mutual animosities in order to secure to themselves a power acquired by the force of arms and political foresight. One will continue to weigh upon the liberties of Europe, while the other will pursue its dominion over the rest of the world, and turn it to commercial advantage.

These are certain curious ideas, but they furnish a fair reflection of the general run of French notions concerning English policy, not only in the Far East but all over the world.

The conduct of the English in Madagascar is spoken of here in terms that are a disgrace to a civilised country, but even the violent diatribes of the Imperial and other journals upon this subject supply useful hints. It is said that a naval force is about to be despatched to protect the French Consul and residents in that island, and this announcement draws forth an expression of fear lest this should indicate the commencement of a new expedition following those of Mexico and Cochin China. The war party here is thoroughly tired of peace in Europe, it thirsts for blood near home and pants for laurels to be plucked in the fair fields of the Old World, and it consequently deprecates all expeditions such as those referred to, which have been almost universally unpopular with the French army as well as with the public.

THE DEATH OF LIEUT. TINLING BY THE REBELS.

EXAMINER.

The conduct of Lieut. Tinling, killed when engaged in illegal hostilities against the Chinese rebels, must not be treated as a mere personal question, and disposed of on the ground that he was acting under superior orders. Captain Dew has taken the responsibility for the lieutenant's death, and in so doing he makes himself gravely responsible for himself violating and causing another to violate the orders of his Government. Admiral Kuper, indeed, states that, by taking a part in hostilities beyond the prescribed limits of thirty miles, Captain Dew exceeded his instructions. If a sentry were found beyond his post, would that be merely called exceeding his instructions? Captain Dew has trespassed against instructions, and thereby caused the service the loss of a valuable officer, besides presenting a pernicious example of insubordination for partisanship. Yet in the House of Commons not a word of blame of Captain Dew was uttered, nor indeed was his conduct characterised or adverted to in any way, except as exonerating the memory of his unfortunate brother officer. Yet if we are not to have another Chinese war, it is of the highest importance that rules should be strictly maintained against unnecessary interference in the intestine troubles of the Empire. Thirty miles seem a liberal allowance of scope for partisan zeal, but if that wide boundary may be passed with impunity, we may not only have to deplore the loss of good officers in barbarous conflicts with which we have properly nothing to do, but shall be drawn into affairs committing the honour of the flag, and leading to complications the end of which it may be impossible to foresee. We may, indeed, be made parties in this interminable Taiping war. Nowhere is Talleyrand's caution against zeal more necessary than in China. Let it have head, and as sure as fate we shall again have war in China.

LONDON REVIEW.

It may be a maxim with Secretaries of the Admiralty and other officials that, like kings, they can do no wrong, but it is a maxim which is apt to make men ignore generosity and to violate justice. We do not suppose that Lord Clarence Paget is remarkable for ill-nature, but we must say that his conduct towards the family and the relatives of poor Lieutenant Tinling, who lost his life the other day in China, displays a lamentable spirit of pettifogging pedantry. This young officer was the acting lieutenant on board H.M.S. *Encounter*, under the command of Captain Dew, now in China. Captain Dew had the strictest orders from the Admiral upon no account to go thirty miles beyond Ningpo. Instead, however, of obeying these instructions, he proceeded, with his subordinate officers, among whom was Lieutenant Tinling, to take part in the siege of Showshing, far beyond the prescribed limits; and in the course of the operation this young man lost his life. That Captain Dew was guilty of a gross act of disobedience, it is impossible to doubt; and indeed Admiral Kuper distinctly told him that in acting as he had done he had exceeded his instructions. Lord Clarence Paget cannot understand how poor young Tinling can be said "to have died in the service of his country." He cannot admit that he was wrong in asserting "that this gallant young officer lost his life through his own indiscretion, and when acting as an amateur." He is, of course, deeply grieved that anything he has said should give pain to a "respectable family," and to a young man whom he has known personally; but his duty to his country forbids him to apologise for the slur which he has cast on a young officer's character. Nobody denies that the authorities are quite right to set their faces against British captains mixing themselves up in the hostilities between Imperialist and Taiping. But in order to obtain this laudable end it cannot be necessary to violate the principles of ordinary justice, and to stigmatise a gallant young officer who has died in the performance of his duties, as an "indiscreet amateur." Lord Clarence Paget should remember that the reputation of a youth who has fallen in battle may be dear to some he has left behind; and that if the conduct of such high-spirited lads as Lieutenant Tinling is to be criticised in this spirit of perverse and ungenerous pedantry, the Admiralty will find it less easy than hitherto to fill up the list of naval cadets.

THE PRESENT CONDITION OF INDIA.

THE ANNUAL FINANCIAL STATEMENT BY THE INDIAN SECRETARY OF STATE (SIR C. WOOD).

We gave an abstract in our last issue of the Indian Budget. The following details will be of interest to all interested in the Far East as illustrating the wonderful progress of India:—

REVENUE AND EXPENDITURE—1861-2.

The accounts with which we have to deal are those of 1861-2, up to the 30th of April, 1862, and the regular estimate for 1862-3. As to the year 1861-2, I am glad to say there has been a great increase in the revenue of India. When the regular estimate was submitted to the House last year it was estimated that there would be a deficiency of some £600,000. I am happy to say that, although the expenditure has been somewhat larger than the estimate, to the extent of £370,000, yet the revenue has increased to a large extent—viz., £920,000 in round numbers. So the deficiency, instead of £600,000, will be only £56,000. The actual revenue was £43,829,000, the estimated amount being only £42,911,000. The actual expenditure was £43,880,000, the estimate having been £43,506,000, or an increase of £374,000; but the excess of revenue over the estimate, as I said, reduced the actual deficiency to only £56,000. I think I may fairly congratulate the House upon the circumstance that so soon after the mutiny year we have arrived at a practical equality between Indian expenditure and Indian revenue.

REVENUE AND EXPENDITURE—1862-3.

I now come to what is called the regular estimate for the year 1862-3, which is an estimate of the public income and expenditure for the year, made up shortly before the close of the year, and very nearly approaches correctness. The Budget estimate of 1862-3, as transmitted from India, shows a probable surplus of £179,000, but it was my duty to state last year that I thought some items should be omitted and some inserted, and I said a year ago that in the result the probable deficiency would be £800,000. But in this case, still more than in that of 1861-2, the estimate of revenue and also to a lesser extent of expenditure were under

Digitized by Google

the mark. It appeared clear soon after the year had begun that revenue was increasing more rapidly than had been estimated in April. As long ago as December last, we received a despatch from India which showed that in all probability the revenue would be £920,000 higher than the estimate laid before the Council of India in the April preceding, and that the expenditure would be about £600,000 higher than had been estimated, thus reducing the anticipated deficiency by about £320,000. But I am glad to say the increase of revenue has been more extraordinary and the increase of expenditure has been less great. The regular estimate of 1862-3 gave a probable income of £45,105,000. The Budget estimate of April, 1862, assumed a probable income of £42,971,000. In March, 1863, the increase of revenue, compared with the estimate, was no less than £2,134,000. The result, therefore, is, that the regular estimate of expenditure is £43,825,000, and the Budget estimate £43,779,000; the increase of expenditure, taking India and England together, is only £46,000; and, subtracting the expenditure from the revenue, a surplus of £1,280,000 is left upon the year. I am still more happy to say that I have not the least doubt that the revenue will exceed the regular estimate. Even in this country it is not easy to be correct in estimating revenue, and in India it is even less easy, the estimate of revenue made by Mr. Laing before he left India being more than £2,000,000 under the amount received. But what is more material, as indicating the progress of the country, is comparison of the estimate for 1862-3 with the actual accounts of 1861-2. The revenue of 1862-3 may be taken at £45,105,000; that of 1861-2 was £43,829,000; so that the revenue of 1862-3, if the anticipations of the regular estimate are verified, will show an increase of £1,276,000, compared with the revenue of the preceding year. Of this increase about £1,500,000 is due to the opium revenue; and the increased revenue from salt in 1862-3, as compared with 1861-2, is £770,000. The expenditure in India in 1861-2 was £37,245,000; in 1862-3 it amounted to £37,228,000, the reduction of expenditure in the latter year being thus only £16,000. That is owing to accidental circumstances. The army has been reduced by about £1,215,000; but the opium charge was more by £550,000, and a larger amount of interest has been paid, to the extent of £270,000. The increase in expenditure is £46,000, taking England and India; the increase of revenue is £1,276,000. This is the more satisfactory because the reduction of the ten per cent. duty to five per cent. has taken place, so that the revenue has kept up in spite of that reduction.

ESTIMATES AND REDUCTION OF TAXATION—1863 4.

I now come to the year 1863-4, which is the current year. This is what is called the Budget estimate, which is laid by the Government of India before the Council of the Governor-General. The revenue of 1863-4, before the reduction of taxation, was estimated at £45,306,000., and the expenditure at £44,490,000, leaving a probable surplus of £816,000. That being the state of the prospective revenue and expenditure, the Government of India thought it advisable to reduce taxation to a certain extent. Everybody knows that a sort of pledge was given that the income-tax should cease at the end of the appointed period, and in order to show that they were honest in this intention, and to relieve the people of India from the pressure of a tax which is felt very severely, the Indian Government reduced the income-tax by a penny in the pound. At the same time they reduced the duty of ten per cent. upon the raw material of iron, and also a duty which I think ought never to have been imposed—the duty upon beer, one of the most wholesome beverages in India, and consumed there by Europeans, to the exclusion of spirits, which are much more deleterious. The reduction of the income-tax and the Customs' duties together amount to £335,000, leaving a probable surplus of £480,000 for the current year. In the estimate opium figures to a very large amount, the anticipated revenue from this source in the course of the year being no less than £8,000,000. The increased expenditure is upon public works, to the amount of from £400,000 to £500,000, but there is also a very considerable increase in the charge for the police force and for law courts—establishments intimately connected with the peace and tranquillity of the country. These items represent the whole increase in the expenditure of the year. The satisfactory condition of the revenue is, of course, owing to the general improvement and growing prosperity of the country. The reduction of expenditure is due, in a great measure, to the exertions made by the Government of India; and the Committee would probably like to see what these reductions have been during the last three or four years.

DISCONTINUANCE OF THE INDIAN NAVY.

During the last year we have discontinued the Indian navy. That has been not from the slightest disregard of the merits and claims of this branch of the service, but because the state of things had very much changed from what it was in former years. In the early period of Indian history there was, in point of fact, no Indian navy at all, and the defence of India depended entirely upon the Royal navy. Subsequently the Bombay marine and the Indian navy were created, mainly for local purposes—the conveyance of troops, the suppression of the slave trade, and the prevention of piracy—and they performed these services admirably. But a considerable change has now taken place. Large French frigates now constantly visit those seas, and, with a view to the adequate protection of English interests there, it is indispensable that such a naval force should be there as could not be maintained by the Indian Government. The Indian navy was not calculated to meet or to cope with the vessels of first-rate European Powers. It was therefore thought desirable to reduce that force within smaller limits; but on learning that this was our intention, the officers, and the commodore who was at the head of that navy, expressed the opinion that if we were to reduce it to so small a force as was proposed, it would be hardly possible to keep up the spirit and the character of that force. We therefore determined that it would be far more advantageous to put an end to the service altogether; but it must not be supposed on that account that the officers, wherever they were employed, did not perform the most distinguished services. The measure adopted did not originate in any doubt as to the admirable manner in which they discharged their duties, but it was thought desirable, simply for public reasons, not to continue the service.

PUBLIC WORKS—SANITARY CONDITION OF THE ARMY.

The great item in which an increase will take place is, of course, that of public works in India which are necessary for so many purposes, and which can only be carried on by the Government. The first great cause of increased expense under this head will be for military works, with an improved construction of barracks. In consequence of the report of the commission appointed to inquire into the sanitary condition of the Indian army, a question was put the other night for the purpose of ascertaining whether we were prepared to take any steps in reference to the mortality in the Indian army. I am sorry that that question was put, because I think that a careful examination of the documents contained in the report would have shown that the general conclusion as to the mortality, though perfectly correct, was based on facts going so far back that they do not afford a very good index of the sanitary state of the Indian army at the present moment. There is not the least doubt that the habits of the soldiers were more intemperate in former years than now, and the rate of mortality which prevailed some forty years ago is no good criterion of the rate of mortality at present. If we look to the appendix of the report, we find that the conclusion arrived at is founded on accounts embracing four or five years of extraordinary mortality, which serve to swell up the average. For instance, in the Burmese war, during 1824 and the two following years, the mortality was 129 per 1,000, per 157 per 1,000, and 158 per 1,000. In the war of the Cabul massacre the mortality was 107, and in the first year of the Sikh war 124 per 1,000, These few years swell the average in a wonderful way. Those were periods of war, but if we take periods of peace, the decrease of mortality is remarkable as we approach the present time. Before the Burmese war the mortality was 75 per 1,000; and in the next periods of peace after, the mortality was respectively 53 per 1,000, 50 per 1,000, 42 per 1,000, and 32½ per 1,000. During the mutiny in India, the mortality in twenty regiments which were sent from this country, but which were not in action, was only 34 per 1,000; and in eight regiments, which were in India at the time, the mortality was only 30 per 1,000. But coming to the last year for which we have complete returns—the year 1861—I find that in that year in Bengal the mortality was 47 per 1,000, of which nearly one-half was owing to an outbreak of cholera; in Madras the mortality was only 12·8 per 1,000, and in Bombay only 20 per 1,000. This is by no means a higher mortality than prevails in more temperate climates. Referring to the rate of mortality in the West Indies, I find it stated at 60 per 1,000; in Ceylon at 38 per 1,000; in the Bermudas at 35 per 1,000; and in the Mauritius at 24 per 1,000. The rate of mortality, therefore, as stated in the report of the commission on the sanitary state of the Indian army, is not a fair representation of the ordinary mortality, sufficient allowance not being made for the casualties of the service, and for the deaths of persons suffering from wounds and diseases contracted in service. The ordinary mortality in India in times of peace is nothing like that which has been stated in the report, and I think it right to make this statement, because some alarm might otherwise exist in the public mind. It is not, however, to be supposed that we will relax in the least in our sanitary precautions, for it is incumbent on us to take every means for the preservation of the lives of our troops in India.

RAILWAYS—OPENING OF THE BHORE GHAUT INCLINE.

Another source of increased expenditure is the carrying on of works of a reproductive character. The total sum applied to public works amounts to £5,237,200, and, including the guaranteed interest on railways, to £9,237,200. On this point Sir C. Trevelyan, in his financial statement for 1863-4, stated:—

"The Government desires that it may clearly be understood that any funds that can be expended with advantage on cotton roads, on works of irrigation or navigation, or on any other useful works, will be granted during the ensuing year. There will be no difficulty as far as money is concerned. The only limit will be the impossibility, in particular cases, of getting value for the outlay."

I can assure the House that for some years past there has been no check whatsoever as far as money goes. If hon. gentlemen will look at the report laid on the table by Mr. Dawes, they will see that many railroads are now approaching completion, and that others are progressing rapidly. The whole amount now opened is 2,500 miles; 747 were opened last year, and 759 in 1861. The East India Railway is very nearly completed, with some small breaks, and I am glad to say that, under the direction of Mr. Turnbull, the works have been admirably executed. The Great Indian Peninsula—one of the greatest works ever accomplished—is rapidly progressing. The Bhore Ghaut incline, which surmounts an elevation of 1,800 feet in fifteen miles, was opened in April last. The scenery there is most beautiful; it really is almost worth while going that far to see the magnificent works which have been erected there. If anyone is disposed to go by this time next year he would have an opportunity of seeing works equally great on the sister incline - the Thull Ghaut inclines. The amount of the estimated expenditure on these great lines was £60,000,000. Of this, £56,000,000 has been sanctioned, £48,000,000 has been raised, and £46,000,000 has been spent. The opening of these different means of communication from one part of India to another will be of the greatest possible advantage to that country As I have mentioned Mr. Turnbull, I ought also to mention Mr. Berkely, who unfortunately was not spared to see the result of his skill and labour. I have been charged with having overrated the value of railroads, and neglected other means of communication; but it does so happen that though I sanctioned the opening of the Godavery, the Irawaddy Irrigation, and other great works, it never fell to my lot to sanction the opening of any of these great lines of railway. When the railways are once commenced, the more rapidly they are pushed on the better. We guarantee the interest, and until the receipts begin to come, of course that is so much out of pocket. The House will be glad to hear that whereas in 1861-62 the traffic returns were only £390,000, in 1862 63 they rose to £868,000. That, of course, is deducted from the guaranteed interest which we are liable to pay.

WASTE LANDS—CHINCHONA.

I need not go into topics which have already been made the subject of discussion here this session—such, for instance, as the sales for waste lands. On a matter of that kind I will only refer to one assertion made—that there had been no applications to purchase waste lands. I have made inquiries, and I find the statement is totally inaccuaate. Applications were made to know whether there were lands for sale, by persons who

Digitized by Google

required first to inspect maps of the district, so that they might select their lots. Of course there were no maps which would enable them to do that; and hon. gentlemen will see that these complaints of the want of a survey are quite inconsistent with the violent attacks made against me for requiring a previous survey. I see in some papers we have recently received from Madras that they have carried out my instructions, and insist upon nothing more than marking out the boundaries, and special care being taken that there is no encroachment on lands belonging to private persons. So far from there being no demands for the purchase of land, I find that there has been a great demand in almost every part of Madras. I should mention also that we have lately introduced into India the culture of the chinchona, or bark plant, An enterprising gentleman, who is at present a clerk in the India-office, sent to South America for some plants, carried them out to India, and plantations of them have been established in various parts of Madras, with every prospect of their flourishing and becoming a very important feature.

COTTON—SALT—THE PUBLIC DEBT.

With regard to cotton cultivation, on a recent occasion I stated what had been done and what might be done, and to what extent the natural demand would induce the ryots to cultivate cotton to a larger extent. A considerable drawback has been the want of gins—for those sent out from Manchester did not answer the purpose. When the question was discussed here no practical suggestion of any sort or kind was made differing from what had been actually done. I should be glad of any suggestion, but I don't believe it is possible to offer any. I believe the Government have done all that can be done, but I can assure my Manchester friends that the Government will spare no possible exertions to stimulate the production of cotton. It may be remembered that a matter which used to excite frequent discussion here was the taxation on salt. The Government of India were asked to do first one thing and then another; they left the matter alone, and the result is this: In 1842-3 the native salt was 4,700,000 maunds, and the English salt 892,000 maunds—altogether, 5,592,000 maunds. In 1862-3 the native salt had fallen to 1,800,000 maunds, while British salt had risen to 6,054,000 maunds—in all 7,854,000, a total increase of 40 per cent. The importation of English salt in the twenty years had increased sevenfold. The natives at first had great prejudices to overcome, but at last they had come to prefer clean salt to dirty salt. To give an illustration of the advantage of railways I may mention that of 1,220,000 maunds of salt sold at the Madras depot, as much as 1,000,000 went by rail into the interior. As to the Indian debt, it has been reduced by about one million and three-quarters, and we propose to make some changes in regard to debentures. About £5,000,000 of debentures become payable in October, and £300,000 in April next. We deem it, however, very desirable to create a debenture stock at a lower rate of interest than is now paid, and we have, therefore, resolved to issue some new stock at 4 per cent., redeemable at the end of twenty-five years. It has been offered in the first instance to the holders of debentures that are about to expire, and if they will not accept it, they will, of course, be paid off. Thus I shall either establish a considerable amount of 4 per cent. stock, or reduce the debt by paying off existing debentures. The great object we have in view is to place the credit of the Indian Government on a sound footing. The best way to do that is to prove that we are acting in good faith, by never borrowing except when it is really necessary, and by paying off our debts whenever we have the means to do so. We have shrunk from nothing that appeared to be desirable for the improvement of the country, and finding ourselves in possession of a surplus we have thought it best to apply it to the reduction of the public debt. I trust that the statement I have made will be regarded as satisfactory by the committee.

GENERAL PROSPERITY OF THE COUNTRY.

Throughout the length and breadth of India we hear of a progress and prosperity which must be deeply gratifying to all who have the interests of that country at heart, and from all quarters I receive assurances of the contentment and loyalty of the people. Although the material improvement has been owing to the development of the natural resources of India, still I believe that the measures which have been proposed by the Government and passed by Parliament have contributed not a little to this very satisfactory state of things. The natives have been admitted to the highest positions. They have been placed in the Council of the Governor-General, on the bench, and in other situations of high trust and dignity. The people are now, I hope and believe, convinced that India is governed by us for the benefit of the great mass of the population. In referring to these results I should not be doing justice to my own feelings if I did not express my obligations for the assistance I have derived from my Council and the support which the House has uniformly afforded to me. In conclusion, I now beg to move the following formal resolutions:—

"1. That the total net revenues of the territories and departments under the immediate control of the Government of India for the year ended the 30th day of April, 1862, amounted to £3,098,196 sterling, and the charges thereof, for the same period, other than military charges, amounted to £2,857,876 sterling.

"2. That the total net revenues of the Bengal Presidency, for the year ended the 30th day of April, 1862, amounted to £11,066,513 sterling, and the charges thereof, for the same period, other than military charges, amounted to £2,140,555 sterling.

"3. That the total net revenues of the North-Western Provinces for the year ended the 30th day of April, 1862, amounted to £6,026,080 sterling, and the charges thereof, for the same period, other than military charges, amounted to £1,845,487 sterling.

"4. That the total net revenues for the Punjab, for the year ended the 30th of April, 1862, amounted to £2,763,785 sterling, and the charges thereof, for the same period, other than military charges, amounted to £1,257,807 sterling.

"5. That the net revenues of the territories and departments under the immediate control of the Government of India, of the Bengal Presidency, of the North-Western Provinces, and of the Punjab together, for the year ended the 30th day of April, 1862, amounted to £22,864,574 sterling, and the charges thereupon, including the military charges, amounted to £15,469,629 sterling, leaving a surplus available for the general charges of India of £7,394,945 sterling.

"6. That the total net revenues of the Madras Presidency (Fort St. George), for the year ended the 30th day of April, 1862, amounted to £5,925,140 sterling, and the net charges thereof, for the same period, amounted to £5,905,800 sterling, leaving a surplus available in the above Presidency, for the general charges of India, of £19,331 sterling.

"7. That the total net revenues of the Bombay Presidency, for the year ended the 30th day of April, 1862, amounted to £6,931,348 sterling, and the net charges thereof, for the same period, amounted to £4,627,011 sterling, leaving a surplus available in the above Presidency, for the general charges of India, of £2,304,337 sterling.

"8. That the total net revenues of the several Presidencies, for the year ended the 30th day of April, 1862, amounted to £35,721,062 sterling, and the charges thereof amounted to 26,002,449 sterling, leaving a surplus revenue of £9,718,613 sterling.

"9. That the interest on the Registered Debt of India, paid in the year ended the 30th day of April, 1862, amounted to £3,134,897 sterling, and the charges defrayed in England on account of the Indian territory, in the same period, including guaranteed interest on the capital of railway and other companies, after deducting net traffic, receipts of railways, amounted to £6,634,344 sterling, leaving a deficiency of Indian income for the year ended as aforesaid, to defray the above interest and charges, of £50,628 sterling."

AN ENGLISH ENGINEER'S OPINION ON THE SUEZ CANAL.

(THE TIMES.)

The report of an English engineer on the whole of the works now in progress in Egypt by which it is proposed to connect the Red Sea with the Mediterranean, by a Ship Canal through the Isthmus of Suez, will be read with interest by both parties in the controversy the undertaking has excited. When the late Pasha of Egypt visited the International Exhibition last summer his attention was not entirely engrossed by its marvels of industry. In his own country one of the boldest conceptions of modern enterprise was being carried out by a company of Franks, and doubts had arisen whether the completion of the scheme was physically possible, even if the funds could be raised to pay the cost of it, the last question being by no means a minor point in the discussion. To the Oriental mind the machinery of a company by which money can be raised by millions, to be expended at any place, for any purpose that merely promises a future return of dividends, must appear like the rubbing of Aladdin's lamp passed into the hands of Western possessors. By some such inscrutable process, however, was made visible the commencement of an undertaking that Egypt itself had never dreamt of in its long sleep of ages. But the doubts referred to at last became disturbing, and the late Pasha, being largely interested in the scheme, whether it succeeded or failed, naturally wished for fuller and more impartial information on the subject. During his stay in England, therefore, he requested Mr. Hawkshaw to visit Egypt, to examine professionally the line of the proposed Ship Canal, and report his opinion of that work to the Egyptian Government.

Mr. Hawkshaw accepted the commission, and, accompanied by four Egyptian engineers, made his survey in the course of last winter. He was in direct communication with M. Lesseps, the president of the Canal Company, and states that he and all the officers engaged on the works readily answered every question put to them, and without hesitation gave him access to every document he required. He adds that the labour of investigating so large a subject had been much lightened by the vast amount of research that had been previously bestowed upon it.

The undertaking of the company is twofold. The first and principal scheme is, of course, the Ship Canal itself, to be cut directly across the desert, northward from Suez to Port Said, on the Mediterranean. Port Said is nearly at the eastern point of the great Delta of the Nile, that includes the whole of the fertile region of Egypt, the better known port of Alexandria being at the extreme western extremity. The sea coast of the Mediterranean is the base of the great triangle, of which Cairo may be taken as the apex. Port Said itself is situated on the long narrow spit of land that shuts in Lake Menzaleh from the Mediterranean, Through the shallow water of this lake the canal has been formed by dredging. This process has been so far completed that, for nearly one-third of the whole line proposed, a channel has been deepened through water "covering the earth." It is only at the southern point of Lake Ballah that the work of cutting through the dry and sandy soil of the desert commenced. From this southern point of Lake Ballah an excavation, ten miles in length, has, Mr. Hawkshaw states, opened a channel navigable "for flat-bottomed boats of small draught of water" from the Mediterranean into Lake Timsah. On summing up, therefore, what has actually been accomplished, we find that such boats, adapted for very shallow water, can penetrate the Isthmus from north to south for a distance of fifty miles from the sea, and of this distance thirty miles have been obtained by the process of dredging.

The second scheme undertaken by the company is independent of the first, and though called a "fresh water canal," is, more strictly speaking, only an aqueduct. It is not intended to be navigable as the term canal generally implies in England. It is better described as a large trench or cutting, for the purpose of conveying the water of the Nile from Cairo northward, curving to the east, through a tract of land "purchased by the company," to Lake Timsah, before-mentioned, and then southward to Suez. At present all the fresh water to be obtained at Suez is brought from Cairo by the railway. Large trains, conveying iron tanks filled from the river, are constantly passing along the line that conveys the passengers by the overland route, from sea to sea. The whole line of the proposed Ship Canal, from Suez to Port Said, runs either through the two salt water lakes on the Isthmus, the wide expanse of Lake Menzaleh on the sea coast, or the soil of the desert, "a barren land, where no water is." Labour is impossible without a certain and abundant supply of this element, for the want of which travellers in similar arid regions have often perished. This aqueduct is, therefore, a work of necessity, if the larger undertaking is to be carried on. It will also be employed to irrigate such portions of the soil through which it passes as may be worth cultivating, and of this secondary purpose a beginning seems to have been made.

Digitized by Google

The portion of the Ship Canal still to be excavated is the whole of the line from Lake Timsah, southward, through another large sheet of salt water called the "Bitter Lakes" and the Desert that lies between them and the northern point of the Red Sea. This last section of the line will run parallel with the ancient canal, and a little to the eastward of it. The course of the old work can be traced, but no part of it has been taken into the modern scheme. The works of the new harbour will carry the canal through the water of the Red Sea, past Suez, and terminate near a point on the eastern or Arabian shore marked as the "Fountain of Moses."

It is scarcely necessary to say that the portion of the line described as completed and "navigable" is very far from the accomplishment of the object in view. What has to be done exceeds what has been finished in about the proportion a large heavily freighted merchant ship bears to a "small flat-bottomed boat of small draught of water." In fact, the Suez Canal at present is a narrow and shallow cutting, marking out what is to be the course of an artificial channel that must be navigable for large ships of heavy burden, or be useless. It has been ascertained that the seas on both sides of the Isthmus have nearly the same level, and as the soil along the whole line across it is strewed with shells common to the Red Sea and the Mediterranean, it is evident that "at no distant period, geographically speaking," those seas spread over the desert track through which it is proposed to unite their waters again. But by far the greatest portion of the work has yet to be done. Without reference to the plans and sections by which the report is illustrated it is difficult to convey a clear idea of the proportion of what has to be excavated to what has been marked out by the cutting on land and the dredging through shallow water; but if the reader will suppose that the furrow drawn by a subsoil plough marks the course of what is to be enlarged into a ditch he will have a rough notion of the approximation of what exists, compared to what is proposed. Nothing has yet been done between Suez and the northern end of Lake Timsah; and from that point northwards to the Mediterranean nearly five times the amount of work completed has yet to be executed. The earthwork done is estimated at 7,848,000 cubic yards; the amount still to be performed is 34,000,000 yards. The cost of the works, so far, has been, by the French estimate, £1,220,000. Mr. Hawkshaw states that he sees no unusual difficulty in the execution of the plan, nor does he conceive that any contingencies can arise which engineering skill could not surmount; and, if completed, he thinks the canal could be maintained without any extraordinary yearly expenditure. But, considering the possibility of meeting with rock at the Red Sea entrance, and that the deep sea dredging at the Mediterranean end may cost more than the first estimate—considering also "the money already expended compared with the work done"—he thinks it would be prudent for the promoters of the scheme to calculate on having to expend £10,000,000 sterling, and five years of labour before a single cargo can be towed across what is now a neck of dry land. This is the least encouraging part of the report to those customary victims of modern enterprise, the "original shareholders."

When in the end of 1858 it was determined to proceed without the firman, the whole capital of £8,000,000 was forthcoming in less than a month. From that time M. Lesseps and his friends have practically had their own way. The Porte had reserved its rights, and, as the only wish of the British Government was to maintain those rights, there was no further cause to interfere. As a political question the Suez Canal has ceased to be discussed for several years, much to the advantage of both ourselves and our neighbours. A general interest was revived a few months ago by the Note of the Porte which followed on the Sultan's visit to Egypt, and which was directed to the questions of the forced labour by which the Canal is constructed, the possession of the lands on its banks, and the agreement with regard to its neutrality. This communication of the Porte, though quite consistent with its former policy in not granting the firman, of course brought it at once into collision with France, and has produced discussions of rather a spirited kind—France being as imperious as usual, and the Sultan showing more resolution than was expected of him. The end, we learn, is a compromise. On the first point it is understood that the fellahs are to be better paid, and it is promised that they shall be fairly hired, though this last substitution for forced labour is not likely to be fully carried out. But the most important question relates to the company's land, and on this subject it is stated that the Viceroy is to come to an understanding with the company, which will receive a pecuniary compensation, to be decided hereafter, in place of the grant of the lands. The third question—of the neutrality of the canal—is likewise satisfactorily settled. When everything is arranged between the Viceroy and the company on the bases already agreed to, the Porte will ratify the convention and recognise the undertaking.

We may congratulate all parties concerned on this conclusion, which must entirely remove the Suez Canal from the domain of politics, and puts an end to any uneasiness that may have been felt at Constantinople, or, in a less degree, in London. The Porte has, in fact, established the principle for which it contended in 1855, when it declined to recognise the late Viceroy's concession. The company's enterprise is now merely an ordinary work of industry, and as such will be looked upon with goodwill by all Europe, and by no people more than by the English, who, if it succeeds, will profit by it most. On this last question we have no desire to give an opinion. Mr. Hawkshaw has, after a long examination of the works in progress, reversed, as it were, the judgment of Mr. Robert Stephenson and the French engineer who reported with him against the scheme, and is of opinion that the works can be completed and kept in repair for a sum not very much more than that originally estimated. That this may be a correct opinion we sincerely hope, for a Suez Canal, if even it did not bring the trade with Eastern Asia back to its mediæval channel, would undoubtedly do much to civilise the regions which border the Red Sea.

Sir Hercules Robinson, the Governor of Hong Kong, will return to his post by the mail of 26th October, accompanied by Lady Robinson. Mr. T. F. Callaghan, the Governor of Labuan, also proceeds by the same mail.

The "Dennis Hill" and New York Courts.—Mr. Atkin, late master and part owner of the British barque *Dennis Hill*, who early in the year 1861 shipped a crew in Melbourne, sailed for Newcastle (N. S. W.), Wellington (New Zealand), Japan, Shanghai, Foochoo, Hong Kong, and New York, and shipped at Wellington, as one of his crew, an Englishman, Wm. Broom, who proved extremely refractory, but twice refused his discharge when the ship was in China, and had subsequently to be put in irons for mutinous conduct. On arrival at New York, Broom preferred a charge against the captain and chief mate for assault, and the latter was sentenced to pay a fine of $100 and $24 court expenses, and in default of payment to be imprisoned. Before the charge against the captain came on, Broom had disappeared. The effort to discharge or reduce the bail cost the captain six weeks of labour and $500 cost. His lawyer proving a rascal, and failing to deposit the amount of the reduced bail, the captain was arrested again on his return to New York. Broom not making his appearance, the captain left New York. The portion of this narrative to which we desire to direct attention is that which relates to the assumption of jurisdiction by the court of New York over an occurrence taking place between British subjects on board a British ship on the high seas. If the assault and battery had occurred in an American port, no question could arise as to the jurisdiction, but to assume it on the high seas is something new in international law.

Surat Cotton.—There seems to be very little doubt, says Mr. Baker, Inspector of Factories, that Surat cotton will come into extensive use. In Wigan, Stockport, and other places he has found but one opinion expressed about it—namely, "Give us plenty of it, and a fair sprinkling of Egyptian and Brazil, and we should scarcely care whether we ever saw American cotton again." One of the best judges of cotton cloth in Lancashire complained to a manufacturer that he was perpetually buying cloth as made of American cotton which had more or less of Surat in it, that he could always tell it, and that the attempted deception was very disappointing. The manufacturer answered that he thought a cloth could be made of all Surat cotton of such a quality that nobody could distinguish it from one made of bowed Mobile. The buyer said he was sure that could not be; but the manufacturer said he would try. He did try; and, on submitting both cloths to the buyer, he placed his hand on the Surat cloth for American. The experiment may possibly have been made without regard to expense; but it proves that Surat cotton possesses exceedingly valuable properties. At present frauds are practised upon it both abroad and, if reports speaks truly, here also.

The Sister of Sir Sidney Smith.—We read in the *Army and Navy Gazette*:—"There is, we are told, now living in abject penury, a woman aged eighty years, who is described as the sister and only surviving relative of a man whose name and whose deeds were on every one's lips in the early part of this century. The woman is a lady; she is in beggary, subsisting on casual charity, and so saved from dying in the pauper's ward of the workhouse. There are doubtless many poor ladies living in indigence, but the sister and only surviving relative of 'Sidney Smith, the hero of Acre'—a British Admiral, a Grand Cross of the Bath—has surely some special claims on the consideration of those who are able to spare her the last degradation from which the Government and the country are apparently unable to rescue the few remaining hours of life. General and Lady Mary Fox, Captain Kitchen, R.N., Commander Wright, R.N., vouch for the truth of the lady's condition and claims. The charitable and generous may send in subscriptions to General Fox, at Coutt's; all the navy agents will receive any aid from the public for the same purpose; and we shall be happy to take charge of any sums intended for the relief of the lady, addressed to Mr. Marchant, *Army and Navy Gazette*, 'Sidney Smith.'"

Improved Ordnance.—The Select Committee appointed to report nominally on improved ordnance, but really on Sir William Armstrong's guns, has reported, on the whole, in his favour. His field gun is declared "the best yet known," only 13 out of 570 twelve-pounders having been returned for repair, and only three out of those proving unserviceable. As to the Navy, the Committee do not condemn their adoption, but they say that the old 68 pounder is the best gun yet invented for smashing in iron-plates—a decision fatal to the extended employment of any other heavy ordnance. On the whole, it would seem that Government, in its contract with Sir W. Armstrong, obtained a capital field gun, but paid rather dear for a naval gun about as good as the old one. That is a very fair result for a Government to obtain.

Expedition into Thibet.—The old Bengal army may well be proud that for two of its officers—Captain Speke and Grant—was reserved the honour of discovering the source of the Nile. Surely, if Captain Speke now offers to conduct an expedition into Thibet Sir F. Bruce and Lord Elgin will not see fit to prevent it, as they did in the case of Captain Smyth's proposed expedition. Next winter it is expected that Lord Dalhousie's road from Simla to the frontiers of Thibet will be completed. A regiment of Sikh pioneers (the 23rd Punjab Infantry) and several thousand coolies are hard at work there.

The P. and O. Company's Berths.—A most amusing and clever sketch appears in this week's *Punch*, on the manners and customs in one of the cabins for six persons, on board a P. and O. Company's steamer. To all who have travelled by this route it will be thoroughly appreciated. The combination of the company's motto "Who shall separate us," is an admirable hit. We presume the sketch to be the work of a passenger lately one of six in a P. and O. berth

Forced Labour by the P. and O. Company.—In the report of the Suez Canal Company it was announced that the P. and O. Company employed forced labour. The directors repudiated the charge by a letter to *The Times*, in which they stated that no forced labour at Suez or elsewhere was employed by them.

Mr. Gregson, M.P., has presented the borough of Lancaster with baths and wash-houses, which have just been erected at a cost of about £5,000. The building is after a design by Mr. G. Martin. Its dimensions are 100 ft. by 84 ft. It contains five private baths for women and ten for men, with washhouse, ironing-room, and spacious swimming-bath.

The decoration bestowed upon Mr. Robinson is for service in China, where he was second commissariat officer with the expeditionary force under Sir Hope Grant, and where he contributed by his zeal and ability to the success of the operations which resulted in the fall of Peking.

Monetary and Commercial.

—o—

City, Friday, Aug. 14.

The directors of the Agra and United Service Bank (Limited) have declared the usual interim dividend of £2. 10s. per share for the half-year ended the 30th of June.

According to a circular of Messrs. Arles, Dufour, and Co., of Lyons, transactions in the silk market as usual at this time of the year, and more especially under the present aspect of politics in Europe, have remained rather dull during the month. Prices, however, have experienced on the whole, little alteration. Swiss and German manufacturers, acting under the influence of the late events in America, having effected important purchases of silk, particularly in Italy. In France less confidence is entertained respecting the end of the American war. Manufacturers, having seen their hopes so often deceived, seem decided to wait the course of events before making any provisional purchases, and, meanwhile, but only for immediate wants, which will remain small until the receipt of orders for the spring, which are generally placed in September.

The Times, on the telegraphic communication to India, has the following :—

"The statement that telegraphic communication with India is expected to be brought into operation by the end of the year has been received with great satisfaction by the principal commercial houses. It is not forgotten, however, that the Government in connexion with this question, have inflicted very considerable injustice on private individuals. Some years back a number of investors established a company for carrying a line by the route now adopted in preference to that of the Red Sea, on which the public money has been squandered. The Government encouraged them, and promised that all necessary steps should be taken to secure the requisite concession from the Sultan. In consequence of this their shares went to a premium, at which numerous parties made purchases. Suddenly, however, the company found themselves deserted by the Government without a word of explanation, and, after much expenditure of time, money, and trouble, they were compelled to suspend operations. No compensation in any shape was ever vouchsafed to them, and all the satisfaction they are now likely to receive is that of finding that, although they have lost their subscriptions, their views were perfectly correct."

An extraordinary meeting of the Bank of Hindustan, China, and Japan was held at the office of the bank, Cornhill, for the sole purpose of confirming the resolution passed by the shareholders present at an extraordinary meeting of the company, held on the 6th ult., altering the rules and regulations of the company, as contained in the articles of association, by excluding therefrom the 19th clause. Confirmed accordingly.

Annexed is a communication with regard to the recent reduction of the tea duty, and the causes which tend to prevent the consumption of that article from rapidly attaining its natural dimensions :—

"Sir.—The commercial public feel great interest in the results of the recent reduction of the tea duties. It is yet too early to say much on the subject; but as far as can be judged, the measure has not been followed by the full increase of consumption that was anticipated. It is suggested that the principal hindrance to the development of this trade, now that the duty is brought to a comparatively low point, consists in the delusion entertained by the greater part of the poorer classes that good tea is not to be obtained except at high prices. This delusion is, of course, encouraged by the dealers, because it is upon the high and fancy-priced teas that they can best lay on a high per centage of profit. A great service would be rendered to the commerce of the country, and also to the tea dealers themselves, since in the end it is from extensive consumption that the largest and safest profits would be derived, if the people could be enlightened on the real state of the case, and be induced to trust to their own taste and judgment, instead of allowing themselves to be persuaded by interested persons, who are often far less competent to form an opinion, and who are biassed by the desire to obtain a large commission. Excellent tea is to be obtained at 2s. 2d. per lb., that would soon, if it could get a fair market, deservedly supersede much of that for which 3s. 6d. and 4s. is now paid. By applying to really respectable grocers, consumers may easily make the experiment for themselves, since, although these persons would not volunteer to sell the low-priced sound article in preference to the high-priced fancy one, they would, as a general rule, honestly supply that which is demanded. If the public could know the extent to which they are fooled and laughed at by the connoisseur commission agents of tea and wine merchants, they would soon learn a grand lesson of domestic economy, and also the desirableness of endeavouring to cultivate a power of forming an estimate for themselves as to what they should like or dislike.—I am, Sir, &c. "Canton."

Mr. John Labouchere, a partner in the banking firm of Williams, Deacon, and Co., died on the 5th inst., at the age of sixty-five. The deceased was the only brother of Lord Taunton.

The biddings for £400,000 in bills on India took place at the Bank of England, the proportions allotted being—to Calcutta, £220,000; to Bombay £160,000; and to Madras £20,000. The declared *minimum* price was, as on the last, occasion, 1s. 11½d. per rupee on Calcutta, and 1s. 11⅝d. on Bombay and Madras, and the applications within the limits amounted to £1,980,000. Tenders on Calcutta at 1s. 11½d. will receive about 11 per cent.; on Bombay, at 1s. 11,d., about 32 per cent., and all above these prices in full. On Madras all will receive in full.

The half-yearly report of the Bank of Egypt states the available balance (including £4,663 brought from the previous account) to be £13,895, out of which a dividend is recommended at the usual rate of 7 per cent., leaving £5,145 to be carried forward.

The bar silver brought by the West India packet has been sold for the East at 61d. per oz., the rate obtained for the previous arrival. In the interval, however, transactions have been effected both at 60⅞ and 61⅛d. The Mexican dollar at 63d.

At the half-yearly meeting of the London and County Bank Mr. W. C. Jones in the chair, it was stated that the profits for the six months had been at the rate of 21¼ per cent. per annum, and that the available balance was £65,322. Out of this a dividend of 6 per cent. for the half-year was adopted, and £15,000 was ordered to be added to the reserve fund, leaving £14,343 to be carried forward. The amount of customers' balances, &c., held by the bank is £3,554,492.

A supplementary return regarding the formation of limited joint-stock companies gives a list of all that have been registered since the 15th of June last up to the 9th ult. Although the period embraces little more than three weeks, the number of English companies specified is fifty-eight, with a nominal capital of £14,328,200; of Irish two, with a nominal capital of £14,000; and of Scotch three, with a nominal capital of £3,600. The average nominal capital of the English companies is £247,000, the highest being that of the "Credit Metropolitan" for £3,000,000, since believed to have been abandoned, while the lowest is that of a concern which figures for £1,000, with the important title of the United Bank of England, France, and America.

The report of the directors of the Mediterranean Extension Telegraph Company, submitted on the 7th inst., states :—

"The improvement in the revenue has been such as to render it unnecessary for the company to apply to Her Majesty's Government for assistance under the guarantee. This improvement would doubtless have been more fully developed had the interruption not occurred on the Malta and Alexandrian line. As, however, it is believed that that interruption will only be temporary, the directors do not anticipate any serious diminution in the receipts for the current half-year. The company's cables still continue in excellent working order. Since the last report, the cable therein alluded to as being about to be laid by the Italian Government has been successfully submerged, and the transmission of message between Malta and Great Britain has been, as was anticipated, very materially accelerated. The directors recommend the payment of the usual dividend on the preference shares and the same dividend on the original shares as was paid last half-year. They also recommend that a sum of £544. 18s. 2d., being at the rate of £10 per cent. on the receipts, be added to the reserved fund."

Rotterdam letters mention that a sample of cotton from a new source is about to be offered in that market. It consists of nine bales from the island of Java, four of which were grown from New Orleans seed, and five from East Indian. The quality of the former is stated to be very satisfactory, being not inferior as regards cleanness to middling fair North American, while the report is also favourable with regard to staple and strength. The sample grown from East Indian seed is not equal in the latter respects to that grown from New Orleans.

The Board of Trade returns for the month ending June 30th have made their appearance. The following were the exportations to the Far East in that period :—

To China.—Cotton Yarn: 333,682 lbs. of the value of £33,866, against 396,336 lbs., of the value of £22,770 in June, 1862, and 763,200 lbs., of the value of £32,150, in June, 1861. The total export in the first six months of this year was 716,472 lbs., of the value of £70,893. Cotton Goods: 4,826,623 yards, of the value of £118,282, against 7,021,660 yards, of the value of £104,810 in June, 1862, and 15,973,024 worth £205,252 in June, 1861. The total export for the first six months of this year was 20,934,354 lbs. of the declared value of £505,904. Woollen and Worsted Manufactures: 1,138,296 yards, of the value of £24,850, against 137,944 yards, of the value of £17,243 in June, 1862, and 294,024 yards worth £36,753, in June, 1861. The total export for the first six months of this year was 963,808 yards, of the value of £167,510. Worsted Stuffs: 643,736 yards, of the value of £47,352, against 656,059 yards, of the value of £32,498, in June, 1862, and 407,288 yards, of the value of £32,850 in June, 1861. The total export for the six months of this year was 3,855,997 yards, of the value of £277,159. Lead: 1,554 tons, of the value of £32,999, against 986 tons, of the value of £20,939 in June, 1862, and 523 tons worth £11,476 in June, 1861. The total export for the first six months of this year was 8,544 tons worth £183,837.

To Philippine Islands.—Cotton Goods: 1,911,654 yards, of the value of £45,804, against 2,420,724 yards, of the value of £50,361, in June, 1862, and 2,521,303 yards, worth £43,540, in June, 1861. The total export for the first six months of this year was 5,113,909 yards, of the value of £123,046.

To Java.—Cotton Goods: 1,208,499 yards, of the value of £27,994, against 1,679,284 yards, of the value of £29,647, in June, 1862, and

Digitized by Google

6,230,710 yards, worth £98,951, in June, 1861. The total export for the first six months of this year was 5,338,148 yards, of the value of £128,492.

To CEYLON.—Cotton Yarn: 25,500 lbs., of the value of £3,385, against 35,500 lbs., of the value of £3,160, in June, 1862, and 10,000 lbs., of the value of £1,325, in June, 1861. The total export for the first six months of this year was 188,500 lbs., of the value of £22,185. Cotton Goods: 1,248,353 yards, of the value of £26,193, against 2,582,176 yards, of the value of £41,627, in June, 1862, and 80,278 yards, of the value of £2,046, in June, 1861. The total export for the first six months of this year was 5,896,944 yards, of the value of £137,458.

The amount of bullion by the P. and O. Company's steamer *Poonah*, from Southampton, on the 4th inst., was:—In gold: To Ceylon, £1,500; to Madras, £2,155. In silver: To Singapore, £1,950; to Hong Kong, £11,963; to Shanghai, £24,520. Total in gold, £3,655; in silver, £38,433.

ARTICLES OF IMPORT.

TEA.—The tea market during the past month has been without any improvement, the clearances for home consumption continue very large, but those for export show a material falling off; several parcels of fine Monings and Kaisows, which had been bought in anticipation of a large demand for Russia, have been re-sold at public sale, without reserve, showing a loss of 3d. to 5d. per lb. on cost price, which has tended to keep the market very quiet. The trade, in the face of these sales, are only buying by private contract very sparingly, and the result has been a further general decline in prices, and as yet without giving any stimulus to the demand. Low and dusty kinds of Congou, also fair common, show no material alteration, the supply being moderate; good common continues scarce, and the few orders have been with difficulty executed at 1s. 1d. per lb. Fair to good Sinchune Kai Congous and fair Kaisows have sold at a further decline of fully 1d. per lb. Fair to good Ho Hows and Ning Chows, and second-class Honams, Monings, and Wopaks, have sold to a moderate extent at a decline of about 1d. per lb. Good to fine Kaisows have sold at public sale at a decline of 3d. to 4d. per lb. below previous nominal rates; also good to fine Monings. A few parcels of really superior quality still command 2s. 5d to 2s. 6d. per lb. for the Russian market. Tayshan Congous have been difficult of sale at ½d. per lb. decline. Oolongs of fair to good quality have been neglected: fine have been in moderate request. Good to fine Souchongs have been sold at public auction at a decline of fully 4d. per lb. on previcus nominal rates. Common to fair have sold rather lower. In Flowery Pekoes business has been nearly confined to sales without reserve, at public auction. Scented Capers have been difficult of sale, and prices in favour of the buyers. Canton Scented Teas have sold at a reduction of about 1d. per lb. Foo Chow kinds have sold rather lower, the demand being very limited. Uncoloured Japans have been saleable for Export at from 1s. 5d. to 1s. 5½d. per lb. for fair to good qualities. Indian Teas have sold freely at public auction at an advance of about 2d. per lb. In Green Teas business has been to a fair extent, the chief demand being for Young Hysons for Export, the deliveries of which have now reached a large amount, and prices show an improvement of fully 1d. per lb., which has also extended to the coloured Japan kinds. Hysons show no material alteration. Fine Moyune Gunpowders have fully supported former prices, but Ping Suey kinds have been difficult of sale at a decline of 1d. to 2d. per lb. Fichow kinds have also sold fully 1d. per lb. lower. Canton made Young Hysons have been difficult of sale, also the fair qualities of Gunpowder; good to fine have been saleable at former prices. The public sales have comprised 44,698 packages, of which 25,869 packages were sold, including 22,995 packages offered without reserve, and 2,485 packages Indian Tea.

SILK.—There has been a little improvement in the market, and rates were somewhat hardened. The deliveries for July are 3,500 China, and 1,443 Japan.

SUGAR.—The market for landed parcels has been only moderately active, and although prices have been supported with tolerable firmness, the total transactions are of somewhat limited extent. The total stock of sugar in the chief ports of Europe on the 1st instant was 251,000 tons, that in the United Kingdom being 215,300 tons. Current quotations are—Siam and China: white, 22s. 6d. to 26s. per cwt; brown and yellow, 14s. 6d. to 22s.; Manila: clayed, brown, and yellow, 18s. to 19s. 6d.; Muscovade, 15s. 6d. to 16s. Java, grey and white, 23s. to 26s. 6d.; brown and yellow, 15s. to 23s. Penang: grey and white, 23s. to 25s. 6d.; brown and yellow, 15s. to 23s.

COFFEE.—A fair amount of business has been done at about previous rates. Ceylon: The supply of plantation by auction has again been limited, comprising only 227 casks, 184 barrels and bags, which were taken freely, fine fine ordinary to low middling 81s. to 84s.; middling 85s. to 87s. 6d. 20 casks, 1,670 bags native also realised full prices; good ordinary 70s. 6d. to 71s. 6d. Privately, few sales have occurred. The Netherlands' Trading Company have advertised 413,000 bags for their autumn sale, to be held on the 9th September. The stock of coffee in the leading ports of Europe on the 1st inst. was 69,160 tons, the proportion held in the United Kingdom being 13,050 tons.

COTTON.—Demand active; the value is again ¼d. to ⅜d. per lb. higher. 2,750 bales Surat, barely middling fair Dhollera to fair Sawginned realised at auction 16½d. to 19d.; 410 bales middling to good fair Kurrachee 12d. to 13½d.; 2,900 bales middling to good Tinnevelli Madras 15½d. to 17½d.; and 100 bales fair China at 14¾d. The business for arrival embraces 4,570 bales, above half Madras at 16½d. to 17¾d., April to June shipments.

RICE.—A dull tone still prevails in the market; only small parcels, amounting to about 12,000 bags, have been realised on the spot; common Nakrenzie 8s. to 8s. 3d., and a floating cargo of the latter description, 600 tons, at 10s. 1½d. for the United Kingdom, or 10s. 3d. for the Continent.

SAGO.—Of 730 boxes at auction, the small Pearl met a brisk competition, and fetched advanced prices, viz., 21s. to 21s. 6d. for fair; the rest, fair medium, was taken at 18s. 6d.

SPICES.—Pepper: Nothing has been offered in public sale, and by private contract, the chief business to report is 600 bags good dark Penang at 3⅝d. Pimento is taken in retail quantities at previous rates. Cassia Lignea: Privately, 300 cases have been sold at full prices; middling to good middling 86s. to 90s. 160 boxes Japan, in auction, were taken at 24s. Ginger: 391 bags African, at public sale, were only partly realised at 57s. Business in other descriptions of spices has again been unimportant.

HEMP.—This market has greatly improved, prices steadily advancing 30s. to 40s. per ton. 5,782 bales offered at auction, and the bulk placed; and nearly 15,000 bales sold privately. Sunn: Dearer; and 134 bales Calcutta Sunn at auction, sold at £27. 15s. to £33 per ton; 278 bales Bombay, sold at £25 to £32. 5s., and ten bales Kurrachee retired.

TIN.—This market has been generally very quiet, but a little business has been done during the last few days within our reduced quotations. We quote Banca £126 to £128 per ton; Straits, £121 to £123.

JAPAN WAX.—The recent importation from Nagasaki, 4,983 boxes, brought to auction, and four-fifths quitted, at and after the sale, at 60s. to 63s. per cwt. for good block; 609 boxes of fine saucers sold at 70s. to 71s. 6d.

MISCELLANEOUS.—Rum: Demand rather active; East India is somewhat dearer; 600 puncheons Penang having been sold at 1s. 5½d. Galls: No East India here. We quote Japan and China 42s. to 65s. per cwt., but without business. Turmeric: Large business has again been done, prices further advancing 1s. 6d. per cwt.; quotation 25s. to 30s. per cwt., Shellac: Market steady. Camphor, China, £6. 5s.; Japan, £6. 7s. 6d.; moderate business at a lower figure. Cocoa-nut Oil: Cochin, £47 to £49 per ton; market steady, but with only moderate demand; of 404 casks Cochin, the bulk sold upon former terms. Dragons Blood: Steady, and of 14 cases at auction, half sold at £6. 10s. to £7 per cwt. for fair lump. Gum Benjamin: Auctions confined to 2 cases middling second Siam, sold at £20. 5s. to £20. 15s. per cwt., and 14 cases ordinary third Sumatra, sold at £5. 10s. to £6. India Rubber: Held firmly, but with little present demand.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 10s. to £6. 15s.; nail rod, £7. 5s. to £7. 10s.; hoops, £8. 5s. to £8. 15s.; sheets, single, £9. 5s. to £9. 15s.; Staffordshire bars, £7. 10s. to £8; rails, £5. 15s. to £6s.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and Sheathing, £102 per ton; yellow metal, 8½d. to 9d. per lb.

TIN.—118s. for block; 119s. for bar. Tin plates, best charcoal, I.C., 28s. 6d. to £29s. 6d. per box.

LEAD, &c.—English pig, £20. 2s. 6d. to £20. 10s.; shot, patent, £23. 10s., sheet, £21; spelter, £18. 2s. 6d. to £18. 5s.; zinc, English sheet £23; quicksilver, £7 per bottle.

The following is from the circular of Messrs. French and Smith:—

IRON.—In Scotch Pig Iron there was much speculation, and consequently some fluctuations in price. The market closes about 1s. per ton dearer than last month. Welsh and Staffordshire Pig Iron, owing to some difficulties with the puddlers, is higher in price. Manufactured Iron, both rail and bars, is very firm.

COPPER.—Owing to a deficiency of ores for sale, Copper has again advanced in price. On the 27th ult., an advance of £3 per ton was declared, and the quotation is well maintained. Foreign is also firm.

TIN.—The past month was almost unprecedented in the Tin trade for dulness. For English there was a small demand, but foreign was scarcely inquired for. In consequence English was reduced 4s. per cwt. Foreign has fallen 7s. to 8s. per cwt., there being so few buyers. Some small parcels which appear pressing the market were sufficient to force the price downward considerably. It is impossible to account for the depression, unless the disturbed state of politics in Europe, and the little prospect of a speedy termination of war in America, are the depressing influences.

TIN PLATES.—Charcoal are in fair demand. Coke in very good demand. The actual shipments from England last month were about 115,000 boxes. In July, last year, they were about 114,000 boxes. Lead continues without alteration. Spelter is also quiet. The stock 31st ult. was 5,041 tons, against 5,250 tons last year.

Ceylon	£1,500	—

MANCHESTER MARKETS.

A fair amount of business has been transacted in yarns for India and China. The home trade have given out some fair orders, and the yarn market closes with a healthy feeling, and with a tendency to rather higher prices than could have been obtained last Tuesday. The cloth market was quieter, and the inquiries were exceedingly few for any market, but this dullness had but little effect on sellers, stocks of all descriptions of cloth being exceedingly bare, and manufacturers hold rather firmly to their prices.

The circular of Sam Mendel quotes Grey Shirtings, 8 lbs., 39-inch Count, 17 by 17, 19s.; 44-inch Count, 14 by 12, 17s. 6d.; T-Cloths, 11s. 6d. to 12s.; White Spot Shirtings, 18s.; White Brocades, 18s. 3d.; Damasks, 31s. 9d.; Maddapollams, 6s. 6d.; Cotton Yarn, 16-24, 2s. 1d. to 2s. 2d.

FREIGHTS AND CHARTERS.

There have been numerous arrivals of ships during the last week, but they are readily taken up at recent low rates. Coal freights to China are firm. Homeward freights remain unaltered.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 42s. 6d. meast. To Nagasaki: 65s. To Hankow: 65s. weight, 60s. meast. To Amoy and Foo-chow Foo: 50s. weight, 42s. 6d. measurement. To Shanghai: 50s. weight. 30s. measurement. To Hong Kong: 40s. weight, 35s. measurement. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. to 35s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £46 and £2. For Shanghai: £54 and £2. 10s. 0d. For Manila: £1. 10s. For the Philippine Islands, Penay, or Zebu: £2. For Singapore: £28 and £1. 4s. 0d. For Penang: £24. For Galle: £25 and £1. 5s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

CASUALTIES.

The Wilhelmina, Wiersma, from Macassar for Rotterdam, put into Ascension, June 23, with loss of sails and mainyard.

The Henrietta, Doe, which arrived at New York, July 15, from Bermuda, brought the crew of the Red Gauntlet, from Boston to Hong Kong, which was taken, as before reported, by the Confederate str. Florida, June 14, when a prize crew was put on board, and kept her in company till the 26th, when she was burnt in lat. 29, lon. 47.

Rio Janeiro, July 9.—The American ship Talisman, from New York for Shanghai has been captured by the Confederate str. Alabama, and her crew landed here. Vessel since reported as having been burnt, June 5, in lat. 14 S., lon. 34 W.

The Constitution, from Philadelphia for Shanghai, which was captured by the Confederate steamer Georgia on the 25th June, was retained to be fitted out as a cruiser.

The Mary Henzell, Richardson, from Shields for Galle, put into Rio Janeiro 25th June leaky. About 200 tons of her cargo has been discharged, and she has been recommended to be caulked from the copper upwards. This vessel brought on to Rio the crew of the American ship Talisman, from New York for Shanghai, which had been captured and burnt by the Confederate steamer Alabama, as before reported.

Maranham, June 27.—The Robin, Gammon, from London for Shanghai, came in here, June 16, from Ceara, where she put in with her bottom foul; about half her cargo has been discharged, and she was beached yesterday and found to be perfectly sound. It is thought that she requires repairs which will detain her for 15 or 20 days.

THE CAPE, INDIA, AND CHINA AGENCY.

ORDERS for GOODS of all descriptions executed, and Shipped by the Overland Route or by Clipper Sailing Vessels. Consignments of Produce realised. The Goods are selected by parties who have had personal experience of the requirements of the markets at the

JOYCE'S AMMUNITION—1862. Established 1820.

The following articles, of the best quality manufactured by
FREDERICK JOYCE,
OF LONDON,
may be had of most Gunmakers and dealers in Gunpowder.
MILITARY RIFLE PERCUSSION CAPS.
PATENT PYROXYLINE SPORTING DITTO.
ORIGINAL (1824) ANTI-CORROSIVE DITTO.
TREBLE WATERPROOF CENTRAL FIRE DITTO
Chemically-prepared Cloth, Felt, and Paper Waddings, Cartridge-Cases for Breech-loading Guns, Wire and Universal Shot Cartridges, &c., &c. Contractor to Her Majesty's War Department.

JOHN GOSNELL AND CO.'S
PERFUMERY, PATRONISED BY
HER MAJESTY and the ROYAL FAMILY.
JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club New Perfume—Extract of Flowers, Eugenie, Napoleon II., Frangipanni, Wood Violet, Opera Bouquet, &c.
JOHN GOSNELL and Co.'s LA NOBLESSE PERFUME—a most delicate perfume of exquisite fragrance.
JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM. — A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.
JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.
JOHN GOSNELL and Co.'s CHERRY TOOTH PASTE is greatly superior to any Tooth Powder, gives the Teeth a pearl-like whiteness, protects the enamel from decay and imparts a pleasing fragrance to the breath.
JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.
JOHN GOSNELL and Co.'s PATENT TRICHOSARON is adapted for universal use, and the most serviceable and convenient Hair Brush ever invented. Letters Patent Granted Nov. 6, 1852.
JOHN GOSNELL and Co.'s PATENT PERFUME SPRINKLER, which, for convenience and simplicity of application, far exceeds anything of the kind hitherto produced.
Merchants and Shippers supplied on liberal terms.
12, THREE KINGS COURT, LOMBARD-STREET
LONDON.

WHOLESALE AND SHIPPING PRICES ON APPLICATION AT THE

WORKS, UPPER MARSH, LAMBETH, LONDON.

CHOLERA, DYSENTERY, DIARRHŒA, AGUE, FEVER, SPASMS, &c. The Safes and Best REMEDY is that marvellous remedy known as

CHLORODYNE,

which was discovered by Dr. J. Collis Browne, M.R.C.S.L. (ex-Army Medical Staff), and the SECRET OF HIS RECIPE CONFIDED ONLY to J. T. DAVENPORT, pharmaceutical chemist, 33, Great Russell-street, Bloomsbury-square, who is the sole manufacturer. Medical testimony furnished by the highest authorities in military, naval, and Civil practice, and numerous gratifying statements from the public generally, establishes this property as invaluable. It relieves pain, soothes the system, inducing refreshing and soothing sleep without producing or having any unpleasant effects like opium, and may be taken at any time in a few drop doses. Extracts from the General Board of Health, London, as to its efficacy in Cholera:—"Third Stage, or Collapse—In all cases restoring the pulse. So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases." From Dr. Andrew Smith, Director-General Army Medical Department:—"I have seen it used, and apparently with much advantage." From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an anti-spasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am perfectly satisfied with the results." From Dr. M. M'Millman, of New Galloway, Scotland:—"I consider it the most valuable medicine known." Dr. M'Grigor Croft, late Army Staff, says:—"It is a most invaluable medicine." Dr. Gibbon, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa." Dr. T. Baker, Bideford:—"It is without doubt the most valuable and certain anodyne we have."

Sold in bottles, 2s. 9d. and 4s. 6d., by the sole Agent and Manufacturer, T. DAVENPORT, 33, Great Russell-street, Bloomsbury square, London; or sent carriage free on receipt of Stamps or Post-office Order, and with Professional Testimonials enclosed. None genuine without the words "Dr. J. Collis Browne's Chlorodyne" engraved on the Government stamp on each bottle.

*** Beware of counterfeits sold under the same name. Orders can be sent through any of the Agents of this Paper

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses—T. WHITEHEAD, 37, EASTCHEAP, E.C. Sole Manufacturer.

HOLLOWAY'S OINTMENT AND PILLS.—BETTER THAN A FORTUNE.—These purely vegetable extracts can be safely and effectively used by all persons suffering from internal or external ailments. The directions wrapped round every pot of Ointment and every box of Pills are amply sufficient to guide the most diffident and encourage the most timid. When illness makes its appearance, and remedies are easily sought after, none will be found more effectual than Holloway's in alleviating and assuaging the pains of the diseased and the afflicted. Both Ointment and Pills purify and preserve every component part of the human body. It will not do to use them on one day and neglect them on the next. Steady perseverance must be maintained health is restored.

Duty paid—Double, at 21s. sparkling Hock, Moselle, Champagne, and Claret, in Bond and Duty Paid.

TO THE NERVOUS AND DEBILITATED.

Dr. Curtis on Marriage, Nervous Debility, Spermatorrhœa &c, with Plates. Post free by the Author, 12 stamps; sealed ends, 20.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour; being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excess: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Invaluable Lotion, the result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS 15, Albemarle-street, Piccadilly, London.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 29, 1858.

The book concludes with numerous, varied, and interesting cases, to which is added the Author's Receipt for a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

The work may be obtained of Mr. HINNAM, Queens-road, Hong Kong.

TEMPORARY OFFICES.

36, Cannon-street, E.C., and 5, Parliament-street, Westminster.

ABRIDGED PROSPECTUS.

This Company is formed for the purpose of introducing a system of efficient Hotel accommodation into India, China, and other places in the East.

In Calcutta a Joint-Stock Company has lately purchased and undertaken the management of an hotel, and the prospects of the enterprise may be inferred from the very high premium at which their shares are quoted in the Calcutta market, see *Times*, July 17; the *Englishman's Weekly Mail*, of June 8th, 1863; and *Allen's Indian Mail*, of August 4th; viz., £25 paid, present value £45 ex div., equal to 80 per cent. premium, and the payment of a dividend of 10 per cent. for the half-year ending 30th April last, equal to 20 per cent. per annum.

It is proposed, in the first instance, to supply the urgent requirements of Bombay and Point de Galle.

In the event of two-thirds of the first issue of Shares not being subscribed for, no allotment will take place, and the deposits will be returned to the subscribers, without deduction.

It is proposed to pay to Shareholders 5 per cent. interest upon the capital as paid up, until the first dividend is declared.

Detailed prospectuses and forms of application for Shares may be obtained of the Secretary, Bankers, and Broker.

ORIENTAL HOTELS COMPANY
(Limited).

NOTICE IS HEREBY GIVEN, that NO APPLICATION for SHARES in the Oriental Hotels Company (Limited) will be received after SATURDAY, the 15th August current.

MACDONALD YATES, Secretary pro tem.

August 6, 1863.
